IT'S WHAT YOU DON'T SEE THAT PAYS!

The camera hasn't caught the hidden pay-off features, but you are looking at the fastest tunnel driving set-up you can put on the job: jumbo-mounted Ingersoll-Rand Drifters using Carset Jackbits.

The drilling unit, of course, is the familiar DB-30 or DA-35 Powerfeed, but what really speeds up the drilling cycle is the *Carset Jackbits* and the *long-feed aluminum shell* weighing three times *less* than steel. The Carset Jackbit, with its no-gauge-loss, faster cutting action, and tremendous footage drilled without resharpening, takes full advantage of the lightweight, long-feed shell. The time spent in steel changing, bit changing, and manhandling heavy shells is now turned into *productive drilling*.

A lot of "know how" went into these giant condensers

Two 48,000 KVA hydrogen cooled outdoor Synchronous Condensers in a large Ontario station. They stabilize the voltage on long transmission lines.

GENERAL ELECTRIC

EQUIPMENT

generates power, transmits it and puts it to work

The same "know how" — the result of years of research, engineering and manufacturing experience—that produced these giant condensers goes into every General Electric product you buy.

For nearly sixty years this Company has been intimately associated with the electrical development of this country. Through all these years, in spite of ever-growing competition, it has maintained its leadership by a combination of forward thinking, good products, fair policies and efficient service.

"See the bank about it!"

WANT TO TRANSFER money to someone, even half-way around the world? Any branch of any chartered bank in Canada will do it for you.

Every day, all sorts of people are using all sorts of banking services . . . making deposits, cashing cheques, arranging loans, buying or selling foreign exchange, renting safety deposit boxes, buying travellers cheques, collecting trade bills, arranging letters of credit.

You will find all these and other convenient services at any branch of any chartered bank.
Next time, *any* time, "see the bank about it".

One of a series by your bank

"One 30-Ton lump, please!"

Lumps of Metal, Of Course— *Not* Sugar — Are What These Giant Vickers-Built Tongs Were Designed To Handle

The huge tongs shown here were designed and built by Canadian Vickers Limited for an internationally known Canadian mining company. Attached to a crane, they are used for picking up metal slag. These particular tongs have a 30-ton capacity.

Such items are all in the days' work for the men of Canadian Vickers. Giant boilers, forming presses, copper kettles, cargo ships—these and many other diversified pieces of machinery and equipment keep the 45-acre Vickers workshop humming with activity.

Truly . . . if Canadian industry needs it—Canadian Vickers can build it!

Canadian Pacific

In Ten Provinces
In Eleven States

In an area extending through eleven of the United States B-A has built up substantial crude oil and gas reserves. This successful venture in the major U. S. oil fields has contributed greatly to the achievement of B-A's original objective . . . providing for B-A refineries in Canada a profitable and long-term source of crude oil.

In Canada's ten provinces, B-A is concentrating on the improvement of its whole net-work of facilities . . . development of Canadian crude reserves — increased refining capacity — improved marketing outlets and distribution — more economical transportation. The objective is three-fold: highest quality products — better service — fair returns for shareholders.

Cover Picture

Cover picture of this issue is by *Montreal Star* photographer Adrian Lunny who snapped Princess Elizabeth as she stopped to sign the students' register on the Royal Couple's drive up the avenue to the Arts Building.

Seconds later Photographer Lunny took another shot of the Royal Couple which so charmed the Princess that she asked for special copies to be made and which Photographer Lunny had the privilege of presenting to her personally on the return visit here from Washington, D.C.

Much to Report in Little Space

We hope you like this winter issue of The McGill News *as much as any editor is expected to be fond of his own brain child. It was a lot of fun and at times somewhat of a problem putting it together in the allotted number of pages because there were so many things to report. The Royal Visit, Founder's Day Convocation, the great number of class reunions, the week-end of the McGill-Varsity game, the football season itself and the momentous victory over Western and finally, of course, the various activities of what must be one of the most colourful and busiest alumni bodies to be found anywhere.*

We said in the last issue we hoped the graduates would write in to say what they wanted in their News *and if they felt so inspired to contribute articles for publication. Of the many which reached the editor's desk, one has been chosen which we are sure you will enjoy. It is written by Marjory Doble Baillon, whose 20 years' wandering away from Canada has given her "New Uses for a College Education" and this editorial desk the kind of copy that delights an editor's heart. This is truly a finely written piece, of deep feeling, the reading of which we are sure will give you the same pleasure as we had in first looking at the manuscript.*

Jimmy Manion, who handles Canada's foreign trade affairs at Paris, has come through with a short article of interest and promises quarterly contributions for the future if we give him more warning about deadlines. On another page, Lionel Shapiro, who writes government propaganda now as neatly as he did Hollywood plots, tells about the boys in the foreign correspondents brigade who are accused by the Reds of cloak and dagger activities. It won't scare the children and it makes illuminating reading.

Dr. Lozinski contributes an informative article on atomic materials which will certainly interest readers other than the scientists and Clyde Kennedy, as usual, makes a complete report on campus capers, which, as you will see, are many and varied.

We don't apologize for the rash of pictures in this winter issue because so many of those who expressed an opinion said they liked more pictures and shorter articles. We don't in the least take this suggestion as any reflection on our guardianship of The News *and herewith comply with pages and pages of reunion pictures, branch gatherings and the like.*

You will see that the pages of The News *have been thrown open to class notes, the further contribution of which will be encouraged by publication. We said before that we thought that* The News *should be a record of what the graduates are doing and this is one of the best ways of reporting same.*

Next issue, in the spring, will have just as many pictures and more comprehensive reporting, we hope, by the graduates themselves. We think the feature article in the spring issue may turn out to be the one already contributed by someone now studying at McGill on a Carnegie fellowship concerning his experiences in Lapland and who claims to be the "only Harvard man who has ever milked a dead moose". Until the spring issue, then, a Merry Christmas to all and the compliments of the season from the staff of The McGill News.

D. A. L. MacDonald.

The Principal's Page . . .

Full-souled Partnership

by Dr. F. Cyril James

ON the morning of Tuesday, October 30th, when their automobile stopped half-way between the Roddick Gates and the Arts Building, in order that the President of the Students' Society and a small group of his colleagues might bid them welcome, Princess Elizabeth and the Duke of Edinburgh were surrounded by thousands of cheering students. The scarlet blazers of the Royal Victoria College faced the green and gold of Macdonald College on the other side of the avenue, while the McGill Band in its new uniforms, the Choral Society and the women students of the School for Teachers were bright splashes of colour along the bleachers that were decked with bunting, flags and some of the Ajax badges.

A colourful moment of pageant, and at the same time a significant moment in history. Young men and women from every part of Canada and from many distant corners of the Commonwealth welcoming with all the warm enthusiasm of her own generation the youthful heiress to the throne.

Almost a century ago, in 1860, when the Prince of Wales came to Montreal, McGill extended an equally warm welcome. The University was smaller then. There were no more than 256 students registered in the three Faculties of Arts, Law and Medicine, which then composed the whole University, and the teaching staff of these faculties comprised 24 professors, several of them part-time members of the University. The present campus, well beyond the city-limits of that period, had not yet begun to assume its present dignity and beauty, so that Principal Dawson, accompanied by many members of the University attended the Royal Levées to present McGill's greetings in the formal fashion of that period.

The contrasts are immediately apparent, but it is the continuity that I should like to emphasize. The "loyal address" of 1860 may have lacked the spontaneity and colour which characterized the welcome to Princess Elizabeth, but it lacked nothing of the inner spirit. The contributions that McGill men and McGill women have made, since 1860, to the development of Canada, and to many other parts of what was then called the British Empire, are testimony to the sincerity of McGill's welcome to the Prince who was to become King Edward VII. The gallant sacrifice of McGill men in two world wars is immortal tribute to the value that they placed on the traditions which Canada has inherited from that Empire.

As we look backward across the pages of history, we realize that the "balkanisation" of Europe was one of the weaknesses of the Treaty of Versailles, and yet at this moment the spirit of intransigent nationalism is surging upward in many parts of the world. Along that road lies catastrophe.

Let us hope that the welcome that Princess Elizabeth has received from every part of Canada is, like that extended to her great-grandfather a century ago, a portent. The universities of the Commonwealth today are among the strongest links in the chain that binds its scattered nations, and it is to university men and women — students and graduates alike — that we must look for understanding of the vital importance of full-souled partnership not only among the nations of the Commonwealth but among all those nations that share the traditions of human freedom and the aspirations toward human progress which are the rich heritage of Canada.

DR. JOSEPH N. NATHANSON, M.D. '19, *of New York, is shown here in the foyer of his home with some of the collection of Lincolniana which he has amassed in the last 11 years and which he plans to leave to the Redpath Library. His collection includes about 700 books, 1,000 pamphlets, 300 prints, etchings and engravings and 50 plaques and medallions. Dr. Nathanson is holding the book which started his hobby, Carl Sandburg's "Abe Lincoln Grows Up", which he bought originally to help his daughter with her homework.*

Back Issues of The News Wanted

The McGill News' office is lacking the following editions of The News:

Vol. 20, No. 4
Vol. 28, Nos. 3 and 4
Vol. 29, No. 3
Vol. 31, No. 1

If you have extra copies of any of these and would be willing to part with them, would you please send them to the Graduates' Society, 3574 University Street, Montreal.

New Uses for a College Education

You never know—it may come in handy in Brazil, Rhodesia or Cockney London

by Marjory Doble Baillon

On a sweltering day in May 1929, in the company of several hundred fellow students who had all been up all night, I tottered onto the stage of the Capitol Theatre to receive my B.A. degree. From that day on, and for twenty years to come, the familiar confines of the McGill Campus which had been all my world for the past four years were suddenly whisked away. Or rather I should say that the centre of my own world shifted so greatly and suddenly as to leave the once-familiar college life hovering vaguely on the outskirts of memory. To put it briefly, I married and went abroad to live—to Africa, to England and finally to Brazil.

One of the first things I was to discover abroad was the greatly enhanced position of the college graduate outside of North America. I soon found that the possessor of a B.A. degree was held to be a person of extreme sagacity and high attainments. This was true in most places abroad, though I have to admit to one bad set-back to my new-found self-esteem. When Brazil, during the second World War, decided (on paper!) to mobilize its woman-power, my young maid and I (both falling between the ages of 16 and 60) went along together to register. The registering-officer questioned her closely as to her work, place of residence and educational attainments, then turned to fill my card. Finding our home addresses to be the same he glanced up carelessly and said, "Fourth grade primary school also, I suppose?" I said, as modestly as possible, "As a matter of fact I have a university degree." He looked baffled for a minute and then said, "Oh, well, hardly worth a whole new card for that" and stacked it away with the others.

I think that in twenty years of wandering in the world's odd corners I slowly learnt what a university training really meant. You did not step out into the big world with that roll of parchment in your hand as something full-fledged.... a completed product. You had not really attained an end at all but only a beginning. Almost nothing you had learnt in college seemed, on the face of it, to really matter. You looked around you, bewildered, and said, "I have been wasting my time. I have been learning nothing that really applies to life." At college I studied German and economics, history, geology and sociology. In my first home in Africa I would have been infinitely happier if I had understood "Kitchen Kaffir" and known how to bake a cake. So for a little while I thought bitterly about the futility of a college education while I struggled with my new and so different problems.

Marjory Doble Baillon

But after a while, as I moved from place to place and met the constant challenge of new environments, I began to realize that it was not the things I had laboriously memorized during my university days that were important, but rather the fact that I had gained a habit of learning. My four years' training had freed me from all panic in the face of new experiences. It had also infinitely enlarged my capacity to enjoy and appreciate whatever life I was leading at the time.

When we found ourselves living among ghosts in the high desolate interior of a forgotten corner of Brazil, we had no knowledge of that country's history to bring the solitary landscape back to life, to people it once again with all the fantastic activities of an earlier century whose memorial lay in the fine churches and rich buildings scattered everywhere through the poverty-stricken valleys. But we did understand that history was there, to be routed out and brought back to life to put new meaning into our surroundings.

We saw, in the groups of an evening along the cobbled village streets the unmistakable faces of the Portuguese aristocrats who rode through the towns in their sedan chairs in the great days of slavery—and gold. All the types from the old exciting drama of the Colonial days were there among the crowd—dazzling blond women from the ballrooms of European palaces, barefoot in this generation but preserving all the carriage and manners of the great ladies of the past; black men with the ebony lustre of the true African and the inherent gaiety which even slavery could never dampen. These black men were called lazy, but it always seemed to me that they were resting, resting forever—down the generations—from the terrible labours of their ancestors who had been made to work as never a black man was intended to work. They were taking their revenge on history.

Then we went into the churches, where brown urchins and their barefoot mothers moved in pious devotion among the wondrous accomplishments of their own so recent ancestors without even understanding what they saw. These people who lived in hovels, worshipped in churches lined with gold-leaf and decorated with the carvings of one of the greatest sculptors of all times. How had these churches, so many and so magnificent, come into being? And what had become of the lords and ladies of Portugal who rode to these churches in their sedan chairs and of the bowed and beaten black men who bore them hither? We came to know the answers to all these questions and as we learned the poor and half-forgotten country grew rich with romance

where every stony donkey-trail might lead to a new treasure.

So much for history, and the pleasure I have had because I learned ABOUT history in college. In the vast monotony of the high veldt of Africa, or in the intimate hubbub of London, this has been equally true. Then there was also the question of languages. Of course, it turned out to be a great pity in my case that they did not substitute courses in Kaffir for German at McGill. But in the last analysis the useful thing was the fact that they had introduced you, firmly and soundly, to the study of languages, so that you knew what you were doing when you tackled a new one. During two precious years that we lived in London I think that we called to the surface every resource of our college education, thankful for what we had and increasing it at every turn. So near to the world's heart, no phase of education can be allowed to grow rusty. London is what you make it. And what you make it depends entirely on what you bring with you in the way of intellectual equipment.

For a time we owned and ran a small restaurant in the shadow of the Guildhall. I remember that the day we took over the restaurant from its former owner the bells of St. Mary-le-Bow clanged and clattered above our heads all day long as if in honour of our new venture. It was, in fact, the first time in many years that they had rung out their familiar notes over the Cockney world whose centre they claim to be. I wonder if it would be far-fetched to suggest that one may even slice ham more thinly and change a half-crown more expeditiously for having had a college education. At least, none can say we did not spread our influence in the City, for by the time we left, there were at least three good Cockney waitresses in the heart of London with unmistakable Canadian accents —and the only trace of a Cockney accent was mine.

Back in Africa again—this time Rhodesia—and from a university point of view you might call this the Land of Sociology. Back to a land of tribal customs, strange marriage laws, witchcraft and all manner of superstitions. For a while I helped a white nurse and a native orderly in a clinic for native women and babies, and I saw all sorts of strange things, and joined in the battle against such superstitions as the one which led the parents to slash their sick child all along the brows with a razor blade, in the hope of letting the demon of illness escape through one of the slits.

We also had trouble with people who wanted to treat pneumonia by sprinkling the head of a dead brother's grave with beer. The theory was that the cold on the chest was the chilly spirit of some forgotten brother. Your forgetfulness was what had chilled him and he settled over your heart in an attempt to grow warm again. But as long as you continued to forget him he chilled you instead, so that you became ill. The obvious cure was to pour plenty of beer on the dead man's grave. After a while the spirit began to feel a warm and pleasant glow of inebriation, whereupon he lifted himself from off your chest—and away. So what could it possibly matter if a pneumonia patient continued to lie on the damp ground by the drafty door of a smoke-filled hut, so long as the spirit world was being appeased?

The garden-boy, who had cross-eyes and the filed teeth of a cannibal and the soul of a little child, came to me one day and asked leave to go to his village. He showed me a great glowing arch of rainbow in the summer sky and said that the end of it was dipping earthwards in the very direction of his village. If, where it came to earth, it should touch his hut, it would assuredly burn it to the ground and he had many household treasures he would like to save. I let him go. Then I sat down and wrote a letter to Dr. Dawson asking him to recommend some appropriate reading on primitive tribal customs.

Thus I extended my college education over another twenty years—using it as a kind of platform on which to build my life—until the day came when we focussed our attention on two small boys who had miraculously reached school-age during our wanderings, and said, "We had better be getting home."

Our rediscovery of Canada was the most exciting adventure of them all! This was doubly true because, to our two small companions in adventure, none of it was familiar; and their reactions were so often unexpected. Their first great thrill at hearing English spoken in public places was a thing we had never thought about. And escalators—and traffic lights—and that marvel of childhood, the ice-cream cone. "You can even eat the jug!" cried Alex, biting into his first cone at the airfield as he came off the plane. And lighted windows at night! To see a woman moving placidly about her kitchen when all the world can see her from the roads, or a family relaxing in their livingroom in full view from the street—like a scene on the stage! This seemed strange to all of us after years of closely-shuttered Brazilian homes where the inmates seemed to have barricaded themselves against the world during the sinister hours of darkness.

During all that first year the novelty of everything was with us wherever we turned. The lovely dazzle of Christmas lights, wreaths of holly on the doors, lighted trees on the streets. The prosperous people everywhere. The good warm, comfortable clothes—especially parkas and snowboots, both novelties to me!

(*Continued on page 15*)

MISS M. D. FIELD

A personal reminiscence

The door to the office of the Dean of Arts and Science is generally closed: but the outer office remains open. And in that outer office for twenty-five years sat Miss Field, small but indomitable, protecting the person and preserving the sanity of the dean. Students at times found her grim and formidable enough. But she knew her job and faithfully and loyally performed it. There were no assistants to the dean in those days, and she was his sole champion and defender. All the petty and irrelevant problems that drive deans mad she could handle far more promptly and efficiently than they: and she did so.

Once she said to me: "But you can't do that, Dean Woodhead"; to which I replied: "But I've done it, Miss Field." I am sure she was in the right. I have no recollection of the enormity of the offence committed on that occasion. I only know that, if it had been a really serious breach of routine or tradition, she would herself have accepted, nay, would have insisted upon, full personal responsibility: it was her duty to protect the dean.

To spare the dean she never spared herself: and her devotion and splendid loyalty will never be forgotten by those for whom she did so much.

W. D. Woodhead

College Education . . .

(Continued from page 14)

The general feeling of the average Canadian that he and his neighbour were both worth something—and that nothing was too good for their children. I liked Canada when I left it. I loved it when I came back.

In these twenty years Canadians have travelled a long road. My children, after five years in Canadian schools, are much more Canada-conscious than their parents ever were. I think it is safe, and fair, to feel that to some extent they do really begin where we left off, and not where we began before them. They will go up to McGill with their lives built up on a foundation which includes our own education, plus twenty years of ripening experience, plus their own infinitely richer schooling. This may be the old, old story of every generation's advantage over its predecessor, but I think in this generation and in Canada it is especially true.

NEW EXECUTIVE OF THE ALUMNAE SOCIETY: *Back row, left to right: Miss M. Patricia Maybury, vice-chairman of the Modern Literature group; Miss Maryellen Rossiter, chairman of Placement Committee; Mrs. Lewis Spencer, vice-chairman of Class Organization; Mrs. L. A. Tucker, representative to the Children's Library; Miss Jean Buchanan, representative to the Women's Athletic Board of McGill; Mrs. Charles Neale, chairman of Undergraduates' Interests Committee.*

Middle row, standing, left to right: Mrs. H. O. Lough, representative to C.F.U.W.; Mrs. Robert Ogilvy, representative to the Montreal Council of Women; Miss Merle Peden, honorary secretary; Mrs. W. D. H. Buchanan, chairman of the Scholarship Committee; Mrs. J. P. Anglin, representative to the Montreal Council of Women; Miss Caroline Rigby, honorary treasurer; Miss Joyce Beatty, representative to the University Settlement.

Middle row, seated, left to right: Mrs. George Savage, past president; Mrs. E. C. Common, president; Mrs. Gavin Graham, 1st vice-president.

Front row, left to right: Mrs. A. C. Jensen, 2nd vice-president; Mrs. H. K. Markell, 4th vice-president.

Absent: Mrs. Walter Vaughan, honorary president; Mrs. D. S. Abbott, 3rd vice-president; Mrs. A. T. Latter, chairman of the Education Committee; Mrs. A. R. Hasley, chairman of the Tea Committee; Miss Miriam Tees, representative to the Women's Athletic Board; Miss Mary Hill, chairman of the Modern Literature Group.

Atomic Energy For Peaceful Purposes

by E. Lozinski, M.Sc., M.D.C.M.

At the tense moment after the explosion of the first atomic bomb over the desert lands of New Mexico, in the early morning of July 16, 1945, "All seemed to feel that they had been present at the birth of a new age—the Age of Atomic Energy—and felt their profound responsibility to help in guiding into right channels the tremendous forces which had been unlocked for the first time in history."* The above expressed hope and prayer has been but partially fulfilled. Political circumstances have dictated that the larger part of our energies must still be concentrated on the development of atomic energy for military purposes. That such concentration of effort need not be limited to the production of weapons of destruction is evidenced by reports indicating that the development of engines of propulsion deriving their power from the controlled release of atomic energy is well advanced.

In another direction and as a direct result of the operation of atomic piles is the production of one or more radioactive isotopes of many elements. Some of these have an extremely short existence, reverting to the stable form in a few seconds, others retain radioactivity for many thousands of years. The duration of radioactivity is expressed as the time in which a radioactive element loses half of its activity and is referred to as its half-life. For each isotope this time is characteristic. The half-life of radioactive iodine (I^{131}) is 8 days, radioactive phosphorus (P^{32}) 14 days, and radioactive carbon (C^{14}) 6,000 years approximately.

The availability of such radioactive isotopes in relatively large amounts and at relatively low cost has provided the opportunity of preparing large numbers of compounds containing radioactive elements, the so-called labelled compounds. Chemists have thus been enabled to apply new techniques to the determination of molecular structure and to the elucidation of the nature of reactions between chemical compounds.

Biologists too have a new and unusually sensitive tool with which to investigate biological syntheses, transformations and degradations of compounds in the living organism, investigations which, because of the minute quantities and complexities involved, ordinary chemical procedures have proved inadequate to unravel. Medical science also has been provided with new methods for investigating and treating disease. While such applications are still limited and expansion attends on advances in fundamental knowledge to be obtained by the biologist, biochemist, physiologist and pharmacologist, nevertheless important steps have already been taken, and will be referred to later

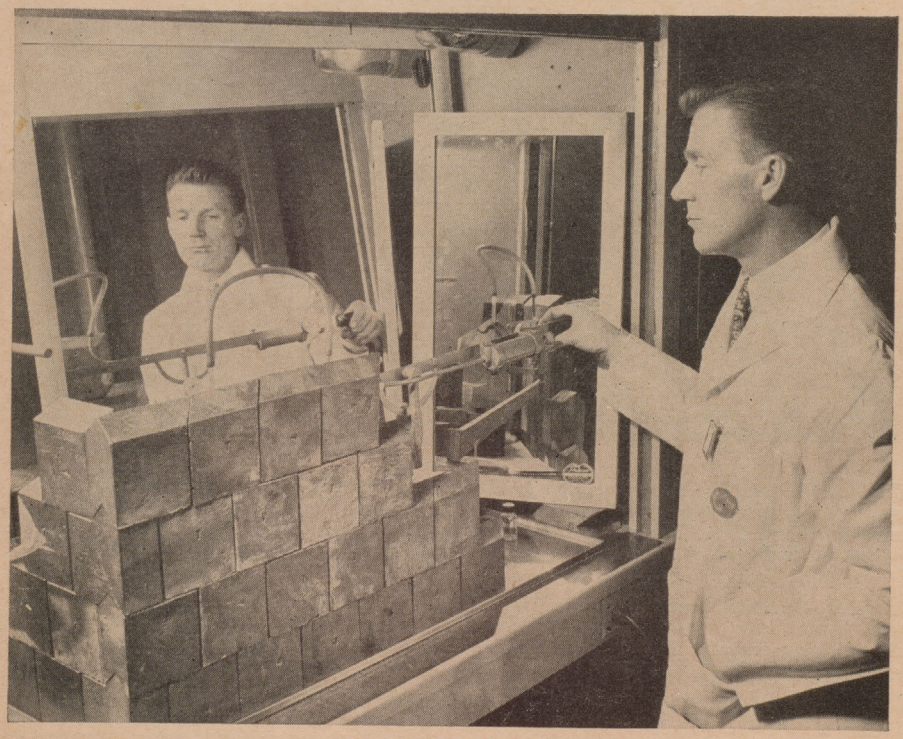

It is fitting and gratifying to know that at McGill University where Lord Rutherford carried out his early experiments on radioactivity, fundamental investigations in radioactivity are being intensively pursued. On the physical side there is the recently opened cyclotron equipped radiation laboratory, and on the chemical and biological side are the important investigations being carried out in the Department of Biological Chemistry and in the Department of Anatomy.

In biochemistry Professor R. D. H. Heard with his students, including Saffron, Zigler, Zorbach, Belleau, Solomon, Thompson, Yates and Jamieson, the latter three now on the staff of Charles E. Frosst and Company, has carried out the fundamental research on, and has indeed prepared several radioactive carbon labelled steroid hormones. Preliminary metabolic studies using these compounds have been made and, when further extended, will undoubtedly throw much light on their biological functions, many of which are at present obscure.

In the Department of Anatomy Professor C. P. Leblond, with his students, including Gross, Dougherty, Bogoroch, and Findlay, has achieved international recognition for his fund-

General Farrell in "Atomic Energy for Military Purposes", by Henry D. Smyth, Princeton University Press, Princeton.

The author of this article, E. Lozinski, M.D. '20, M.Sc. '23, is Director of Research and Control Laboratories of the Charles E. Frosst and Co., Montreal.

***DR. RALPH JAMIESON, Ph.D. (Sci.) '47,** research worker at the Charles E. Frosst and Co. laboratories, gingerly handles atomic materials which are used in treatment of disease. Dr. Jamieson is using tongs behind a protective wall of zinc bricks and manipulates his tools by use of mirrors.*

amental studies on thyroid physiology through the use of radioactive iodine and special tracer techniques developed in his laboratory.

These represent but the beginnings of what may be considered a new science, which, if it does not entirely alter, will certainly profoundly modify present day concepts of biological and physiological chemistry, and may contribute to a more accurate understanding of disease processes, more especially to those of a degenerative character. Application of such knowledge to the prevention and treatment of disease is to be anticipated, and indeed a beginning has already been made.

It has long been known that the thyroid gland produces an iodine-containing hormone known as thyroxin, and that the thyroid selectively concentrates within it iodine required for the production of this hormone. When small amounts of cyclotron produced radioactive iodine became available about ten years ago, it was suggested that it might be possible to apply radiation directly to thyroid cells by the administration of radioactive iodine, and in this way subject them intimately to radiations which would destroy their function. This proved to be true, and when, after much experiment to determine the safety of the procedure, and dosage, radioactive iodine was administered to patients ill with thyrotoxicosis (a disease due to hyperactivity of the thyroid gland), the results were impressive.

Cyclotron generated radioactive iodine could be produced only in small amounts and at great cost, and it was only when pile-produced cheap radioactive iodine became available that this method of treatment became practical, and today thousands of thyrotoxic patients have been successfully treated with radioactive iodine. Among these were many who, because they were not, for many reasons, suitable operative risks, could not be treated surgically except with considerable hazard.

In the treatment of cancer of the thyroid, the administration of radioactive iodine has been found useful, and a number of patients have had their lives prolonged who would otherwise soon have succumbed to their disease.

Radioactive phosphorus has been applied successfully to the treatment of a disease known as polycythemia rubra vera, sometimes referred to as Osler's disease. This disease is characterized by an over-production of red blood cells as opposed to anemia in which red blood cells are produced in insufficient amounts. The blood is more viscous than normal, blood pressure is increased, headaches common, and blood clots form in the veins with great frequency. It is known that the red blood cells are produced in the bone marrow. It is also known that phosphorus tends to concentrate somewhat in the bone. The administration of radioactive phosphorus was therefore thought to offer the opportunity of slowing down the production at the source of excessive red blood cells through its radiation effects. Animal experiments showed that this would occur and, after safety and dosage had been determined, radioactive phosphorus was administered to patients ill with polycythemia rubra vera with salutary results.

Other radioactive elements and compounds are used clinically for investigative work. The use of such compounds and elements is possible by virtue of the fact that they have short physical half-lives and, what is equally important, still shorter biological half-lives, so that the natural decay of radioactivity coupled with rapid excretion avoids, with the quantities of compounds used, exposure of vital organs to dangerous periods and intensities of radioactivity.

The danger of over-exposure to radioactivity introduces the question of precautions necessary to safeguard those handling or receiving radioactive elements and compounds. The elaborate precautions to guard the safety of staff which are in effect at atomic energy plants could be discussed much better by the safety officers of those plants. The Atomic Energy Control Board of the National Research Council is equally concerned with the protection of those outside the atomic energy plants. Regulations have been set up which prescribe conditions which must be fulfilled before approval is granted to an institution to carry out experimental chemical or biological work with radioactive compounds.

The radiation branch of the Department of National Health and Welfare has on its staff an officer who is prepared to assist with his advice on the construction and instrumentation and other pertinent requirements for a laboratory in which radioactive materials are to be used. This officer also regularly inspects approved laboratories to ensure that the safety

Leacock Memory Honored

Speaking of the making of humor, Stephen Leacock once said:

"The making of humor is hard, meritorious and dignified. It would be much easier to write a sermon for the Archbishop of Canterbury than to write a poem for Punch. Huckleberry Finn is a greater book than Kant's Critique of Pure Reason. Mr. Pickwick did more for the elevation of the human race than Cardinal Newman's Lead Kindly Light. Newman cried out for light in the gloom. Dickens gave the light. Personally I would rather have written Alice in Wonderland than the whole of the Encyclopaedia Britannica."

Sunshine Sketches of a Little Town were recalled and the memory of McGill's and Canada's great humorist was honored this fall in a gathering of distinguished citizens in his home town of Orillia, Ont. Louis Blake Duff of Welland, Ont., author of The Country Kerchief, closed an eight-hour program with an appraisal of the humorist's work.

The Stephen Leacock Memorial Committee set up at Orillia a permanent exhibit of his books and manuscripts. His brother and sister, George Leacock and Mrs. Caroline Ulrichson, unveiled a bronze bust, the work of Elizabeth Wyn Wood, in the Orillia Public Library, while Premier Frost, of Ontario, looked on. At the memorial dinner at Fern Cottage, Lake Couchiching, the 1950 Leacock Medal for Humor was presented to Eric Nichol of Vancouver.

***STEPHEN LEACOCK'S** portrait bust, by Elizabeth Wyn Wood, which has been unveiled in Orillia Public Library as centre of a permanent exhibit of the great humorist's books and manuscripts.*

***MONTREAL BRANCH'S** first golf tournament at Lachine Golf and Country Club resulted in a three-way tie and because of darkness, a "toss-off" was held with Frank Pope, Comm. '48, being declared the winner. Thus he became first holder of the Eric A. Leslie Golf Trophy, the gift of the former president of the Society who has just retired as one of the graduate representatives on the University Board of Governors. Shown left to right are: George Heaven, Comm. '49, Frank Pope, Lorne Webster, chairman of the golf committee, presenting the trophy to the winner, and John Keay.*

Atomic Energy . . .

(Continued from page 17)

measures are maintained. In addition, a hospital in which isotopes are used therapeutically is required to have a "Committee on Isotopes" whose function it is to select patients suitable for treatment with radioactive isotopes. This committee usually consists of an internist, surgeon, radiologist and physicist. There are presently eight centres in Canada where radioactive isotopes are used. These are located in Montreal, Toronto, Hamilton, Winnipeg, Saskatoon and Regina, and other centres are being established.

What has been described has been made possible by Canada's Atomic Energy Plant, considered one of the most efficient in operation, at Chalk River. There the isotopes are prepared and separated by chemical and physical processes from unwanted by-products and contaminants, and the specific activity determined. The distribution of the isotopes has been arranged through two channels. For industrial and non-medical applications distribution is through Eldorado Mining and Refining (1944) Limited, and for medical use distribution is through Charles E. Frosst and Company, Montreal, where, in specially constructed laboratories, isotopes received from Chalk River are prepared for administration to patients in institutions approved by the Atomic Energy Control Board.

It must be quite obvious that if biochemical and physiological research with isotope labelled compounds is to proceed, these must be prepared and made available. The preparation of each compound presents a problem which may involve considerable research. This is especially true with respect to the steroid hormones. In our laboratories at Montreal radioactive carbon labelled steroid hormones are now being produced in quantities which will enable many investigators to study their distribution and fate in the body and perhaps contribute to an understanding of their mode of action in health and disease. In the light of the important role played by hormones in the maintenance of health, such knowledge may advance man's well-being. Thus may atomic energy contribute to man's health, happiness and longevity rather than to his destruction.

Society Welcomes Its 50th Branch

AUTUMN is always the time for visits to the Maritimes. This year the visits started auspiciously with the formation of our 50th Branch in our newest province. C. F. Horwood, Comm. '23, undertook to organize the inaugural meeting of the graduates in St. John's, Newfoundland, and, for the splendid job he did, the graduates responded by electing him first president. J. W. Morris, B.A. Sc. '94, and Cluny Macpherson, Med. '01, were elected honorary presidents.

The meetings in Halifax, Charlottetown and Saint John, N.B. were all excellent. These were all annual affairs and the following officers were elected:—

HALIFAX—President, Henry Romans, B. Arch. '37 Sec.-Treasurer, Miss Mairi Macdonald, B.Sc. (Agr.) '46.

PRINCE EDWARD ISLAND—President, Dr. Joseph MacMillan, Med. '38.

SAINT JOHN, N.B.—President, H. H. Scovil, B.Sc. '10; Sec.-Treasurer, S. V. Grisdale, B.Eng. '36.

An outstanding feature of these three meetings was the number of graduates who attended the university in the 1890's as well as those who received their degrees in the last few years who were present at the meetings. There was also a noticeable increase in the number of Macdonald graduates present. The informal, friendly nature of the gatherings amply demonstrated that all that is needed to make a McGill meeting go, is the common interest in McGill.

The coloured movies depicting life at McGill, covering such things as the football games, the Alumnae Society's Parade of Fashion, the Winter Carnival, and the kodachrome slides seem to make McGill live again for those at the meetings.

Brig. J. A. deLalanne, B.A. '19, president of the Graduates' Society accompanied by Mrs. deLalanne, made a flying trip through the west and down the west coast, meeting with our branch executives only, with the exception of Victoria, B.C., where a branch meeting was held and where Brig. deLalanne was the guest speaker.

Dr. G. Lyman Duff, Dean of Medicine, and Mrs. Duff were guests of honour at meetings held by

by D. Lorne Gales
General Secretary

graduates at Los Angeles, San Francisco, Seattle, Vancouver and Regina. From the letters received, the impression made by the Duffs was most happy and apparently wonderful meetings were held all along their route.

"I NEVER had so much fun in all my life." "I would not have missed it for the world." "It was worth every minute of the time spent on the aeroplane all the way from Kansas to Montreal." These and many similar sentiments are probably the easiest way to describe the graduates' feelings about their respective class reunions.

These unanimous expressions are the tribute by the graduates to those in Montreal who organized the reunions. The programmes were varied, the ties were the same—the McGill they remembered and those who had taught them.

The earliest class to come back was that of Medicine 1900, organized by Dr. R. H. Stevenson, Mayor of Danville, and Dr. Lorne Gilday.

The class of '01 came back as a group. George Campbell, Dr. Colin Russel, Gordon McMurtry and C. W. Taylor rounded up their respective classmates and climaxed one of the best 50th anniversary reunions with a stag dinner as well as a dinner for their wives and the members of their class. After the dinner, the ladies joined the men to hear their former

Down to Brass Tacks . . .

by D. A. L. MacDonald

Some Thoughts on the Football Season

What kind of frustration do you prefer with your football since every season must have its winner and three losers? Do you prefer, for instance, the kind of football frustration where your team loses the first two or three games by such huge scores that there doesn't seem to be a chance of them winning a single one before the season ends. ? And they don't.

Or do you lean to the kind of frustration where you think your team may wind up third, or perhaps second and then, as they put together a string of successively improving performances, you begin to dream title dreams? And then they go and blow the big one. The answer may be what the poet meant when he remarked: "Tis better to have loved and lost than never to have loved at all."

Well, this time if any of us had shattered dreams of victory at least the coach wasn't to blame. Vic said himself at the outset that the team, having lost no less than 17 men the previous spring, wasn't 75 per cent as strong as the one which lost out in the playoff to Western. Actually at the start of the season, on paper, it looked like Varsity, with almost its whole 1950 club back, a sure winner; Western second, McGill third, and Queen's, hopelessly riddled by graduations, a bad last.

What got everyone excited and thinking in terms of a championship, no doubt, was that magnificent victory over Western at London, the first in 16 years. Football fans are no different from any other of the sporting species in getting optimistic after a couple of victories. Perhaps after so many lean years, we can't stand even a little success any more.

Here is a story that should be retold. It happened after the McGill-Western game at London according to Dink Carroll in his column "Playing the Field" in the Montreal *Gazette*. A good many McGill graduates had gone to London for the game and when the Redmen defeated the Mustangs for the first time there in 16 years, it was the occasion for a good deal of celebration. Somebody remembered that Johnny Metras, coach of the Mustangs, must be feeling awfully low. His critics had been scalping at him in print and over the radio. Punch McCracken, one of the McGill grads, telephoned Metras around eight o'clock in the evening.

"Gee," said Johnny, starting to choke up a little. "This is the first time the phone has rung all night."

The group decided to call on him. They drove around to his home, stopped outside and gave him a cheer. Johnny appeared at the door.

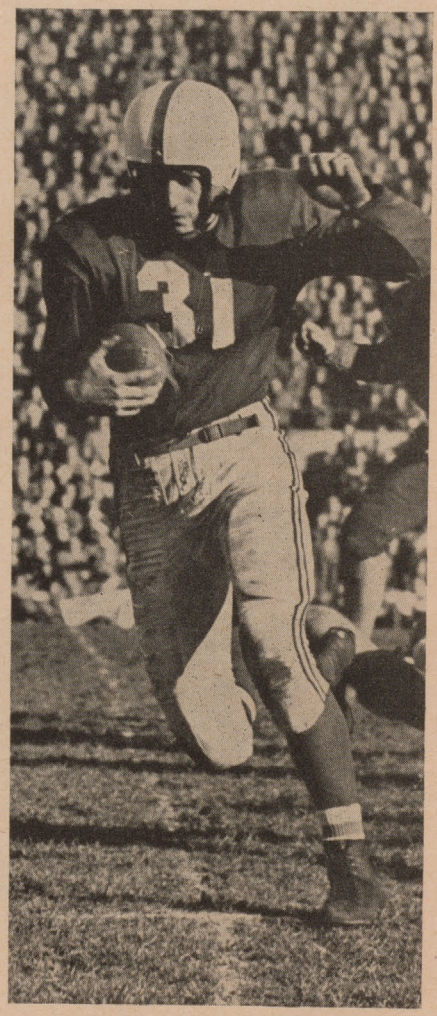

"I don't know what it is you've got at McGill", he said, "but it's something worth having."

It was the same something that manifested itself after the Varsity game at Toronto when several hundred of the grads gathered to give Vic and the team a cheer. It was pretty obvious in his reply that Vic realizes that he had no need to apologize for the teams he fielded during the last three years. Also that his job does not entirely depend on how many games are won or lost during any particular season. It occurs to us now that someone should have shown Vic the list of senior intercollegiate football champions down the years when he first came to McGill. There were long stretches before he ever arrived at the college when McGill's win and loss record could have meant a new coach every season.

It was a season of good football, championship or not, and the team that represented McGill, well-drilled and well-conditioned, was a credit to the university. And among all the outstanding players, Pullar, Caldwell, Robillard and the others, there was one player who was a treat to watch. We don't often go overboard for any single individual in sport but in Geoff Crain, the new captain-elect, McGill has, in our opinion, the finest all-round footballer to come to college since the days of Don Young.

This is a pretty tall statement, but we have not seen in the college union one who shows such great promise. Young Geoff's versatility is remarkable. He can kick, throw, run and tackle as well as any man in the union and when we compare him to Don Young, himself a former cap-

Six Are Honored On Founder's Day

The need for closer collaboration between universities and industry was stressed by Rt. Hon. Lord McGowan in his convocation address on Founder's Day. Lord McGowan, retired chairman and honorary president of Imperial Chemicals Limited, received an honorary degree of Doctor of Science, along with five others at the fall convocation ceremonies, held in the Sir Arthur Currie Memorial Gymnasium.

Lord McGowan declared that a closer relation between industry and universities was necessary, both to assure the support of institutions of scientific teaching and research, and to apply the results of university research "to the production of the commodities and services that will be of practical value to mankind."

Lord McGowan noted the lessening support for universities from private individuals, because of high taxation and heavy death duties and said that industry would have to "step into the breach and support the universities rather in the way that the guilds did in the Middle Ages."

But he added: "Industry must avoid any interference whatever with the academic liberty and proper functions of the universities, which must be trusted to make proper use of any help extended to them."

"McGill has shown a fitting sense of the special conditions and needs of this time in the six men selected to receive its honorary degrees in the annual fall convocation," commented *The Montreal Star* editorially.

"It is a time when the western world is under a special urgency to discover its resources and to enlarge the scientific knowledge to use them, and to develop the industrial capacity to process them. The men honored by McGill are all leaders in the three essential links of mining, sciences and industry."

In the realm of mining, the achievements of Jules R. Timmins, one-time football great at McGill, are playing an important role in opening up the iron ore of the Quebec-Labrador area. The ultimate importance of this ore to the western world, in peace and in war, is beyond calculation.

McGill also recognized the enterprising part the Provincial Government of Quebec is playing in developing these resources in conferring its degree on Dr. A. O. Dufresne, B.Sc. '13, M.Sc. '13, deputy minister of mines for the province.

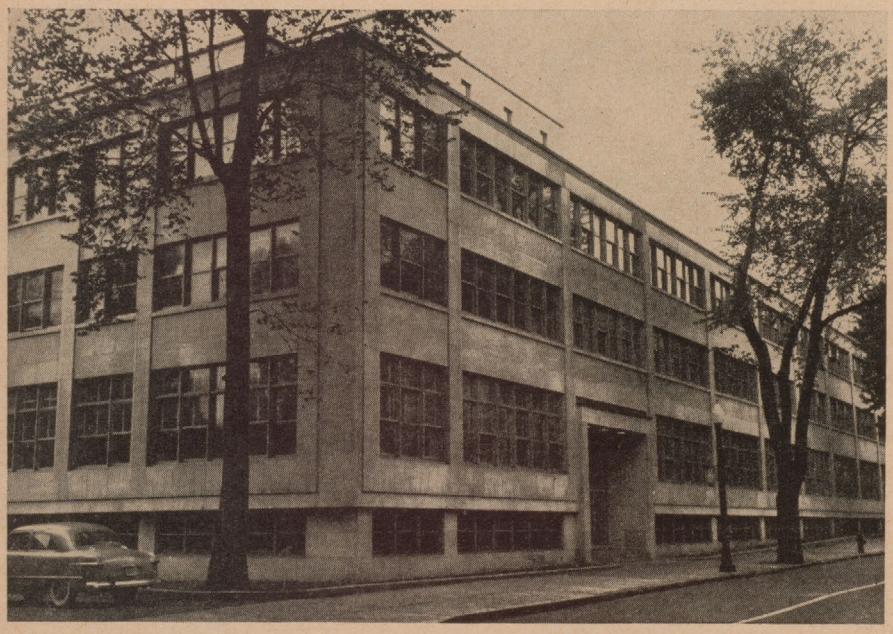

LORD McGOWAN *delivering the convocation address on Founder's Day.*

In the realm of applied science, one of the honorary degrees was bestowed on Dean T. K. Sherwood, B.Sc. '23, of the Massachusetts Institute of Technology. Dean Sherwood was one of the most important scientists serving the United States in the Second World War and presides over an institute which is playing an outstanding role in scientific development.

Two Canadian scientists were also honored. Dr. J. R. Donald, B.A. '13, B.Sc. '13, president of the company which bears his name and Dr. O. M. Solandt. Dr. Donald served in the Second World War as director of chemicals and explosives in the Department of Munitions and Supply and has been called back to fill a similar post in the Department of Defence Production.

Dr. Solandt, who played a most notable role in the operation research work in the Second World War, is now correlating the defence effort of Canada on the scientific front as chairman of the Defence Research Board.

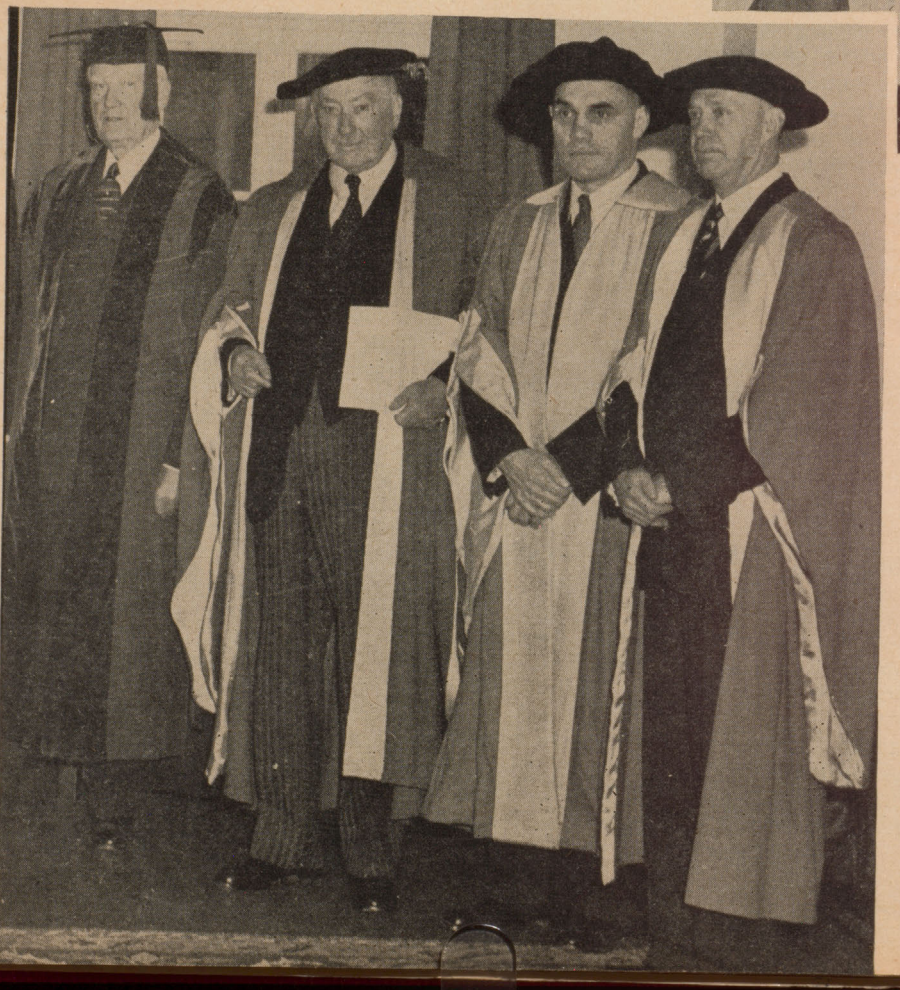

THE $2,500,000 *Physical Sciences building was officially opened by His Excellency Lord Alexander of Tunis, accompanied by Lady Alexander who had laid the cornerstone in May last year.*

Key workers among the alumnae for the McGill Alma Mater Fund are shown here as they were snapped at the annual dinner given by the Montreal branch in the Currie gymn. Left to right are: Miss Margaret Racey, B.A. '51, group chairman of classes 1950-51; Mrs. Cecil Currie, B.A. '40, group chairman of classes 1937-44; Miss Mary Pitts, M.A. '50, group chairman of classes 1945-49; Mrs. A. C. Jensen, B.A. '29, chairman of the Alumnae Alma Mater Fund; Mrs. Selwyn Irwin, B.A. '29, vice-chairman, and Mrs. Dent Harrison, B.A. '32, group chairman, classes 1926-36.

Montreal Branch's Alma Mater Fund Dinner

Though McGill will receive approximately $500,000 in Federal Government grants under terms of the Massey Commission recommendations, this sum will merely wipe out the university's deficit but will not provide for urgently needed increases in salaries and wages which came into operation this month, Dr. F. Cyril James, principal and vice-chancellor, told an Alma Mater Fund gathering at its dinner in the Sir Arthur Currie Memorial Gymnasium.

"In simple accounting terms," Dr. James said, "it seems likely that the grant from the government will put McGill in the black for the first time since VE-Day.

"Last year I emphasized the fact that if town and gown are to mingle more freely, the members of the university staff must be able to meet their fellow townsmen on a basis of economic equality. Salaries and wages within the university must bear a reasonable relationship to the salaries and wages earned by those who are employed in private industry.

"We have not yet attained that happy situation at McGill. A year ago, the Board of Governors authorized modest increases in salaries and wages but the rise in the cost of living has already out-stripped the amount of those increases. Salaries at such institutions as Toronto and Alberta have also risen in recent months as a result of increased provincial grants, while the scale of salaries in universities in the United States is still higher."

Dr. James stated that the university was now appealing to its graduates for funds in order to pay these increases which, together with higher cost of operations, would require an additional $500,000.

Last year, 7,060 graduates contributed a total of $121,550 to the Alma Mater Fund. An impressive start had been made, it was pointed out by other speakers, inasmuch as a little less than one-third of the 22,000 graduates had participated.

Dean of Divinity, James S. Thomson, told the gathering that under Dominion of Canada grants "the new sources of fuel may keep some universities from going on the rocks, but they will require much additional resources in financial energy if they are going to keep going even at moderate speed."

As to fears that state support may involve government control, he maintained that "our fine tradition of academic freedom which, let us remember, is represented just as strongly in the keepers of the public press as among ourselves, is likely to prevent any such calamity. In any case, the proportion of government support to total income has not yet reached the size that confers the suggestion of a presumptive right to interfere, even if there were the wish to do so."

David R. Fraser, president of the Montreal branch which sponsored the dinner, was in the chair. James A. deLalanne, president of the Graduates' Society, introduced head table guests who included B. C. Gardner and R. E. Powell, of the Board of Governors; E. C. Wood, president of the McGill Associates; Colin W. Webster, chairman of the Alma Mater Fund.

Mr. Webster, in emphasizing the importance of the occasion, urged that a careful canvass be made of those who had not yet responded to the fund. Other speakers included R. I. C. Picard, chairman of the Montreal Branch Alma Mater Fund and Mrs. A. C. Jensen, Alumnae Alma Mater Fund Committee.

Cyril James. Foreground, left to right: R. J. Kane, W. M. Cairns, Mr. E. C. Woodley, Mrs. E. C. Woodley.*

Paris Letter

by James P. Manion

The indications that have been given to me as to the subject of this article* are trite, dangerous and sometimes unacceptable to a person in the Foreign Service of his country. Twenty years ago when I first started this 'métier', it would have been considered impossible for me to even accept the title without getting out of the Service. Now, however, even good friends, such as "Mike" Pearson, have the latitude given perforce by the Communists themselves to discuss with liberality the views that we have of them.

My own opinion is that there has been a very definite turning point in Western Europe; whether it is a point of no return, one cannot say as yet, but when the famous elections took place in Italy early in 1948 I was there as Chargé d'Affaires and realized the implications of that election to the rest of the remaining Free World.

There was nothing trite, impartial or untendentious about these elections. They were hard-fought on one side and the other and they were clearly won by the Anti-Communist forces in Italy. This gave an undoubted spur to the Anti-Communist forces of Labour in other countries and its result was soon seen in the deplorable failure of the French maritime strikes of early 1948 and the final failure of a six week's strike of the coal miners, which took place in October and November of that year and which it had been desired, without success, to spread to other Unions.

Since that time there have been upturns and there have also been bad economic moments which could suggest that any revolutionary movement might obtain a wide franchise. I am myself sufficiently leftist in feeling to know that, were I without adequate means of support for a family which comprises among others two children, I should be prepared to accept a lot of experiments to see if they would not be more successful than my present way of living. I can therefore understand the person who is ready to take Communism by the hand. Nevertheless, we ourselves in North America are now used to the idea that our way of life will prosper for quite some time in the future and the European mind is being made over to the idea that a new form of life would also be impossible for them for the immediate future.

***WITH THIS ISSUE** begins "Paris Letter" by James P. Manion, Comm. '29, which will be a regular feature of The McGill News. Jimmy is commercial counsellor in Canada's Foreign Trade Service in Paris. After graduating from McGill, he attended London School of Economics. His first post was at Tokyo and he was in Paris when World War II broke out. He served four years with the Canadian Armed Forces, and was discharged with the rank of lieutenant-colonel to resume his duties in the Foreign Trade Service.*

I therefore have every faith in the fundamental conservatism, traditionalism, understanding, forbearance and tolerance of the Western European mind that I have every confidence that there would be little Communistic reaction were Western Europe to be involved in more than a cold war with the countries of the Iron Curtain.

There has been a remarkable recrudescence of faith and hope, a recrudescence which would not have been thought possible two years ago. This flood-lighting of the spirit is still active and still effervescing; one must remember, however, that such movements which are built on faith and not entirely on intellect are likely to evaporate with similar speed when material aims are completely baffled. This might happen once more if we do not all work together toward a union which will be not only intellectual, material, emotional, but also spiritual.

It was suggested by The Editor to Commercial Counsellor Manion that, if the regulations of his office permitted, he might write something about the Communists' excursions into Western Europe.

50th Branch . . .

(*Continued from page 19*)

professor, Dr. C. W. Colby, give the evening's address.

Our first vice-president, Shirley Dixon, and the inimitable "Finny" Fletcher gathered Arts '11 together at the Montreal Club.

Stan Neilson started the Science '16 reunion with a reception at his home that insured the success not only of the reunion held in 1951, but of every future reunion of Science '16. John Palmer guided Medicine '21 through their stag party and a buffet lunch as well as an informal mixed cocktail party.

The 25th year anniversary reunions for the class of '26 were all extremely successful.

The leading spirits were:—
Law, Bev. Puddicombe
Science, Val Wilson
Medicine, Cliff Ward

Warming up for their 25th by holding successful 20th's were the '31 group led by:—
Meredith Rountree, Arts
Ed. Seybold, Commerce
Cam Gardner, Medicine
Palmer Savage, Science

Engineering '34 managed to hold a Stag Reunion with "Orbey" Brummell in the chair.

Fifteenth anniversary reunions were held with chairmen:—
Dana Weeks, Medicine '36
Hugh Savage, Commerce '36
Jim Anglin, Law '36
Keith Shaw, Engineering '36

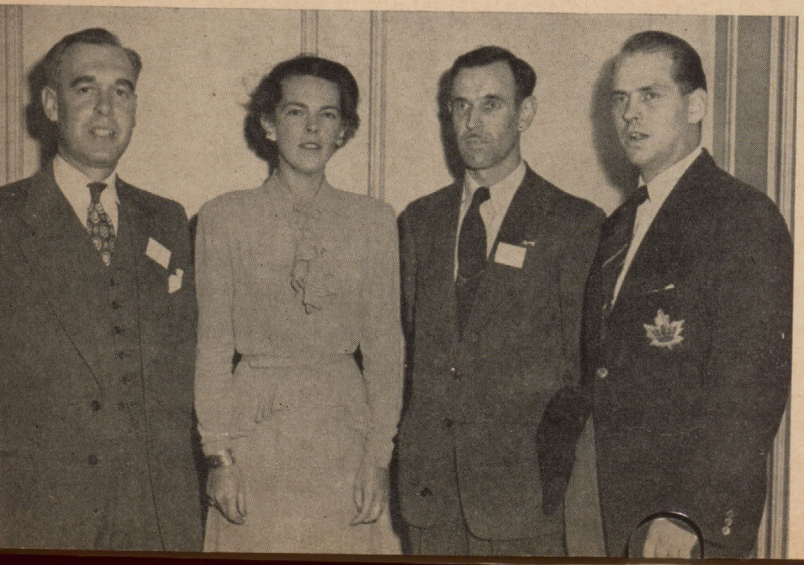

Cliff Morse and Lorne Lindsay rounded up Engineering '41 for a 10th Reunion. John Stonemuir organized the youngest reunion, Engineering '46.

War Correspondent

Former McGill Daily Man Tells Of Trials, Tribulations And Dangers Of Job

by Lionel Shapiro

The author of this article, Lionel S. B. Shapiro, B.A. '29, is well-known not only as a war correspondent but for his three successful novels, "They Left the Back Door Open," "The Sealed Verdict" and "Torch for a Dark Journey," the second of which was filmed by Hollywood. Just after he completed this article for The McGill News, *Mr. Shapiro left for Germany where he will represent North American Newspaper Alliance. He had also just completed, at the request of Department of National Defence a 30-page handbook "Off to Europe," designed as tips for the 27th Canadian Infantry Brigade whose activities he will report from Germany.*

The business of being a foreign correspondent, especially in today's troubled Europe, teaches one a great many things, some of which prove to be permanently useful in one's life, others of scant value in any kind of normal world. In the latter category I would place the trick of writing a news story from a totalitarian country in such a way as to transmit certain vital information without being tossed out of the country; the development of a look of wide-eyed innocence while trying to gouge a quote out of a squeamish ambassador; the knack of getting across an international boundary without the required papers.

However, being a foreign correspondent has taught me one thing which I believe is of permanent value. It has taught me how to read a newspaper, how to extract fact out of a rumor-ridden story, which stories to take seriously, which to ignore on the ground that they are the product of a correspondent hard put to fill out his news budget.

I lost the blush of youth (insofar as the newspaper business is concerned) some years ago. I was a war correspondent then, and I found myself assigned to what appeared to be an extremely dangerous military mission. There was only one other correspondent on this mission, a well-known writer for a great American news service. Both of us had unmistakable shakes as we set out with a small military group.

As it turned out, the assignment was dangerous only on a what-might-have-been basis. The group accomplished its tricky mission without any interference from the enemy, and I arrived back at base full of jitters but with no blood-and-thunder descriptives. As we sat over our typewriters trying to extract some drama out of a neat and unspectacular mission, my fellow-correspondent spoke up: "How about putting in one attack by the Germans, just a little shooting to give this yarn some guts ?" I wouldn't agree to the pure manufacture of drama. We wrote our separate stories. Some weeks later I happened to pick up an American newspaper and read my friend's story of our mission. I proceeded to the nearest bar, had a stiff drink, and promptly awarded myself a Victoria Cross.

This man is still writing. Whenever I read a story under his byline I ignore the information contained therein, no matter how factually it is presented.

Then there is the frequent scare story about the European situation based on an exclusive despatch in one of the Paris newspapers. Some Paris papers are excellent, but there are several which reach out widely for a scare headline purely for newsstand circulation. Therefore, when I read a spectacular story in our newspapers which begins, "According to a front-page story published in the Paris newspaper————"I usually dismiss it as being worthless.

On the other hand, certain correspondents have a rare reputation for accuracy even when they are discussing rumor. In September, 1949, the *New York Times* front-paged a story from its London bureau chief, Raymond Daniell, stating that according to usually reliable sources, the British pound was going to be devalued from $4 to 2.80. This story appeared some five days before the actual occurrence. Knowing Raymond Daniell's reputation for accuracy, and knowing the care with which the cable desk of the Times allocates stories for its front page, I took it for granted, quite justifiably, that the pound was going to be devalued. The Times would not give prominence to such a rumor without the most painstaking investigation.

There is the case of William Oatis, the Associated Press correspondent now languishing in a Czech prison after having been convicted of espionage. I know something of the operation of American correspondents in Prague, having operated for a little time in that city which is always filled with an air of *cospirazione.* I knew Oatis and his predecessors in the AP bureau and I can give personal assurance that they are no more spies than your maiden Aunt Mathilda. It is clear to me that Oatis was jailed and convicted because the Czech government does not want western correspondents operating in the country. To expel one correspondent after another was not as effective as jailing one and thereby preventing others from being assigned to Prague.

Shortly after the war, I entered Czechoslovakia on a reasonably simple newspaper assignment. I managed to get the story I was after and left the country a few days later. About a year later I was in Rome on assignment. At a diplomatic reception, I found myself in conversation with a Czech diplomat (who has since resigned and is living in a western country as a political refugee). He recalled to me the assignment I had covered in Prague and warned me, as a friend, never to return to Czechoslovakia on pain of being arrested,

The Royal Visit

The Royal visit itself is described elsewhere in this issue. It seems to be generally agreed that the arrangements made on the campus and in the Arts building were effective.

These elaborate functions, however, do not run smoothly unless there is a lot of previous planning and hard work. Bleachers have to be erected and some borrowed, tickets issued, seating arranged, a first-aid post established, bands provided, academic robes issued, platforms put up, traffic control planned, decorations planned and put up, the foyer of the Arts Building to be transformed, a museum exhibit to be collected and displayed—in fact, a lot of people were very busy for a long time.

Among those who carried the main part of the labour were the Principal's Office, the Comptroller's Office, the Registrar's Office, Buildings and Grounds, the Faculty of Music, the senior officers of the Students' Society. A special tribute should, of course, be paid to Professor Percy Nobbs and Lieut.-Col. D. Stuart Forbes for the beautiful decorations. The university had the most excellent co-operation both from the military and from the police.

The members of the committee in charge of the arrangements were the following: The Principal, chairman; Dean Fieldhouse; Dr. Roscoe; Mr. Dobell; Mr. Herron; Mr. Matthews; Colonel Forbes; Mr. Jacques Tétrault, president, Students' Society; Miss Marilyn Pickering, president, Women's Union; Mr. Willie Bokovoy, president, Macdonald Students' Council.

Honours

Dr. Archibald D. Campbell (M.D. '11) has been elected vice-president of the Montreal Medico-Chirurgical Society.

Dr. Sinclair Laird, former Dean of the School for Teachers, has been appointed to the Quebec Council of Education.

Staff Changes

Professor John Lyman has been appointed chairman of the Fine Arts Department.

DR. F. CYRIL JAMES *(right) examines a map of the Moslem world with Prof. Wilfrid Cantwell Smith, appointed director of the Institute of Islamic Studies, which has been given a grant of $214,800 by the Rockefeller Institute. The money will be used to provide special research scholarships and assistantships for Moslem scholars and four graduate fellowships annually.*

Dr. Oswald Hall has been named chairman of the Department of Sociology.

Mr. Hugh MacLennan, well-known Canadian novelist, has been appointed an associate professor in the Department of English.

Dr. D. O. Evans, who holds the degree of Doctor from Oxford and Paris, has been appointed visiting Professor of French.

Professor L. J. Arcand of the Department of Civil Engineering has been given leave of absence for a year.

M. D. O'Shaughnessy, assistant professor of Mining Engineering, has accepted a position with the Quebec Copper Corporation.

Roger Marier, of Laval University, has been appointed associate professor in the School of Social Work.

Dr. B. H. Higgins, who was recently appointed chairman of the Department of Economics, is detained in Libya, where he is working for the United Nations. The vacant chairmanship has been filled by Dr. E. F. Beach.

Registration Figures

Final registration figures are not yet available, but it appears that, as anticipated, we shall have about 300 students less than we had last year.

Rooms Registry

The Rooms Registry, which was staffed by voluntary workers from the Alumnae Society, put in a most active and useful six weeks at the Union and helped a great number of out-of-town students to find suitable accommodation. Their work and the friendly reception they gave to the students who consulted them is greatly appreciated by the University and the student body, especially the large number of students coming from foreign countries.

Library Extension

Because of steel shortages, there seems to be some doubt about the speed with which the Library extension will go up. There is, however, no doubt about the speed with which it is going down, for where the tennis courts used to be there is now a huge hole. The new extension will greatly increase the facilities of the University, but will decrease the amenities of the Faculty Club, from windows of which members could,

People In The News

This is the first of a series of articles about McGill men who are taking a prominent part in our economic, political and social life.

If you take a plane anywhere in Canada today, you can be almost certain it was made at the big Canadair plant at Montreal, now the biggest airplane manufacturers in the Dominion. And not only does the big Cartierville plant turn out North

J. G. Notman

Stars for Trans-Canada Air Lines and the Canadair Fours for Canadian Pacific Air Lines but it produces a tremendous volume of planes for this country's defence effort as well.

The North Star is the backbone of the RCAF Transport Command and the F-86'E Sabre jet interceptor is the key weapon in this mounting defence system. Recently, Canadair received a $100,000,000 order from the Canadian government to produce T-33 jet trainers.

Directing the company's tremendous production capacity is a McGill graduate J. Geoffrey Notman, B.Sc. 22, one-time football star in the Shaughnessy era and now executive vice-president and general manager of Canadair.

He joined the company in 1950 from Dominion Engineering, one of Canada's top makers of heavy equipment, with 28 years of manufacturing and management experience. During World War II, the Department of Munitions and Supply gave him various assignments. He set up a Crown-operated gun plant; planned Canada's arsenal set-up; assisted in co-ordinating war production and finally helped to direct industrial reconversion in 1945-46.

until now, see all the tennis courts and half the cricket field.

Air Law Course

Law graduates of world famous centres of learning have assembled at McGill to start a new phase of investigation and research at the University's Institute of International Air Law. Min Min Peng, of the University of Taiwan, Formosa, has travelled the farthest to join the unique group of scholars who have assigned themselves the task of preparing, while at McGill, books in their respective languages on international air law.

Prof. John Cobb Cooper, director of the institute and a member of the Bar of the Supreme Court of the United States, is director of the institute.

Supply Psychologists

McGill has supplied a research associate for the department of psychology to the University of Illinois. This is the latest in a series of appointments from among McGill-trained psychologists or staff members.

Dr. Charles Wrigley, a native of New Zealand, has been on the McGill staff for the past two years in both research and teaching capacity.

Included in the number of other McGill men who have gone to important posts are Dr. Julian Blackburn, chairman of the department of psychology at Queen's; Dr. Gordon McMurray, chairman of the department of psychology at University of Saskatchewan; Dr. Donald Forgays, now doing research with the United States School of Aviation Medicine in Texas; Dr. Gerald Mahoney and Dr. Bernard Hymovitch, with University of Michigan and Dr. H. C. Lansdell with the Defence Research Medical Laboratories, R.C.A.F. Station, Toronto.

HIGH JINKS *after breakfast featured a visit of more than 200 farmers from the corn states of the United States to Macdonald College. Dr. W. H. Brittain, left, vice-president and dean of the faculty of agriculture, accepts a "Nebraska Admiral" commission from William Wiseman, spokesman for the touring farmers from Nebraska, Iowa, Kansas and South Dakota. The purpose of the tour was to permit Mid-west farmers to study agricultural conditions and operations in eastern Canada. The visitors were given an extensive tour of the college.*

Debatable Subjects Intrigue Campus

"Royal Yell," Russian Visitors, Compulsory Athletics, Fraternities Keep Tongues Wagging

by Clyde Kennedy

Yea Betty, Yea Windsor
Yea Yea Betty Windsor
Rah Rah Rah.

Having read in the staid old *London Times* that McGill students, led by a cheerleader, gave the above "special yell" for Princess Elizabeth when she and the Duke of Edinburgh drove on to the campus, a McGill graduate wrote *The McGill Daily* to say that, although he was remaining a member of the Graduate Society, he was now going to considerable effort to conceal the fact that he was a McGill graduate.

Some Canadian newspapers also reported that the student body gave this yell as the Royal car stopped inside Roddick Gates, but the students deny it. They say that long before the Royal couple appeared the yell was given by a few students without the guidance of a cheerleader. So those graduates who were upset by the newspaper reports can relax—they were incorrect. And those who thought it was a "good show" must go disappointed.

Invite the Russians?

Should Russian students be invited to visit Canada? Are fraternities a harmful influence in campus life? Should *The McGill Daily* cease to be a daily? Does the student body want compulsory athletics and freshman hazing?

The answers to these questions, the main topics of debate on the campus up to press time, were varied and interesting.

When Denis Lazure, former president of the student association of the University of Montreal, returned from Europe early in September, he proposed that the National Federation of Canadian University Students, a union of Canadian student bodies with representation from every university and college student council in Canada, which had sent him abroad, invite several Russian students to visit Canada. He had attended the Youth Festival in Berlin and an executive council meeting of the International Union of Students (a Communist-dominated organization claiming to represent the youth of the world but having no official members from the western countries) in Warsaw from Sept. 1 to Sept. 6. He felt he had detected a change in heart in I.U.S. (which, with apparent Soviet-satellite government financing, spends most of its energy on whipping up anti-American sentiment).

In contrast with McGill student leaders of previous years, those at the University of Montreal have long felt that affiliation with the Communist organization would be profitable—to the extent that some of our viewpoints would be made known to members of the I.U.S., without Canadian endorsement of all of the policies of I.U.S. being the significance of Canadian membership.

Lazure presented his proposal for the Soviet visit during the NFCUS national meeting at the University of Western Ontario in mid-September. Six delegations representing their respective student councils, including that from McGill, favored the proposed Russian visit. Twelve delegations were opposed.

The climax of debate at McGill on the proposed visit came at a general meeting of the Students' Society Nov. 7 when the student body voted 500 to 12 in favor of having the Russians visit Canada. The preamble to the motion, which was proposed by John M. Scott, last year's editor-in-chief of *The McGill Daily*, made quite clear the McGill students' "total opposition to the aims and methods of Soviet Communism."

Scott emphasized that none of the students plugging for the exchange doubted the Russians would be thoroughly indoctrinated and dedicated Communists, but, he said, "we do think it is possible to sow the seeds of doubt in their minds. Another important reason for bringing them is the propaganda value to Russia if we do not."

(Continued on page 40)

WELCOMED FROM OVERSEAS: *Members of the McGill Scarlet Key Society were on hand to welcome foreign students when the Empress of Canada docked at Montreal. Six Commonwealth students are shown in the party which includes Bill Hutchinson, Walter Wood, Vernon Forester, Michael Bell, Howard Bond, Barrett Priestman, Desmond Nivin, Basil Cooper and David Charness.*

Hochberg, Vincent P. Cummings, Paul Von Haeseler, Abraham Blau, Oscar Nutik, L. J. Tessier, Donald G. Henderson, R. S. Hayden, Harry D. Cheifetz.*

"There are more important arguments for the exchange," said Scott, "than that this is a way of achieving mutual understanding. But of course that is important too."

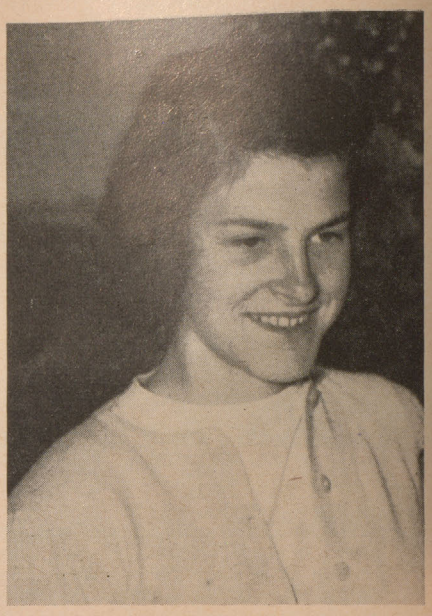

In a special meeting, November 12, to consider the Russian question, members of the student council at the University of Montreal voted unanimously in favor of the visit. "I am very happy indeed about the vote at McGill and on my own campus," said Denis Lazure.

Now the proposal is being debated on campuses across the country. The McGill NFCUS committee, which is a committee of the Students' Executive Council, is strongly in favor of having Soviet visitors, disagreeing with the belief of the committees of 12 other universities that such a visit would be "bad publicity" for Canadian universities.

The McGill International Student Service committee, also a committee of the Students Executive Council, has been campaigning to win favor for the visit not only at McGill but also at other campuses. (International Student Service has always had strong support from university presidents and principals and should not be confused with the International Union of Students which has its headquarters in Prague.)

The Toronto Varsity commented editorially: "If the university students of this country are afraid, for one reason or another, to bring into this country for visits, young men and women whose ideas are diametrically opposed to ours, then surely we have lost a large degree of faith in ourselves and in our democratic institutions. A little honest controversy over the visit of some dyed-in-the-wool Russian Communists might be very good for the too often smug, isolationist tendencies that the Canadian student has shown so willingly and so frequently during the past five years."

The Acadia Athenaeum disagreed with *The Varsity*, and commented editorially: "The proposal to bring 15 Communists to Canada for an expense-paid tour of Canadian universities is something that not even the most starry-eyed idealist would dare to dream. Certainly these 15 Commies would be trained propagandists—experts in their field. On the other hand they would be meeting students who would have had no training in such matters. We would be sitting ducks."

Rose Alexander, daughter of Lord and Lady Alexander, was among the some 900 freshmen who registered for courses when the university reopened.

More than 150 graduates attended the Macdonald College grad reunion which was held October 20. Included in the programme was a tea given by the Household Science Department, a football game and an evening at Glenaladale. Shown above is the executive of the Alumni Association, left to right: Bill Ritchie, associate secretary; Pat Ellis, executive member; Vivian Turnau, secretary-treasurer; Bill Shipley, president; Kitty Freeman, vice-president; Mary Louise Gasper, member; Bill Kydd, past president; Len Robertson, member.

The McGill Daily declared it had more confidence in Canadian students: "*The Athenaeum* feels that Canadian students could not hold their own if pitted in a bull session or elsewhere against 15 of Russia's best, and bolsters this argument by saying 'we are not ready for them yet'. Somehow, we have more confidence in the ability and strength of Canadian students."

"The fear of acquiring a 'Red reputation' is what should concern us most", added *The McGill Daily*. "It is this fear that prompted one Canadian college paper to question whether 'the insidious tentacles of the disease, well-known to every university student south of the border, have stolen into Canadian thinking.' "

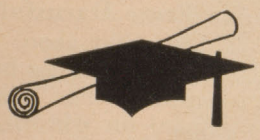

"The threat of 'McCarthyism" invading Canada is a serious one, all the more so when it threatens university students," *The Daily* continues. "For students as a group have always been noted for their tolerance of every shade of thought and opinion. It would be truly tragic if 'the future of the nation' succumbed to this insidious evil."

This editorial view was close to that of most McGill student leaders, though a minority were doubtful about the soundness of this argument. The latter students did not oppose

SIX MEMBERS *whose ages totalled 489 years attended the 55th reunion of the class of Medicine 1896, held during the meeting of the Canadian Medical Association. Of the original 91 graduates 19 are accounted for, scattered from Halifax to Vancouver. The six attending the reunion were, left to right: Edward Lauder, Toronto; C. H. Church, North Hatley; P. J. Fenton Argue, Ottawa; Percy C. Leslie, Montreal; William D. Lambly, Kingston, Ont.; Philip Colquhoun, Waterville, P.Q.*

Pearl R. Arshawsky, of Melville, Sask,. Carrie Derick scholarship winner, was among the eight women who registered in first-year medicine this fall. Six of the "career" women are Canadians, one is from England and the other from United States

Debatable Subjects . . .

(*Continued from page 40*)

the proposed Soviet visit, however, and the letters to *The Daily* favored it.

The debate is continuing on campuses across the country.

Compulsory Athletics?

Don Allen of *The McGill Daily* staff polled 400 freshmen on compulsory athletics, asking: "Do you approve of McGill's new program of compulsory athletics for members of the freshman class? If so, do you think that it should be extended to all four years of undergraduate study?"

A 78 per cent vote of approval was given by the 365 who answered the first question. The breakdown showed that 79 per cent of the men and 76 per cent of the women expressed approval. But a majority—56 per cent—were opposed to extending the program to the upper years. This was qualified in many cases by the suggestion that until they tried it out the first year, the freshmen were not prepared to say with finality what time should be allotted to compulsory athletics. A majority of the freshmen felt they would gain much from athletic activities but some felt that, as college students, they should be free to decide for themselves.

As for freshmen hazing, 55 per cent favored hazing and expressed disappointment that there wasn't such a thing in the McGill reception program.

The Daily's Demise

Next January, *The McGill Daily*, the oldest college daily in Canada, will no longer appear five times a week—which means, as far as the Canadian University Press definition of a "daily" goes, that a few weeks after observing its 40th anniversary (October 1, 1951) *The Daily* will cease to be a daily.

Founded in 1911 by W. E. Gladstone Murray, *The McGill Daily* has been published five times a week ever since. Effective the middle of January, it will appear only four times a week and some students think this is the first step toward cutting the issues to three or two per week.

This year's Students' Executive Council, concerned about the number of failures each year, decided to make a vigorous attempt to cut down on extra-curricular activities. A "No Activities Week" was held from Nov. 19 to 25. *The McGill Daily* was not published during that week and no activities, other than the Grill Room and the Short Order Bar, were allowed to operate in the McGill Union.

"Although it believes that failure is caused mainly by the general character of the student," said the S.E.C. announcement, "and by the fact that large classes prevent individua supervision, the S.E.C. does recognize that extra-curricular activities are a contributing factor in the high percentage of academic failures. It hopes that these measures will persuade the student to concentrate more on his studies."

The Managing Board of *The Daily* fell in line with the S.E.C. policy and announced a reduction in the number of issues per week.

In a poll of campus opinion on "No Activities Week" conducted by *The Daily*, 483 students declared that this week wouldn't necessarily be spent in study. On the other hand, 386 students thought it would be. As to approval of the S.E.C. policy of cutting down extra-curricular activities, men students declared their disapproval 297 to 289. Co-eds approved the idea 155 to 121.

Opinions expressed on the unusual week ranged all the way from belief that "No Activities Week" should last throughout the university year to a suggestion that "the idea is stupid."

Are Frats Harmful?

The old argument about the evils and virtues of fraternities burst into the open again when *The McGill Daily* reprinted an editorial on the subject from *The Toronto Varsity*. While this has long been a topic of

(*Continued on page 44*)

McGill Daily Marks An Anniversary

The 40th anniversary of its first issue as the student newspaper of McGill University, and an unbroken record of daily publication during every academic year since then, were marked this week by *The McGill Daily*. This makes it by a comfortable margin the oldest college daily in Canada and, as far as can be ascertained by careful investigation by university authorities, the oldest among the relatively few publications of this type produced in all the countries of the Commonwealth.

The achievement of this important milestone was noted in an editorial in the *Daily* yesterday, the date on which the first issue appeared on the campus in 1911. Congratulations to the *Daily* as an institution, and to the present editors and staff, are in order not only from within the university but from the Montreal community generally. In this *The Gazette*, in whose plant the *Daily* is printed, is pleased to join.

The McGill Daily's establishment resulted chiefly through the leadership and enthusiasm of its first editor—Mr. William Ewart Gladstone Murray, in later years general manager of the Canadian Broadcasting Corporation. In the years since then, the *Daily* has made steady progress in improving its standards of coverage and journalistic performance, in promoting and aiding student activities, and in enlisting an increasing number of students in the work of its production. A staff of some 100 students now contribute all or part of their spare time to the writing and editing.

The status the *Daily* has achieved in the field of college journalism through the past four decades is a commendable reflection of the sustained effort and determination of the successive staffs who have been responsible for its development through the years.

—The Montreal Gazette, October 3, 1951

debate on the campus, for some years the debate hasn't been carried on in the student newspaper.

"The fraternity system is built on one main idea: exclusiveness", declared the *Toronto Varsity*. "Out of this has grown a multitude of unhappy consequences. High on the list is discrimination. And we are not concerned here only with racial or religious discrimination, which is not universal in fraternities although it remains prevalent. It is more subtle than that. Primarily economic, the fraternity discrimination perpetuates the idea of exclusiveness within the relatively narrow confines of a definite social strata. You have to be able to afford it. To this is added other, more obvious, kinds of discrimination, such as religious and racial."

The Varsity felt that the fraternity produces "standardized minds", adding that "the fraternity, whether it would admit it or not, seeks and often demands a set of ideas and values which ordinarily leave small scope for the individual. Such an influence is of the creeping, crawling kind: people banded together in tight little groups such as a fraternity tend to try to be one of the boys".

"The high ideals that are written in some fraternity charters," added *The Varsity*, "are not borne out by the fraternity record, nor by their present activities. They have no place in a democratic university, because they are essentially a negation of the very principles of freedom, of tolerance, and devotion to service to which the university is committed. Undergraduates who avoid such a system as that established by the fraternities may have to work harder to make their 'social contacts'. Those who have done it both ways find they like hard work."

Beyond pointing out that the 17 men's and eight women's fraternities around the McGill campus are not officially recognized, and that "*The Daily* feels that an open discussion of the place and value of fraternities . . . would be of definite value . . .", *The McGill Daily* had nothing to say about the argument. But the letters poured in.

"These organizations (fraternities)", said one letter, "can do nothing of value except provide friendships. It is a shame that there are not more on this campus so that a greater proportion of the students could have this opportunity . . . bad characteristics (of the fraternities) . . . are unfortunate, but they seem to be a function of the fallible human species. In these respects fraternities have failed, but where they may have succeeded there is no adequate yardstick. Only in those few who have found their lives enriched by fraternity can their success be measured."

"We only ask", said a letter from two fraternity girls, "that those who wish to get a fair picture of fraternity life should investigate the amount of work done by fraternal organizations in the field of social welfare alone. It might also be in order to remind the reader that when campus activities are in need of student assistance, it has been proved in the past that fraternities can be counted on to give their wholehearted support, as a body, not merely as individuals. Contrary to the expectations of their detractors, fraternities, on a surprisingly frequent number of occasions, have the good fortune to believe in those ideals which have been set before them. The fact that they may not always live up to them is hardly a just reason for their condemnation. Even the 'exclusive' are fallible."

"Undoubtedly there is some truth in the article," said another letter by a fraternity man, referring to *The Varsity's* editorial. "What is omitted is the very real attempt by fraternities to get rid of these discriminatory practices. In many ways the fraternities nowadays strive to make it easier economically for a student to join. In fact a fairly substantial saving is effected by out-of-town students who can live more cheaply in a residential fraternity than elsewhere. The stigma attached to 'standardized minds' is ridiculous. Any person chooses most of his friends for what they have in common, not for the ways in which they differ". This writer believed that the most spirited groups on the campus were the fraternities and "fraternal groups" such as the McGill Outing Club and the staff of *The McGill Daily*. Therefore, he concluded, the answer was not fewer fraternities and fraternal groups, but more of them.

Macdonald College paid tribute to the 74 members of the college who died in two world wars in the sixth war memorial ceremony. Prime Minister Louis St. Laurent gave the memorial address. Shown above left to right: Dr. F. Cyril James, Principal and Vice-Chancellor of McGill; Mr. St. Laurent; Chief Justice O. S. Tyndale, Chancellor of McGill; Dr. W. H. Brittain, Vice-Principal of Macdonald College. Miss Virginia LeDain, Vice-President of the college's student society, has just placed a wreath at the War Memorial Plaque.

Dr. George F. Laing, of Essex Country Club, Windsor, Ont., has won the Ontario seniors' golf championship for the third time in a row. He carded a 75 over the par 71 Lambton course. Dr. Laing is a former McGill football great and was a member of the championship teams of 1912 and 1913, captaining the latter.

Brass Tacks . . .

(*Continued from page 20*)

tain, we keep in mind the fact that Young was a seasoned player in Big Four competition with Ottawa before entering college. But this new star from Ottawa, who has that same competitive spirit which made Young a standout, can do things that Young, who played in the era before the introduction of the forward pass, never dreamed of.

They say around Ottawa that young Crain is a better skier than he is a football player and, if he could spare the time, he could certainly make a berth on the Canadian Olympic ski team. We do not know anything about that, but we hope we know a great athlete when we see one and we think that the Montreal sports writers didn't completely appreciate this young man's talents. We do not hesitate to write this because we think, too, young Crain is not likely to let anything he sees in print go to his head.

As well as being elected captain of the team for 1952, Crain's feats on the gridiron were recognized by awarding him the Billy Lea Memorial Trophy, a solid gold watch, as the most valuable player to the squad. Captain Dave Caldwell was awarded the Fred Wigle Trophy for outstanding sportsmanship. The Touchdown Club Trophy for the best lineman went to Bill Pullar and the Lois Obeck Trophy for the most improved player to Hank Sliwka.

Highlighting the graduates' support of the football team during the season were the huge gatherings that attended the buffet luncheons before each contest and the work of the Touchdown Club, conducted by Hugh Savage. The attendances at these functions show how much the efforts of those who sponsored them were appreciated.

In other autumn sports, the track and field team, under the guidance of Coach F. M. VanWagner, as usual, distinguished itself by winning the intercollegiate title 74 points to 59 by its nearest rival, the host club of University of Toronto. Two records were broken, one by a McGill man, Don Blair, who smashed his own high jump record with a leap of 6 feet 2¾ inches. Hank Sliwka took time out from football chores to win the pole vault.

Other McGill winners were Dave Winship in the half mile, Farrell Hyde in the one mile, Lionel Whitman in the shot putt and Tink Kyte in the javelin. Kyte had been the outstanding man in the 79th McGill championships when he won the discus throw and took second place in high jump, shot putt and javelin.

The tennis competition ended up in a three-way tie between McGill, Varsity and University of Montreal. McGill, with Hall shooting a leading 155, took the golf crown and both the soccer and rugger teams brought home the intercollegiate championship.

Books

The Case for Conservatism

By Bernard Lande Cohen
Exposition Press, New York
143 pp. — $4.00

Mr. Cohen, a graduate of McGill University, has based his defence of the conservative viewpoint on economic grounds. The principles which can be derived from an understanding of the economic system, he believes, are applicable to politics and legislation as well. From his economic analysis, the author concludes that the possibilities of successful interference with traditional mechanisms are limited, and from this he infers that similar caution should be used regarding political and social innovations.

The Case for Conservatism, therefore, stands or falls with the author's economic position, and it is unfortunate that it is just this aspect of the work which is weakest. Most professional economists will sympathize with the charge that "the vast majority of books and articles purporting to deal with the 'social science' are unintelligible to the ordinary reader, and probably to the professional class to whom they are largely addressed". They will be joined by the ordinary reader, nevertheless, in insisting that a simpler substitute for "academic pedantry" be consistent and precise.

With the author's general position, that social change should be gradual, partial and a development of tried, existing institutions, most readers will be in agreement. It is regrettable that the elaboration of an interesting theme is marred by many inaccuracies.

Michael Oliver

The Labour Problem in the Public Service

By Robert Morton Godine
Harvard University Press,
Cambridge, Mass. 301 pp. — $8.00

This book fills a gap in the knowledge of both political scientists and economists. The political scientists have long been asking themselves what role unions can play in the public service. Striking against the state is either illegal or universally condemned in democratic countries. The closed shop and the union shop are inadmissable in the civil service, since Civil Service Commissions cannot resign to union leaders the selection or dismissal of employees. More important still, collective bargaining between the state and its employees is virtually an impossibility, since there is no legal equality between the parties, and the state with sovereign power can ultimately coerce its labour force. In these circumstances it has seemed doubtful that civil service associations can be genuine unions. Yet such associations have grown up in all democratic countries, many have become affiliated with the general labour movement, and all have acted more and more like the unions which are their counterparts in private employment. Mr. Godine analyzes their activities and, while he admits that there are inevitable limits to what they can do, shows that they can improve the civil servant's lot and increase efficiency in the public service.

For the economist this book sheds new light on a hitherto neglected part of the labour market and the labour movement. Public service unions have always differed with their brothers in the ranks of labour over such matters as job classification. The craft unions in private employment resist classification for fear that it will break down the apprentice - journeyman - master structure of the trades. Public service unions have supported classification, however, in order to secure uniformity of pay for similar work throughout the service. On the other hand, public service unions have often made common cause with employees of private industry, particularly where public servants are paid "prevailing rates" of wages, and where, therefore, public servants are interested in securing better terms throughout the trade. All unions have encouraged the idea that the government should be a model employer in order to put the pressure of good example to bear on private employers. At the unions' insistence, the eight-hour day was launched in public employment in order to force private employers, competing for the same labour force, to reduce hours.

The subject of this book is in the borderland between economics and political science. To treat it properly, the writer must appreciate the problems of both disciplines, and Mr. Godine has succeeded in this difficult task.

"Where They Are and What They're Doing"

(The McGill News welcomes items for inclusion in these columns. Press clippings or other data should be addressed, The Editor, McGill News, The Graduates' Society of McGill University, 3574 University Street, Montreal. Items for the Spring 1952, issue must be received not later than February 15th.

'01

Fuller, Professor Emeritus George D., B.A. '01 (McGill), Ph.D. '13 (Chicago), is still at home in his room in the botany building of the University of Chicago when he is in the city. This has been his headquarters for more than 30 years. Dr. Fuller, who recently celebrated his 81st birthday, still enjoys his many field trips which he takes in the interests of a more complete record of the flora of Illinois.

'11

Currie, Lt. Col. George S., B.A. '11, has been elected second vice-president of the Montreal General Hospital.

Savage, Dr. Alfred, B.S.A. '11, was elected president of the Canadian Veterinary Medical Association at the concluding session of the association's third annual convention in the Banff Springs Hotel. Dr. Savage, who is attached to the veterinary laboratory of the University of Manitoba, is a past president of the Manitoba Veterinary Medical Association Council.

'12

Davis, Senator J. Caswell, B.Sc. '12, has been named as honorary president of the L'Alliance Française of Winnipeg.

'16

Taylor-Bailey, W., B.Sc. '16, has been appointed president and managing director of the Dominion Bridge Company Ltd.

Mrs. Alice Johannsen Turnham, newly-appointed director of all McGill museums, arranges exhibits of one of the University's prizes, the Lyman Entomological Collection (insects).

Museum Space Badly Needed

A "place in the sun" for the tremendously valuable museum collections at McGill is the ambition of Mrs. Alice Johannsen Turnham, B.Sc. '34, who has been appointed director of all the university museums.

Mrs. Turnham, who has been on the museum staff for 10 years, succeeds Dr. T. H. Clark who will devote his full time to teaching and research in the new Physical Sciences Centre.

The new director says she would be happy just to get the famous McCord Collection of Canadiana out of storage and on display and to have better facilities for showing the scientific collections in the Redpath Museum and the collection of cultural and historical exhibits in other parts of the University.

The McCord collection, one of the most valuable sources of its kind for the Canadian historian, writer and student, cannot be put on display because there is no space anywhere in the university for it.

'17

Bone, Mrs. Alan Turner, B.A. '17, M.A. '20, has been elected president of the National Council of Women.

'19

Proudfoot, Mrs. David G. (Marion Lindsay, B.A. '19), is a prominent clubwoman of Oil City, Pennsylvania, being affiliated with various women's organizations both in the city and in the country. She has been president of the Belles Lettres club, is a member of the Oil City Garden club and holds membership in several more. She is also active in the Venango County Federation of Women's Clubs and Allied organizations, serving as public affairs committee chairman.

'20

Gordon, Dr. John Keith, M.D. '20, has been appointed medical director and an executive officer of the Sun Life Assurance Co. of Canada.

McLean, Dr. Angus H., B.A. '20, has been named dean of the Theological School at St. Lawrence University, Canton, N.Y. Dr. McLean was formerly professor of Religious Education at the school.

Rorke, Miss Christine, B.A. '20, has been appointed principal of the Girls' High School, Montreal, succeeding Miss Grace Gardner.

Young, Dr. Arthur Wilson, M.D. '20, has been appointed associate medical director of the Sun Life Assurance Co. of Canada.

'24

Tombs, Laurence C., B.A. '24, M.A. '26, was elected vice-president at the world congress of the American Society of Travel Agents in Paris, France, recently. Prior to arriving in Paris, Mr. Tombs led a party of 43 American and Canadian agents who were official guests of the Scandinavian and Finnish authorities. He gave a number of addresses in northern Europe and, as consul of Finland in the Province of Quebec, was received by Sakari Tuomioja, recently appointed Minister for Foreign Affairs in Helsinki.

'26

Amaron, Estelle, M.S.P.E. '26, has, since graduation, been doing Y.W.C.A. work in South East Asia, mainly in Burma and Ceylon. She represented the Y.W.C.A. of Sierra Leone, West Africa, at the World's Council of the Y.W.C.A. in Beirut, and has now taken up new work as organizing secretary for Sierra Leone.

Star, Dr. Marcus, D.D.S. '26, was recently elected president of the Mount Royal Dental Society.

'28

Woodruff, Richard S., M.D. '28, gave up the practice of hospital pathology in Pittsfield, Mass., in the summer of 1949 to join the faculty of the Medical School of the University of Vermont where he currently holds the rank of Assistant Pro-

fessor of Pathology. His work is divided between the teaching of pathologic anatomy and cancer research.

'29

Tremain, Kenneth H., O.B.E., B.Sc. '29, has been appointed sales manager of the Ronalds Co. Ltd.

'30

Boyce, Harry M., B.Com. '30, is vice-president, treasurer and director of the British Columbia Telephone Co.

MacLeod, Dr. John Wendell, M.D. '30, has been appointed Dean of Medicine at the University of Saskatchewan.

Ross, Dorothy J., B.A. '30, M.A. '32, Ph.D. '39, has been appointed vice-principal of the Girls' High School, Montreal.

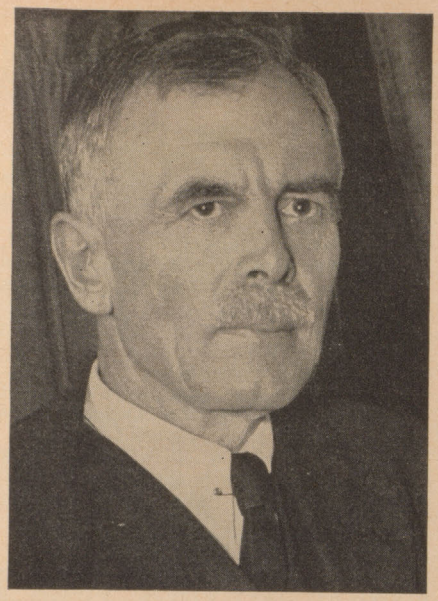

'31

Grace, Dr. Nathaniel H., Ph.D. '31, one of Canada's outstanding research scientists, has been appointed as director of the Research Council of Alberta.

Rollit, Dr. J. Buchanan, B.A. '31, M.A. '32, Ph.D. '34, has been elected as Manitoba vice-president of the Institute of Public Administration of Canada. He is a fellow of the Royal Economics Society, of the Statistical Society and a member of the Canadian Political Science Association.

'33

Connelly, Brigadier A. B., B.Eng. '33, will take up his appointment in Tokyo in December as Commander of the Far East Military Mission. He is at present Commandant of the Northwest Highway System with headquarters in Whitehorse, Yukon Territory.

Gen. A. G. L. McNaughton, C.H., C.B., C.M.G., D.S.O. (B.Sc. 10, M.Sc. 12, LL.D. '20), wartime commander of the First Canadian Army, has been named honorary colonel of the McGill University Contingent, Canadian Officers Training Corps.

'35

Hutchins Lt. Col. John A., B.C.L. '35, has been acting Commander of the Saskatchewan Area. He was flown out to Korea for the Court Martial Trials.

'36

Baxter, Dr. Hamilton, M.Sc. '30, M.D. '36, has been elected president of the Canadian Society of Plastic Surgeons at the annual meeting held in Montreal and has also been elected president of the Quebec Society of Plastic and Reconstructive Surgeons.

'37

Scott, Joseph R., B.A. '37, has given up schoolmastering and is with Godfrey L. Cabot Inc., Boston, Mass.

'40

Battista, O. A., B.Sc. '40, has been promoted to the newly-created position of senior research chemist at the American Viscose Corp.

Henderson, Rev. Lloyd, B.A. '40, M.A. '41, is Canada's and probably North America's only clergyman-mayor. In October he was re-elected for a third consecutive term as mayor of Portage la Prairie, Man., where he is pastor of First Presbyterian church.

'43

McCorriston, Lila Redmond, B.A. '40, M.D. '43, is the first Canadian woman to be certified as a specialist by the American Board of Dermatology. Holder of diplomas in dermatology and syphilology from McGill and New York University, Dr. McCorriston has been certified as a specialist by the Royal College of Physicians and Surgeons of Canada.

'44

Fitzpatrick, J. G., Jr., B.Sc. '44, has been appointed Maritime manager of Richard & B. A. Ryan Ltd. He will make his headquarters in Saint John, N.B.

Dempster, A. L., B.Eng. '44, and Mrs. Dempster (Shirley Potter, B.Sc. '46) have returned to Montreal from British Guiana where they spent three years. Lou Dempster is with the Aluminum Co. of Canada.

'47

Draper, Catherine, B.A. '47, was one of six young Canadian delegates who attended the International Advertising Conference in London, Eng., this past summer.

Jooste, Mrs. Rene (Freda Campbell, B.A. '47) has returned to Montreal after spending the summer in Capetown, South Africa, where her husband (M.Sc. '47, Ph.D. '49, McGill) is with the Aluminum Co. of Canada. Dr. Jooste is now in French West Africa.

'48

Pfeiffer, Gordon M., B.Com. '48, has recently been appointed district sales representative for Eastern Ontario by the Ford Motor Co. of Canada.

Reid, Beverley, Arts '48, has been in England for the past two years where she has been operating her own travel agency, Can-Am, 122 Wardour St., London.

Vrooman, Jane, B.A. '48, has returned to Montreal after spending some time in Vancouver as fashion director of the Hudson's Bay Company.

Yates, Havelock H., B.Sc. '48, is with the research division of the Esso Laboratories of the Standard Oil Development Co. of Linden, N.J.

'49

Pitfield, Sally, B.A. '49, has the unusual title of "fashion accessorizer" in one of London's West End stores. She arranges the displays and recommends various accessories such as gloves, hats and shoes. Prior to going to England, she was with Mrs. Doreen Day in Montreal where she received her training.

Plessers, Arthur Gerard, B.Sc. Agr. '49, has been awarded a scholarship by the Agricultural Institute of Canada, sponsored by The T. Eaton Co. Ltd. He will study plant genetics at the University of Minnesota.

'50

Bingeman, Carl Woodrow, B.Sc. Agr. '50, has been awarded a scholarship by the Agricultural Institute of Canada for advanced work in soil science at Ohio State College.

Braaten, Chester R., D.D.S. '50, has been awarded a W. K. Kellogg Foundation Fellowship for postgraduate training in "Dentistry for Children" at the University of Michigan.

Fraser, A. J., B.Sc.-Phys.Ed. '50, is with the Physical Education Department at the University of Manitoba.

Larson, Dr. George H., D.D.S. '50, who for the past year has been a dental interne at the Mary Fletcher Hospital at Burlington, Vt., has now established his practice at Rutland, Vt.

Power, Anita, B.A. '50, has returned from a year in Spain having obtained a Diploma de Estudios Hispanicos, Facultad de Filosofia y Lelras, from the Universidad de Madrid.

'51

Berger, Hyman, B.Sc.-Phys.Ed. '51, has joined the physical education staff of the Y.M.-Y.W.H.A. as a gym instructor.

Clancy, Miss Barbara, B.Sc.-Phys. Ed. '51, has been appointed physical education teacher at D'Arcy McGee High School in Montreal.

Gilbert, Verdun Palmer, D.D.S. '51, was awarded the second prize in the "Canadian Dental Association's Annual War Memorial Award". He is a member of the Division of Dentistry, Department of Health and Welfare, British Columbia.

Hutton, Frederick A., B.Sc. '51, is taking post graduate work in the Department of Physiology at the University of Vermont College of Medicine at Burlington.

Class Notes

Science '08

Every year since graduation the class of Science '08 has gathered for its annual dinner and its 43rd anniversary was held this year on October 27 at 7 o'clock at the University Club, Montreal.

Present were Walter J. Ahern, Walter O. Briegel, John Callaghan, Evan Cameron, James S. Cameron, John Forbes, J. Kemp, L. A. Kenyon, Dave Manny, Ed. Montgomery, Gilbert Robertson, A. B. Rogers, Walter Spencer, E. Winslow-Spragge, A. Campbell Wood, Gordon MacLeod Pitts.

The class noted with deep regret and sorrow the passing of Tom Ballantyne, John Parham and Harry Bates since the last meeting.

One of the most faithful attendants at these reunions, Charles Ayre, had suffered an accident which caused him to miss the 1951 reunion. A recording was made of the celebration and will be played to him in hospital where the best wishes of the class were also sent for his speedy recovery.

The evening saw the usual round of anecdotes and class news and a series of colored slides which Gordon Sproule has made for the Graduates' Society was also shown and much appreciated. A very pleasant evening terminated at midnight to be reconvened next year—same time, same place.

G. MacL. Pitts

Engineering '35

The class reunion of Engineering '35 was held on the night of the McGill-Varsity game at the Hotel de la Salle, Montreal, with the following in attendance: Jim Leahey, Toronto; Doug McLeod, Moose Jaw; Alex Rose, Ottawa; Lorne Russell, Jack Kazakoff, Don McMartin, Bill Swift, Jim Jeffrey, Jack Houghton, Claude Robillard, Jason Ingham, Henry Burri, Os Barry, Johnny Riddell, Gord Auld and Ken Reynolds, all of Montreal.

In the usual democratic manner, "engineered" this time by Jim Leahey, Lorne Rowell was returned president and Ken Reynolds vice-president. The new secretary-treasurer, replacing Don McKay at his own request, is Gord Auld. Jason Ingham, of course, is permanent honorary president. Permanent publicity manager is Os Barry. The field representatives are now Russ Dunlop (Kingston), Jim Leahey (Toronto), Ernie Brown (Ottawa) and Doug McLeod (Western Canada).

It is hoped to have more class news in the next issue of *The News* and those who have same should get in touch with the nearest representative or the secretary-treasurer, c/o T.C.A., Montreal. It could be interesting, for instance, to watch developments in the stork derby which is a dead heat between Rowell (5), Riddell (5) and Reynolds (5) the latter dark horse counting only two at the same time last year!

D. G. Auld

McGill Society of Great Britain Meets

Just at the time for going to press a letter was received from P. L. Backus, honorary secretary of the McGill Society of Great Britain, stating that the society held its dinner on November 16. Lord Woolton was the principal speaker. Among those who were expected to attend were the Canadian High Commissioner, Dana Wilgress, who is honorary president of the society; Lord Balfour, Lord Selkirk and Dr. Logan, principal of the University of London. Many fellow graduates of other Canadian universities had been invited to attend.

Deaths

In the Summer 1951 issue, the death of Hamish Heney McIntosh, M.D. '43, was reported. This degree should have read M. D. '03, and should not be confused with Hamish W. McIntosh, M.D. '43, who is presently living in Vancouver.

Ballantyne, Thomas Bell, B.Sc. '08 at Toronto on Sept. 16, 1951

Deblois, William Howard, B.Sc. '01, at Kingston, Ont., on Aug. 28, 1951.

Donnelly, Miss Beatrice Ann, Bach. Mus. '10, at Montreal, on Sept. 2, 1951.

Fels, Moses A., B.C.L. '24, at Montreal, recently.

Fillmore, Millard James, M.D. '14, on Mar. 12, 1951.

Jacques, A. George, B.Sc. '17, at Montreal, recently.

Kaplan, Harry A., B. Com. '22, at Montreal, on Mar. 14, 1951.

Macnaughton, G. Kerr, M.D. '06, at Cumberland, B.C., in Sept. 1951.

Racey, P. W. B.Sc. '07 on Sept. 20, at Oakland, Calif.

Skelly A. J. M.D. '24 at Pembroke, Ont., on April 2, 1951.

Sutherland, Thomas Wellington, M.D. '12, at Vancouver, on Oct. 19, 1951.

William Forrest Angus B.A.Sc. '95, outstanding industrialist and philanthropist, died at his home at Senneville, P.Q., on October 14, 1951. He would have been 79 years old on October 28. Mr. Angus was president of the Dominion Bridge Company Ltd. and of Dominion Engineering Works Ltd.

Swindlehurst, Albert, B.C.L. '95, at Hawthorndale, on Sept. 4, 1951.

Vaudry, Miss Mary Olive, B.A. '96, on Jan. 26, 1951.

THE SENATE of McGill University records with a deep sense of loss the death on September 6th, 1951, of George William Scarth, Emeritus Professor of Botany and formerly Chairman of that Department.

The eminence of Dr. Scarth as a plant physiologist and as an original investigator in this field was attested by the American Society of Plant Physiologists, who in 1944 made him a Charles Reid Barnes Life Member of the Society.

Among his many friends, George Scarth will be especially remembered for his amusing absent-mindedness and for his endearing gift, less common in professorial circles, of silence. With his pleasant sense of fun and humour he was most happy in his quiet academic and family life and deeply attached to the University. Here in Montreal and in Macdonald College there will remain pleasant recollections of a modest, thoughtful, and kindly character.

tried and (at the very least) jailed.

I was astounded. It was, I argued, a straightforward newspaper assignment.

"To you—yes," he replied. "But to this government, it was espionage."

In the days of *The McGill Daily* it was much simpler. The only enemy was Toronto Varsity and the only crisis came at the April examinations.

THE E. B. EDDY COMPANY

papermakers at Hull, Canada

INFORMATION *and* PRACTICAL IDEAS

of interest to Engineers and Engineering Students

are contained in a varied selection of pamphlets and technical papers published by Crane. These include:—

"Flow of Fluids through Valves, Fittings & Pipe"
—a 92-page technical paper, presenting the latest available information on this subject.

"Bringing Piping up to Peak Efficiency"
—technical manual for engineers, students and industrial maintenance men.

"Piping Pointers for Industrial Maintenance Men"
—a practical reference guide, completely covering the fundamentals of piping systems.

"Pipe Coils"
—a comprehensive catalogue of value to all users of coils for industrial or commercial purposes.

"Aids to the Selection of Corrosive-Resistant Piping Material"
—authoritative pamphlet containing the famous "Stop and Go" Charts.

Copies of Crane pamphlets are available without charge upon application. Write General Office or any Crane Branch for those in which you are interested.

Perfection the Sum of Many Details

IN this magnificent tapestry every separate stitch was made under the supervision of a master craftsman, and each contributes its part to the whole effect.

Likewise in steel construction, every detail of design and workmanship must be studied, and each contributes to the safety and durability of the finished structure. But once it is complete, these all-important details are no longer visible, and your only assurance lies in the integrity and reputation of the fabricator.

Drifters

REALLY PUT YOUR AIR TO WORK

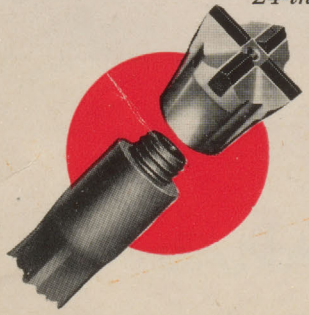

Note the convenient location of the controls.

Set up an Ingersoll-Rand Drifter underground. Fasten to it a one-inch air hose and a half-inch water hose. Crack the throttle, collar the hole, then open the drill up wide and watch it eat into the rock. You will see record-breaking drilling speed—speed and durability; you will see performance from a medium-weight machine that enabled two experienced mining men to report as follows:

"The Ingersoll-Rand Power-Feed Drifter outdrills our other machines by three holes nearly every shift."

"The Power-Feed outdrills our other machines as much as four inches in a 24-inch run."

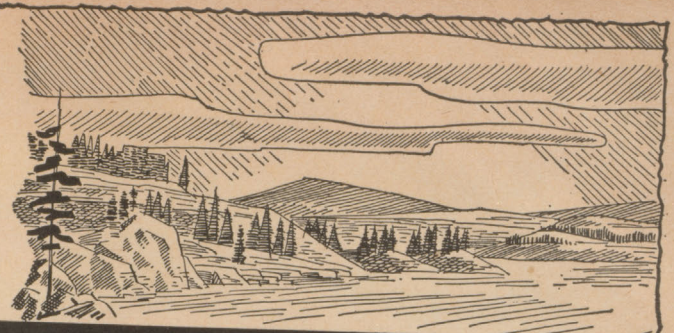

Carset 4-pt. Jackbits — detachable for practical drilling.

SERVING CUSTOMERS IN EVERY PROVINCE

Progress

This company believes that the greater the use that is made of electric power in Canada the higher will go our national standard of living and lower will go the costs of producing goods of every variety.

It is this belief, held now for nearly sixty years, that has determined the Company's unwavering policy—to produce more goods for more people at less cost.

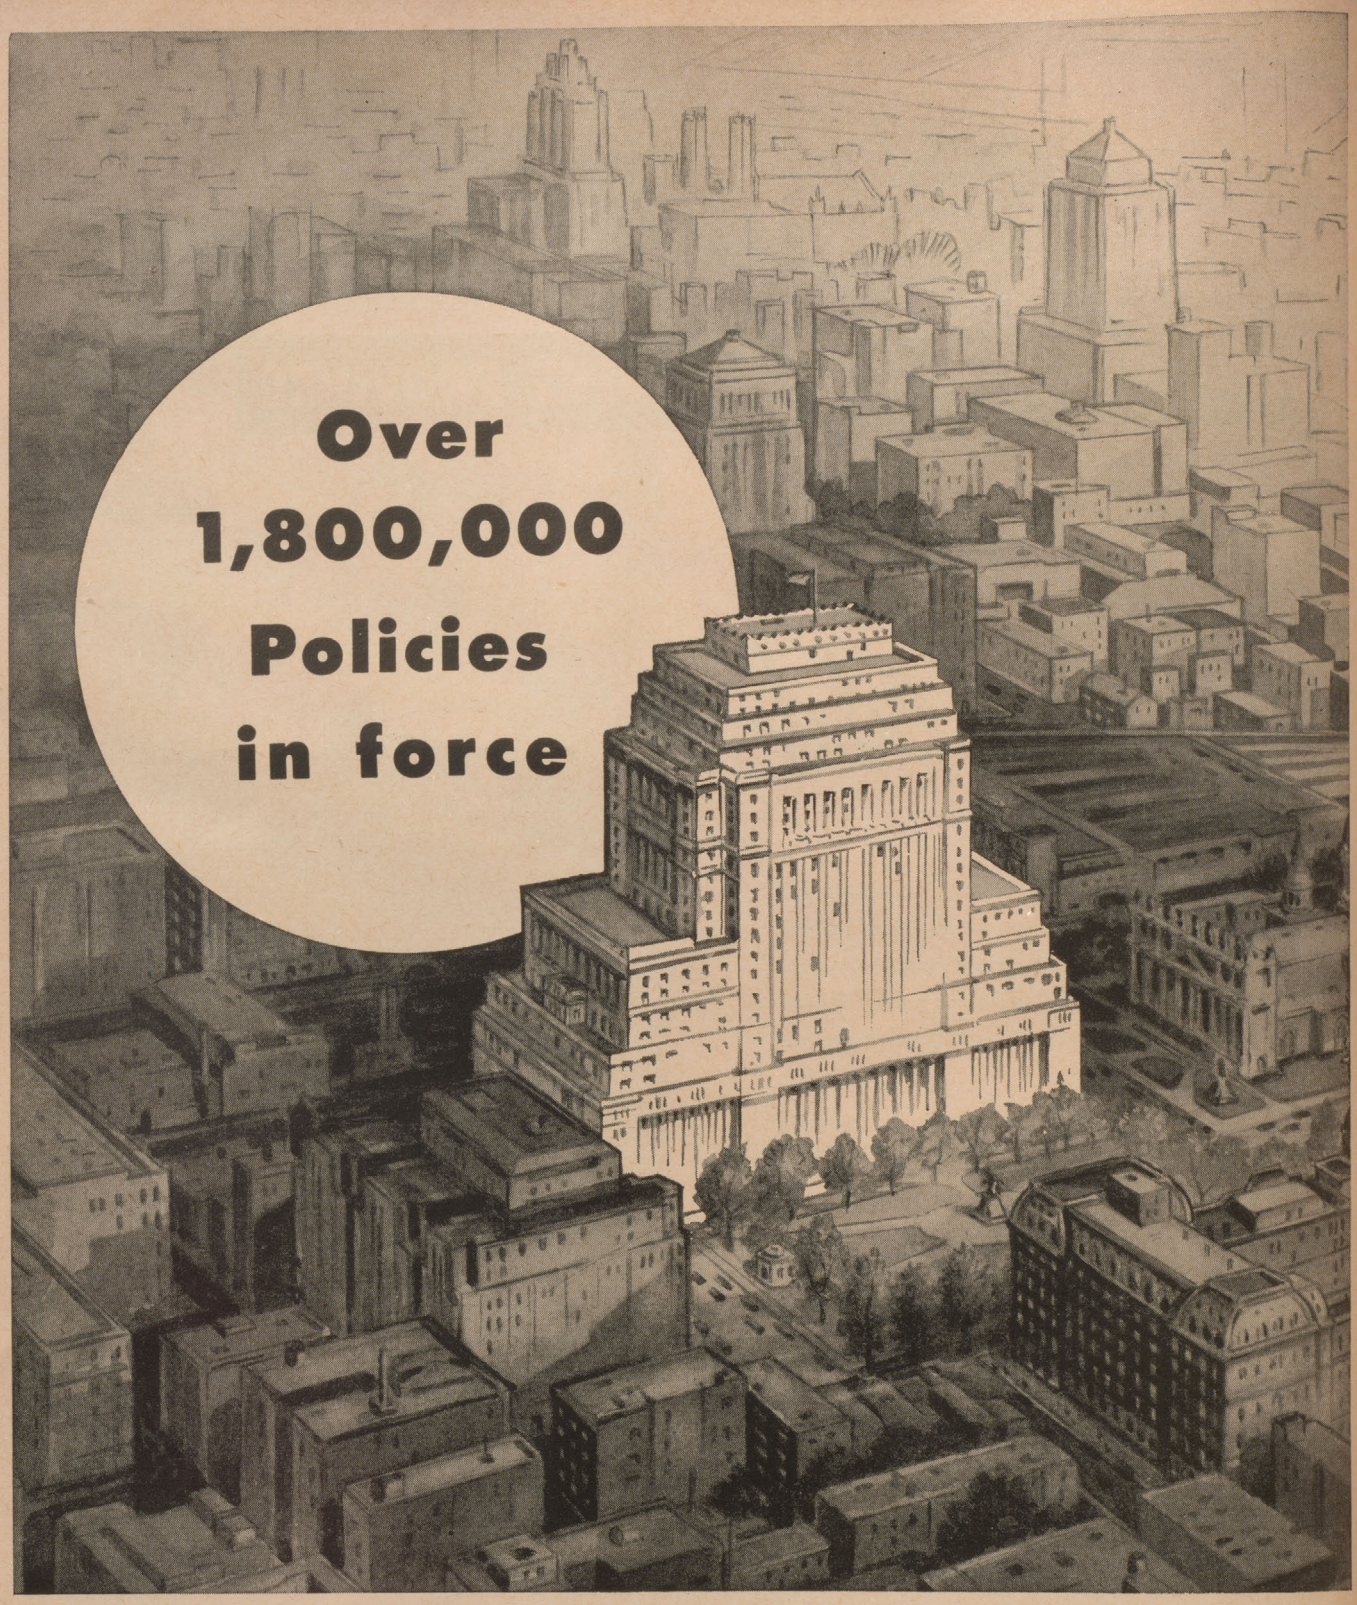

Canadian General Electric is proud to be playing a part in the ever-growing electrical development of our country.

He's cutting down the cost of your new suit

Viscose rayon, a product of the Canadian forests, with its amazing versatility, its superior performance and its outstanding value is putting a check on the rising cost of living. Using viscose rayon alone or blended with wool or other fibres, Canadian textile mills are producing a wide range of excellent fabrics . . . fabrics which now make it possible for a man to buy a good suit **at a price he can afford to pay!** The new rayon and rayon/wool suits represent far and away the best value today. Consider these facts: Because of viscose rayon, colours are richer. Patterns are smarter. Wearability is increased. And, with all these advantages, prices are lower. Ask your clothier about these fine new suits. He knows fabrics . . . you can depend on his good judgment.

Cover Picture

McGill's Redpath Museum is one of the many outstanding examples of how a university may serve the community. The museum, apart from performing its primary function as a storehouse of valuable information and being a ready reference for research students in science and history, is always one of the main points of interest on the itinerary of school tours.

Visits of school classes to the museum are conducted by trained assistants of the Junior League of Montreal and our cover picture shows a young visitor making the acquaintance of a member of the Sir William Logan Collection, a prehistoric monster known as a glyptodon. This ancestor of the modern armadillo goes back about 1,000,000 years. The intrigued youngster is Ruth Gottlieb, Grade VII pupil of Alfred Joyce School in Outremont.

A Report on Giving and Achievement

READERS of this issue of The News *may perhaps wonder how a picture of a small girl making the acquaintance of a glyptodon got on the cover of their favourite periodical and what its significance can be as far as* The Gift Record *is concerned.* The News *and* The Gift Record *have been combined in an attempt to tell, at one and the same time, the story of first, what McGill men and women are doing and second, what they are doing for their Alma Mater.*

If it can be agreed that one of the functions of a university is to serve the community in which it is located and the nation as a whole, then one of the ways to achieve this is to train men and women who can fulfill this ambition. The quarterly report on the doings of McGill people thus finds a natural place beside the names of those who have made Fund contributions toward helping the university carry on its activities.

An outstanding example of service will be found in the all-too-sketchy account of the tremendous contribution to humanity as a whole, and his adopted province of Saskatchewan in particular, made by a McGill man, Dr. Allan Blair. McGill helped to train him for the job he was to do so well before death brought a close to a brilliant career in cancer research. In this way, McGill shares in the honours that have been paid him and, at the same time, the function of the university has been fulfilled.

We think a number of other articles also illustrate how much a university can contribute in the type of men and women it turns out. There is, for instance, the account of the work of Dr. Duncan J. McDonald in assessing the effect of the atomic bomb explosion on future generations at Hiroshima and the impact of this terrible weapon on humanity as a whole.

There is the story on research in nutrition being carried on at Macdonald College and there are pictures on other pages to show, as well, some of the various forms of research in progress within the university. There is a reference also to McGill's part in bringing into being the Neurological Institute, for this was a McGill project and the work of friends of the university in the beginning, and it is continuing to be so in the building expansion described in the article. And there is the story of the Redpath Museum and its functions, of which one concerns the little girl and the glyptodon.

In what might be called the feature article, Clarence McCaffrey tells about "The Famous Class of Law '21" and it will be noticed that more than a dozen members of this one class in Law have distinguished themselves as public servants or in some form of service to the community and to the nation at large.

The rest of The News *deals with other things McGill men and women are doing: how branch officers in various parts of the world are playing their part in serving the university; of the efforts of the Graduates' Athletics Association; of the willingness of others to assume new duties that the business of the university may go on and, finally, the very direct expression of generosity in pages and pages of* The Gift Record.

Most of these articles were chosen, not because they were suitable for an issue which combined with The Gift Record, *but because they are merely highlights of a continual flow of information about the doings of McGill people to come to this desk. In this respect, every issue of* The News *could be said to be, in part, a gift record.*

Because of space restrictions, some articles already prepared had to be omitted, but they will appear in the summer issue. One other, already promised for publication, is still awaited from the "only Harvard man who ever milked a dead moose". For those who are still curious about this episode, and that includes, we believe, Editor William Bentinck-Smith of the Harvard Alumni Bulletin, the explanation is that the would-be author is trying to complete a book. We hasten to assure one and all the book is not about the dead moose and we trust the article for The News *will be ready before the summer deadline.*

D. A. L. MacDonald.

The Famous Class of Law '21

One of its number recalls its notables, some of their doings and their foibles

by Clarence F. McCaffrey, Q.C.

The Toronto Saturday Night once referred to it as "The famous Class of Law '21 of McGill University."

From it has come two cabinet ministers, Doug Abbott and Brooke Claxton; a judge of the Superior Court, Arthur Smith; a judge of Social Welfare Court, Gordon Nicholson; three senior crown prosecutors, John Long, Ivan Sabourin and John Crankshaw; one bank president, Graham Towers; one leader of Her Majesty's Loyal Opposition, George Marler; one member of the Quebec Upper House, George (Bunny) Foster; one High Commissioner, Ambassador, Judge of the Exchequer Court and Chairman of the Board of Transport Commissioners all wrapped up in the person of John Kearney; one Quebec Public Service Commissioner, Joe Harold and many others with distinct claims to fame.

This is not to be considered as a class history by any means, for that would require a book and our space is limited. It is just a few random reminiscences of this particular Class.

The Faculty of Law at McGill has always been slightly "off the campus." The vast majority of its students have degrees either from McGill or other universities and, as a rule, its members do not mix with the rest of the student body. But Law '21 was unique because it took in many whose legal studies had been interrupted by World War I and others who had been away from college for a number of years. They were men rather than college boys.

Law '21 started out in the usual way in the fall of 1918. The country was still at war and, while there was a rift in the war clouds, it was impossible to foresee how soon it would end.

Clarence F. McCaffrey, Q.C.

From the fall of '18 through the winter of '19 and '20, returning soldiers swelled the ranks of the class until a record enrolment was received.

The Dean at that time was Robert Warden Lee who came to the university from England in 1914 and who weathered the war years but was unable to cope with the peace. In 1920, he retired to take the Chair of Roman Dutch Law at Oxford. He was a man of aquiline features, great erudition, a fine wit, with sarcasm the like of which has never before or since been seen at the University. A gracious English gentleman who at all times considered his student first, and upon whom he left an indelible mark.

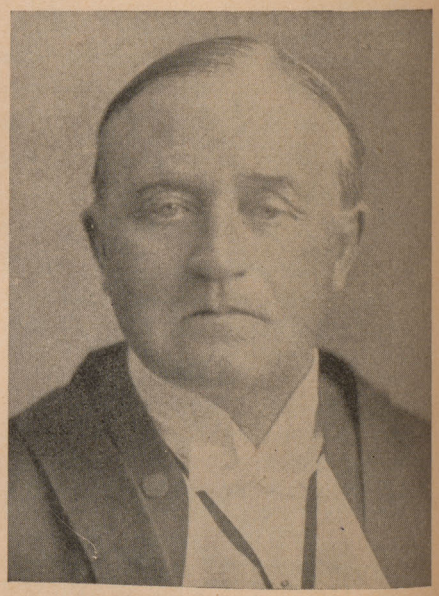

Dean Robert Warden Lee

When mentioning incapacitated persons in the province of Quebec he would invariably refer to them as "insane persons, married women and criminals," thereby neatly bracketing the married women and stressing their position in the province. He once ticked off Hilary Robertson for quoting Latin to him with a Jesuitical rather than an Oxonian pronunciation, although the only place where Robertson could have acquired such a pronunciation was perhaps when he overheard some good French Canadian saying his prayers in Latin.

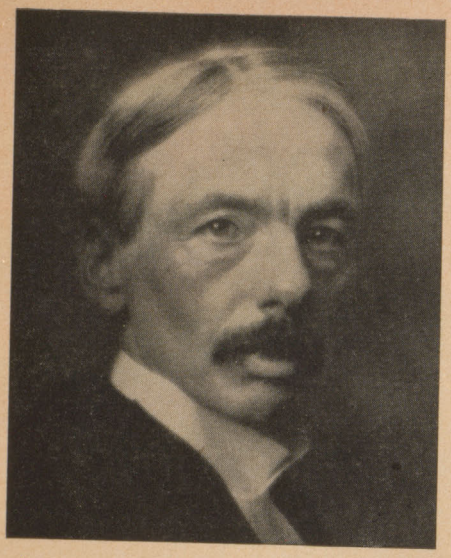

I am delighted to report that Dean Lee is still alive and teaching at Oxford.

Some of the professors of that day were the great leaders of the Bar, and I well recall Hon. P. B. Migneault, affectionately known to his students as "Pas Beau," of the Supreme Court of Canada; Aimé Geoffrion and Judge Greenshields, the students' great delight; Hon. Mr. Rinfret, now of the Supreme Court; Eugene Lafleur, perhaps the greatest of them all and Mr. MacDougall, his partner; Dr. Willis S. Johnson and the distinguished Mr. W. de M. Marler, among others.

I do not think a University was ever so glad to be rid of a class as it was of this one. The professors would announce the date of an examination

Mr. Justice R. A. E. Greenshields

Eugene Lafleur

in this fashion: "Gentlemen, you will have your examination on such and such a date," to which the class would answer: "We will not," and the dates were generally set by the students themselves.

It cannot be said that, in spite of the galaxy of professors the students gave their utmost attention to the pearls that were cast before them. At eight o'clock, on frosty winter mornings when Judge Surveyer would come to lecture on Civil Procedure, there would be about ten students in attendance, but when he called the roll, miraculously he got answers of "Present" to about sixty queries. I recall one morning with an attendance of about eight and getting a "present" as each name was called, then suddenly a dead silence when a certain name was called. The distinguished, but gentle, Judge raised his head and said: "My, my, has Mr. Blank no friends among you this morning?" On another occasion he solemnly informed us: "You know, gentlemen, this is a very old house (it was the Coristine house on University street) and there are times when I am convinced that it is inhabited by ghosts."

The late Judge Greenshields was renowned for his wit and sarcasm. He repeatedly told us: "Gentlemen, I care not what intelligence you possess, with what assiduity you may pursue your studies, you will never learn Criminal Law from the Criminal Code." He carried on a one-man feud with its long-dead codifiers.

Law '21 had many members who have since distinguished themselves but, in particular, it had one who distinguished himself as a student. I refer to the late Frank Genest, who created the lovable character Si Whiffletree, who became a fabulous personality around McGill. Dink Carroll, John Gallery and Gordon Nicholson were stars of the rugby team. Dink is now the Sports Editor of the *Montreal Gazette* and a contributor to such outstanding publications as the *Saturday Evening Post* and the *Readers' Digest*. John Gallery is engaged in the publishing business and Gordon Nicholson is a judge of the Social Welfare Court where he has the onerous task of solving family troubles in a courteous, gracious and distinguished manner. The only trouble with him is that he is working entirely too hard, but I presume the conscience of the Nicholsons, who have for many years been connected with the University, will not allow him to do otherwise.

I always thrill when I hear or read one of Doug Abbott's budgets. He balances billions, and I recall him in a debate at McGill quoting John Stuart Mill, and adding the totally unnecessary rider, "since deceased, I believe." Doug was always hard working and sincere and, even in his young days, was recognized by his fellow students as one who would succeed.

Brooke Claxton is the son of a distinguished jurist. He early felt the weight of responsibilities and I sincerely believe that in every task which he has accepted, and done so remarkably well, the honour was of a distinctly secondary nature and he is gratified that he is able to spend his fine talents in the service of his country.

One day in the Common Room, one of our fellow students announced that he was through with Law and had accepted a position with the Royal Bank of Canada. We were outraged at this defection and told him with dire foreboding that in twenty-five years he would still be toting up figures in a ledger and signing bills of exchange. He refused our sound advice and went right ahead to become quite a personage in banking circles. His name is Graham Towers.

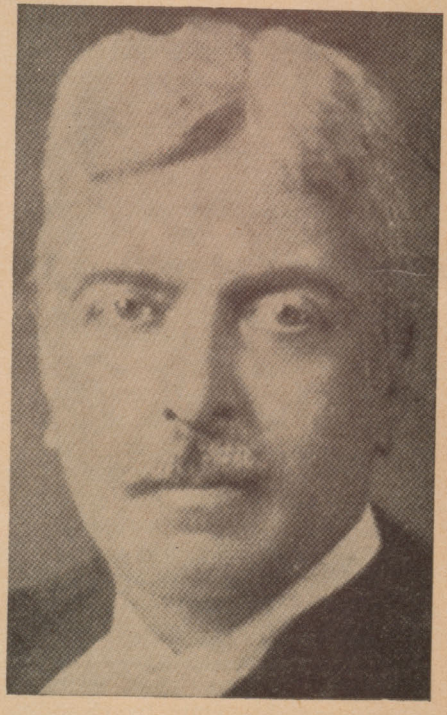

Paul Hutchison is the studious type, club man, and lawyer to Montreal's elite. I recall when we were taking our examinations in the University of Montreal building on St. Denis street, someone had stolen Hutchison's hat. I looked at the ghastly thing he was wearing and said that I had no idea what his looked like but he certainly got the worse of the deal. He indignantly reproved me and assured me that this was his own new hat. It was the custom at that time to wear as disreputable a looking hat as possible.

Whatever fame Hutchison will acquire as a lawyer will be dimmed by comparison with the magnificent record which he established as commandant of the Black Watch during World War II. He not only made an excellent commandant but took on the difficult position of Public Relations Officer and addressed many service clubs and others in the interest of the Black Watch. To one of his shy nature this must have been the more onerous part of his position.

Talking about hats, Buck Buchanan refused to wear any for a long time. Now a sound corporation lawyer, his nature has changed not one whit. At college, he used to sit in the rear of the class and with his pen knife etched out the whole Ypres Salient on a battered desk. He has all the loving faults of the Irish and few, if any, of their execrable virtues. He breakfasts in Walton's and dines in an exclusive club. While other mortals are content to drive an ordinary car, Buchanan drives a station waggon.

Two great friends of that year were Hank McKean and Curzon Dobell. Their particular delight consisted in seeing how fast they could drive Dobell's car along Sherbrooke street

(*Continued on page 84*)

Mr. Justice E. Fabre Surveyer

Redpath Museum Marks 70th Birthday

Special exhibitions of great interest are staged to celebrate event

by Alice J. Turnham,
Director McGill Museums
and
Beverley Barclay

For seventy years the portrait of Peter Redpath has studied the changing scenes and growing activity within the museum which bears his name. His keen eyes look out today from the past, confident that the institution which he founded in 1882 to house the University's geological and zoological collections was then the most up-to-date college museum in the country.

Despite somewhat of a struggle to keep up with the times, the museum has continued to serve the University well. Its possessions have steadily increased and, though the building still remains essentially the same, the collections now include an astonishing variety of subject matter, from ichthyosaurs to fluorescent gems, from Egyptian mummies to Birds of Paradise. This year, to honour its seventieth anniversary, a series of special exhibitions and events will be staged to emphasize the contribution which the McGill University museums are making to the educational life of the University and of Montreal.

The expanded collections today comprise some 500,000 objects which the Redpath Museum is now totally inadequate to display and maintain. Exhibits and stored specimens are therefore scattered under four separate roofs on the McGill campus, and the problem of co-ordinating and utilizing them has become acutely difficult for the museum administrative staff. The Redpath Museum remains, however, the hub of the museum wheel, with spokes radiating to the McCord historical collection in the old house on the corner of McTavish and Sherbrooke streets, and to the loan exhibit on the Ancient World in Divinity Hall, and the loan exhibit on Eskimo life in the Arctic Institute of North America.

Faculty and students in a number of University departments, including Geology, Zoology, Fine Arts, History, Sociology and Divinity make fair use of the museum collections. At the same time, it is sad but true that hundreds of other students spend four years on the campus as undergraduates without ever seeing a museum exhibit. Only by providing material of interest to a wide variety of tastes and by altering exhibits to suit the demand and the season can we hope to draw some of these into the Museum. Once there, we want the place to be so interesting that they will feel compelled to come back, having discovered for themselves interests far beyond the demands of their college courses.

It is a source of deep concern that insufficient funds and lack of specialized staff have kept the McCord Museum closed for sixteen years. Many a Montrealer remembers visiting it with school classes in his youth. Today its 30,000 objects, illustrating the development of Canadian culture lie shrouded in storage, accessible only to students and specialists by appointment with the director or when selections are made for lending or for temporary displays. The major part of the collections remains, at best, a latent potential, bulky proof that the true usefulness of the McGill museums cannot be fully realized until all their possessions are efficiently co-ordinated in one functional building.

The routine work of the general museum staff, however, goes steadily forward. Collection, preservation and exhibition of specimens, research and identification of objects, coupled with instruction to visiting groups and loans to schools and other organizations all centre in the Redpath Museum where much progress has been made during the past year.

Most important advance has been reorganization of the working area which became available on removal of a portion of the Geology Department, formerly installed in the museum, to its new home in the Physical Sciences Centre. Space thus released has been converted into administrative offices; enlarged quarters for the Lyman Entomological Collection where close to 150,000 insects and 2,400 books are available for study on request; a workshop, which is in constant use for preparation and repair of specimens and construction of new exhibits; a zoological laboratory with hot water, refrigeration and other necessities of taxidermy; and a special exhibition room which will enable the museum to rotate some of the wealth of material which has been relegated to storage for so many years.

First exhibit in the new room was an attractive scientific display, Birds of Montreal, assembled in honour of the American Ornithologists' Union which met in Montreal in the Fall of 1951. Souvenirs of Former Royal Visits provided a timely background of McCord material for the recent visit to the McGill Campus of Their Royal Highnesses. The current exhibit, The Fur Trade, combining McCord and zoological material, will be followed in the Spring by The Seas Around Us, in tribute to Dr. P. P. Carpenter whose Mollusc Collection formed part of the original nucleus of the Redpath Museum.

Meanwhile there are many research problems requiring specialized attention. Chief among these is a three-year project centred on the unique and irreplaceable Carpenter Collection and carried out with funds generously provided by Mr. Lovell G. Mickles, an enthusiastic local malacologist whose private collection of Cuban shells is one of the museum's recent valuable acquisitions. Under the Mickles' Project the 100,000-odd Carpenter specimens comprising one of the three largest shell collections in North America will be catalogued, evaluated and made scientifically available for the first time since they became University property in 1867. This remarkable study collection can then be condensed into much less space, leaving only a synoptic collection and some of the more spectacular specimens on public display. This in turn will make room for further modification of the remaining zoological exhibits. Similar condensations are scheduled for the geological collection, but these changes are major projects which will take considerable time to complete.

Every year the museum receives many requests for guide service for visiting groups, but because of previous commitments the staff is fre-

University Mourns Beloved Monarch

Immediately the announcement of the death of King George VI was received at the University, Mr. Jacques Tetrault, President of the Students' Society, issued the following message:

"Today at McGill the flag flies at half-mast and we, as students of McGill and citizens of Canada, wish to join with the rest of the Commonwealth in expressing our sincere sympathy to the Royal Family.

"The Crown, as a symbol, must continue and it is with mixed feelings that we utter the words: 'The King is dead; long live the Queen.' For King George was a man loved and respected, who instilled courage and confidence amongst his family of nations in troubled times and looked to its welfare at all times. The King gave dignity and strength to his office and, in our generation when tradition frequently has been too readily cast aside, his presence on the throne gave full meaning to a great heritage.

"With our deep-felt condolences, we also send our warmest wishes to Queen Elizabeth for a happy and peaceful reign. It is but a short time ago that we were honoured by the visit of the Royal Couple. As then, we were united with the Princess in a period of happiness, so today we are united with the Queen in a period of grief and sorrow. And, for the future: 'God Save Our Gracious Queen.' "

The Principal issued the following announcement:

All social activities and public functions on the part of staff and students of McGill University will be cancelled or postponed until after the funeral of the late King."

This meant that the last performance of the McGill Red and White Revue, which was to have been given on the evening of Feb. 6, was cancelled; all intercollegiate competitions scheduled for the weekend of Feb. 9-10 were cancelled. The McGill Winter Carnival which was to have opened on Thursday evening, Feb. 14, was also cancelled.

The Principal, on behalf of the Board of Governors and Senate sent the following cable to Her Majesty the Queen:

"Your Majesty,

The members of the Board of Governors and of the Senate of McGill University express to you their humble duty and their deep sense of the loss that you have suffered in the death of your father. To each of us, as to every individual throughout the Commonwealth, the late King was an exemplar, sharing our joy on proud occasions and standing forth, a beacon light of quiet courage and inspiration, in the hours of our tribulation. His memory will endure in our hearts.

"The spontaneous demonstration of loyalty that welcomed you to McGill so short a time ago is but the outward sign of a sincere devotion to Your Majesty which is this day engraved more deeply in our hearts and minds.

F. Cyril James.

Her Majesty the Queen
Clarence House,
London, England."

A University Memorial Service was held in the Sir Arthur Currie Memorial Gymnasium Armoury at eleven o'clock on the morning of Feb. 15, attended by Governors, Senate, members of the staff and

(*Continued on page 22*)

C.P.S. "EMPRESS OF SCOTLAND",

At sea.

14th November, 1951.

Dear Mr. Chancellor.

Their Royal Highnesses The Princess Elizabeth and The Duke of Edinburgh have asked me to write to you and tell you how much they enjoyed the welcome given them at McGill University during their stay in Montreal. Her Royal Highness has also asked me to thank you very much for your words of welcome and also for the beautiful books about McGill University, which she will treasure.

Her Royal Highness would also be grateful if you would thank the students for having given her the copies of the 'McGill Daily'.

Yours sincerely

Martin Charteris

Private Secretary to
The Princess Elizabeth.

The Chancellor,
McGill University,
MONTREAL.

LETTER OF THANKS: *Reproduced above is a letter received by the Chancellor, Mr. Justice O. S. Tyndale, from Queen Elizabeth II, written on her way home from her visit to Canada and McGill as Princess Elizabeth.*

Three New Governors Named to Board of University

G. A. Walker, Colin W. Webster and John A. Fuller Receive Appointments

Three new governors have been appointed to the board of the university who will also serve as members of the Royal Institute for the Advancement of Learning. Named to the board of governors are, George A. Walker, Q.C., D.C.L., Colin W. Webster, B.A. '24 and John A. Fuller.

Mr. Walker replaces the late Paul F. Sise; Mr. Fuller replaces James Wilson, who resigned due to ill health and Mr. Webster replaces Walter Molson, who resigned as member of the board.

Also announced is the appointment of Col. A. A. Magee as a representative of the Board of Governors on the Senate, replacing Mr. Molson.

Other board of governor representatives are S. C. Dobson, A. B. Wood, G. Blair Gordon and Dr. C. J. Tidmarsh.

Commenting on the appointments which were announced by Dr. F. Cyril James, principal and vice-chancellor, *The Montreal Star* said editorially:

"These appointments call for two-fold congratulations, to the new members for the honor thereby conferred upon them and to the university which, for so many years, has never failed to find men of outstanding ability in widely chosen callings willing to serve it unselfishly for years.

"Three men, each recognized as leaders in their own spheres, have been chosen to fill the vacancies on the Board, each one identified with his own calling in Montreal. George A. Walker, K.C., D.C.L., like the late Sir Edward Beatty, came to the C.P.R. by way of Toronto and Osgoode Hall and has been for 45 years in the legal department of the Company, for 15 of these years as general solicitor and general counsel and latterly as chairman of the board.

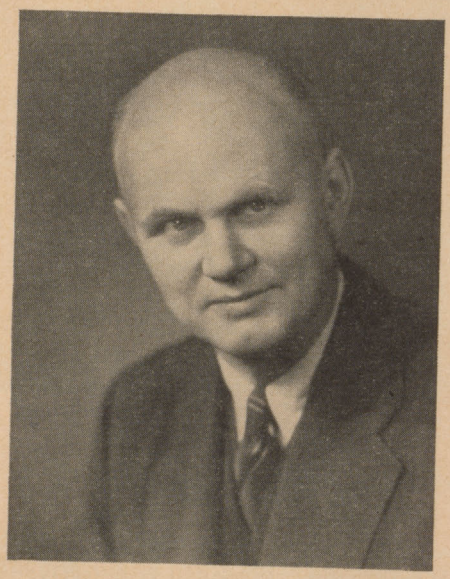

"Colin Webster, son of a father who for years was one of the leading figures in the business community, has carried the name into another generation of similarly diversified activity. A McGill graduate, he has maintained his connection with an interest in the university through the Graduates' Society and the link it maintains between the old school and its sons in after life.

"John A. Fuller is scion of a family famous in years gone by in the worlds of law and medicine in this province, one of them in his time also a member of the Board of Governors. Still a young man, Mr. Fuller already has a brilliant career to his credit in the great Shawinigan and allied power developments.

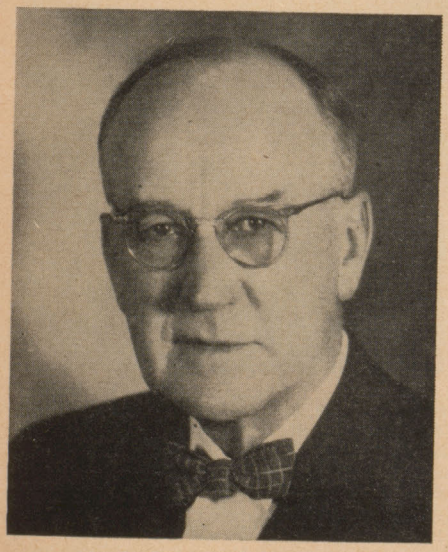

"The three appointments just made maintain the fine tradition of McGill and strengthen the strong bond between 'town and gown' as valuable to both."

John A. Fuller

Colin W. Webster

G. A. Walker

Mr. Walker, who is chairman of the board of the Canadian Pacific Railway, was born at Toronto and educated at Wellesley school and Osgoode Hall. He joined the C.P.R. in 1906, became general solicitor in 1936 and vice-president and general counsel in Montreal in 1945.

Mr. Webster, president of the Canadian Import Company and vice-president of the Imperial Trust Company, was born in 1902. He is the son of the late Senator Lorne C. Webster. Educated at Lower Canada College, he received his B.A. from McGill in 1924. He was honorary treasurer of The Graduates' Society from 1949 to 1951 and was chairman of the Alma Mater Fund from 1949 to Dec. 31, 1951.

Born at Montreal in 1900, Mr. Fuller is president of the Shawinigan Water and Power Company. He is the son of Henry J. and Nancy (Archibald) Fuller and grandson of the late Mr. Justice John Sprott Archibald, who was for many years Chief Justice for Quebec and governor of McGill. He is a nephew of the late Dr. Edward Archibald, who was chairman of the department of surgery at McGill for many years. Mr. Fuller was educated at Hotchkiss School, Lakeville, Conn., and received his B.A. from Princeton in 1924.

The Principal's Page

Money Means Men In The University's Life

by Dr. F. Cyril James

McGill graduates, generous contributors to the Alma Mater Fund, have sometimes asked me what use the University is making of the revenues that it receives from this source.

The answer is simple: McGill is using the money to pay the salaries and wages.

The financial statements of the University for the past year reveal the fact that, out of total expenditures of $7,432,210 for all purposes, the wages and salaries of the men and women who make McGill what it is, accounted for $4,265,917, while annuities and pensions for those who have retired after long periods of service amounted to another $233,139. The rest of our money was spent for a diversity of necessary things—heat, light and power, equipment for research; materials for teaching purposes; books for the library and building maintenance—but Deans of Faculties and Directors of Schools collaborated wholeheartedly with the Board of Governors in reducing all of these expenditures to a minimum because of the unanimous realization of the need for higher salaries and wages.

Four millions of dollars looks like a large sum but there were only 38 members of the full-time teaching staff receiving salaries of more than $6,000 a year. These are the outstanding scholars and scientists upon whom the reputation of the University depends and, of that small group, two-thirds received less than $7,500 a year. The medium salary for an associate professor was $4,500; for an assistant professor, $3,500!

On such salaries as these, men cannot be expected to cultivate that peace of mind and freedom from worry that is essential to research and teaching. They cannot afford to bring up their children to follow in their footsteps, nor can they be expected to resist the temptation of attractive offers from universities in Great Britain or the United States.

Realizing the seriousness of the situation, the Board of Governors decided that every penny of additional income should be used for the increase of wages and salaries. The increasing revenues that the University hopes to receive from both the Alma Mater Fund and the McGill Associates are pledged for this purpose and, to meet the urgent need, the Board of Governors has, during the past few weeks, sought and obtained generous contributions from many friends to the operating revenus of the University. On December 1, 1951, salaries and wages throughout the University were increased by amounts which will augment our annual operating expenses by approximately $300,000, so that the money to meet this obligation must be found each year from sources over and above our present revenues. This is the most urgent of all McGill needs and every subscriber to the Alma Mater Fund is helping to maintain the prestige of the University. Money means men.

Because this is our most serious problem, the Board of Governors has felt it necessary to postpone many building projects that it would have liked to undertake, among them the rink which all of us envisage as the final unit of the Athletics' Centre. Owing to the unforeseen rise in construction costs, the splendid total of $752,395 which was contributed by graduates during the War Memorial Campaign did not fully cover all of the costs involved in providing the swimming pool and the addition to the gymnasium. The Board of Governors appropriated the balance from the general endowments of the University, in order that the project could be carried into execution as speedily as possible, and it has also undertaken to proceed with the construction of an appropriate rink as soon as the University finances make this possible.

A special committee consisting of Mr. E. A. Leslie (Chairman), Air Vice-Marshal Frank McGill, Mr. F. G. Ferrabee, Dean H. N. Fieldhouse and Mr. V. F. Obeck, has been set up to study the whole problem in regard to both the type of rink which seems appropriate and the financial implications of its construction and operation. Clear decisions on both of these questions, which the Board of Governors will be in a position to make on the basis of this committee's report, will carry us one stage closer to the realization of our dreams. The next, and decisive, stage will be passed when the financial position of the University has been strengthened to the point where it can undertake new construction and face additional operating expenses without jeopardizing its ability to pay salaries that will attract and retain outstanding men and women.

University Mourns . . .

(Continued from page 20)

students, the parents of students, graduates of the University, members of the McGill Associates, and their families.

The Service was conducted by the University Chaplain, Rev. E. C. Knowles, and the Dean of the Faculty of Divinity, Dr. J. S. Thomson, and the Principal. At Macdonald College, synchronous services were conducted by the Rev. G. G. D. Kilpatrick. At the McGill service, the Canadian Grenadier Guards, because of their traditional association with the University, officially participated.

***DR. COLIN K. RUSSEL**, B.A. '97, Med. '01, noted Montreal neurologist, who has been active in mental health work for several decades, has been appointed honorary president of the Mental Hygiene Institute. He fills the vacancy left by the death of Mr. W. F. Angus. Dr. Russel was instrumental in starting the first hospital psychiatric outpatient clinic at the Royal Victoria Hospital.*

McGILL SOCIETY OF GREAT BRITAIN MEETS: *The above picture was taken at the annual dinner at which Lord Woolton was the principal speaker. Included in the group are Lady Woolton, Sir Harry Brittain, Dr. T. F. Cotton, president of the society; and, at far left, D. M. Legate, former editor of The News with Hon. Dana Wilgress, High Commissioner for Canada.*

McGill Society of Great Britain Meets

English universities might well meet the challenge of the changing times by greater expansion along technological lines so that an increasing number of graduates might be equipped to reinforce the ranks of business, Lord Woolton, Lord President of the Council and chairman of the Conservative Party, told the McGill Society of Great Britain, at its annual dinner.

The Canadian High Commissioner, Hon. Dana Wilgress, proposed the toast to McGill, coupled with the name of Lord Woolton, who is an honorary graduate. A message from the principal and vice-chancellor, Dr. F. Cyril James, was read by the secretary, Dr. P. L. Backus.

The toast, "London House", was proposed by Lord Balfour of Inchrye. Lieut.-Col. G. L. Sprunt, controller of London House, in replying, gave news of the Lord Mayor's Thanksgiving Fund. The fund, now closed, was intended as a thanksgiving memorial to provide greater accommodation for Commonwealth students attending London university.

The proceeds will now go towards the erection of a new residence with annex for women students and a block of flats for married students.

It is felt that the "London House Association of Canada", branches of which are being formed in every city in Canada, should forge a link between this Commonwealth educational project and the Universities of Canada.

Other guests at the dinner included: Lady Woolton, Lady Balfour, Sir Harry Brittain. Dr. W. D. Logan, principal of London University, Dame Jocelyn Woolcombe, controller of the Sister Trust; Dame Lillian Penson, Mrs. E. C. Pepper and Mrs. C. Husley. In addition to a large number of members of the society, their wives and guests, two London House students and four Beaverbrook scholars were present.

Hiroshima's Atomic Bomb Casualties

Their effect on posterity is studied by a graduate of Macdonald

The McGill News reprints here by permission of Dr. W. H. Brittain portions of a letter which the Dean of Macdonald College has received from Duncan J. McDonald B.Sc. (Agr.) '40. He studied for two years at Harvard under a fellowship and during World War II served with the R.A.F. Transport Command and the R.C.A.F. No. 2 A.N.S. at Charlottetown, During 1944-45, he was a member of the Army Polar Bear Exercises in British Columbia. Named Rhodes scholar for the Province of Quebec Dr. McDonald spent three years at Merton College, Oxford. In 1951 he was named to the Atomic Bomb Casualties Commission at Hiroshima as geneticist, at which post he is still engaged.

The Atomic Bomb Casualty Commission set up after the war, started to function here in 1947 in an attempt to investigate any biological changes produced by atomic radiation. There are two rather obvious divisions to the investigation: first, those studies designed to show the effect on people alive at the time of the bombing; second, the estimation of genetic change. I am in charge of the latter now, having taken over in July from my predecessor, Dr. Schull, who is now at the University of Michigan.

In brief, we attempt to see every baby born in Hiroshima and Nagasaki, and record whether it is normal or abnormal, and if abnormal in what way. Some 15,000 babies are born each year in the two cities; about half are children of parents one or both of whom were exposed to the bomb; the other half are children of parents who have moved into the cities since 1945. Thus we have a control population from which we can obtain an estimate of the normal occurrence of the various types of congenital defects; eventually, when enough babies have been seen (and enough has been estimated at 150,000) we should be able to demonstrate any increase in the exposed group.

Our study is of necessity limited to dominant mutations which will appear in the first generation, and as you know this is only a small part of the total genetic change which must have taken place. It is a rather frightening thought that the genetic effect of the bombs will appear maximally only in between five to ten generations hence; thus, if we can demonstrate any change in this first generation, we can state with some degree of accuracy what the total effect in the next hundred years or so may be.

ABCC (as the commission is known) is quite large, employing some 1000 personnel. I have, in genetic staff, 15 Japanese doctors here in Hiroshima, and a like number in Nagasaki; and of course other personnel, nurses and clerks and drivers and the like. The collecting of the data is the major task; we do it largely through cooperation with the midwives of the two cities; they, and not the doctors, deliver most of the babies. We have a system of registering pregnant mothers at five months; when the baby is born, the midwife notifies us, and a doctor and nurse go out to the home to examine the baby.

In addition, most of the babies are brought up to the laboratory-clinic building at nine months of age and examined rather more closely. This winter we are going to analyze for the first time the bulk of data collected to date, amounting to some 65,000 babies on many of which we have several sorts of information. All this has been coded, and is now on IBM cards. Machines will do the work of analysis once we decide what should be done. I should hate to tackle a job like that by hand.

I worked at headquarters here in Hiroshima, run down to Nagasaki every six weeks or so. But we live in Kure, some 20 miles away. This means a commuting run in our own bus twice a day—a great waste of time, but since the road is along the Inland Sea, it is always a lovely and exciting ride; never twice does the scenery appear the same; wind on the sea, clouds, dramatic sunsets, early morning mists see to that.

I live in a great rambling Japanese house along with several others, and most comfortable it is. The floors are covered with straw mats, tatami, soft to sit on; and everything is hidden behind sliding panels so that the rooms are beautifully austere.

I've been about the country a fair amount, to Tokyo, a hideous modern city, and Kyoto, a lovely ancient one, full of temples and beautiful gardens; inland in the great mountains fishing and climbing, and north to the rugged north coast, through a good deal of northern Kyushu, the westermost island and of course all about in this area. The country is altogether charming; and the people are even more so. I shall quite enjoy my two years here.

***DR. DUNCAN J. McDONALD** is pictured here with his staff of Japanese physicians, nurses and clerks of the Atomic Bomb Casualties Commission at Hiroshima.*

Graduates' Athletics Association To Forefront

The Graduates' Athletics Association of McGill is to the forefront again. Its success with the Touchdown Club is well-known to most football fans, but behind the scenes, the Grads' sports body has been active in expanding its sphere of activities. Badminton and squash, swimming and basketball are already available to members but, in the summer issue, something concrete will be announced regarding further use of existing facilities by members of the association. This programme of participation will be second only to the requirements of the student body.

Recently the association met to elect its new officers and plan an extensive programme. President is T. Palmer Howard and vice-president is Hugh Savage. Treasurer is Kenneth

T. Palmer Howard

Thomson and the secretary is Dr. J. T. Elo. F. Lyle Pattee is acting manager.

Membership in the Graduates' Athletics Association is much larger than many would suppose. At the present time, total number of members is almost 2,000 and with the ever-growing popularity of the Touchdown Club, this total is certain to increase.

Though its activities were curtailed during World War II, the Graduates' Athletics Association has pursued an active programme since 1934. In September of that year, the organization came into being, formed by members of the McGill basketball and swimming clubs and the Red Birds Ski Club. The first president was H. E. Herschorn, O.B.E. and T. Palmer Howard was secretary. Associated with them were such outstanding McGill athletes as Carvell Hammond, Don Young, Gerry Halpenny, Harry Pangman, Frank Campbell, Jim and Fred Houghton, Bill Sprenger, George Vickerson, Frank McGill and Munroe Bourne.

The Red Birds were among the pioneers of skiing in the province of Quebec and, in pre-war days, the Grads' basketball and swimming teams achieved notable successes. The Grads' cage team went to the eastern Canada finals one year and the swim club twice retired the Stober Trophy for the city and district medley relay championship by twice winning it three times in succession. Mainstay of this outstanding swim team were Hugh Savage, Munroe Bourne and Bill Sprenger.

By 1936, a Grads' hockey team had been formed and one match was played at Rye, N.Y., and the Scarlet Runners had come into the picture with Glen Cowan, Frank Nobbs, Jim Worrall taking an active part.

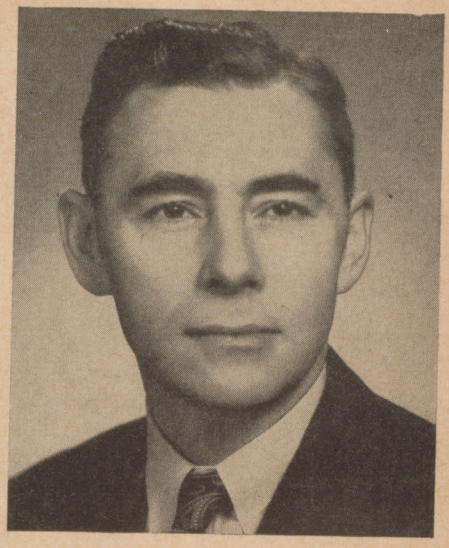

Through 1934 to 1937 the Grads football group was very much in the picture and every spring there was a banquet tended the intercollegiate champions of all sports as well as to the senior football team, Associated with this group were Dr. "Pud" Argue, Dr. Lorne C. Montgomery, R. B. "Boo" Anderson, Geoff Notman, Eddie Hanna, Dr. "Dud" Ross, Boyd Millen, Frank McGill and a host of others. Many are still active in the doings of the Touchdown Club. Dr. Montgomery is honorary president of the football club and "Boo" Anderson of the hockey club.

J. A. de Lalanne head of the Graduates' Society, succeeded H. E. Herschorn as the second president of the Graduates' Atheltics Association and then followed Dr. Gerry Halpenny, Wally Markham and Palmer Howard.

Council members of the different branches of sport in which the association participates, elected at the meeting of officers are:

University Squash Club: Murray Wight and David Bush.

Red Birds Ski Club: W. I. Robinson and R. S. Sproule.

Tommy Robertson

Hockey Club: T. D. Robertson and Bob Keefer.

Swimming Club: Dr. F. Munroe Bourne and Adin Merrow.

Basketball Club: R. Rutherford and P. Hobson Jr.

Track Club: Frank Nobbs and Glen Cowan.

Boxing Club: B. R. Brown and J. F. Porteous.

Touchdown Club: John Porter and Thomas Chown

Ex officio members: J. A. deLalanne and V. Obeck

Honorary Patron: Dr. C. J. Tidmarch.

News of Broken Candid Camera Likely Will be Received with Mixed Emotions

by D. Lorne Gales
General Secretary

To those graduates who have become tired of the General Secretary's antics when endeavouring to take candid camera shots for *The McGill News* or those who feel quite sure they are more photogenic than this shamefully amateur photographer makes them out to be, the announcement that the camera has been failing to click through November and December should be of some consolation. For those who welcome the pictures in *The McGill News*, please be assured that it is simply a mechanical breakdown and that the trusty camera is now being repaired by an expert and will be on the road this month when the General Secretary starts his next trips to branches.

The foregoing should suffice as an explanation as to why all those pictures the General Secretary tried to take at the various meetings from November to January 15, and which covered such wonderful poses, do not appear in this issue of *The News*. An apology is offered to all those kind graduates who stood so patiently by while the camera was focused, the bulb flashed and the party stopped. Please be kind to him and pose once again when he comes around your way.

It has been some time since our New York Society starred in these columns but, under the chairmanship of Gerry Jackman, it has held two highly successful meetings in December and January. In December well over one hundred graduates and their wives attended a cocktail party in the Canadian Club and had a really magnificent time. Following this meeting, a stag dinner was held at the Engineers' Club in January with Vic Obeck, Director of Athletics, as guest speaker. The Football Highlights' film was also shown.

The McGill Society of Hamilton, since its inception last spring, has shown real spirit and to the desk of General Secretary has come the announcement of its programme for the months of March, April and June.

On Friday, March 7, the branch attended the McGill-McMaster basketball game and had a reception for the teams following the game. On April 4, Dr. James is the guest of honour at a dinner meeting given by the branch at the Royal Connaught Hotel. Finally in June, the annual dinner will take place at the Brant Inn. The date is June 12 so bear this in mind if you happen to be in that part of the country because last year's dinner at the Brant Inn was exceptional and the branch wasn't even organized then. Think of the possibilities this year!

The first annual meeting to be reported to this office in 1952 was that of the McGill Society of Great Britain. After many years of faithful service as president, Dr. T. F. Cotton, Med. '09, has relinquished the post and James B. Thom, Sci. '15, has been elected president of the branch to succeed him. The former editor of *The McGill News*, David M. Legate, Arts '27, now the *Montreal Star-Standard* Bureau representative in Great Britain, has been elected honorary secretary, while G. A. Hobbs kindly agreed to remain on as honorary treasurer. The new executive has plans for a number of meetings and is intent on building up the interest of the younger graduates in Great Britain in their branch.

The Porcupine branch of The Graduates' Society held its annual meeting in the fall and the following slate of officers was elected:—

President . . H. A. Leavitt, Sci. '49.
Vice-president Mrs. R. E. Findlay (Jean MacLeay) Arts '25.
Secretary . . Gordon Montgomery, Sci. '50.
Treasurer . Wendell B. Brewer, Com. '23.
Member at large . Hellmut W. Pfeffer, Sci. '45.

This branch has planned an interesting programme for the coming year, including a reception prior to the students' summer dance, McGill movies for members of the Society and the local high schools, informal luncheons for the members of the Society together with any members of the University's teaching staff who might be in the area, and, finally, a wonderfully good idea of a get-acquainted party for McGill students working in the Porcupine area during the summer.

The executive of this branch is also undertaking the very important project of presenting McGill to the various high schools and encouraging the students to apply for University scholarships. This is a practice widely adopted in the United States where the branch scholarship committee is second only in importance to the fund committee.

Another development of great interest, particularly to the Macdonald alumni, and it is hoped the development will prove a stimulus to all McGill graduates in the Ottawa area, is the spontaneous organization of a Macdonald graduates' section of the Ottawa Valley Graduates' Society of McGill University by Al Tennant, B.Sc. (Agr.) '46, M.Sc. '49; Dave Lambroughton, B.Sc. (Agr.) '50; Pat Ellis, B.Sc. (Agr.) '50; Bob Bailey, B.Sc. (Agr.) '40, M.Sc.'50; and Cleo Coutu, B.Sc. '49. Not only has the group organized a Macdonald basketball team playing in Ottawa in the city league, but also held a dance on Feb. 23.

In Seattle, Mrs. Mildred White has been elected president of the Washington State branch while Robert Felsted, B.Sc. '46, is the new secretary-treasurer.

The beer and oyster party, followed by a dance, held by the Quebec branch, was a tribute to the organizing ability and enthusiasm of Jean Bieler, Law '19, and his very able secretary, Mrs. Pierre (Phyllis McKenna) Duchastel, Arts '38.

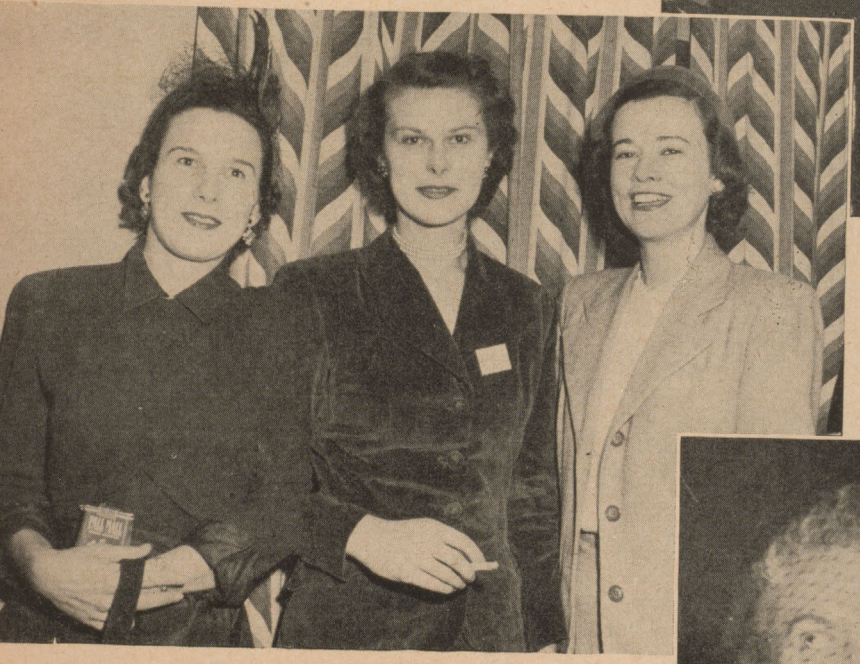

Before Christmas, too, the District of Bedford and St. Francis District branches, both leaders in every sense of the word, held their usual fall meetings.

Dr. Sichel and Win Durrell, the unbeatable combination which guides the affairs of the Vermont branch, held a very successful dinner meeting in St. Alban's. It was a great pleasure

(Continued on page 28)

MEETING OF THE BOSTON BRANCH: *Left to right: Mrs. William Smythe (Barbara Graw) B.A. '46, Mrs. D. Alex Ross (Cecily Galbraith) B.Sc. '45, Miss Peggy Faughnan, B.A. '44, B.L.S. '45.*

NEW YORK SOCIETY OF McGILL MEETS: *left to right, Mrs. John V. Galley, Mr. J. E. Greenwood, Comm. '48, John V. Galley, B.Sc. (Arts) '20, regional vice-president for eastern United States; Dr. William Kindestin, D.D.S. '24, Gerrard Jackman, B.Comm. '32, president of the New York Society; G. B. Diamond, Eng. '43, now teaching at Pratt Institute.*

University and Society Lose Staunch Supporter

In the death of Walter William Colpitts, B.Sc. '99, at his home in Princeton, N.J., on Dec. 23, 1951, McGill lost one of its most distinguished engineering graduates and our Society one of its keenest and staunchest supporters.

Mr. Colpitts was born at Moncton, N.B., and was educated in the local schools, taking his Bachelor of Science degree at McGill University in 1899, where he was the winner of the British Association Medal, awarded to highest ranking student. His classmates will remember the masterly valedictorian address which he gave during the convocation activities in the Spring of '99. Subsequently, in 1901, Mr. Colpitts was awarded a Master of Science degree and at the Centennial Reunion in 1921 he was the recipient of the honorary degree of Doctor of Laws.

Dr. Walter W. Colpitts

Mr. Colpitts started his career in the engineering department of the old Inter-Colonial Railway of Canada and later, after graduation from McGill, was appointed chief clerk to Sir Thomas Shaughnessy, then the president of the Canadian Pacific Railway Company.

Moving to the United States in 1901, he became associated with the railway development then taking place across the border. During this period he became interested in and did a great deal of pioneer work in the use of reinforced concrete. He was the author of one of the earliest text books on the subject of the design of reinforced concrete structures for railways.

In 1913 he joined the late William H. Coverdale in consulting engineering practice in New York City and founded the partnership of Coverdale and Colpitts.

The firm became one of the country's leading authorities on railway transportation, and management, and in the organization and financing of railway properties.

During all these busy years, Mr. Colpitts never lost interest in McGill and at the time of his death was honorary president of the New York Graduates' Society of McGill University, a position which he had held with distinction for many years. McGill graduates living in New York will always remember Mr. Colpitts' kindly interest in each and every one of them, as he was always one of the first McGill men to greet a newcomer to the city from his old University.

In all Graduates' Society endeavours in New York, Mr. Colpitts was not only a personally generous supporter, but also a leading spirit in the organization and a ready worker for every project. He was a representative of the Graduates' Society on the University's Board of Governors from 1946 to 1949.

A member of the board of directors of numerous corporations and societies, Mr. Colpitts still found time to indulge in his hobby of wrought iron work and those who have visited his lovely home at Princeton, N.J., have seen many exquisite examples of his fine craftsmanship.

Mr. Colpitts is survived by his widow, the former Florence Rossington of Topeka, Kansas; a daughter, Mrs. Howard Menand of Princeton; and a son, Jeremy Rossington Colpitts, of Phoenix, Ariz.; a sister, Mrs. A. Ross Smith of Moncton, N.B.; a brother, Charles B. Colpitts of West Englewood, N.J., and six grandchildren.

***THE GOLD MEDAL** which the Royal Geographical Society presented to Dr. George Mercer Dawson, C.M.G., LL.D., F.R.S., A.R.S.N., F.G.S., F.R.S.C., in 1897 in recognition of his outstanding services as director of the Geological Survey of Canada and his great contribution to the geographical knowledge of Canada has been given to the University. It was accepted by Dr. F. Cyril James from W. F. Shepherd, B.A. '26, executive director of the Boys' Farm and Training School on behalf of Mr. Owen Dawson. It was left to him after the death of his uncle. Dr. Dawson. The medal is about 2½ inches in diameter and is covered on both sides with thin glass.*

Branch Notes . . .

(*Continued from page 26*)

to see Dr. and Mrs. L. E. Sample, Med. '19, as well as Dr. and Mrs. Fred Swisler, Med. '33, present at the dinner.

Three more branches held meetings before Christmas—Windsor, Boston and Philadelphia. All were well-attended and excellent meetings.

Word has been received via the grapevine that our Jamaica branch held one of its usual pre-Christmas gatherings in early December.

Following the Christmas holidays, two outstanding meetings were held. First, Ed. Reznik, Med. '30, president of the Connecticut branch, organized a meeting for Jan. 5, and Maxwell O. Phelps, Med. '29, and Mrs. Phelps provided the perfect setting of their home for a typically friendly and informal branch meeting. The evening was highlighted by the piano duets of Dr. and Mrs. J. K. Ormrod, Med. '43, as well as the coloured movies of the visit of Princess Elizabeth and the Duke of Edinburgh to McGill.

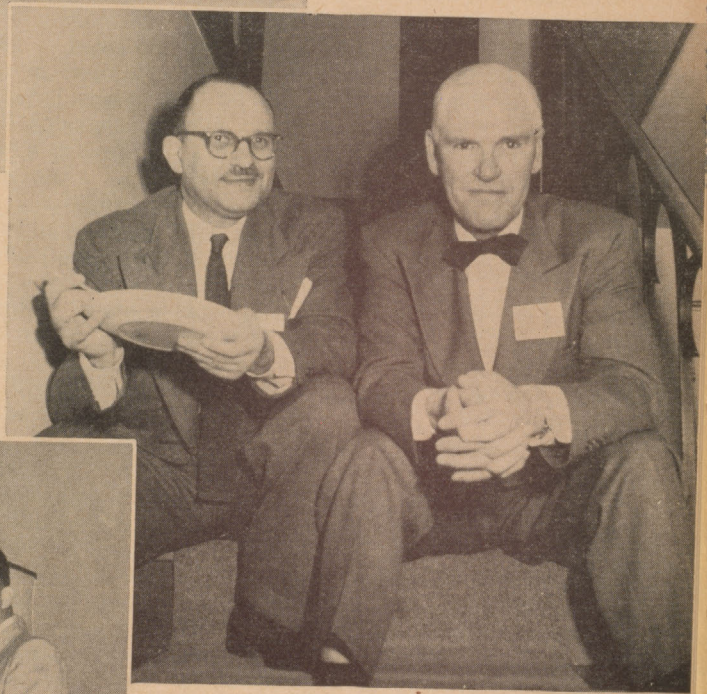

In January a "stag" was held in Rochester under the chairmanship of George Ramsey, Med. '30. The General Secretary was present and showed the Royal Visit and Football Highlights movies.

RIGHT: *Meeting of the Philadelphia Branch. Left to right: Dr. Stuart Rose; D. Alan Sampson, M.D. '31, Secretary-Treasurer; Mr. Kenneth H. Ross, B.Sc. '33; Allan J. Fleming, M.D. '32; Warner F. Sheldon, M.D. '37.*

LEFT: *At the head table, left to right: Dr. D. Alan Sampson, M.D. '31; Dr. P. Robb McDonald, M.D. '34; and Victor F. Obeck, Director of Athletics at McGill.*

RIGHT: *Connecticut branch meeting: Dr. Edward Resnick, Med. '30, President of the Connecticut branch, left, and Dr. David M. Caldwell, Med. '19, father of last year's football captain.*

LEFT: *Meeting of the Southern California Branch held at the Wilshire Country Club, Los Angeles. Left to right, front row: Dr. Douglas McKinnon, M.D. '27; Mr. J. A. deLalanne, B.A. '19, President of the Graduates' Society; Dr. Donat R. Richard, M.D. '37, President of the Southern California Branch; Dr. John R. Black, M.D. '34. Left to right, back row: Dr. Kenneth Jacques, M.D. '37; Dr. Robert Freeman, M.D. '36; Mr. William S. Piper, B.Eng. '34; Mr Victor Dawson, B.Sc. '08; Mr. Victor Duclos, B.A. '15; Dr. Thomas Keay, M.D. '07; Dr. Romeo LaJoie, M.D. '27.*

Paris Letter

by James P. Manion

It is difficult to become lyrical about Paris until April, when its chestnut trees are in bloom and the renewal of its verdure rehabilitates the spirit and tonifies the mind. As the present issue of *The McGill News* appears at that idyllic moment, I am trying, on my February date-line, to project myself into that longed-for future. Not very successfully, for the weather has been so constantly malevolent for the last year that one tends to forget the beauties of spring. Clouds and rain are perhaps more depressing in Paris than in London, for Paris, like a maiden, is made to be dressed up in gay colours, whereas London looks like one of Queen Mary's hats, and you just don't expect the pertness, the sauciness, the floraison and diapason of the Paris boulevards.

April is the time when the birds come out, when the dresses get abbreviated, when to lounge beside a sidewalk table is the greatest relaxation in the world. Oh to be a tourist now that April's here!

I hasten to add that such a life is not for us, the workers of the metropole. I sometimes feel that I might as well be in Copperknife as in Paris, for all the benefit I get from the cultural and other attractions of this great centre.

The Canadian official family is quite extensive, especially since the war. It may be of some interest to know of our organization here. We are about 150 people in the official community, of which about 25 are "officers" and the remainder are administrative staff. The head of the establishment is, of course, Ambassador, who is assisted by a Minister and several First, Second and Third Secretaries and a Cultural and Information Officer.

The higher one goes in the diplomatic service, the greater are the representational duties. Canadian visitors expect to be received by the Ambassador. He has to maintain good relations—largely through social activities—with French ministers and administrative officials. He is obliged to go to the innumerable official functions which can be thought up or dreamed of in this exquisitely nebulous world of foreign representation. Just to give one example: there are 74 countries represented in Paris; each one has a national holiday, and in a large number of cases the Ambassador has to present his compliments or go to the annual reception.

As Counsellor of the Embassy for commercial relations, I have an office consisting of a dozen persons, of whom three are assistant trade officers sent by the Department of Trade and Commerce in Ottawa. Our own duties are perhaps a little more specialized than those of other colleagues. We receive over 600 Canadian businessmen per year, give them contacts, arrange interviews, accompany them if they know no French, get them agents, give them large doses of statistics, and generally find that all our efforts were to no purpose since the French government had no dollars to finance their imports.

(*Continued on page 31*)

(*As another facet of Paris in the spring—or at any other time—Jim sends along this poetic effort, clipped from the Paris edition of the* New York Herald-Tribune *—Ed.*)

ECA Wife Speaks — The Morning After

Good Morning, my bright international mate,
My outstanding genius in Questions of State,
I trust all is clear in the wonderful mind
Which last night remodelled the whole of mankind.

Your handling of Russia, the Ruhr, Palestine
And China and Greece was masterly—fine!
You—and not Marshall—are "Man of the Year".
(Here is your aspirin—swallow it, dear.)

Awaken, my Crosby, my songster—it's noon!
All morning I've waited in hopes that you'll croon
A measure from "Chloe," "The Deep Rolling Sea"—
(Those airs you were crooning at half after three.)

You woke up the baby and stepped on the cat,
And one of your props was your hostess' hat;
I'm sure she will ask you again for tonight
(If police don't insist on priority right).

Arise now, my Old Friend, my Mercury Kid,
Arise and consider the things that you did,
The uprooted garden, the splintered garage;
So, off to your neighbour to ask "Quelle dommage?"

You bet it is plenty—so carry a cheque;
I'm sure if you sign it just "Pain-in-the-Neck"
The bank will okay it—it could be but you—
The bird that went berserk 'twixt dusk and the dew.

There! Drink your bi-carb, you chattering drone,
Then get to your public; but quick, and by 'phone,
And talk plenty fast! They'll need oodles of proof
That you're not the neighbourhood's number one goof!

I wish I were Sandow—How far would I throw you!
For the next thirty days pretend I don't know you,
My juvenile Johnny—my dim-witted duffer!
You say you feel awful? Well, serves you right, SUFFER!

Mrs. E.C.A.

"City Slickers Day" at Macdonald

by J. C. Morrison

It happens every spring. It must be instinct. We all get it though some won't admit it, that unsettled feeling, that primordial urge to return to the soil. Some of us work it off in the garden. Others think of that back ache and pay a visit to our country cousins instead. Cartoonists have a field day at the expense of the rest of us. But here is the big chance for all McGill men and women to really enjoy getting it out of their systems in 1952 by visiting McGill's farm.

But stop! For those whose memories of the old fork, shovel and milking days on the farm are too vivid, let us state once and for all that the farm isn't quite what it used to be. Grandma no longer rises at 4.00 a.m. to chase those cussed pigs out of the garden; instead she drives a tractor on the back fifty. Forks run on trolleys, chemical fertilizers have been added and they, in turn, are traced to their destinations by tagging them with radioactive tracers.

Plants are no longer plastered with foul green and black poisons to kill insects, but the plants themselves, as if by magic, are rendered toxic to the bugs. Not only do half the calves never see their blustering and noisy fathers, but half the cows never see them either. The apples that grandmother used to string up for fly roosts are stored in vast chambers cooled by huge refrigerator units. The country cousin is no longer a naive fellow in a straw hat with a pitchfork in his hand and a grass stem in his mouth.

So, May 31st, Macdonald College is inviting all McGill men to an "At Home", a Saturday afternoon in the country. But what a country! Exhibits of electronic equipment to delight the physicist; miles of glass tubing skilfully built into chemical apparatus; air-conditioned chambers in which any sort of season can be artificially duplicated (California brought to your doorstep); microscopes; lathes; modern dairy equipment; the best beef (on the hoof); barns; field machinery; grains and grasses, growing outdoors and in; kitchens, sewing rooms, and laundry rooms that seem to have stepped out of the latest home magazine; rooms in which you can record your own voice and others where you can play it back and swear it isn't yours; a cosy little "theatre" where student teachers learn how to use films as a teaching aid; acres of lawn and spring flowers; real live woolly lambs which make the children shout with joy; some 600 acres of almost virgin hardwood woods in which to wander and get lost; tractor-drawn wagons to haul you about in the open air and give you that country atmosphere; and to cap it all: **half a barbecued chicken to be eaten out-of-doors in the evening.**

Mac graduates and McGill graduates who have been out to sugaring-off parties and other Mac "do's" will need no coaxing. It's come one come all. Wear clothes for a country outing and let's go. Arrangements and tickets are in the hands of the Macdonald College Field Day Committee and the Macdonald Branch of the McGill Alumnus.

Paris Letter . . .

(*Continued from page 30*)

Despite this, we had a hand in about $7,000,000 worth of business, which is a pretty good record. Say we were agents instead of government employees, we would get a minimum of 2 percent commission, equivalent of $140,000. Our office costs about a third of that to run, so that it seems to be money well spent as far as the Canadian Government is concerned.

Apart from the Canadian visitors we have about 20,000 other "contacts" per year—either telephone calls, visits or visitors from French sources anxious either to import or export from or to Canada. And 12,000 incoming or outgoing letters.

The most burdened Canadian service is undoubtedly the Immigration office, which has as many as 750 inquiries to deal with per day. Since Canada wants immigrants, all queries have to be checked, and there are now some 40 employees looking after this aspect of our relations with France.

Among the ancillary services are the Air Attaché, the Military Attaché, the office of the representative to OEEC (the Marshall Plan Countries) and FEB (the Finance and Economic Board of NATO), and Canadian officers serving on SHAPE (General Eisenhower's headquarters) or following the NATO staff course or the Ecole de Guerre.

Yes, there are lots of initials in France, as there are in Washington.

But to get back to Paris, the point is that we are a bunch of very occupied people, and if we dawdle under the plane trees or the chestnut blossoms, we have to do it at the expense of our duties and obligations. I start work at 9:30 and get home at 7:30 or eight o'clock, depending on the representational cocktail parties that I may have to attend. In the meantime, I normally have a "business lunch" which costs a lot of money and lasts a couple of hours—but all of them right on the bit or the mettle or something.

In the meantime, I have to see people like Lionel Shapiro nearly every day when they are in town. The reason why I am frankly happy about this privilege of writing a column for *The McGill News* is that it brings together again an old team— D.A.L. MacDonald, your editor, L. S. B. Shapiro, Dave Legate and myself all worked together in 1927-28, and it's a great pleasure to collaborate once more after almost 25 years.

But the tourist is always right—if you want to come to Paris, come with money in your pocket, but no contract to work here.

"Academic Freedom" Can Include Cheating

The Daily's Poll Admittedly "Not Representative"— Scots Turn Tables on Debating Team

by Clyde Kennedy

"Sir Arthur Currie, principal of the university 25 years ago, addressed the annual banquet of the Faculty of Arts on the subject of 'Academic Freedom' ", reports *The McGill Daily*'s column of clippings from *The Daily* of 25 years ago.

"Arguing that academic freedom certainly existed at McGill, Sir Arthur Currie stated: 'At Cambridge, students cannot play marbles on the steps of the senate house. McGill students can play marbles anywhere.' "

Since the last issue of *The McGill News* the student body hasn't taken too much advantage of its "Academic Freedom", most of the high-jinx being rather transparent publicity efforts for various dances.

The McGill Daily, however, which became a four-times-a-week publication this term by dropping the Monday issue, showed there was "a dance in the old dame yet" by publishing a poll on cheating. "We Aren't as Innocent as Invigilators Believe" said the headline in large, black type. "Poll Shows 26% Scientists Practise Cheating," said the sub-head.

Two hundred and forty students from all faculties were asked: (1) Do you cheat? (2) Would you cheat if you had the opportunity? Sciencemen led in affirmative answers to the first question with 26 per cent. They were followed closely by the engineers with 23 per cent and commercemen with 21 per cent. There was a three-way tie for fourth place with the artsmen, doctors and dentists each polling six per cent. The lawyers had the lowest dishonesty rate with three per cent.

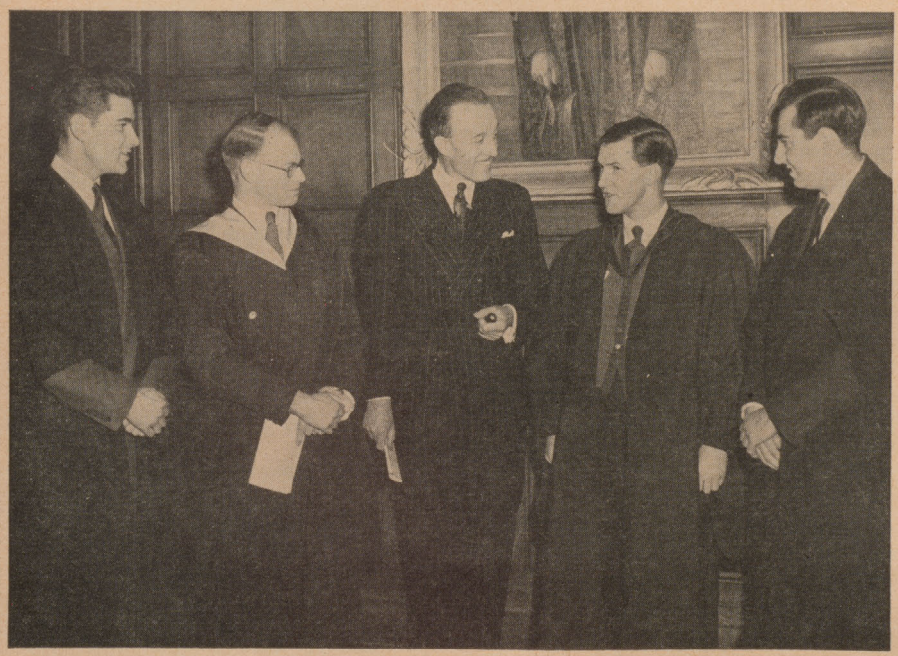

A different view of the lawyers was given by their answer to the second question — 37 per cent of them said they would cheat if they had the opportunity.

The McGill Daily admitted "the results cannot be taken as truly representative because of the small number of people questioned. Also, there is little correlation between the number of students questioned in each faculty and the number of students actually registered in that faculty."

The validity of *The Daily* poll was questioned in city newspaper reports and editorials, with one comment being that the students "were carrying a joke too far when they alleged that as high as 26 per cent of undergraduates practised cheating in examinations." But *The McGill Daily* stood by its figures, repeating only the qualifications regarding the numbers of students questioned. A *Canadian Press* report from Toronto said: "The general feeling among students at the university here was that their cheating score would probably run much the same as that of McGill students."

But at least one McGill professor made it clear he took a very dim view of the poll. "The adolescent mind," he said, "delights in shocking grownups. It is a kind of sport for the undeveloped consciousness of youth. As usual, certain of the juvenile minds rose to the occasion with such an opportunity as presented by the poll."

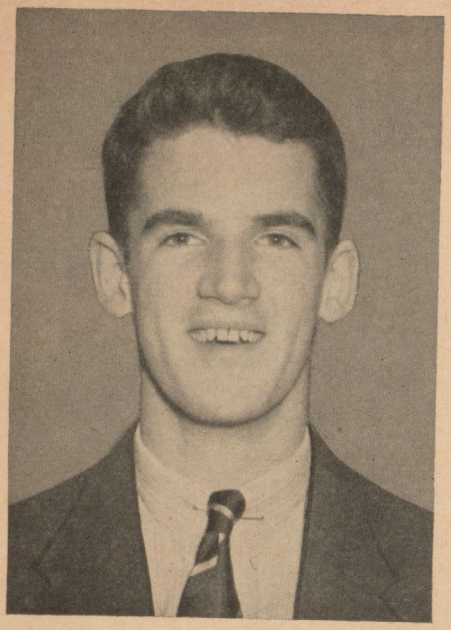

If this satisfied most people about the validity of the poll, they were probably left wondering about the comment of one co-ed. She said she restricted her cheating to certain subjects for she felt that overall cheating was dishonest.

TRIUMPH FOR SCOTS *A pair of argumentative Scots defeated McGill University opponents in a debate on the resolution: "That the British Commonwealth should federate". The Scots were on a Canadian tour. Shown left to right are: Peter Satterthwaite, of McGill; Ian MacGregor, past-president of the Scottish Students' Union; Dr. F. Cyril James, principal and vice-chancellor who acted as chairman of the debate; Tom Tomlinson, past-president of Glasgow University Debating Club, and Murray Spiegel, McGill.*

A Scottish debating team consisting of Ian MacGregor, of Edinburgh University, and Thomas Tomlinson, of Glasgow University, defeated a McGill team in the first of a series of annual Canada - Scotland competitions. With David Craig, of Aberdeen University, alternating on the team, the Scotsmen went on to defeat Queen's and Toronto to capture the Brading Trophy which was put up this year for the annual international event.

In their Montreal appearance, MacGregor and Tomlinson avenged Scotland's defeat three years ago by McGill debaters Ted Huguesson, Sydney Phillips and Isadore Rosenfeld who were undefeated during their tour of British universities. The Scottish team upheld the affirmative of the topic "Resolved that the Com-

CHARLES M. TAYLOR, *of 436 Cote St. Catherine Road, Montreal, 20-year-old honours student in history in his final year at the university, has been chosen as one of two Quebec Rhodes scholars for 1952. Mr. Taylor started his schooling at Selwyn House and continued it at Trinity College School, Port Hope, Ont. Since coming to McGill, he has been active in the debating society, the choral club, Elgar choir, music club and sports. At Oxford, he plans to study philosophy, economics and political science.*

monwealth should federate" arguing that "federation" rather than "association" would enable the Commonwealth to serve as "a great balancing power" between the two camps into which the world was divided. To meet modern conditions, the Scotsmen argued, the resources of the Commonwealth should be distributed and this distribution could be more easily effected by federation. The raw materials and power of a country such as Canada could be put to better use with the craftsmanship of England by the encouragement of the emigration of artisans from the United Kingdom to this country.

The McGill team consisted of Peter Satterthwaite and Murray Spiegel. Satterthwaite, a first-year law student, graduated in Engineering in 1949 and Spiegel is in second year law. Both have been outstanding in debating at McGill for several years.

Principal F. Cyril James, honorary chairman of the Debating Union Society, acted as chairman for the debate while judges were Mr. Justice Batshaw; Hon. A. K. Hugessen, Q.C.; and Shirley G. Dixon, O.B.E., Q.C. The president of the Debating Union Society, Mike Wilson, declared that next year a Canadian team would go to Scotland.

If funds could be raised, four McGill students were to be chosen to attend the Fourth International Student Service Summer Seminar to be held in India from May 28 to July 2. The first of the annual seminars, which was attended on a scholarship basis by students from universities and colleges across Canada, was held in Ploen, near Kiel, Germany, in the summer of 1948. Subsequent seminars, each of which was attended by four McGill students, were held in Holland, France and Canada.

The theme for this year's seminar is "Human Implications of Technological Change." Students attending the seminar will discuss the historical and cultural backgrounds of India; some of India's social, political and economic problems; and how these problems are aggravated or alleviated by advances in technical knowledge.

McGill students who have attended the various seminars have been among the most active of all those interested in international affairs and have been key workers in the annual drives for funds to assist needy students in India and other countries except Russia and her satellites. The seminars have received considerable financial support from the federal and the provincial governments and much of the assistance has come from private sources.

The 1952 edition of the campus literary magazine, *Forge*, was well received. Dr. Constance Beresford-Howe, novelist and faculty member in the English Department, declared the general quality of the stories in this year's issue of the magazine was high. "The techniques are deft and the themes varied," she declared. "There is a freshness and vigour about the best of them, combined with a notable degree of discipline which makes satisfying reading. The stories in this year's *Forge* proudly carry on the traditions of the magazine. The editors have allowed nothing shoddy or imitative to get by, and the contributors are to be congratulated on the excellent quality of their work."

"One is struck, at once, by the good quality of the poetry in general," declared Louis Dudek. "Not one of the contributors will ever need to hide his copy of the *Forge* behind a bookcase. The contributors write in a contemporary idiom, conversational speech raised to the use of poetry; and their form and manner shows a familiarity with some of the living poets of our time."

STAGE MODEL ADMIRED: *Dr. F. Cyril James, principal and vice-chancellor, lauded members of the "university family" for a magnificent demonstration of recreational interest at the formal opening of the McGill Arts and Crafts exhibition in the students' lounge of the Physical Sciences Centre. The principal is shown here with A. J. H. Pullinger, chairman of the exhibition, viewing a stage model for a contemplated drama production, the work of Elmer Hall of the English department.*

Graduates' Society Nominations

For Graduates' Society Representative on the Board of Governors of the University — Term 3 Years.

FRANCIS GILBERT FERRABEE, B.Sc. '24, Diploma, R.M.C. Vice-President and General Manager, The Canadian Ingersoll-Rand Co., Ltd., Montreal. Member, Montreal Branch Council, 1944-'46. Representative on the Students' Advisory Council, 1945-'47. Chairman, Membership Committee of the Graduates' Society, 1945-'46. President of the Graduates' Society, 1948-'50. Honorary Treasurer, Montreal Board of Trade, 1951-'52.

For President of the Graduates' Society —Term 2 Years.

SHIRLEY G. DIXON, O.B.E., Q.C., B.A. '11, B.C.L. '14. President of the Students' Society, 1913-'14. Senior Partner with the firm of Dixon, Claxton, Senecal, Turnbull & Mitchell. World War I — Served with the 19th Battalion, 1914-'19, with the rank of Captain. Elected to the Council of the Montreal Bar, 1936. Elected President of Courtaulds (Canada) Ltd., 1938. Rayon Administrator under the Wartime Prices and Trade Board, 1942-'46. Chairman of the Board of Directors of Courtaulds (Canada) Ltd., 1949. First Vice-President of the Graduates' Society, 1950-'52.

For First Vice-President of the Graduates' Society — Term 2 Years.

STEPHEN BOYD MILLEN, O.B.E., B.A. '27, B.C.L. '30. Managing Director of John Millen & Son Ltd. War Memorial Executive Committee, 1944-'47. Regional Vice-President of the Graduates' Society for the Province of Quebec, 1946-'48. President of the Montreal Branch of the Graduates' Society, 1948-'50. Member of the Council of the Board of Trade.

For Second Vice-President of the Graduates' Society — Term 2 Years.

D. ROSS MCMASTER, M.B.E., Q.C., B.A. '30, B.C.L. '33. Advocate with the firm of Heward, Holden, Hutchison, Cliff, Meredith & Ballantyne. Served with the Royal Canadian Artillery, 1940-'46, with the rank of Major, North-West Europe. Member of the Board of Directors of the Graduates' Society 1950-52.

For Regional Vice-Presidents — Term 2 Years.

For the Maritime Provinces — ELDON M. TAYLOR, B.S.A. '18. Secretary of the New Brunswick Branch of the Graduates' Society, 1947-'49. President of the New Brunswick Branch of the Graduates' Society, 1949-'51.

For Quebec (excl. Mtl.) and Eastern Ontario —B. H. DRUMMOND GILES, B.Sc. '27. President of Courtaulds (Canada) Ltd. President of the Upper St. Lawrence Branch of the Graduates' Society, 1949-'50.

For Central Ontario — E. G. MCCRACKEN, B.Sc. '24. Sangamo Co., Ltd., Leaside, Ontario. Past Secretary of the McGill Society of Toronto. Vice-President of the McGill Society of Toronto, 1946-'48.

For Ottawa Valley and Northern Ontario— BERNARD M. ALEXANDOR, B.A. '28, B.C.L. '30. President of the Ottawa Valley Graduates' Society of McGill University, 1949-'51.

For Prairie Provinces — LT. COLONEL GEORGE E. COLE, B.A. '02, B.Sc. '06. Retired Mining Engineer. President of the Winnipeg Branch of the Graduates' Society, 1949-'51.

For British Columbia — HARRY M. BOYCE, B.COM. '30. Treasurer of the British Columbia Telephone Co. President of the Vancouver Branch of the Graduates' Society, 1948-'50.

For U.S.A. (New England) — GERALD G. GARCELON, M.D. '35. Surgeon. President of the New England Branch of the Graduates' Society, 1949-'50., Regional vice-president, 1950-51.

For U.S.A. (East) — ALLISTER M. MCLELLAN, M.D. '24. Physician. Past President of the New York Graduates' Society of McGill University.

For U.S.A. (Central) — MALCOLM T. MACEACHERN, M.D.' 10, D.Sc. (Hon.). (Marquette University), LL.D. (Hon.). Physician, Associate Director, American College of Surgeons, Chicago. Professor of Hospital Administration and Head of the Department, Northwestern University. Director of Professional Relations, American Hospital Association. Regional Vice-President, 1946-'52.

For U.S.A. (West) — ERNEST H. FALCONER, M.D. '11. Physician (Specialty, Internal Medicine), San Francisco, Calif. Clinical Professor of Medicine, University of California Medical School. Regional Vice-President, 1946-'50.

For United Kingdom and countries other than Canada and U.S.A. — THOMAS F. COTTON, B.A. '05, M.D. '09, D.Sc. '46 (Hon.). President of the McGill Society of Great Britain, 1946-'51.

For Members of the Board of Directors of the Graduates' Society—Term 3 Years.

ROBERT FLOOD, B.S.A. '35. Professional Horticulturist. Manager, Slack Bros., Waterloo, Que. President, District of Bedford Branch of the Graduates' Society, 1949-'50. R.C.I.C. 1943-'45.

PHILIP N. GROSS, B.Sc. '26. Engineer and Builder. President, Anglin Norcross Corp., Ltd. R.C.E. 1940-'43.

LINDSAY PERCIVAL WEBSTER, B.COM. '25, C.A. '28. Vice-President, Administration, Dominion Textile Co., Ltd. Director, John S. Brooks Ltd. and Howard Cotton Co., School of Commerce Fund Chairman, 1951.

The foregoing nominations are published in accordance with Article XIII of the By-Laws of the Graduates' Society of McGill University. Additional nominations for any office or for election to the Board of Governors, signed by at least fifteen members of the Society entitled to vote, shall also be placed on the ballot by the Secretary of the Society if received by him before April 15th, 1952.

The Chairman of the Nominating Committee, Colonel Paul P. Hutchison, Q.C., has asked that the attention of the graduates be drawn to the fact that only one nomination has been made this year for each of the three vacancies on the Board of Directors. This is a departure from the practice followed in recent years.

The reason for this change is that a number of letters has been received by the Chairman of the Committee and a number of graduates has approached the President of the Society, expressing the opinion that the Nominating Committee should not ask more graduates to stand for election to office than there are offices to be filled. The feeling seems to be that the Nominating Committee should nominate the exact number of candidates to fill the various positions and allow the members at large to make any additional nominations in accordance with the provisions of the By-Laws above quoted.

DR. STANLEY M. BANFILL, *M.D. '33, gave up his post as Dean of Medicine at Hong Kong university to return to McGill to serve as professor of anatomy. It was at Hong Kong in 1940 that the 44-year-old native of East Angus, P.Q., as a member of the Royal Rifles of Canada, was captured and spent three years and eight months in Japanese prisoner camps.*

Sydney Mitchell, Horticulturist

Arts graduates of the period centering on the close of the last century will learn with deep regret of the death, at his home in Berkeley, California, of Sydney B. Mitchell, B.A. '01.

Having followed the career of librarian, he became associated with Stanford University Library in 1908. Somewhat of a pioneer in that profession, he became, in 1926, director of the Graduate School of Librarianship at the University of California,

(Continued on page 35)

Sydney Mitchell . . .

(*Continued from page 34*)

when this institution was established by that university. Having had much to do with its inception, he remained at its head till his retirement a few years ago.

As a hobby, Syd Mitchell took up the cultivation, on a commercial scale, of Iris and became one of the foremost authorities on this branch of horticulture. He developed a number of new strains of his favourite flower and wrote authoritatively on Iris culture. The Journal of the California Horticultural Society in 1950 issues named him "Dean of Horticulture in California".

Fellow students will recall his enthusiasm for amateur theatricals and his talent for producing and directing the college plays of those early days. His widow, herself a McGill graduate, is the former Rose F. Michaels, B.A. '05.

Books

Two books, one privately printed, have reached the desk of The Editor. Each in its own way reflects a tremendous amount of work and study on the part of the writer and it is evident, too, that in both cases, the little volumes have been a labour of love.

The News is glad of the opportunity to bring to the attention of its readers the work of two McGill graduates who have made no small contribution to the reading pleasure of those who find joy in sharing the hobbies and interests of others.

The Jones Golf Swing, with Practical Suggestions by Many Experts.

by John Godfrey Saxe
42 pp.—Privately Printed

Many years ago, Harry Vardon wrote of golf: "There are just two primary and all-important points to remember—two essentials to success. They are to grasp the club properly and to keep the head steady."

In the years that followed, writes Mr. Saxe, Vardon's two essentials have remained constant. They are as vital now as they were then. When a golfer has acquired them—by play and by practice—and only then—will he become qualified to make the best use of the inspired teaching of Ernest Jones as to the essentials of a swing.

There are 12 chapters on the subject of golf and every phase of the game from tee to green is covered: stance, the swing, approaching and putting. This has been a painstaking job as is evident from the quotes and advice culled from the lessons of the golfing masters — Hogan, Nelson, Barnes, Snead, Alex Morrison and a host of others who contributed their experience to make this unique book on golf.

The author, John Godfrey Saxe, B.A. '97, (Hon.) M.A. '14, explains that this little book on golf was written from a long series of notes jotted down over a period of 25 years and rewritten again and again. Every golfer who chances upon the little volume will agree it has been time well spent.

Our Island Story

by Carrie Ellen Holman
119 pp.—Tribune Press, Sackville N.B.

In the winter of 1948, a series of broadcasts was given by Carrie Ellen Holman, B.A. '00, over station CFCY Charlottetown on the subject of her native province of Prince Edward Island. It is unlikely that this fine series reached the attention of many outside the limited boundary of the broadcasting station so that it is fortunate indeed that these illuminating chapters have been put into book form and published under the title of "Our Island Story".

Miss Holman tells in her foreword that the broadcasts were prompted after reading William Coates Barrett's "Tales Told Under the Old Town Clock". She suggested to the Charlottetown radio station that two or three talks might be given on the early days of Prince Edward Island and the result was 13 broadcasts.

"I began to realize", explains Miss Holman, "that this was an opportunity to give young people an understanding of the heroic struggle of their ancestors in wresting homes from the wilderness and the equally difficult task of winning for themselves and their descendants the freedom of responsible government."

The Canadian leaders in the field of electric motor repairs.

ROBSON BLACK, *left, president of the Canadian-Scandinavian Foundation, awards the first foundation fellowship to a woman, Miss June Carroll, of the department of geography at McGill and Dr. Maxwell J. Dunbar, who has also been created a foundation fellow and will study in Copenhagen.*

Leahy: In Montreal, on Nov. 17, 1951, Miss Phyllis Furlong and James Gordon Leahy, B.Eng. '49.

Lepofsky: In Toronto, on Nov. 5, 1951, Miss Bertha Sheila Lepofsky, B.A. '51, and David Harold Pollock.

Lewis: In Montreal, recently, Miss Joan Audrey Stranger and Phillips Frisbie Lewis, B.A. '51.

Lyons-Waterston: In Montreal, on Dec. 29, 1951, Miss Grace Patricia Waterston, B.Sc.Agr. '49, and Leslie Allen McKay Lyons, B.Sc.Agr. '50.

Mappin-Taylor: In York Mills, Ont., on Nov. 17, 1951, Miss Judith Winifred Taylor, B.Sc. '50, and John Newton Mappin, B.Com. '50.

Marchessault: In Montreal, on Nov. 24, 1951, Miss Shirley Lorena O'Neill and Jacques Marchessault, B.C.L. '51

Marshall: In Montreal, on Nov. 24, 1951, Miss Margaret Frances Belisle and Griffith Mackin Marshall, B.Com. '49.

McCuaig-Moriarty: In Montreal, on Dec. 17, 1951, Miss June Moriarty, B.Sc. '47, and James Auley McCuaig, B.Eng. '49, M.Sc. '50.

McGuigan: In Ottawa, recently, Miss Doreen Melissa Murdock and James Francis McGuigan, B.A. '48.

McKeown: In Cornwall, Ont. on Dec. 27, 1951, Miss Dorothy Jean McDowell and James Hugh McKeown, B.Com. '51.

Miller: In Caux, Switzerland, recently, Miss Margaret Miller, B.A. '34, and Matthew Manson, of Ayre, Scotland.

Riley: In Hudson Heights, P.Q., on Dec. 1, 1951, Miss Drusilla Drake Riley, B.A. '48, and Maarten Van Hengel.

Ronson-McLaughlan: In Montreal, on Jan. 19, 1952, Miss Caroline May McLachlan, B.Sc. '48, and John Clifton Ronson, B.Com. '48.

Scott-Henderson: In Montreal, on Nov. 24, 1951, Miss Muriel Henderson, Grad. Nurs. '51, and Roland Scott, B.Com. '50.

Sharkey: In Montreal, on Dec. 1, 1951, Miss Anne Gelineau and Patrick Joseph Sharkey, M.D. '48.

Slaght-Van Patter: In Montreal, on Dec. 27, 1951, Miss Jean Mary Van Patter, B.Sc. '51, and William Henry Slaght, B.Sc. '49, M.Sc. '51.

Speidel: In Montreal, on Oct. 6, 1951, Miss Beryl Maude Turner and Joseph Speidel, B.Eng. '51.

Swaine-Taylor: In Montreal, recently, Miss Pamela Mary Taylor, B.Sc. H.Ec. '50, and Eric Gregory Swaine, B.Sc.Agr. '50.

Taylor: In Montreal, recently, Miss Sheila Rosamond Taylor, B.Sc.H.Ec. '49, and Donald Maclachlan Smith.

Trasler-Jenkins: In Lima, Peru, on Oct. 7, 1951, Miss Daphne Gay Jenkins, B.Sc. '48, and Frank M. Trasler, B.Eng. '48.

Watson: In Montreal, recently, Miss Barbara Ruth Watson, B.A. '50, and Peter Leger Ross.

Whitman: In Montreal, on Oct. 27, 1951, Miss Gertrude Jean McKnight and Lothrop Avarde Whitman, B.Eng. '50.

Williams: In Montreal, on Nov. 24, 1951, Miss Phyllis Jardine and Capt. Alan B. Williams. B.A. '49, Educ. '50.

Woolverton: In Montreal, on Sept. 26, 1951, Miss Dorothy Beatrice Kerby and Ralph Solon Woolverton, M.Sc. '50.

Young: In Cornwall. Ont., on Dec. 26, 1951, Miss Beatrice Louise Clarke and Archibald Douglas Young, M.D. '51.

Young-Pirie: In Belleville, Ont., on Dec. 29, 1951, Miss Constance Evelyn Pirie, B.Sc.H.Ec. '43, and Murray MacGillivray Young, B.A. '49.

Births

Allen: At Hartford, Conn., on Jan. 18, 1952, to George Allen, M.D. '37, and Mrs. Allen, a daughter.

Atkinson: At Toronto, on Oct. 8, 9151, to James T. N. Atkinson, B.Eng. '44, M.Sc. '46, and Mrs. Atkinson, a son.

Ballantyne: At Montreal, on Dec. 19, 1951, to Ian Ballantyne and Mrs. Ballantyne (Bernice Faughnan, B.A. '45), a son.

Bensen: At Stamford, Conn., on Sept. 30, 1951, to A. V. Bensen and Mrs. Bensen (Barbara Martin, B.A. '41), a son, Richard Allen.

Bishop: At Montreal, on Dec. 13, 1951, to John W. H. Bishop, B.Com. '36, and Mrs. Bishop, a daughter.

Bower: At Montreal, on Nov. 29, 1951, to R. W. Bower and Mrs. Bower (Marilyn Miller, B.Com. '47), a son.

Bridel: At Montreal, on Dec. 31, 1951, to Thomas F. Bridel, B.Com. '48, and Mrs. Bridel, a daughter.

Buch: At Montreal, on Nov. 26, 1951, to John E. Bush, B.Eng. '49, and Mrs. Bush (Jean Struthers, B.Sc. '48), a son.

Byers: At St. Joseph d'Alma, P.Q., on Dec. 13, 1951, to Stephen P. Byers, B.Eng. '49, and Mrs. Byers (Elspeth Rankine, B.A. '44), a son.

Cadloff: At Montreal, on Nov. 24, 1951, to Joseph Cadloff, B.Arch, '50, and Mrs. Cadloff, a son.

Caney: At Fort William, Ont., on Aug. 13, 1951, to Leo Caney, B.Sc. '51, and Mrs. Caney, a daughter.

Crabtree: At Montreal, on Dec. 7. 1951, to H. Roy Crabtree, B.Sc. '38, and Mrs. Crabtree, a son.

Elo: At Montreal, on Nov. 27, 1951, to J. Thomas Elo, D.D.S.'49, and Mrs. Elo, a son.

Fraser: At Montreal, on Dec. 5, 1951, to C. Donald Fraser, and Mrs. Fraser (Marjorie Abbey, B.A. '45), a daughter.

Goodliffe: At Windsor, England, on Oct. 31, 1951, to Michael Goodliffe and Mrs. Goodliffe (Peggy Tyndale, B.A.'41,) a son.

Haskell: At Toronto, on Nov. 29, 1951, to Lewis Duncan Haskell, B.Com. '48, and Mrs. Haskell, a son, Lewis Crighton.

Hutchins: At Montreal, on Dec. 22, 1951, to Roger W. Hutchins, B.Sc. '49, and Mrs. Hutchins, a daughter.

Hyde: At Montreal, on Nov. 28, 1951, to Eric J. W. Hyde, B.Eng. '51, and Mrs. Hyde (Pamela Ponder, B.Sc. '48), a son.

Kaine: At Shawinigan Falls, P.Q., on Nov. 12, 1951, to Gerald Kaine, M.D. '35, and Mrs. Kaine, a son.

Lapin: At Montreal, on Nov. 11, 1951, to Lyon Lapin, B.Sc. '39, M.D. '41, and Mrs. Lapin (Charlotte Slabotsky, B.A. '38), a son.

Layton: At Montreal, on Nov. 24, 1951, to Robert E. Layton, B.Eng. '47, and Mrs. Layton, a daughter, Nancy Jean.

Leathem: At St. Catharines, Ont., on Nov. 12, 1951, to Ronald W. Leathem, B.A. '34, M.A. '36, and Mrs. Leathem, a son.

Leopold: At Montreal, on Nov. 15, 1951, to Irwin Leopold, B.A. '45, and Mrs. Leopold, a son.

Lewis: At Montreal, on Jan. 2, 1952, to John F. Lewis, B.Com. '36, and Mrs. Lewis (Ruth W. Edmison, B.A. '37), a daughter.

McGaughey: At Montreal, on Dec. 8, 1951, to G. Sheldon McGaughey, B.A. '51, and Mrs. McGaughey, a son.

McCormick: At New York City, on Nov. 14, 1951, to Goerge W. McCormick, M.D. '35, and Mrs. McCormick (Mary Ramsden, M.A. '33), a son.

McGanity: At Toronto, in November, to Dr. William McGanity and Mrs. McGanity (Mary Hambrock, B.Sc. '45), a daughter.

McKay-Keenan: At Winnipeg, on Apr. 11, 1951, to R. McKay-Keenan, B.Eng. '50, and Mrs. McKay-Keenan, a son, Marvin Walter.

Milne: At Glen Falls, N.Y., on Dec. 4, 1951, to James B. Milne, B.Sc. '47, B.Com. '49, and Mrs. Milne, a son.

Mitchell: At Montreal, on Nov. 28, 1951, to Leonard Mitchell, Ph.D. '44, and Mrs. Mitchell, a son.

Moore: At Plainfield, N.J., on Nov. 28, 1951, to Harold L. Moore and Mrs. Moore (Betty Planck, B.Sc. '47), a daughter.

Moore: At Montreal, on Nov. 21, 1951, to W. Donald Moore, B.Eng. '50, and Mrs. Moore, a daughter.

Morse: At Montreal, on Jan. 21, 1952, to Clifford Morse, B.Eng. '41, and Mrs. Morse, a son.

Oliver: At Montreal, on Dec. 12, 1951, to Howard T. Oliver, D.D.S. '38, and Mrs Oliver, a son.

Orban: At Montreal, on Nov. 12, 1951, to Bill Orban, Phy.Ed. '49, and Mrs. Orban, a son.

Pomerantz: At Montreal, on Dec. 29, 1951, to Z. H. Pomerantz, M.D. '47, and Mrs. Pomerantz, a daughter.

Popliger: At Montreal, on Jan. 1, 1952, to Lawrence Poplinger, B.C.L. '44, and Mrs. Poplinger, a son.

Porter: At Brooklyn, N.Y., on Nov. 6, 1951, to T. H. Porter, B.Com. '49, and Mrs. Porter, a son.

McGill's Greats in Track and Field

Coach Van Wagner Recalls a Few Between the Two World Wars

by F. M. Van Wagner

Sports at McGill are rich in tradition. This is particularly true in the case of track and field. One of the early editions of the *McGill Gazette* gives an account of how Bowie, a McGill man, won the two-mile race in one of the first Intercollegiate meets held in the United States. The interest created by Bowie's win resulted in the inauguration of the McGill Interfaculty Track meet in October, 1873. This meet is probably the oldest of its kind in existence on this continent.

Intercollegiate competition in track started in 1899, one year later than football. Over the years, McGill has established an enviable record in

F. M. Van Wagner

track, winning more championships in this sport than have been won by any member of the C.I.A.U. in any sport.

Early accounts indicate that there existed a strong urge to beat Toronto from the very first. It has always been the aim of the track team to win the championship and let the records fall where they may. On numerous occasions, McGill track men have sacrificed opportunities to win individual honours to gain a team victory, thus often winning the meet while most of the first place medals went to their opponents.

The fall of 1920, my first at McGill, is still fresh in my memory; may it long remain so. On September 13th of that year, Dr. A. S. Lamb took me to visit the McGill track for the first time. There I had the pleasure of meeting two great enthusiasts; Ronnie Hamilton, president, and Jack O'Brien, manager of the Track Club. They were very conscious of the past feats of such outstanding stars as Percival Molson, J. D. Morrow and J. C. Kemp who had made track history at McGill, and determined that the standards set by these men be maintained. As new coach, I got the idea then that McGill was expected to beat Toronto in track. This was my introduction to what I like to think of as the McGill track spirit.

No attempt has been made to place the athletes I have chosen to mention on this occasion, in order of their ability. I will refer to them largely in the order of their appearance on the athletic stage.

The 1920 Intercollegiate meet was held in Toronto and upon our arrival, who should be on hand to welcome us, but the mayor, Tommy Church. He took us to the theatre and did everything possible to make us feel at home. We soon met the late Walter Knox, Olympic coach and in his day one of Canada's alltime great athletes. He was then coach of the Toronto track team. Walter was very friendly and did his best to assure us that any hope we might have of beating Toronto was entirely futile.

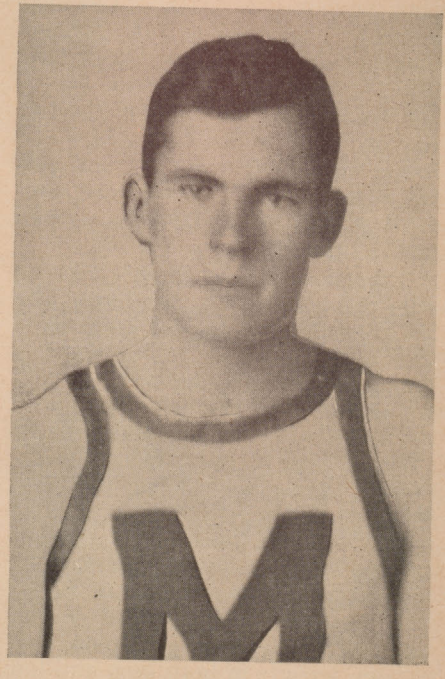

Of course Toronto did have a few good track men. We were told about Keith Carruthers, who would win the high hurdles and probably set a new record. A Toronto report of the meet calls the high hurdles the most exciting event of the day. It was certainly a memorable event for all McGill men present, for the winner and new record holder proved to be Jack Farthing who, of course, was wearing a McGill crest.

Another Blue athlete whom Coach Knox regarded very highly was Joe Breen, a football player who, we were assured, would win the sprints in a 'breeze'. May we now introduce the man who did win both sprints and who proved to be the answer to a young coach's prayers; the one and only Dave Johnson.

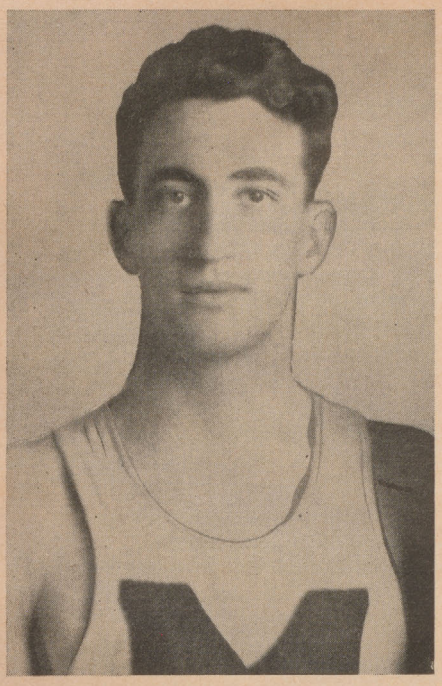

Winning his heats and the finals in the 100 and 220 yards was just a warm-up for the fearless Dave. It was late in the afternoon when the last call for the quarter-mile was given. McGill must score heavily in this event to win the championship. Big Cecil Hay, our number one man, was warming up but who was to be his running mate? Johnson had been entered as a spare in this event and, although he had already done a good day's work, we hurried into the dressing room where he was resting and asked if he felt equal to a 440.

Though it was not mentioned, Dave knew that a McGill victory probably hinged on what he could do in this event. He replied that he felt he could run the distance and was willing to try if it was fair to Jack King whom he would be replacing. Jack readily agreed that Dave should run in his place.

At the crack of the starter's gun, our sprint champion shot into the lead, closely followed by teammate Hay. They finished in that order

Dave Johnson

Syd Pierce

so the championship and R. Tait McKenzie Trophy would remain at McGill for another year.

From the McGill supporters present I now heard for the first time a very pleasant version of the Toronto yell: "We've got you! we've got you! we've got you Varsitee!"

Dave Johnson starred in the 100, 220, 440 and relay during the remainder of his stay at McGill. He then went to Oxford as a Rhodes Scholar where he continued to run and was Canada's best track athlete in the 1924 Olympic Games.

I would like to say this of the two Toronto men, Keith Carruthers and Joe Breen; they were then and still are fine fellows. They are now residents of Montreal and doing very well from all reports.

Anyone at McGill in Syd Pierce's time will be likely to remember him for his producing and acting in Red and White Revues. Syd also had a short, but outstanding career with the track team. He did not turn to track until after he had given football a fling. I think his pal, Hank Gaboury, persuaded him to take up hurdling. In any case, he worked one summer under M.A.A.A. coach J. P. Nicholson and by fall easily made the McGill track team. Though his track career was short, he not only was several times intercollegiate champion, but also set records in both high and low hurdles.

On one occasion at Queen's he really had to be good to win. An inexperienced starter allowed Syd's opponents in the high hurdles to get off to a flying start. When Syd started with the gun, the rest of the field was going over the first hurdle. It looked like a lost cause, but Syd was at his best in a handicap event. He headed for the finish line by the most direct route, knocking down most of the hurdles on the way but arriving first, in time to equal the record. Since the hurdles were not of standard design, the usual disqualification penalty was not inflicted.

I am often asked what it is that distinguishes the really great athlete from the many good ones. The question is not easily answered. Exceptional strength, speed, endurance, highly developed game skills and a strong will to win are qualities all great athletes must possess. But there seems to be something more, a gift bestowed on few. The qualities of greatness show to best advantage in moments of great stress, under intense competition and often make the difference between victory and defeat. I believe athletic greatness depends as much upon the quality of spirit as upon possession of the highest physical qualities.

I have always considered the late Charlie Drew to have been one of McGill's really great athletes. I knew of his outstanding record in football and track at Amherst College so lost no time, on his arrival, in inviting him to join the track squad. At our first meeting he assured me that his one interest at McGill was medicine. Football, he said, was his favourite sport but he had decided never to play it again. As far as track, his second love, was concerned, he agreed to think it over and let me know. It was a great break for the track team when his love for competition won out. While medicine always remained first in importance with Charlie, that did not prevent him from being our high point-winner during the next five years. He competed in the jumps, hurdles and weights and revelled in keen competition. Winning for him had little meaning unless it involved a struggle. Like all great athletes, Charlie was at his best with the last trial coming up and team victory or defeat hanging in the balance.

Of all McGill athletes, none is more widely-known or highly-regarded than Phil Edwards. For a period of at least ten years, Phil was one of the world's leading middle-distance runners. He represented Canada in two British Empire Games and in the Olympics of 1928, 1932 and 1936, where he placed regularly in the 800, 1500 metres and 1600-metre relay. While he was never Olympic Champion, on several occasions his time was better than the existing record. Few runners, if any, have equalled his record over such a span of years. His beautiful running form, often described as the "poetry of motion", made a lasting impression on all who saw him in action.

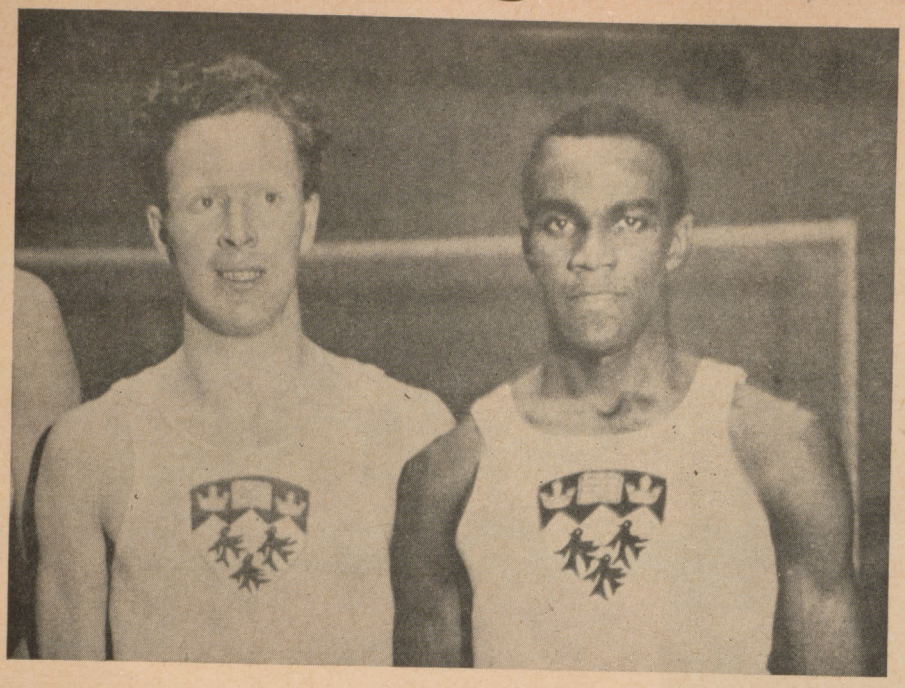

While running for McGill, Phil was little interested in winning personal championships. He was always anxious to run in those events where he could make the greatest contribution to a team victory. Nothing pleased him more than to allow a teammate to win while he took second place.

Phil could easily have set more McGill and Intercollegiate records had he been interested in seeing his name written more frequently in the record books. He did set one record, as we might say by request. At his last Interfaculty meet, I suggested that he not only win the Warren Hurd Memorial Trophy for the half-mile, but set a record as well.

He declined, as he did not wish to break a record held by his former teammate, Gerry Sampson. Knowing Phil, I might have anticipated his reaction. Then largely to please the

Charlie Drew

Gerry Sampson** (left) and **Phil Edwards

coach, he agreed to try for a 440 record. His time of 49.3 seconds stands as a challenge to future quarter-milers.

Another athlete who made a lasting impression is Gordon Meiklejohn, who developed his very considerable talents into winning and record breaking performances with the shot and discus. He, too, was a serious-minded medical student who not only found time to excel in track but was also a member of McGill's great hockey teams under the guidance of the late Bobby Bell.

Gordie Meiklejohn

The 1933 meet was held at Kingston. Queen's had a good shot putter and outstanding footballer in Abie Zvonkin. The Queen's coach on this occasion was none other than Walter Knox, whom we had met before. According to Walter, Abie was going to set a new shot putt record. Everything had been carefully checked so there could be no question about approving the anticipated record. Here you will recognize another of those situations so much appreciated by McGill track men. With the stage so carefully set, Gordie took advantage of the occasion to do the record breaking himself. I should like to say of Walter Knox that he was a good loser and didn't resent our obvious enjoyment of this situation.

If some of our outstanding track men came to McGill with considerable competitive experience behind them, this was not the case with Big Jim Worrall. He came, as have so many good track men, from Montreal High, and developed into an outstanding high jumper, hurdler, and quarter-miler while at McGill.

I recall one occasion when Jim seemed to have taken advice too literally. While competing in an indoor meet at Hamilton, a couple of our runners, inexperienced in indoor racing, were knocked off stride at the start in one of those grand scrambles so common on indoor tracks. We tried to point out the necessity of being on the alert to protect one's self in these jams. In the final of the 300 yards Jim did a good job in this respect. This time someone else got bumped. Jim won the race and disqualification. We, at least, had the satisfaction of knowing that he was the best man in the race.

The men mentioned here are but a few of the McGill track athletes it was my good fortune to know during the period between the two world wars, and whose achievements in Intercollegiate track remain fresh in my memory. There were of course many others, not to mention the present generation of track men, who are responsible for keeping the famous Tait McKenzie sprinter in the McGill trophy case.

RIGHT: *Here is a real coaching brain trust. Left to right: Dr. Lorne C. Montgomery, Frank J. (Shag) Shaughnessy, W. P. (Bill) Hughes, Vic Obeck, Dr. C. J. (Flin) Flanagan, and Lieut.-Col. D. Stuart (The Major) Forbes. Vic is looking at an old-fashioned shoulder pad worn in the days of Monty and Stuart Forbes.*

Gridiron

by D. A.

It was quite a party — perhaps the best foot ball gathering the venerable Union ballroom has ever witnessed. It all began when Hugh Savage and his Touchdown Club decided to pay honour to the 1951 Redmen. The committee in charge got as far as planning a big formal dinner at the Ritz when it became evident to all and sundry that this was a formidable undertaking at short notice.

ABOVE: *Coach Obeck presents the Billy Lea Memorial Trophy, a solid gold watch, to Geoff Crain, captain-elect and voted by his team-mates the most valuable player of 1951.*

BELOW: *Trophy winners shown here are, left to right, Hank Sliwka, Lois Obeck Trophy winner as the most improved player; Dave Caldwell, 1951 captain, Fred Wigle Memorial Trophy for outstanding sportsmanship; Bill Pullar, Touchdown Club Trophy as outstanding lineman.*

FOOTBALL FANS OF THE EARLY TWENTIES *will recall this great pair of running backs, R. B. (Boo) Anderson, left and Dr. C. J. (Flin) Flanagan. Both were hockey stars as well.*

LEFT: *There was some unusual close harmony at this point when Stuart Forbes, Wally Markham, Frank Shaughnessy, Jr., and Hugh Savage, shown from left to right, gathered around Jack Waud at the piano.*

Gathering

MacDonald

Hugh and company were at their wits' end as to what to do when Lorne Gales, the general secretary of the Graduates' Society, came up with the suggestion of simply throwing an oyster party in the Union ballroom. The general secretary is an old hand at arranging alumni gatherings and so his suggestion was taken up. And what a fine evening it

(*Continued on page 46*)

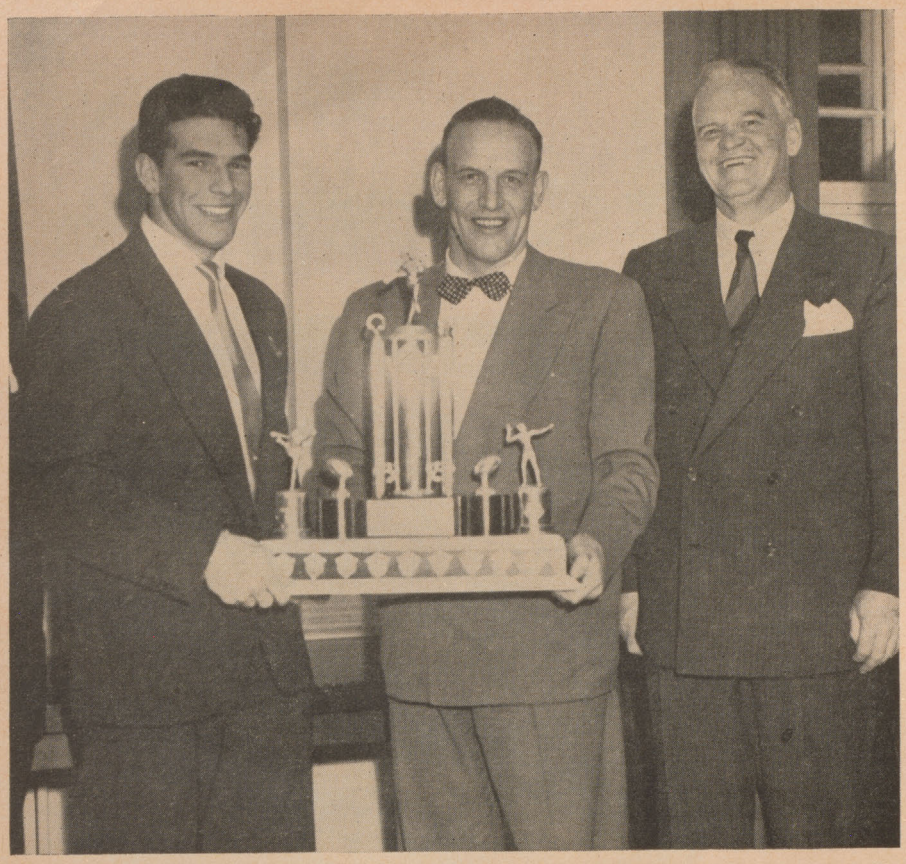

SHAG WAS IN HIS ELEMENT *recalling old times with members of some of the earlier teams. He appears to be reminding Dink Carroll how the latter became known as "The Whispering Halfback" while Gordon (Silk) Murphy enjoys the story.*

BELOW: *Dr. Montgomery, honorary president of the Redmen, chats with a couple of old-time snapbacks, Alan Swabey, left and Dr. Gerry Halpenny.*

SEVEN MEMBERS OF THE 1938 CHAMPION TEAM SHOWED UP. *Left to right are: Captain and quarterback Ronnie Perowne, Russ Merifield, Andy Anton, Colin McDougall, Murray (Sleepy) Telford, Bob Keefer and Prestie Robb.*

MOST VALUABLE PLAYER: *Don Walsh, of the McGill intermediate Indians of the Ottawa-St. Lawrence football conference, left, receives the Claire Mussen Memorial Trophy. The Indians' most valuable player is pictured with Director of Athletics Vic Obeck, centre, and Dr. "Dud" Ross, former McGill football great.*

Gridiron Gathering . . .

(*Continued from page 45*)

was for the more than 150 who attended.

It was one of those affairs at which you meet chaps you hadn't seen for a donkey's age. Every era of McGill football was represented from the days of Bill Hughes, which is going back to 1910, down to the present generation. There was more football talent on deck than you're likely to see again — or at any rate until the Touchdown Club stages its second annual oyster party come this November. Because an annual affair it must certainly be from now on.

You could write a book about the yarns that were swapped in the little groups that gathered together. Dink Carroll, sports editor of *The Gazette*, who was a catching halfback in the days when Warren Snyder played for Varsity to Dink's frequent discomfiture, said he hadn't been in the Union ballroom since his playing days. He recalled that Shag had staged a football workout there once because of bad weather. More shame to Carroll for not coming around oftener.

Dink also remembered that Silk Murphy, who was among those present, was cheer leader in his freshman year in college when the rooters used to hold their practice sessions in this ballroom. He also recalled that, after watching the senior team in action for one season, Silk asked himself: "What is a big fellow like me doing as cheer leader ? I should be out there playing football." So the next year, Silk turned out for the team and made it too and was a star in his own right as well.

Silk was the first of the "Crying Murphys", the other being "Spud", who was a flying wing. The two brothers, a couple of emotional Irishmen, ran up and down the field during a game bawling their heads off for no other reason than they loved to play football.

Flin Flanagan and Boo Anderson, stars of both football and hockey back in the early 'twenties, got together to recall their jousts with Varsity on gridiron and ice. Come to think of it we can't remember when there were two such outstanding performers in both sports around college at the same time.

The odd thing is that neither ever played on a championship hockey and football team the same year but there were three men present at the oyster party who had. One was Bill Hughes who was on a championship hockey and football team in the same calendar year, 1912, and the other two were Ronnie Perowne and Andy Anton, in the same scholastic year, 1938-39. Ronnie and Andy met up during the evening with five other members of the 1938 championship football club — the outfit which enlisted to a man when World War II broke out.

There were more coaches on hand than you could shake a stick at — Monty and Shag (the daddy of them all) and Bill Hughes, Vic Obeck, Flin and Stuart Forbes. Bill is the only one who never coached at McGill but he won three Dominion titles for Queen's (the traitor) another at Hamilton, still another at Ottawa and one with Montreal A.A.A. This adds up to six and you can't think of anyone who ever came close to that record, much less bring the Grey Cup to four different cities.

As might be expected, there was a frightful amount of strategy exploded as more and more oysters were opened. The gabfest covered every era of football, right back to the days of the 14-man game and moleskins and when they used to heel the ball out of scrimmage.

Stuart Forbes, of course, took the honours for the tallest tale of the evening. He recounted beating St. Lambert in a game when he, as quarterback, dived out of touch at every opportunity. Stuart swears that in those days if you carried the ball into touch, it counted as a first down. Even Bill Hughes couldn't remember that far back and Stuart's statement went unchallenged so he won the day.

There will be another gathering like this one in November when the football season is over and if you'll take our tip you'll be there.

McGill Biochemist Honoured

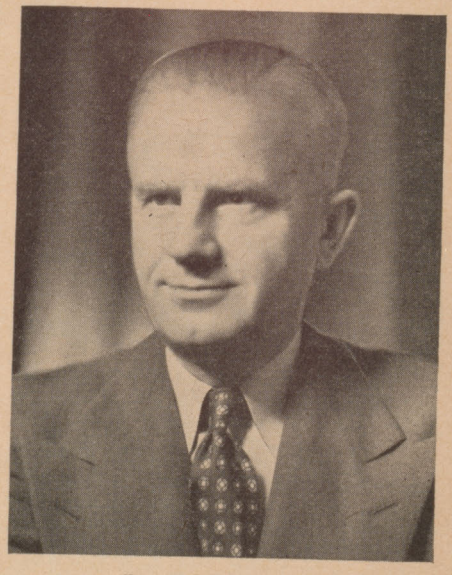

HIGH honours have come to a McGill biochemist and research man. Dr. O. F. Denstedt, Ph.D. '37, has been named a fellow of the New York Academy of Sciences, the fourth oldest scientific society in the United States.

Dr. Denstedt, a native of Blyth, Ont., graduated from the University of Manitoba and then took his Ph.D. in biochemistry at McGill.

He joined the university staff in 1937 and has been actively engaged in research on blood preservation and allied problems since 1939.

His election as a fellow of the New York Academy brings to the foreground the great persistence of his effort to advance knowledge of the preservation of the blood—knowledge which will vitally affect the defence of this country in any atomic bomb attack.

This aspect of Dr. Denstedt's work has been given significance through the support of his research in the department of biochemistry given during the past four years by the National Defence Council. This assistance was supplemented by grants from the John and Mary R. Markle Foundation of New York.

Dr. O. F. Denstedt

Letter to The Editor . . .

The New Chairman - "That Man Millen" - has some very original ideas regarding the Alma Mater Fund

SO you want a message from the Chairman. Very well, my dear Mr. Editor, just remember, you asked for it. Of course, if your circulation falls off, it is my work that suffers, not yours and I'll tell you why. This magazine of yours only goes to *members* of The Graduates' Society. How do you become a member of The Graduates' Society? I am glad you asked me that question. The answer is very simple — you just make a contribution to The Alma Mater Fund. That's just how easy it is. You don't even need a degree — in fact, it has occurred to me at times that a degree may sometimes obstruct the clear vision of its holder as he peers back or if he even glances back to look for obligations, however small, that he has not quite fully discharged.

Whatever you put into your undergraduate days you probably got at least that much out — either in friends and associations or bad habits and a livelihood. But among the things you must have put in, we have to include that sordid thing money, and you probably had less of it than you have now. The amount you put in (for your own good) I don't know but you should. From that point the arithmetic is a cinch. You just double that amount and you know how much McGill lost (also for your good). Nobody can make you do anything about this or even recognize it. My job is to ask you to do something in an easy way or to continue and improve doing what you have done in the past.

As I picture you, in your thousands reading with avid interest this explanatory screed, I want to use a rifle rather than a shotgun and go after one particular group. When I said that only members of the Society (i.e. those who give something to The Alma Mater Fund) receive this magazine, I omitted mention of the fact that this particular issue, containing as it does the Gift Record, goes to all who are eligible. Now let me tell you a curious fact. Last year over 7,000 of us contributed to the Fund. You think that's wonderful? O.K., maybe it is. However, there were over 5,000 others who gave in the previous years but who did not participate in '51. Imagine what our record would have been if those 5,000 had understood the need to continue. Why, we would have had 13,000 members — an all-time continental record achieved in only four years, a record so far ahead of any other university that it would beggar comparison. It would have proved that McGill has something that no one else can claim, and, by the way, we are going to have it.

The merit of this plan is its repetitive nature and its most useful

S. Boyd Millen

aspect is its expendable nature — cheques payable to the University to be spent at once. If, as we hope, the Society can get $200,000 in 1952, it will be just as good as collecting six million in a capital campaign. A good many of you know what a lot of work that would entail!

There is another group of eligibles for whom I have a special word. Consider how upsetting it must be to the perfectly willing and understanding recent graduate who probably has a bunch of brains and babies and no bank balance. Then he gets our high-class literature hitting him on an obvious plan. He feels like the frantic farmer who wrote to the department of agriculture: "Please, don't send me any more books on farming. I don't farm so good as I know how now." We have lots of sympathy for that man. He is very important indeed to McGill and growing more important every year. I have a neat solution for him which I will elucidate below when I tell you, probably with more fortitude than good judgment, how much we want you to give.

The Massey Report, when acted on, will be a great help to the University. So will other developments now in process. But that does not affect the position of the graduates who can still close the deficit. We have an obligation really more important and natural than anyone. The best advice I have had — from a fellow graduate — is that we should ask for one percent of your income. It seems a lot and yet Doug Abbott (Law '21) will pay about half of it, right up to ten percent. That basis, by the way, on a fairly sound bit of figuring would give us about a million and a quarter a year and here is an odd coincidence which I rather like. If we got three dollars a year for every year since you graduated then on the same basis of figuring, we would still get one million and a quarter, so I wish I hadn't been talking that nonsense about two hundred grand this year.

So here we are at an important point in one of the letters you never finished reading. I am trying to set out a rule of thumb to indicate what you should give if you don't already know. I am suggesting that each year you give three dollars for every year since graduation. Thus I would hope my older classmates (class of '30) who are able with or without effort will each give $66.00 in 1952. I am on the horns of a dilemma. I'm vastly impressed with the collective results of small sums coming continuously from all over the world but horrified by the fear that the 25% of our members who now account for 80% of our fund may reduce their

***AS CHAIRMAN OF THE MONTREAL BRANCH'S** Alma Mater Fund Committee, R. I. C. Picard has done a splendid job in completing the class organization. It requires over 121 faculty chairmen and class agents and thanks to the efforts of Mr. Picard, Mr. McCully, and the faculty chairmen, a 100 per-cent coverage is much closer than ever before.*

---

generosity to conform to my rule of thumb. I think I can eliminate this latter possibility because these are obviously understanding people. So there we are, suggesting three dollars for every lapsed year, per year, as a reasonable minimum and one per-cent of income as a fair guide.

I also want to suggest that you write a note to our office if you have your own plans and tell us what to do. Just say something like this: "Look, I can start this thing, I expect, in 1954 (or some other date). In the meantime leave me alone because I understand and will climb aboard as soon as I am able." We can then make a diary note and will follow up when the time comes. I also like the notion that a three-dollar cheque may be considered here as signifying the same message. It will pay for the cost of your plate and we will send you the McGill News. We will also on each anniversary of your token send you a reminder knowing that one of these years, when your ship comes in, you will change the token to what you really want to give. McGill will have kept a valued friend and we will have kept a member.

Yours sincerely,
S. BOYD MILLEN,
Chairman,
Alma Mater Fund.

Acknowledgement to Fund Workers

by F. Lyle Pattee
Fund Secretary

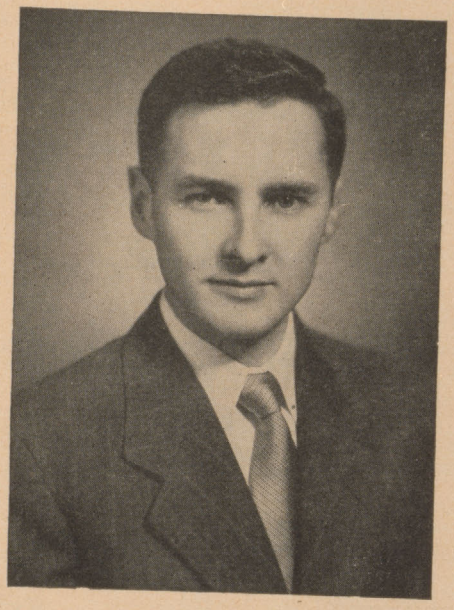

Any attempt to begin to acknowledge the help received from the hundreds of McGill men and women who were responsible for the Alma Mater Fund reaching a new high this year would be, of course, impossible. It is well-nigh impossible also for the average individual to conceive the number of work hours that have gone into the job of contacting every one of the 20,000 graduates living in all corners of the world. McGill graduates are a wonderfully loyal group but 7,356 members of the Alumni did not send in the record sum of $125,769 without being asked.

Most appeals for support of the fund are sent out from the secretary's office but the thought and work of preparing the mailing piece has been done by a group of graduates who volunteered their time and effort to help McGill. By far the most effective appeal is a personal contact or a letter from some interested graduate who can explain the worthiness of the Fund. This has been done all over the country by members of the local fund committee.

The Alma Mater Fund is thus a programme operated by McGill men and women for McGill and depends for its continued success entirely on the amount of interest, help and support it receives from the hundreds of volunteer workers.

The pictures on these pages pay tribute to a few of those many but the selection must, of necessity, be based on the results of figures and percentages and, unfortunately, means the omission of many whose work is not reflected in the results shown by figures. Coincidentally, the size of many of the subscriptions received does not measure the amount of interest, regard for McGill and personal sacrifice involved.

This is written then with the intention of putting forth the fact that many cases did not receive adequate recognition. An attempt to mention any would be a reflection on the others. You, for whom this is intended, know that you are one of this group and I will content myself by saying "thank you" on behalf of the secretary's office with the hope that the personal satisfaction you cannot but help feel for a job well done in a worthy cause has made it worth while.

***CORTLAND J. BROWN,** on taking the job of Fund chairman for the District of Bedford branch, was faced with the difficulty of living up to the high standard set by the Bedford branch in 1950. The many enthusiastic graduates in that area gave him their full support and the branch held first place in the final report with an 84.6% participation.*

***AFTER ORGANIZING THEIR BRANCH** in the spring of 1951, the Sarnia graduates, under the fund chairmanship of J. C. Maguire, lost no time in showing that they did not intend to be left behind by the older branches of the society. Before any of the others had got started, they were in first place with the highest percentage of participation and held this position almost to the last when they were nosed out by the hard-working District of Bedford branch.*

COMPLETING THE CYCLE

The Alma Mater Fund,
McGill University,
Montreal.

Dear Sirs,

The Rt. Rev. P. S. C. Powles of Obuse, Japan, and Mrs. Powles (nee Ruth Mount), both members of the graduating class of Arts '10, have asked me to send you this contribution on their behalf. They are making this contribution to celebrate the graduation of their sixth and last child from McGill University this spring. I think you will agree with me that they are justly proud of this achievement.

Yours sincerely,
R.A.G.

R.V.C. Assistant Wardens Play Important Role

The expanded enrolment of women students in the last decade has meant an increase in problems as well as responsibility for the Royal Victoria College. To help her in the discharge of her obligations to the approximately one thousand young women during the four-year University period of their lives, Dr. Roscoe

Marie Mottola

has two able young McGill graduates. These are Miss Marie Mottola (B.A. 1948) and Miss Nancy Weston (B.A. 1951).

Assistant Wardens, these young women play significant roles in the two-fold administrative programme of the College, viz., (1) advising and helping in the requirements and life of students in residence and (2) meeting the needs of those living in their homes in Montreal.

Miss Mottola (who was house president in her senior year) is in constant touch with all students in residence. Her work on applications and interviews with many of those before coming to McGill and with all of them immediately on arrival means that, with her well-known qualities of friendliness and sympathy, "out-of-town" freshies quickly turn to her as friend and counsellor. All such students have their own particular problems in becoming adjusted to University life; the foreign students, whether from the Far East, Europe or South America, have them in special number. Assisted by student government and the resident assistants (Mlle. M. O. Gauny and Miss Winifred Ross, Med. '52), the machinery of resident student government runs smoothly, but the correlator behind the machinery is Miss Mottola, the young woman who does not forget "the days when I was an undergraduate".

Miss Weston's work began in September with interviewing the 195 freshies who live at home. These talks with Miss Weston meant an immediate orientation to many things, their academic programme, R.V.C. facilities and the staff, and made them aware that, regardless of residence, they are a part of the McGill College for women.

This introduction which has ripened into a continuing acquaintanceship, now means that when the student is having trouble with her studies, or has a financial or other problem, she turns first to Miss Weston. Whether her talks are in the office or the R.V.C. cafeteria at lunch time, she receives a "lift" for her morale. Miss Weston in her unique way gives her a practical suggestion as to bursary or other help, guidance to better study habits,

Nancy Weston

expanded use of the library and recreational facilities, and, indeed, everything that goes to make her University course stimulating and happy. In residence, she is the "mentor" of one of the freshie floors and stimulates her group to a greater enthusiasm for many things, notably English literature and music, two of her own many interests.

Redpath Museum . . .

(Continued from page 18)

quently unable to comply. Unexpected and deeply appreciated help in this respect has come from the Junior League of Montreal, which last year established a special Museum Guide Service to operate in such emergencies.

Under this plan twelve carefully selected league members have been trained by the staff as museum instructresses, available on call. From these enthusiastic helpers, increasing numbers of school classes and adult study groups now receive an introduction to the world of natural science and a glimpse of ancient cultures and far-off peoples through the museum exhibitions. The timely gift by the league of a new lantern slide projector and glass bead screen has also facilitated the giving of lectures both on and off the campus. Other league volunteers have instituted a repair service and have devoted many hours to replacing beads on moccasins and mending ceremonial regalia.

It is difficult to say how much all this encouragement has meant to the staff in its long struggle to develop the museum as a cultural instrument in the community.

Peter Redpath's conviction in 1882 that a museum was essential to the development of a well-rounded university has borne fruit. Museum technique has vastly changed in the intervening years and emphasis is now placed on interpretative activity, rotation of material and creation of colourful, story-telling exhibits, rather than on accumulation in a quantitative sense alone. But none of these later developments would have been possible without the basic collections as a start.

It is now up to the museum to forge ahead. Would it be too much to hope that within a fraction of the next seventy years Peter Redpath's portrait may look down upon the entrance doors of a new and modern, fully integrated museum which, in serving the needs of students, faculty and the community at large, will do justice to McGill as one of the leading universities in the country?

These temporary exhibits are but one phase of a bustling activity. As time goes on the permanent exhibitions will be completely overhauled and made more dynamic, lighting facilities will be improved, and the redecoration which was partially completed two years ago, will be continued.

MRS. A. C. JENSEN (Doris Payne, B.A.'29) was vice-president in charge of Fund for the Alumnae Society of McGill University. The Alumnae in Montreal reached a new high of 928 contributors to the Fund in 1951, which was in no small part due to the organization of the Alumnae chairman and the enthusiasm she inspired in her 5 group chairmen and 40 class agents.

Castle in Skye

by Marjorie Mathews Legate

In this atomic age, it takes a bit of readjustment to live in a thirteenth-century castle for a few days. That is what I have been doing. Living in a dream castle in Skye, that misty isle of lochs and cuillins.

It was a great honour and a not-soon-forgotten experience to be the guest of Flora, Mrs. MacLeod of MacLeod in Dunvegan Castle, the oldest inhabited castle in the United Kingdom. Our hostess is the twenty-eighth Chieftain of the Clan MacLeod, the first woman to have this distinction. She is a most remarkable lady, a very young and vigorous seventy-three, upright as a sapling, extremely well-read with a delicate feeling for words and their exact shade of meaning. With her regal bearing, it seems quite in order to hear huge, kilted Highlanders address her as "Chief."

Mrs. MacLeod knows Canada quite well. She visited Cape Breton last year for the Gathering of the Clans and she prizes a flag which was presented to her during that visit. It is a very special hand-woven flag with a picture of a castle embossed on it and it now hangs in a place of honour in the imposing entrance hall.

Mrs. MacLeod has been to other spots in Nova Scotia and Prince Edward Island as well as Quebec and Ontario, to say nothing of New Zealand, Australia and South Africa, In fact, she would go to the ends of the earth to meet MacLeods. She believes that if she fosters the feeling of family ties in her large clan, she is doing her bit towards international peace and understanding.

Dunvegan Castle, Skye.

To be taken on a personally conducted tour of her home, as she likes to call the castle because it really is a home, is a thing to be treasured. The castle has a number of turrets as all real castles should have. It has a most horrible dungeon and one walks from it to the most enormous and most modern of kitchens, with every labour-saving device. I found this terrific jump of the centuries rather disconcerting.

Legends abound. There is a Fairy Tower and a Fairy Bridge and a Fairy Flag. A chieftain in days of yore was married very happily for twenty years to a Fairy but the time came when she had to return to Fairyland. That is when they parted on the Fairy Bridge, over which one passes en route to the castle. And that is when she gave him the Fairy Flag and told him it would save the clan but, of course, only on three occasions. And it did. Just ask any MacLeod. The silk in the flag is of eastern origin and dates back to the Crusades.

Flora, Mrs. MacLeod of MacLeod will tell you of the frightful fire in the castle in 1938 and how the flames abated as soon as the Fairy Flag was carried to safety. The whole island turned out to save the wonderful old building and all its treasures were kept in homes all over Skye until the danger was over and nothing was harmed or stolen.

In the beautiful drawing room, there is a gorgeous gold and white waistcoat of Bonnie Prince Charlie, given to the MacLeods by Flora MacDonald's daughter. There is the enormous drinking horn of the first chief, Rory Mor. Every chief at his installation, must drain this at a draught, full of claret. It must hold nearly a gallon. Mrs. MacLeod explains that in latter years this custom has been changed to a loving cup. There is a magnificent gold and silver filigree casket set with semi-precious stones, which was a gift to a former chief from an Indian princess who wanted to marry him.

(*Continued on page 56*)

The Cuillins, Isle of Skye.

Mrs. David M. deC. Legate (Marjorie Mathews, R.V.C. '27) is remembered for her outstanding contribution to the Alma Mater Fund in 1950 through her work as chairman for the Alumnae Society. She was responsible for directing the Alumnae organization which that year added 825 contributors to the fund. She is presently living in London, Eng., where her husband, formerly editor of The McGill News, *is head of the Montreal Star-Standard Bureau.*

MRS. A. M. BAIN was class agent for 1927, which obtained 84% percentage of participation in Montreal and an overall percentage for the entire class of 61.3.

Castle in Skye . . .

(*Continued from page 54*)

Sir Walter Scott visited Dunvegan Castle and quite a few of his descriptive passages can be identified with the surrounding country. Other notable guests to this stone edifice sitting on almost perpendicular rock, were Doctor Johnson and, of course, Boswell. Mrs. MacLeod will give you the letter the Doctor wrote to his hostess after this visit and while you try to decipher the writing, she will recite the whole thing to you.

The huge baronial dining-room has oils of ancestors all over the walls. The halls are decorated with coats of mail, swords and other old weapons. There is also a quantity of old Moorish iron-work which looks like the finest lace.

Quite apart from the charm of the castle and its chatelaine, there is the charm of the people of Skye. Hospitality here is no empty word. They seem to be particularly fond of Canadians and so many folk wanted us to call on them that we hardly had time to unpack, let alone get sufficient sleep. There were tea parties and dinner parties and "ceilidhs", pronounced "cayley", meaning roughly, a concert.

Everyone appears to have a talent on this remote isle and it is delightful to see how unselfconscious they all are if called upon to sing or dance or to play the pipes. The Gaelic songs are haunting in their minor key, particularly the really old ones which are unaccompanied and which have been handed down by the bards.

On Sunday morning, we went to the little old Scottish church and, after we had been ushered to the family pew by our hostess, she left us. To our amazement, she began to pump and play the ancient organ and direct the choir.

And now we are back in our London flat but it will be many a long day before we forget the piper, who, of course, was a MacCrimmon, because the MacCrimmons are the hereditary pipers of the Clan MacLeod, playing "The Road to the Isles" and "Over the Sea to Skye" and "Will Ye No Come Back Again ?" Will we, Flora, Mrs. MacLeod of MacLeod ? Just ask us again and you'll see.

Research in Nutrition at Macdonald

by E. W. Crampton

Among the activities of the Department of Nutrition at Macdonald College is a unique research project in which essentially identical diets are fed to human subjects and to rats, guinea pigs, sheep, and swine. The primary object of the study is a re-examination of the estimates of the energy which certain foods yield to the body.

Usually the largest and most variable loss in diet energy is from incomplete digestion. Present knowledge of the role of micro-organisms in the digestive system suggests that "apparent" digestibility of food may with some species at least, be practically a constant, reflecting the extent of bacterial and enzyme residues voided in fecal material more than it does incomplete digestion of food. These metabolic fecal products vary with the size of the individual and hence with the total quantity of food eaten, but appear not to be directly related to the particular foods making up the diet.

It is probable that the quantity of any undigested food residue is influenced, however, by the extent of the cellulose, and particularly the lignocellulose, present in the ration. By measuring the digestibility of identical diets by different species, representing different anatomical types of digestive systems and different microflora, some interesting and significant information is being obtained in this connection.

One of the major problems which had to be solved in this project was that of method of determining apparent digestibility. The cost in terms of time, and of provision of suitable equipment for accurate recording of food intake and of subsequent quantitative collection of excrement normally makes extensive digestibility tests prohibitive.

This difficulty has been satisfactorily resolved by the perfection in our laboratory of a method which avoids the necessity of quantitative records of intake and output. This index method is particularly useful with human studies as can well be imagined. It involves the ingestion, mixed in known concentration in the diet, of chromic oxide, and subsequently the determination of its concentration in a sample of the solid excreta.

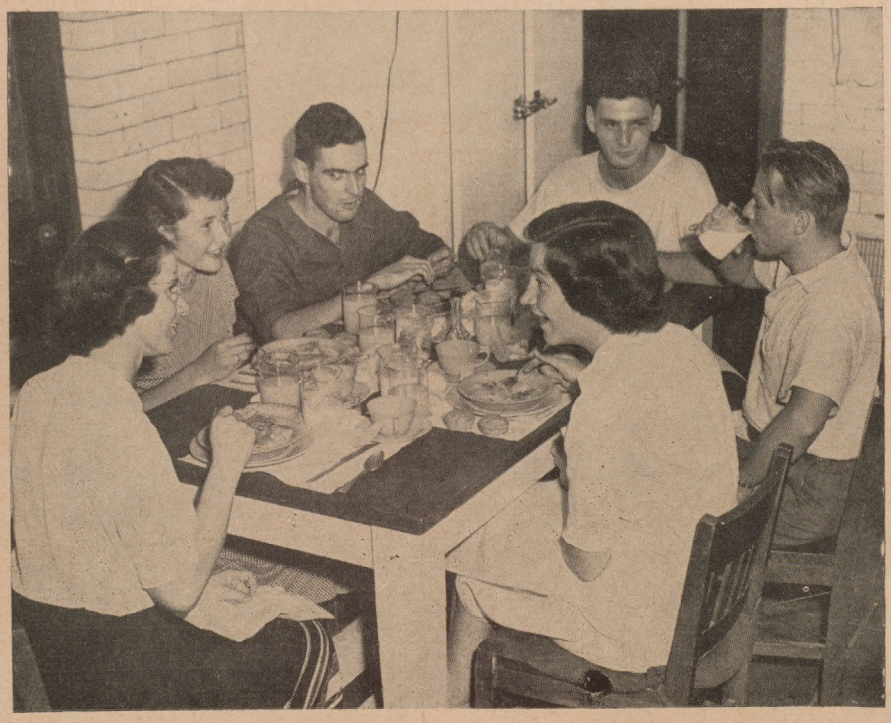

The chromic oxide is determined by a photo electric colorimeter by a procedure developed in the course of this research. The proportion of the diet "digested" is calculated directly from the change in the concentration of the index substance between the diet and the feces.

This project, like others in the Department, is carried out by post-graduate students working under the guidance of the permanent staff. It thus serves as a training ground for future research workers. There is another "by-product" of this project. The direct comparison of the several species in their ability to utilize the same foods gives data as to the extent to which one species may legitimately be used as a "pilot" for another in nutrition studies.

The significance of such data will be clear if we realize that much of our information as to human needs has been, and of necessity must continue to be, derived from rat or other animal trials. It becomes important, therefore, to establish species similarities and dissimilarities in nutritional behaviour. This is as true with the farm animals as with the humans, though not always for the same reason.

At present it looks very much as though the human is much more of a pig than many of us are willing to admit—but time will tell.

Dr. Earl W. Crampton, B.Sc. (Conn.), M.S. (Iowa), Ph.D. (Cornell) F.C.I.C., F.R.S.C., is professor of Animal Nutrition and Chairman of the Department of Nutrition at Macdonald College.

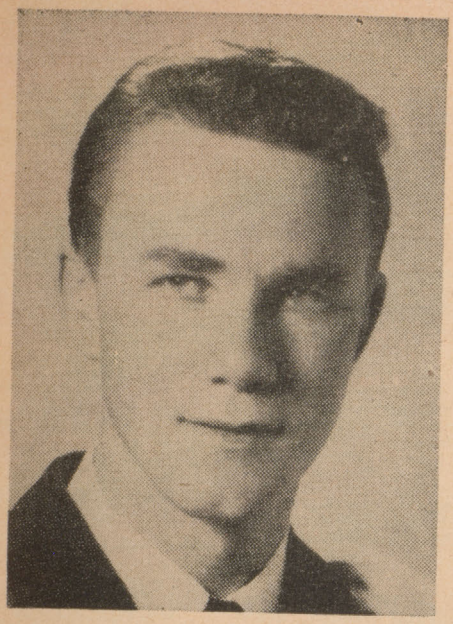

***POST-GRADUATE STUDENTS** in the nutrition department act as human guinea pigs in experiments conducted by the department.*

TO YOUR SUCCESS

Every winter, as in other seasons, thousands of U.S. tourists visit our world-famous resorts. They enjoy our natural advantages for winter sports, and if made welcome they will return — again and again.

Your business—everyone's business — benefits from the increased trade our tourist industry promotes. So, let's ALL be good hosts. Let's make them want to come back.

GIFT FROM SPAIN: Mariano de Yturralde, right, consul-general for Spain at Montreal, presents to Dr. D. L. Thomsom, dean of graduate studies and research at McGill, a modern Spanish book, one of 250 works presented to the Redpath Library by Spain. McGill will make a return gift of Canadian books to a designated educational institution in Spain.

McGILL'S CYCLOTRON, *valued at nearly three-quarters of a million dollars, was designed and assembled by the staff of the radiation laboratory under the direction of its head, Dr. Stewart Foster.*

A CLASS AGENT'S TASK is not an easy one at any time but, when one has 138 classmates to contact, it becomes a big job. Harold G. Dondenaz, agent for Arts '48, did it so quietly and quickly that it would seem that to get a job done quickly it is always best to make it a big one.

***K. S. MILLER,** class agent for Arts and Science 1940, is one class agent who has taken over the responsibility of keeping in touch with his classmates to make them see the importance of The Graduates' Society and helping the University through the Alma Mater Fund. His interest and enthusiasm makes it plain that big things can be expected from this class.*

L. P. WEBSTER, *faculty fund chairman for Commerce, prior to 1931, is another example of a graduate who, in spite of a busy year in which he was made vice-president, administration, of the Dominion Textile Co. Ltd., found time to do a splendid job for McGill. Under his leadership, Faculty of Commerce climbed to second place in the report by faculties and headed all the larger groups.*

PROF. B. D. BURNS *is using here an experimental setup for studying the nerve cells that give rise to brain waves. The intricate and specialized apparatus has been built in the physiology laboratory. Miss Bernice Grafstein, first-year graduate student, is assisting Dr. Burns in his work.*

DR. JOHN STANLEY, *chairman of the department of zoology, is using here a machine to rear stored products insects such as flower beetles and grain weevils. The incubator makes it possible to take samples at any hour of the day or nigh and study their growth.*

ICAO Post to McGill Man

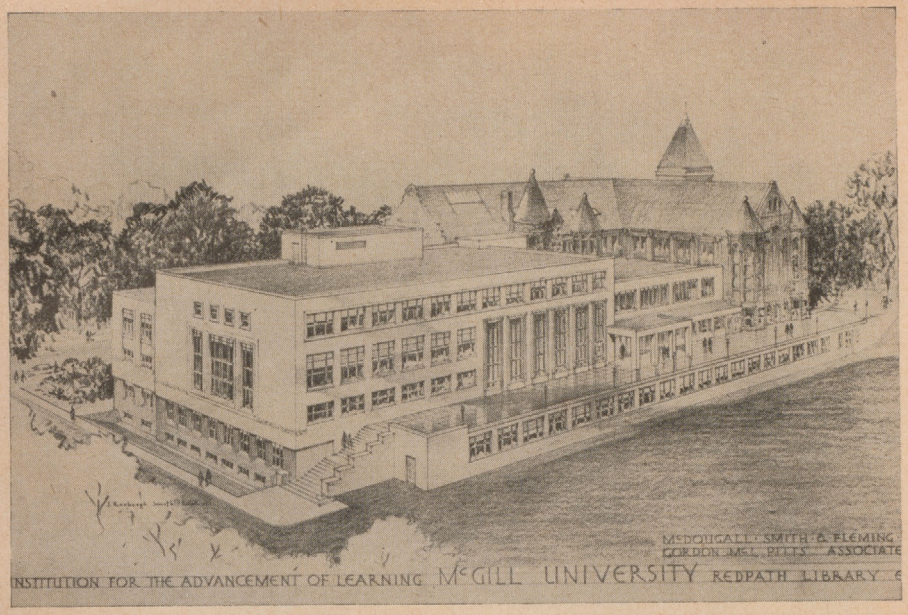

FOR the first time since its inception in 1944, a Canadian flier is holding down the key role as acting secretary-general of the International Civil Aviation Organization. He is a McGill graduate, Air Vice-Marshal Alan Ferrier, C.B. (B.Sc. '20) who has been a member of the Royal Canadian Air Force for 24 years.

He took over his new duties at the start of this year when his chief, Dr. Albert Roper, secretary-general, retired. He had been his assistant since January, 1950. Before entering ICAO Air Vice-Marshal Ferrier served for five years as one of the original three members of the Air Transport Board of Canada.

Son of Maj.-Gen. J. A. Ferrier, C.B., D.S.O., of the Royal Engineers, Air Vice-Marshal Ferrier served with that famous unit during World War I and earned the Military Cross. He joined the R.C.A.F. when it was organized in 1921. He married Gladys Mary Roche, daughter of J. D. Roche, of Quebec City, in 1922. They have one son and two daughters.

A. V. M. Alan Ferrier

NEW LIBRARY WING: *This is the perspective from the southeast of the Redpath Library extension, showing the terrace with the new entrance in the centre and the tall windows of the entrance hall. The windows near the ground are those of one of the new reading rooms. Architects are McDougall, Smith and Fleming. Gordon MacL. Pitts is associate architect.*

C. H. P. MOORE, *class agent for Dentistry 1918, made an outstanding contribution to the morale of the alumni fund by his fine work and the response of his classmates.*

A. DOUGLAS CROWE, class agent for Dentistry '22, has led another dentistry class to one of the top positions in percentage of participation. It will be a great day for the Alma Mater Fund when all classes realize the important contribution they can make to McGill in the same way as Dentistry '22.

THIS BRONZE PLAQUE, *placed at the entrance of the Allan Blair Memorial Clinic, Grey Nuns' Hospital, at Regina, Sask., by the Saskatchewan Division of the Canadian Cancer Clinic, was unveiled recently. Those present included members of the society, Mrs. Allan Blair and family, Premier Douglas of Saskatchewan and Mrs. Douglas, members of the government and the Cancer Commission. The unveiling was done by Mrs. Blair and Dr. Hedley F. Auld, president of the Saskatchewan division, presided.*

Tributes Are Paid to Dr. Allan Blair For His Work in Cancer Research

A tribute to the memory of Dr. Allan Blair, M.D. '28, has been made in the form of a plaque at the clinic where he laboured in the Grey Nuns' Hospital at Regina, Sask. At the time of his death, at the age of 47. Dr. Blair was one of the foremost men in the field of cancer and director of Saskatchewan's cancer services and director of the Regina cancer clinic.

Speaking of him Premier T. C. Douglas of Saskatchewan said: "In the passing of Dr. Allan Blair, Saskatchewan has suffered an irreparable loss. As director of the province's cancer program, Dr. Blair won for himself a national and an international reputation.

"There can be no doubt that the arduous duties which he performed for the cancer patients of this province and the extensive work which he did for the National Cancer Institute of Canada did much to bring about his untimely death. If ever a man laid down his life in the service of humanity, it was Dr. Allan Blair."

Commenting editorially on his great work. *The Regina Leader Post* has this to say of Dr. Blair himself:

"While Dr. Blair was a distinguished scientist in his chosen specialty and while he was also an able administrator, he was at the same time a deeply human individual, a vigorous and likeable personality and highly respected as a citizen.

"His wit was delightful, the twinkle in his eye constant. He had an underlying sense of humor that must have stood him in good stead in all his years of battling to make his dreams for cancer eradication come true. Dr. Blair, the man of simplicity and natural human qualities, was never overshadowed by the doctor with an instinct for research, by the probing scientist intent on a single purpose.

"He never gave the impression of being anything but just another Regina citizen. He was unconcerned with leaving an impression of greatness, and yet in terms of human accomplishment, Saskatchewan has known few men greater."

Allan Walker Blair was born at Brussels, Ont., in 1900 and went with his family to Regina in 1911. He graduated in Arts from the University of Saskatchewan in 1924 and in Medicine in 1928 from McGill, where so many football followers will remember his starry performances with the Redmen.

After a year as instructor in pathology and bacteriology at McGill, he spent five years at the University of Alabama Medical School as associate professor. In 1934-35, Dr. Blair was senior resident in surgery at the Winnipeg General Hospital and in 1935-36 assistant resident and Rockefeller Fellow at the Memorial Hospital New York. He spent the following year in cancer centres abroad and in 1939 returned to Regina to take charge of radiotherapy at the Regina Cancer Clinic. In 1944 he became director of the Cancer Clinic and director of cancer services for the province. He carried both these arduous posts until the time of his death. He was also president of the Southern Saskatchewan branch of The McGill Graduates' Society.

DR. ALLAN W. BLAIR

Editor's note: The story of the pioneer work done by Dr. Blair in the use of radio active materials for the treatment of cancer was well told in a feature article by Eric Hutton in the Feb. 15 issue of Maclean's. *The article told of Dr. Blair's early efforts to turn the deadly atom into a healer and related how the cancer institute he founded at Regina became, before his death, an international model.*

Neurological Institute's Beginnings Recalled

IT is now nearly 18 years since the Neurological Institute was initiated at McGill, for the present building, for which enlargement plans have already been made in the form of a new wing, was opened on Sept. 27, 1934.

The opening of the institute was a red letter day in the history of the Medical Faculty at the university for, as Dr. Charles F. Martin, then Dean of Medicine, expressed it in *The McGill News:* "It came as a consummation of several years of effort on the part of the faculty to build up the department of surgery into a more complete unit.

"Realizing some years ago", Dr. Martin recalled, "the need of more skilled and expert service in the field of neurological surgery (in which he himself was no mean exponent), Professor E. W. Archibald cast about for someone suitable to initiate and develop it as a subdepartment in the university and to serve in the Royal Victoria and Montreal General hospitals. With this end in view, he searched the field in Great Britain and the United States but, strangely enough, among a comparatively large group of surgeons, few seemed suitable to this specialty to meet the ideals held for a department at McGill.

"It was finally decided to invite Dr. Wilder G. Penfield—then Associate Professor of Surgery at Columbia University and attendant surgeon at the Presbyterian Hospital of New York—to visit Montreal and, as it were, to look over the ground with a view to making this a possible centre for his future career.

"Fortunately for us, conditions in New York were at that time unfavourable to a development along the lines of Dr. Penfield's ambition; and so he came, and saw, and was apparently impressed with the environment here.

"There seemed only the necessity of assuring him of moral and of some financial support. Already, friends of the university had contributed sums to encourage neurological research, among whom in those early days should be remembered Mr. Howard Murray.

"Associated with him in his work in New York, Dr. Penfield had Dr. W. V. Cone, a graduate of Iowa University, who had worked with him for years. He wanted Dr. Cone to join him in the new work and, thanks to friends who remain anonymous, it was made possible to invite Dr. Cone to form a team, combining both the clinical and histo-pathological aspects of the work.

"Dr. Penfield, of his own accord", relates Dr. Martin, "approached the Rockefeller Foundation, found them interested and so developed plans. The Principal of McGill, Sir Arthur Currie—always quick to recognize the worth of such men—gave every encouragement and, without much delay, the city and the province and interested friends were invited to contribute to the scheme.

"Among those who accepted the invitation and contributed most generously were Sir Herbert Holt, president of the Royal Victoria Hospital, Mr. J. W. McConnell and Mr. Walter Stewart of McGill's and the hospitals' board of governors. And so it came to pass that the Rockefeller Foundation finally gave their support to the erection of a Neurological Institute in Montreal at McGill with a gift of one and one-quarter million dollars."

THIS ARCHITECT'S DRAWING *shows how the new Montreal General Hospital between Cedar and Pine avenues near Cote des Neiges road will look from the air. The four-storey out-patient centre faces Pine avenue and is connected with the main hospital by a service building. The 12-storey nurses' home is also connected with the main building. The Travancore Apartments to the east facing Cedar avenue will be converted into a residence for about 115 doctors and internes. The architects are McDougall, Smith and Fleming.*

PEOPLE IN THE NEWS

This is the second of a series of articles about McGill men who are taking a prominent part in our economic, political and social life.

The success story of Courtaulds is linked with that of one of Canada's oldest Loyalist settlements, Cornwall, Ont., now one of her youngest and fastest-growing cities. For long generations, Cornwall, founded more than 160 years ago by Sir John Johnston, last governor of the British province of New York, had been a sleepy factory town of some 6-7,000 persons, living in its mile square area between the canal and the railway.

B. H. Drummond Giles

In 1925 Courtaulds (Canada) Limited established a plant at Cornwall and in a little over a quarter of a century, the factory town has grown with the big rayon plant in its east end section on the Montreal road to a flourishing city of some 33,000.

Two years ago, Courtaulds brought into production a new $16,000,000 staple fibre plant with a capacity of 33,000,000 pounds per year which has made Canada largely self-sustaining in the manufacture of viscose rayon fibre.

As the year 1951 came to an end Drummond Giles, Courtaulds' president, announced that production in Cornwall of rayon staple fibre and rayon tire yarn would be doubled by mid 1953. An associated company, TCF of Canada Limited, is constructing a new plant near Courtaulds' site for the manufacture of transparent cellulose film.

Drummond Giles is a McGill man, Eng. '27, the son of the late John Bevans Giles and May Clark Giles. He was born at Montreal, on April 20, 1903.

Mr. Giles has maintained his interest in McGill affairs since leaving the University. He was organizer and later president of the Upper St. Lawrence branch of the Graduates' Society and is at present regional vice-president for Quebec outside of Montreal.

His wife, the former Eleanor Irene Brooks, is also a McGill graduate (B.A. '28) and is active with her husband in graduate activities. Two of their children are attending McGill. Carol, 21 years old, is in her final year in Arts and is known to be engaged to one of the 1950 Redmen. Bevans is in his first year Commerce and played football last year with the Indians. There are two other young children, Brooks and Jennifer.

***IN SPITE OF A BUSY YEAR,** during which he was appointed vice-president and manager of the eastern division of the Dominion Bridge Co. of Canada, R. S. Eadie found time for McGill and saw that his class was one of the leaders in the Faculty of Engineering*

THIS INSTRUMENT *in the department of metallurgy is virtually priceless as there are so few of its kind left in existence. It is a Zeiss metallograph used for microscopic study of metals and alloys. Magnification as high as 2,000 times may be obtained. Dr. J. P. Ogilvie, B.Eng. '43, is shown here using the instrument.*

PROF. J. U. MacEWEN, *chairman of the department of Metallurgy, is shown here regulating the power of an Ajax 20,000-volt conduction furnace for rapid melting of metals and alloys. It can melt 30 pounds of steel in one hour. It has a practical top temperature of 1,700 C.*

CONCRETE

FOR WHATEVER YOU PLAN TO BUILD

You'll always get full value in concrete. Moderate first cost and low over-the-years maintenance. Permanence, too, and assured fire safety. An ideal construction material for homes, hospitals, schools, highways and bridges—for any and every building project.

HOUSE AT HAMPSTEAD, P.Q. Concrete is suited to home construction of every type and size.

BRIDGE OVER KESWICK RIVER, YORK COUNTY, N.B. Concrete bridges are economical to construct and maintain.

Class of Law '21 . . .

(Continued from page 17)

at four o'clock in the morning. McKean is now head of a large law firm and Curzon Dobell, after establishing himself as an authority in Mining Law, died at a too early age.

Murray Hayes also forsook the law and made such a success in commerce that he was able to retire at a comparatively early age, but the family tradition was ably carried on by his son who distinguished himself as a star of McGill's football team while at the University.

The Class of '21 early came up against the facts of life. We graduated with what was McGill's most distinguished graduating class. It was our Centenary and the authorities decided to present one hundred honorary LLD's so you can see that our fellow graduates were men of distinction who perhaps at that time had never even heard of Calvert.

We left the ghost-ridden building and ran right smack into reality—the Bar Examination. I shudder to recall what happened to us there. One was reminded of that quotable quote from 1066 and All That. "Every time Gladstone settled the Irish question, the Irish changed the question." It appeared to us that either McGill had given us the right answers to the wrong questions or wrong answers to the right questions. However, we were not to be stopped by such a puny barrier as this. General Smart took up the question in Parliament. Professors and politicians alike were bombarded and July 1922 saw most of us practising lawyers. So if when reading our obituaries you find that we graduated in '21 but were called to the bar in '22, you will know the reason why.

It seemed that Jack Chisholm was a student who was more interested in the links than in the law. He was a first-class golfer but his interest in golf waned as his interest in the law waxed. He now takes vicarious pleasure in the golfing exploits of his charming daughter and brushes aside repeated offers of a judgeship.

Another brother act was Joe Harold and Ken Wilson. One was weak and one was strong. The strong undertook to tutor the weak and he was so successful that the weak one passed and the strong one failed at the Bar examination and was forced to wait an additional six months.

RIDLEY COLLEGE

FOR BOYS

Ridley College for boys 8 to 18 offers high academic standards with the advantages of supervised residential life in modern buildings. Special attention is given to physical development and character building. A modern gymnasium, artificial ice rink and over 50 acres of playing fields provide year round recreational facilities.

Generous entrance scholarships and bursaries are available. For information and illustrated prospectus write the Headmaster, J. R. Hamilton, B.A., LL.D.

Applications are now being entertained for boys who will be ready to enter Ridley College in 1952 and later years. Fall term opens Sept. 9, 1952.

"Here's a tip... ...about Rock Drilling Equipment"

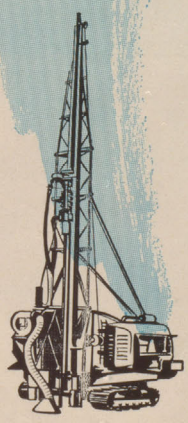

WAGONDRILL

FM-2 WagonDrills, featuring nine feet steel changes, are heavy production units for quarry work or large rock removal jobs on all types of construction.

QUARRYMASTER

The QuarryMaster is a self-propelled drilling unit, designed for quarrying, open pit mining and heavy cut work in highway or other construction. Recommended for large blast holes up to and including 6" diameter, to a depth of 70 feet.

A QUARRY OPERATOR, interested in our large QuarryMaster drilling unit, was surprised when our field representative told him frankly that he didn't require such a large unit. Instead, our man recommended FM-2 WagonDrills. The reason: this customer's production rate was not high and his bench cuts were comparatively shallow.

This case proves, once again, that the time to decide on the rock drilling equipment for your next job, or the work you're on now, is before the outlay for the equipment is made.

Discuss the details of your jobs with an Ingersoll-Rand field representative—let him recommend the equipment you'll need. He represents a firm that has been manufacturing rock drills since the first rock drill was invented . . . this long experience, of course, goes into the rock drilling equipment built by Canadian Ingersoll-Rand.

Use the Carset Detachable Jackbit with your Rock Drills.

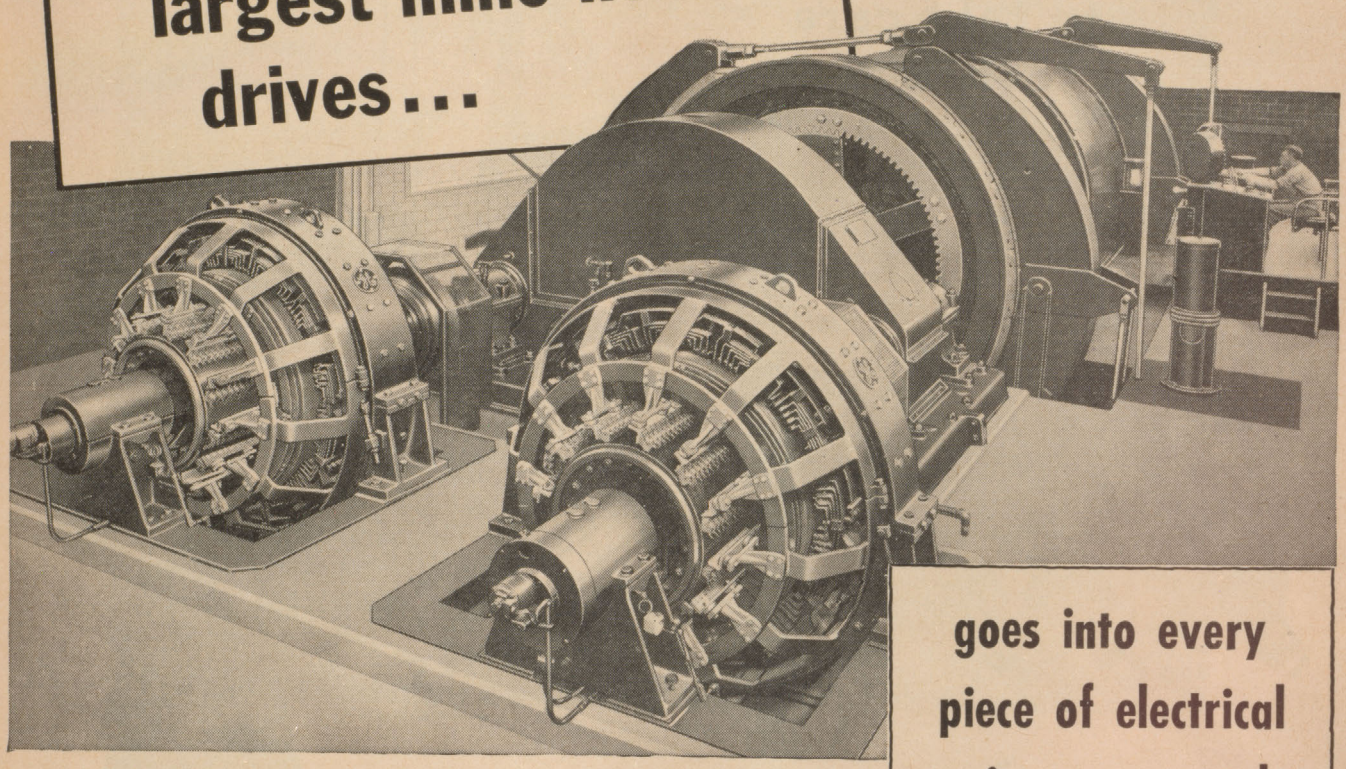

Canadian Ingersoll-Rand Company Limited

CANADA

The "know-how" that goes into Canada's largest mine hoist drives...

A 4,500/9,000 hp motor-driven hoist at a Northern Ontario mine which is designed to handle over 400 tons of ore an hour from a depth of over 4,000 feet.

goes into every piece of electrical equipment we make

GENERAL ELECTRIC

EQUIPMENT

Although few people have occasion to buy a huge G-E mine hoist motor, it is important to remember that every piece of equipment this company makes is better because of experience gained in many fields of electrical design, manufacturing and application. This "Know-how" is the basis of the quality, and continual improvement of G-E products. Through sixty years, Canadian General Electric has maintained its leadership by a happy combination of forward thinking, fine products, fair policies and good service. It is called upon to help with many big projects in the application of electric power which raises output and cuts costs in the nation's industries.

Available to you—no matter how large or small your electrical problem—is this wealth of seasoned experience. Simply get in touch with the nearest of the 31 C-G-E sales and engineering offices.

PORT RADIUM

NORTHWEST TERRITORIES

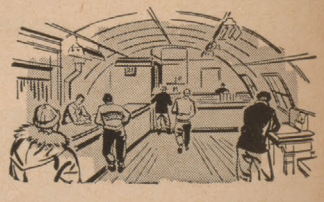

THIS SAFE, *together with everything from bank notes to pen nibs, was recently flown from Edmonton, 1100 miles due north to Port Radium, on the fringe of the Arctic circle.* It is part of the equipment for a new branch of The Royal Bank of Canada, just opened to serve the men who work one of the world's greatest known deposits of uranium, on the shores of Great Bear Lake. This is the "farthest-north" bank in Canada.

Up B.C.'s rugged coast a giant new aluminum development is taking form. Since last November we have operated a branch at Kemano, site of the power house. Three sub-branches have since been opened to serve other construction crews at isolated inland points in the area.

Up north at Churchill on Hudson Bay —at the international airports of Goose Bay (*Labrador*), Gander (*Newfoundland*) and Montreal's Dorval—the Royal Bank brings modern banking services to military and civilian personnel, and to airlines and air travellers from every corner of the globe.

Pioneer camps and towns are springing up in areas of Canada which a few years ago were known only to trappers and prospectors. The Royal Bank of Canada carries on business in many of these isolated communities. Whenever and wherever the need arises, the Royal Bank heads north with the men who are establishing Canada's new frontiers.

THE ROYAL BANK OF CANADA

A BIG BANK SERVING A GROWING COUNTRY

Bertie C. Gardner, right, president of the Bank of Montreal, and named new chancellor of the university, is warmly congratulated by the retiring chancellor, Chief Justice O. S. Tyndale, at the graduation exercises. The picture was taken immediately after the Chief Justice had announced Mr. Gardner's appointment.

The Report on Athletics

AS EVERYONE knows, there has been a series of scandals in intercollegiate sports, particularly in basketball, below the border. No such situation has arisen at McGill, or at any other Canadian university, but a little more than a year ago, a Special Committee was formed to inquire into the state of athletics at McGill.

This report has now been seen and approved by both The Senate and the Board of Governors of the university. It was released to the press a few days before this issue went to press. Because of its length — 17 pages — it is impossible to reprint it here in its entirety so that a few editorial remarks must suffice until the fall issue when any comments from the graduate body will be considered for publication.

The report concerns itself mainly with the past, present and future of the senior football team. In brief, it recommends the abolition of the Athletic Loan Fund; that the team cease playing exhibition games with and practising against professional clubs; that the financial statement of the Touchdown Club be published in The News; *and that professional coaches not to be invited to speak before gatherings of this club.*

With regard to the place of athletics in the university itself, the report recommends: that every student wishing to take part in intercollegiate sport submit a written declaration as to his amateur status; that the conduct and the finances of athletics be the responsibility of the university and not solely that of the Department of Athletics; and that the Canadian Intercollegiate Union, now composed of colleges in the provinces of Quebec and Ontario, be extended to the whole of Canada and a full time president appointed. There are many more suggestions and recommendations but these are the more important ones.

No doubt, the decision to disband the Athletic Loan Fund will be received with varying reactions among members of the graduate body. The writer is not in a position to speak for this body in an editorial in the graduate publication and can give only his personal views. We think this was a sound decision, in the full knowledge that the subscribers to the fund were honest in their intentions and most open-handed in the manner in which the fund was conducted. But we think that in the final analysis, the loan was in the nature of a compromise with amateurism and, if subsidization of athletics in any form whatsoever can bring matters to the pass they reached across the border, even such innocent operations can become extremely dangerous.

We do not quite see why the Special Committee was sensitive about the football team playing exhibitions with teams outside the college union—specifically Sarnia Imperials and Alouettes in recent seasons. The entrance of McMaster to the senior football union, however, may automatically remove this condition and solve the problem, if one existed.

The impression that the Touchdown Club was anything more than a booster organization for the football team is dispelled in the publication of its financial statement for its two years of operation, in another page of this issue. With regard to professional coaches appearing on the club's speaker platform, we suggest that their places be taken by members and captains of McGill football teams of the past. We are thinking of the kind of talk (with demonstrations) given by Dan Gillmor, of the 1910 era, at a Touchdown Club gathering last fall.

It is unfortunate that some people read into the Special Committee's report a suggestion of criticism or a reflection on the manner in which sport has been conducted in the past by the Department of Athletics. Nothing could have been further from the facts. The information given by the head of the department, Vic Obeck, had much to do, we know, with the content of the report and the final suggestions made by the committee.

We say this, in final analysis, that, when we read the report, we were glad that McGill was the first Canadian university to take this stand, and to say so publicly, so that all might know just where the university stands on these matters at a time when college sport in general is open to so much suspicion.

Footnote: To all who may be interested, we are sad to report we have not heard from "the only Harvard man who has ever milked a dead moose." We fear he may have fallen into the hands of the game wardens.

The Financial Results of Human Interest

by Dr. F. Cyril James

Thirteen is thought by some people to be an unlucky number, but I am delighted, as my thirteenth year at McGill University draws to a close, to report to you that as a result of the generous co-operation which McGill University has received from many sources our total income for the 1951-52 session is approximately equal to our expenditure. The University budget is in balance and, even more important, it has been possible for the Board of Governors to increase substantially the salaries and wages of members of the University staff whose incomes have trailed a long way behind the steady rise in the cost of living.

This happy result has been attained through the generous and wholehearted co-operation of many people. In the first place, all the members of the University staff have co-operated in the effort to keep other expenditures to a minimum in order that as large a portion of our resources as possible might be available for wages and salaries. In the second place, the Board of Governors felt it necessary to increase tuition fees substantially at the beginning of the present session, in spite of their reluctance to do so, and these increases have added approximately a quarter of a million dollars to our income. Thirdly, I should like to underline the contributions of those graduates who have subscribed to the revenues of McGill through the *Alma Mater Fund*, and of those Montrealers who are active members of the McGill Associates. Under the enthusiastic leadership of Mr. Boyd Millen it is hoped that the aggregate *Alma Mater Fund* subscriptions will exceed $200,000 in 1952.

Augmenting the results of these three developments within the University family, two other things have occurred this year, for which I should like to express, both officially and personally, very warm appreciation. The Board of Governors, under the leadership of Mr. R. E. Powell, set out last December to raise the additional money required for the purpose of increasing wages and salaries to a reasonable level, and they succeeded in obtaining subscriptions amounting to $599,400. This money is sufficient to defray, until January, 1954, the cost of the salary increases that were approved at the meeting of the Board of Governors in January, 1952, so that an appropriate portion of the total will be carried forward to the coming session.

Finally, as all of you know, the Government of Canada appropriated the sum of $7,000,000 to provide financial aid to Canadian universities along the lines recommended in the Massey Report, and McGill University has received as its share of this amount a cheque for $615,000. To the Right Honourable Louis St. Laurent, and to all members of the Government of Canada, McGill owes a debt of profound gratitude for making this money available. To the Honourable Maurice Duplessis and his colleagues we are equally indebted for their co-operation in working out a satisfactory formula for the distribution of the funds. It is, I know, the hope of all who have the welfare of Canadian universities at heart that this programme of financial aid, although specifically limited to this year in the parliamentary vote, may in fact become a regular feature of university finance since, without it, I do not think that any Canadian University could have balanced its budget this year.

With the exception of the increase in fees, which we should like to have avoided in view of the inadequacy of scholarships, these larger revenues are a happy evidence of the interest of tens of thousands of people in the welfare of McGill. The list of those who have helped the University is long, and that list is in itself an inspiration which, although less tangible, is as significant as the material results that the generous actions of many men and women have made possible. To all of you who are partners in bringing about this year's happy ending, I offer warmest thanks, from myself and from all members of the staff, and I know you share our hopes that as a result of our joint efforts McGill may continue to move forward along the plateau it has now attained.

J. A. FULLER, *president of the Shawinigan Water and Power Co., was elected chairman of the McGill Associates at their 13th annual dinner. Shown left to right at the dinner, are: Mr. Fuller; Chief Justice O. S. Tyndale, chancellor; Edward C. Wood, president of the Imperial Tobacco Co. of Canada, retiring chairman; Dr. F. Cyril James, principal and vice-chancellor; Dean W. J. C. Meredith, of the Law faculty, who was guest speaker.*

Centenary Greetings

McGill salutes three sister institutions of learning in Canada which are celebrating their centenary this year. They are Trinity College and St. Michael's College, both within the University of Toronto, and Laval University in Quebec City. Laval, with much the longest Canadian background, grew out of a little seminary founded by Msgr. Montmorency de Laval, first bishop of New France, in the 17th century. It received first approval from Louis XIV and its Royal charter from Queen Victoria. St. Michael's had its beginnings when Bishop Charbonnel asked the Basilian Fathers of France to come to Canada and establish a college at Toronto. The most notable contribution to Canada of the modern St. Michael's has been its Pontifical Institute of Mediaeval Studies. Trinity College had the most spectacular beginning when Bishop Strachan, at the age of 72, set off for England to raise the necessary funds to found a Church of England college in the Old Country tradition. Trinity, since its inception, has been the champion of intellectual freedom.

"Whitehead Worms and God"

Dr. N. J. Berrill, Strathcona Professor of Zoology is made Fellow of the Royal Society

by Clyde Kennedy

What does a boring piddock do when it runs head on into another piddock boring in the opposite direction? The answer to this question is given in a book written by a McGill professor who gives a course that is generally known to the student body as "Whitehead Worms and God."

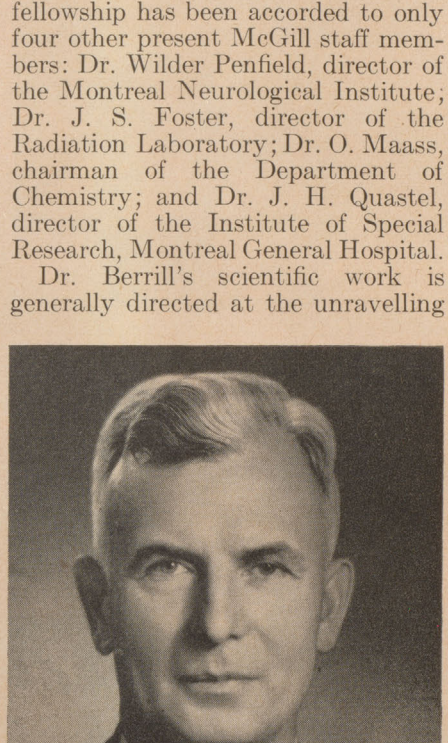

The professor's publishers, Dodd, Mead and Company, have aptly described him as "one of that rare species — an eminent scholar with a real flair for everyday human writing." Along with the fate of the piddock — a clam that thinks nothing of drilling into concrete — his book contains lively comment on the crab that lives in the top of palm trees, the beastie with ski-pole legs, the snail with a foot that has a ten-inch span, the stink bomb of the octopus, the animal that exudes true plastic from its foot, the drilling creature that uses sulphuric acid for its homicidal work, and innumerable other fascinating facts about life along the rim of the oceans.

The professor writer is Dr. N. J. Berrill, Strathcona Professor of Zoology, whose brilliant research was recognized with his election in March as Fellow of the Royal Society, London, Eng. His book is "The Living Tide," first published in April, 1951, and now in its fourth printing.

Dr. Berrill has had another book published, but he admits that most of his friends, when they pick up a copy of "The Tunicata," quickly "drop the book as though they had seized a hot ash." It is a scholarly work on a subphylum of the Phylum Chordata. The book contains excellent sketches of such things as the blastozooid and, in general, it delights the zoological people.

In addition, he has published some 70 scientific papers during a life-long quest for answers to the mysteries of marine life, a quest which began in his youth on the coast of South Devon where he found "undersea worlds-in-miniature" in the rock-pools along the estuaries. His scientific reports on his never-ending quest brought him election to Fellow of the Royal Society, one of the highest honours in the scientific world. This fellowship has been accorded to only four other present McGill staff members: Dr. Wilder Penfield, director of the Montreal Neurological Institute; Dr. J. S. Foster, director of the Radiation Laboratory; Dr. O. Maass, chairman of the Department of Chemistry; and Dr. J. H. Quastel, director of the Institute of Special Research, Montreal General Hospital.

Dr. Berrill's scientific work is generally directed at the unravelling

Dr. N. J. Berrill

of the ancestry of vertebrates and a general theory of development of organisms. He has used the coelenterates and tunicates as vehicles for the study of growth mechanisms, a study which has led to his discovery of quantum growth in animals.

He is emphatic about his preference for studying living animals (as opposed to the pickled variety), and a wistful look appears in his eyes when he notes that McGill University is far from the sea. He spends most of the winters far from the teeming tides, longing to get back to his combined summer home and private marine biological station at Booth-bay Harbour on the Maine coast.

Apart from his work "The Living Tide", a book which few people will want to set aside once they hav started into it, Dr. Berrill's love fo marine zoology is best illustrated b recalling his honeymoon. As he drov along the Pacific coast with his wife Jacquelyn, he just couldn't pas Pacific Grove, home of Stanfor University's Hopkins Marine Bio logical Laboratory. His bride thu received an early initiation into th ways of a marine zoologist, whic Dr. Berrill admits frequently cause him to be considered a "bit queer' by those who see him wading int deep mud, or simply standing i shallow water for long periods, staring fixedly between his feet. His wif found herself dressed in oilskins an accompanying her husband by flash light among the rocks at Asilomar probing the icy water for sea creature while a dreary drizzle hissed onto th rockpools left by a receding tide.

But his bride survived the honey-moon, and doubtless numerous similar studies in the interest of science, an herself has become an apt popularize of seashore life. Through teaching their three children, Peggy, Elsilyn and Michael, the facts of marine life as her husband revealed them, she became sufficiently versed in the subject to write her own book. Her "Wonders of the Seashore", a children's book, was published in 1951. She submitted rough sketches to the publisher, Dodd, Mead and Company, with her manuscript. When the book was accepted, she had only six weeks to learn the technique of scratchboard drawing and do the finished sketches in time to meet the deadline. Her second book, "Wonders of the Woodland," is to be published soon.

As for his McGill course in Experimental Zoology, which has come to be known to the student body as "Whitehead Worms and God" (a term coined by the professor himself), Dr. Berrill says: "I stick to worms and the students bring in God." Apparently the mysteries of the origin and development of living things sinks deeply into the always fascinating minds of university students when they get into Dr. Berrill's course. "They begin to think — usually for the first time since they came to college," says Dr. Berrill. "I use my

DR. OTTO MAASS, *O.B.E., Ph.D. (Harvard), D.Sc., F.R.S.C., F.R.S., has been appointed scientific adviser (special weapons) to the Chiefs of Staff. The announcement said "his fields include biological and chemical warfare."*

material to get them to think — only incidentally is it an informative course."

Among the devices Dr. Berrill has used to encourage university students to think and to express themselves, one of his students reports, is to enter the classroom and simply stand staring out the window. This disconcerting situation goes on until some student thinks of something worth saying, an event which doesn't occur as frequently among university students as most professors would like.

Dr. Berrill hasn't waited for the inevitable student question: "What are we responsible for on this course?" He has posted the answer to this oft-asked question in the hallway of the biology building in large, black type that should leave no doubt in any student's mind. It reads as follows: "Students attend college not merely to pass examinations or to receive didactic instructions, but to train their minds to think and to be able to solve the problems of their future careers. Education is something every man acquires for himself and it will never be available in capsule form.

"Lectures are more than the transfer of the notes of the lecturer to the notes of the student without their having passed through the heads of either, and are not merely the stuffing of immature minds with unrelated facts to be vomited in toto at examination time. Obviously a lecturer can say much more in the course of 50 or 60 hours of lectures than can be remembered, and it is necessary for students to think and to select essentials from interesting, irrelevant or boring backgrounds.

"The practice of observation, recording, selection, abstraction, deduction, and induction is much more valuable than the technical character of the facts serving as the raw material. And to console those who can see no value in transient retention of facts, there is the adage: 'culture is a state of mind produced by the things one has forgotten.' "

While he has written, with respect to the weird structure of marine life, that "there but for the grace of God go we," Dr. Berrill's determination to make the university student more of a thinking organism has not brought him to apply the same comment in his attitude toward students. He has long taken an active interest in student extra-curricular activities, such as the Arts and Science Undergraduate Society. And the Berrill's home is a frequent, popular meeting place for students.

Dr. Berrill was born in Bristol, England, in 1903. He took undergraduate training at Bristol University and then went to the University of London where he was granted Ph.D. and D.Sc. degrees. He came to Canada in 1928 as assistant professor in the Department of Zoology at McGill. He was made associate professor in 1938, served as chairman of the department from 1940 to 1947, and was named Strathcona Professor in 1946. He has studied at marine biological stations in the West Indies, on the Atlantic and Pacific coasts of Canada and the United States, in England, Scotland, France and Scandinavia. He is a Fellow of the Royal Society of Canada.

He began to write popular accounts of marine life in 1945 and declares that the editors of *Natural History* and *Frontiers* magazines, where many of his articles have appeared, taught him how to do it. The editors, he admits, would send back his writings, declaring bluntly that certain parts were "didactic and impersonal" and asking for a revision. The success of this training is best illustrated in "The Living Tide," a book which has been widely acclaimed.

Another book by Dr. Berrill, "Journey Into Wonder," will be published shortly. Extracts from this account of the zoological observations of such explorers as Columbus, Cook and Darwin, will appear in the July, August and September issues of *The Atlantic Monthly.*

Voice of the Graduates

Dear Editor:—

I have pleasure in enclosing herewith cheque for my subscription to *The McGill News*, which is certainly of great interest to me. I was glad to read in the last issue the letter from Mr. J. P. Manion, who is a good friend of mine in Paris.

I am living now in France, as the representative of Colonization and Agriculture of the Canadian National Railways in Paris, and have now been here since last August. I don't exactly plow up the Paris boulevards, but choose farmers from the various agricultural districts in France for emigration to Canada. The work is extremely interesting but keeps me very busy, and I feel I am really making a contribution towards the development of our country.

I have just received the last class news, and feel rather sorry that the doings of all our fellow students were not included. Some of us manage to keep in touch, but perhaps we could arrange that each student writes in about every few months to give news of his activities.

I have heard from one of our friends, Danny Boys, who is now in England.

I hope you will accept the above as a suggestion, and not criticism, but I should like to know if it is possible to draw us closer to our student days. If any old student drops into Paris one of these days, I should be only too pleased to meet him in the Café de la Paix and offer him an apéritif, and we could drink to the old days at McGill.

I am already looking forward to receiving the next news bulletin from over "the other side". It is always cheering to read about "the old days".

Paris, France, *J. LAMBERT*
May 6, 1952. *(B.Sc. Agri., 1951).*

A McGill Man to Watch

Duncan J. McDonald has a record of achievement crowded into his 33 years

by Frank O. Morrison

In the spring issue of The McGill News *were reprinted portions of a letter written to Dean W. H. Brittain, of Macdonald College, from Duncan J. McDonald, who heads the Atomic Bomb Casualties Commission at Hiroshima. Here Frank O. Morrison, B.A., M.Sc. in Agr. (Alta.), Ph.D., assistant professor in entomology at Macdonald College, tells the story of this remarkable young McGill man, a graduate of three universities, who is in charge of this most important mission in Japan.*

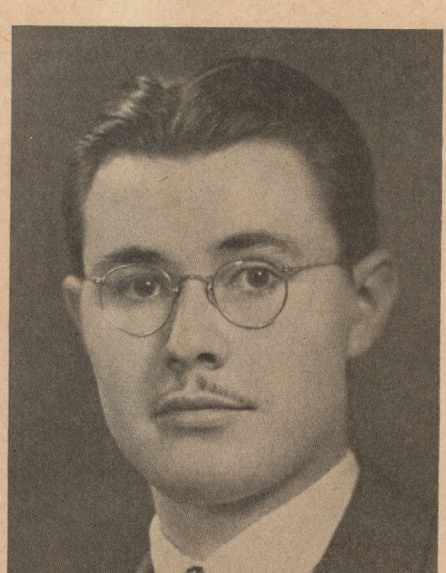

A card from Hiroshima with a picture of the Round Bridge at Iwakuni and inside a few Japanese symbols and this note: "Japan is an altogether lovely country — shall have a delightful two years here. Too much work looking over data on 15,000 babies a year here and in Nagasaki — but delightful nevertheless. — D." set me to reminiscing.

It was in 1938 that I first met Duncan McDonald. I was a graduate student in entomology at Macdonald College. He was in his second year. That summer I stayed on to do some research with Duncan to assist me. It fell to his lot to help me with the endless routine of counting hundreds of thousands of fruit flies into little containers, spraying them, transferring them one at a time to other containers and later counting the dead and alive. And it fell to my lot to introduce Duncan to the more pleasant business of collecting insects in the field.

While doing routine work there was plenty of time to talk. That suited him perfectly. He had untold enthusiasm for everything and his mind was stocked with everything that he had ever read or seen or done. His memory was phenomenal, his interests universal, and his actions governed by three frequently expressed convictions: that work in any form was distasteful and undesirable therefore to be done with the greatest efficiency and dispatch so as to leave as much time as possible for leisure; that he was capable of doing anything that came to hand as well as or better than anyone else; and that the proof of the pudding lay in its consumption.

Student labour then commenced work at 7 a.m. and quit at 6 p.m. and was paid the magnificent sum of 25 cents per hour. Acting on his conviction about work, our procedures were streamlined until what at first required from ten to twelve hours daily fitted into six and the rest of the day was left for collecting in the fields. Throughout the summer, he demonstrated his second conviction, pointing out each success with glee. It mattered not whether it was transferring flies with camel hair brushes, collecting certain insects, shooting rats before breakfast, or picking raspberries on a weekend, he always managed to forge just a little bit ahead and in the end have a few more than I had. He had apparently been doing that all his life.

The proof of his third conviction took some amusing forms. One day he expressed the opinion that if a man were to discard his shoes his feet would soon become toughened until he would have no more need for protection on his feet in the summer than the savages had of old. I expressed doubt. Off came the shoes and socks. For the rest of the summer he trod the fields and woods clad only in the briefest of shorts and his glasses. He proved his point.

Duncan J. McDonald

Whenever Duncan encountered a new word in his reading he made a point of trying to use it in his conversation for the next few days. That habit sometimes gave his conversation a funny twist. Yet this lad who spoke in polysyllables and ran about "undressed" all summer was no "queer". His popularity among his fellow students was attested for by his being elected president of the student council in his fourth year. Neither was he beyond a little horseplay. There was the night he set out from the second floor of the Biology Building with the nether garment of a very large Cape Breton student. He made the residence via the tunnels and the authorities never knew what took two tunnel doors off their hinges that night.

And there was the time that we went to Morgan's woods to collect night flying moths. An Indian student who liked to boast about his exploits with big game but who had proved quite unable to catch a bee without getting stung begged to be allowed to come along. It's a three-mile walk each way. Loaded with sugar, lights, bottles, nets and a sheet we went out. As midnight approached our eastern friend wanted to call it quits but we stayed on until two a.m. His legs couldn't match our strides on the way home and he didn't like that dark woods. It was three days before he turned up for lectures.

The records show that Duncan Joseph McDonald was born on June 23, 1919 at Glen Nevis, Glengarry County, Ontario, the second youngest of a family of nine, seven boys and two girls. All have proved the value of good Scottish ancestry and an excellent upbringing by a tall, straight Scottish mother, who might well have stepped from the pages of a Sir Walter Scott novel. The father died in 1931. John, the eldest and a most successful farmer, still runs the home farm; Ranald the fifth son (Macdonald first year Diploma Course 1940-41) farms nearby; Donald, the second boy, is an electrical engineer (Queen's University) with the Bell Telephone Co. of Canada in Montreal and has a daughter Margaret Anne who received her McGill B.Sc. in Household Economics this year; Hugh is a metallurgist (McGill B.Sc. '35) with the Illinois Institute of Technology, Chicago; Angus is an engineer (McGill B.Eng. '39) in Hamilton,

A. NORBERT BEAUPRE, *Agr. '39, has been appointed assistant deputy minister of defence production. At 34 years old, the one-time army officer has become one of the government's top ranking advisers with special responsibilities in the field of manpower, materials control and production of armament for North Atlantic Treaty countries.*

Ont.; Alec (McGill B.Sc.Agr. '42, M.D. '49) is doing specialist work on anaesthesia in the Montreal General Hospital; the two sisters are in Catholic teaching orders.

May 1940 found Duncan graduating from Macdonald College with his B.Sc. in agricultural entomology, the Lochhead Memorial Prize, first-class honours, and a McGill Rhodes Scholarship. The war made his Oxford Scholarship untenable at that time so he went to Harvard on another scholarship. There he spent two years demonstrating in comparative vertebrate anatomy and working out a thesis on "The endocrinology of reptiles." He returned to Canada in 1942 with a Harvard M.A. Unable to become a pilot because of his eyesight, he entered a school for meteorologists in Toronto where, in competition with graduates in physics and mathematics, he again stood out and, as a result, became civilian meteorologist attached to the air force at Goose Bay.

The wild country and the outdoor life delighted him. An expert skier he took full advantage of the opportunities. His spare time he devoted to growing a magnificent beard on a round and cherubic face which, even bearded, failed to look its twenty-three years; and to "gunning up" on the philosophy of mathematics and music. I'm told, on good authority, that it required two planes to move his library out. Yet he found time to prove his worth as a meteorologist and was chosen to assist with Operation Muskox.

The Alaskan trek over, Duncan took up again the threads of formal education and proceeded to Oxford, in 1945. There he undertook research on "The genetics of tissue transplants" as his Ph.D. thesis work. But no one little problem of that nature could deprive him of plenty of spare time. His letters glowed with the wonders of old Oxford and historic England which he took care to see pretty thoroughly; with the visits he paid to the home of his forefathers in Scotland where he paid especial attention to the haunts of the famous Dr. Samuel Johnson, a much-admired countryman. Then there were trips to Ireland to sample its hospitality and its national beverages and Christmases spent skiing in the Swiss Alps. He drank life to the full, maintaining his conviction that work was abhorent to his nature yet completing his studies and research to the satisfaction of all concerned, and returned triumphant with a wonderful Oxford accent which he blamed on listening to the BBC.

The same year, 1948, Dartmouth College, Hanover, New Hampshire beckoned. The "old school tie" atmosphere, a light teaching load, and plenty of time and opportunity for reflexion and skiing appealed to Duncan. There he taught genetics and enjoyed his favourite sports for three years. Late in June 1951 he went to Japan where, as his Christmas card and a letter published in the spring issue of *The McGill News* shows, he is engaged in studying the effects of radiations on the genetics of the human population. No one could be better fitted for the job.

Entomologist, endocrinologist, meteorologist, Rhodes Scholar, geneticist, world traveller, sportsman, athlete, graduate of three universities, at 33 years of age this McGill man is a man to watch.

Dr. Malcolm MacEachern Honoured by Five National Organizations

One of McGill's most illustrious alumni, Dr. Malcolm T. MacEachern, (M.D., C.M., D.Sc., LL.D., F.A.C.S., F.A.C.P., F.A.C.H.A.), has been cited by the newly formed Joint Commission on Accreditation of Hospitals for his work in elevating the standards of hospitals of the United States and Canada, while directing the hospital standardization movement of the American College of Surgeons.

The Commission is comprised of five great national organizations: the Canadian Medical Association, the American Medical Association, the American College of Surgeons, the American College of Physicians, and the American Hospital Association.

The recognition of Doctor MacEachern was one of the first actions of the commission after it was organized Dec. 15, 1951. In acclaiming his work as "unique throughout the world", the Commission has presented Doctor MacEachern with a Resolution of Commendation praising his efforts in developing and directing the hospital standardization program during the 27 years he served with the American College of Surgeons.

One of the few persons so recognized in human welfare, Doctor MacEachern is Director of Professional Relations for the American Hospital Association, and is Professor of Hospital Administration and Director of the Program at Northwestern University, at Chicago.

Dr. Malcolm T. MacEachern

McGill Students in Northern Research

Franklin Society offers splendid opportunities for scientific field work

Dr. Maxwell John Dunbar, M.A. (Oxon), Ph.D., F.R.G.S. is associate professor of zoology at McGill. He tells here of his work in northern research and the opportunity for field research offered to undergraduates through the Franklin Society.

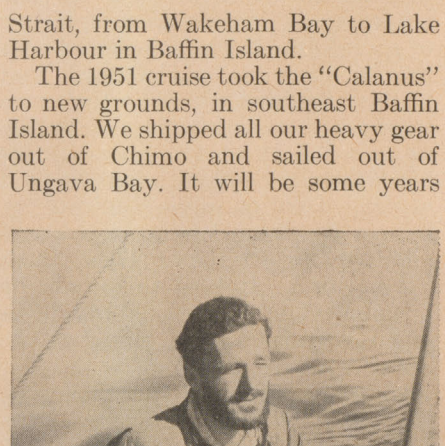

by M. J. Dunbar

The C. G. M. V. "Calanus" was built in 1948, specially designed as a small arctic research ship of fifty feet overall length and 43 tons displacement. She belongs to the Fisheries Research Board of Canada, which began its arctic investigations in 1947. The writer, as director of these investigations, together with one student assistant, Henry Hildebrand, first hit the turbulent waters of Ungava Bay in a small 30-foot "trap boat" which had not seen much salt water before that year.

This boat had been chartered from the Hudson's Bay Company and proved quite unsatisfactory for the work. For the latter half of the 1947 season, we chartered a native-owned Peterhead boat, of 40-foot length, a much more seaworthy craft, but still far from the type required for the purpose. While the "Calanus" was being built in the spring and summer of 1948, Hildebrand and one other McGill student, Philip Orkin, worked in Ungava Bay with the Peterhead boat, and the "Calanus" was sailed from Mahone Bay, Nova Scotia, to Fort Chimo at the head of Ungava Bay in August and September, too late to do any work that year.

The 1949 season began in June, when we launched the "Calanus" from her winter cradle at Chimo and took her up to Port Burwell, at the extreme northeast corner of Ungava Bay, on the eastern entrance to Hudson Strait. The whole of the water of the bay was "boxed" by four hydrographic sections; the codfish at Burwell were studied and trawling experiments were done. In 1950, the ship returned to Burwell and the Button Islands for more work on the cod and the seals, and extensive long-lining experiments were carried out for shark, in the vicinity of Cape Hopes Advance. A hydrographic section (involving the measurement of temperatures, salinities, oxygen and phosphate concentrations at standard depths) was made across Hudson Strait, from Wakeham Bay to Lake Harbour in Baffin Island.

The 1951 cruise took the "Calanus" to new grounds, in southeast Baffin Island. We shipped all our heavy gear out of Chimo and sailed out of Ungava Bay. It will be some years before the vessel is back in that region. The 1951 season was exceptionally calm and clear of ice, at least in the Frobisher area, where most of the year's work was done. The "Calanus" was beached at the airfield at Frobisher for the winter and will be taken in 1952 up to Cumberland Sound for further oceanographic work. She will then be sailed all the way west to Churchill and wintered there.

The Author aboard "Calanus"

McGill students have been employed on these marine expeditions in the eastern Arctic throughout the whole program, and the headquarters for the organization of the work, and for the working out of the results, are at McGill. Hildebrand and Orkin have already been mentioned. The "Calanus" was sailed north from Mahone Bay in 1948 by Captain Ernest Ritchie, with two McGill students on board; Bill Wilson, then an undergraduate, and a medical student, Kingsley Morrison. The fourth member of the crew was Corporal Haley of the Marine Section R.C.M.P., who took the writer's place at the last moment, the latter having been landed in the Halifax Infirmary.

The 1949 crew included four McGill students: Bill Wilson again (engineer), Emerson Reid (second engineer), Tim Creery and Ted Grainger. John Lewis joined the party as another zoologist in 1950, and in 1951 Tommy Wilson, Bill's younger brother (still at school) was signed on as apprentice engineer to take Emerson Reid's place. Another student from the Department of Zoology, Ian McLaren, took Grainger's place, the latter spending the whole season on shore at Frobisher Bay, working on the biology of the arctic char (a northern salmonid fish closely related to the brook trout).

Most of these expedition members joined first as undergraduates. In 1950 the writer joined the expedition late and, for most of the summer, Ted Grainger was in charge of the scientific program. He will be in charge again in 1952. Young men of student age are perfectly capable of assuming these responsibilities and of doing a good job in the field. There is nothing impossible or extraordinary in a small expedition in the north in which the average age is only 20 or 21, and the "old man" only 23. Good work has been done in the past by these expeditions and is still being done.

In order to stimulate interest in scientific field work, especially in northern Canada, the McGill Franklin Society was formed in the autumn of 1947. One ultimate object of the society is the raising of funds for student expeditions, especially undergraduate expeditions, so that young people of that age can get into the field on their own, learn at first hand how to look after themselves and their parties in the north, and carry out for

***JOSHUA "JOSH" BOOTH** is presented with a gold watch by Jacques Tetrault, president of the Students' Society on the eve of Josh's retirement after 26 years of service in the McGill Union.*

Josh Booth Graduates

by Clyde Kennedy

When graduation day came this year the students lost their favourite campus "character". While he didn't graduate in the usual way, Joshua "Josh" Booth graduated nevertheless. And as far as the students are concerned, he rated *summa cum laude*.

From 1926 to 1945, Josh worked in the boiler room of the McGill Union. Then he put on a white jacket and took charge of the four tables in the billiard room on the second floor where he served until his "graduation".

Being a man of 72 years of age, Josh decided it was time he got out in the world to look around. He had been a member of the student body for 26 years and was restless to return to his native land of England. At the annual awards banquet on March 12, therefore, nearly one thousand students stood to cheer Josh after Jacques Tetrault, president of the Students' Society, had presented him with a gold watch.

"They tell me I beat James," says Josh proudly as he recalls the comparisons made by the students between the speech Josh made and that of Principal F. Cyril James at the awards banquet.

"The Leprechaun", as *The McGill Daily* has called the short, white-haired Lancashireman, stole the show at the banquet, reminiscing and telling his favourite jokes for the assembled students, faculty members and guests of honour. They loved every minute of it.

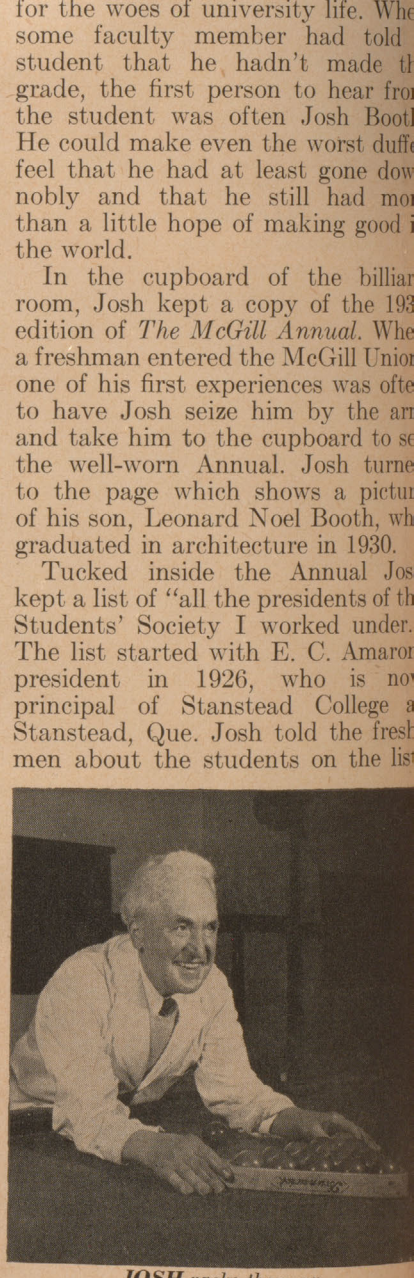

Josh has a tremendous zest for living and much of his good humour rubs off on those around him. At a cocktail party preceding a *McGill Daily* banquet a couple of years ago, Josh and Principal James were among the honoured guests. "How would you like to be principal of McGill?" Josh was asked in front of the principal. "Goodness no," replied Josh emphatically. "I would like to have a million dollars but wouldn't like to have the job collecting a million dollars."

In the billiard room, Josh insiste on gentlemanly behaviour at a times, with swearing and argumen taboo. "I tell them I'll lower th boom if they swear," Josh said ju before he completed his 'universit work'. "The newcomers don't swea when they arrive at McGill but doesn't take them long to learn He always kept the poolroom cloc 10 minutes fast so "my boys" woul not be late for lectures.

The billiard room was a place fo relaxation and it was a place, th students quickly learned, where ther was sure to be a sympathetic hearin for the woes of university life. Whe some faculty member had told student that he hadn't made th grade, the first person to hear fro the student was often Josh Booth He could make even the worst duffe feel that he had at least gone dow nobly and that he still had mor than a little hope of making good i the world.

In the cupboard of the billiar room, Josh kept a copy of the 193 edition of *The McGill Annual*. Whe a freshman entered the McGill Union one of his first experiences was ofte to have Josh seize him by the arm and take him to the cupboard to se the well-worn Annual. Josh turne to the page which shows a pictur of his son, Leonard Noel Booth, wh graduated in architecture in 1930.

Tucked inside the Annual Jos kept a list of "all the presidents of th Students' Society I worked under. The list started with E. C. Amaron president in 1926, who is no principal of Stanstead College a Stanstead, Que. Josh told the fresh men about the students on the list

***JOSH** racks them up.*

***JOSH** and Mrs. Josh at Old Orchard.*

what they did around the campus and what they are doing today.

Many of these ex-students, and others who came to know Josh around the Union, dropped in from time to time to say "hello" even long after they graduated.

"He's like Mr. Chips," says Gerry Clark, who was editor-in-chief of *The McGill Daily* in 1939 and is now a staff writer with *Weekend Picture Magazine*. "He makes you feel you are one of his personal, private possessions. He has an uncanny memory for people."

When Josh read in the papers of one of "my boys" doing well at something, he phoned them to say how pleased he was.

The 1930 *McGill Annual* was dedicated to J. Ramsay MacDonald, Prime Minister of Great Britain and Northern Ireland. One page of the Annual carries a brief, handwritten letter from MacDonald to the McGill student body. He suggested that the best he could say to the students was to give the quotation: "Whatsoever thy hand findeth to do, do it with all thy might."

"Them are nice words," Josh would tell the freshmen when he showed them that page. And they sum up very well the attitude Josh took toward the humble jobs he did in the employ of the students of McGill.

Josh proudly pointed out that his son was on the Junior Prom Committee which bought the clock on the Union hallway wall. Josh, who is remarkably spry for a man of 72, pointed out also that he outlasted the clock, which was put up in 1929. It ran without trouble until the spring of 1950 when it was taken off the wall for repairs for the first time. Josh, on the other hand, has never missed a day's work at the McGill Union during his 26 years of service.

Josh was invited to many student parties and entered right into the spirit of things, temperately enjoying a few drinks and a lively dance. He was particularly fond of square-dancing and he was still stepping lively to "Pigeon on the Pier" this spring.

At any intercollegiate football game in Molson stadium, a shock of white hair could be seen in the students' section. That was Josh Booth, who rarely missed a university football or hockey game. The players always saw to it that there was a ticket for Josh. "For any football or hockey player who scored a goal or who were on a team that won a game," says Josh, "it was a game of billiards on the 'ouse." (The rate in the billiard room is a cent a minute.)

Josh, who has a broad Lancashire accent, was born in Ashton-under-Lyne, near Manchester, in 1880. His father was a blacksmith. "When I flew the coop 48 years ago," said Josh, "my father said: 'Well, son, I don't 'ave owt, I canna' give ye owt, only a bit of advice — hear aw and know nowt, see aw and say nowt, and tha'll get by.' " When young university students pretended they knew everything there was to know, Josh would repeat that advice to them.

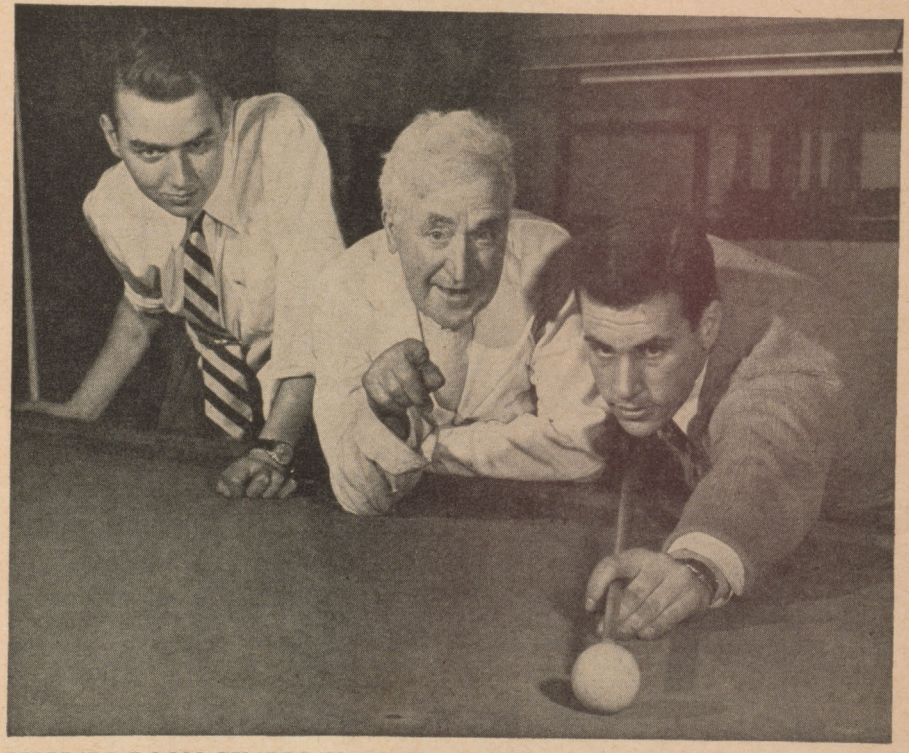

He entered a cotton mill in Ashton-under-Lyne at 10 years of age to learn cotton spinning. "I worked in bare feet on an oily, wooden floor," he says. "Sometimes you got a nice splinter in, boy."

His pay was the equivalent of 75 cents a week, all of which he gave to his mother. His boss spinner "gave me six cents a week for myself, to encourage me," he says. The boss spinner was a member of the Salvation Army and made Josh attend the Friday night Army meetings to get his six cents.

"I used to sit next to a big pot-bellied stove at meetings and I always fell asleep," says Josh. "The boss spinner woke me up at the end of the prayer meeting and gave me my six cents. I would use it to buy a cup of coffee and a bun on Saturday afternoon."

When he was 13 years of age, Josh discontinued the half day of school he took each day and worked full time

The Year in Sport in Retrospect

by Vic Obeck
Director of Athletics

It is always a pleasure to me when I am asked to put down a few words for *The McGill News* because you readers, as former students and athletes of McGill, represent the foundation and the real support for our overall programme.

Looking at the year in retrospect, I see that our representative teams brought home seven championships out of the 17 intercollegiate sports in which we compete in the Canadian Intercollegiate Athletic Union. The sports in which we came out on top were track and field, squash, soccer, golf, fencing, English rugby and badminton. Once again, we came very close in football and we were among the runners-up in boxing.

It has been an extremely busy year in the Athletics Department because, in addition to the 17 intercollegiate sports for men, we have intercollegiate sports for women, an intramural programme for both men and women which includes more than 20 different activities. This is over and above the recreational programme which involves hundreds of students, active in recreational squash, badminton, swimming and, of course, the large membership in the McGill Outing Club.

An addition to our programme this year was the required sports programme for all freshmen. The first year was extremely successful. A questionnaire was given to all freshmen (men and women) who had taken this sports programme of two hours a week. The answers did not have to be signed so therefore the opinions expressed are most likely quite sincere. More than 94 percent voted 'yes', that they did really enjoy this new programme and also the same high percentage voted that they did become reasonably proficient in the activities in which they had instruction. All of these students had choices ranging through the various activities such as swimming, volleyball, squash, badminton and handball plus specialized activities in each group, such as dancing for the women, the art of self-defence for the men. I feel that these students in being introduced to the excellent athletics facilities at McGill in their first year will be more likely to continue in some activity during the rest of their college career. But we will have some facts on that after another year of operation.

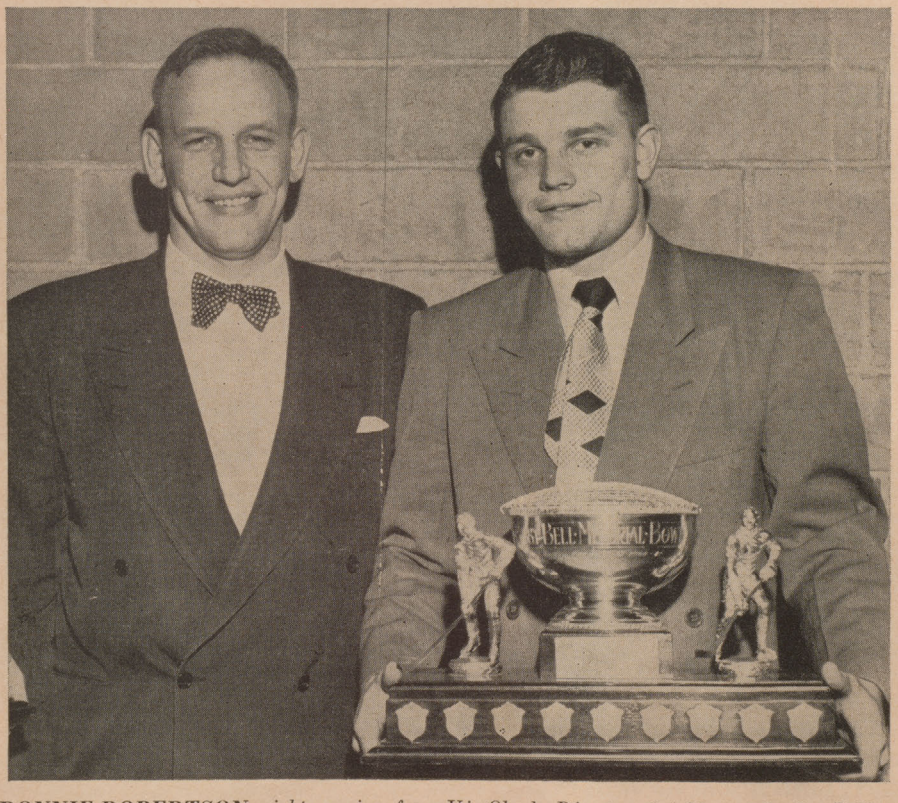

Now, just a few words about two of the major sports which would be of interest to you all. Our hockey team did not have a successful year when you look at it from the point of wins and losses but they operate under very trying circumstances. Rocky Robillard, in his first year as head coach, did an excellent job, but, as we know, it takes a couple of years for any new head coach to get things rolling with his system.

There is the same situation in basketball. Joseph Anderson, the new head coach, tried to improve the calibre of basketball at McGill this year, but it will take him another year or two to bring it up to the level where they can cause some trouble for Toronto and Western.

With the hockey team, the biggest difficulty is finding practice ice and time. We had the hockey team practising some days at seven in the morning at the Forum, other times at noon, but it was very difficult to get the full team out because of classes which they certainly couldn't afford to miss. There is a hockey rink committee working under Mr. Eric Leslie which will be coming out with a report in the very near future on the possibilities of McGill building some sort of a rink to complete the athletics centre.

My own personal opinion is that McGill will build a rink in the near future but so much of this depends on finances and the availability of building material. I also feel that, if intercollegiate hockey is going to get back to the high level of interest that it held years ago, we need some fresh sort of stimulus such as an international league competition once again. This, naturally, is just an idea but I hope to see it evolve in the future where we are playing such teams as Yale, Harvard, Princeton and Michigan, along with the Canadian institutions in one overall league.

Turning to football, it is as usual very difficult indeed to give any sort of a prognosis or preview, at this early date, of the 1952 McGill Redmen because so much depends on

***RONNIE ROBERTSON**, right, receives from Vic Obeck, Director of Athletics, the Dr. Bobby Bell Memorial Trophy, as the most valuable player to the Redmen's senior hockey team.*

***LIEUT.-COL. D. STUART FORBES** is shown, right, presenting the Forbes Trophy to Dave Caldwell, captain of the senior football Redmen, who was named McGill's outstanding athlete of the year.*

what the candidates did in their examinations. If we are fortunate enough to have everyone get through academically, we will have the nucleus of a fair football team. We lost some outstanding men such as Captain Dave Caldwell, Bob MacLellan, Dawson Tilley, Gene Robillard, Haskell Blauer, George Bossy and Frank Creaghan.

The team will most likely be centred around Captain-elect Geoff Crain, who is a fine triple-threat back. What we have to go along with Geoff I do not know just yet because we may lose some boys through ineligibility and there are some other boys who may not be able to continue because of financial troubles.

I was very happy to see that McMaster University has been admitted to the league even if it is only on an exhibition basis the first year, because I feel that they will be admitted as a full league member next year if they make any sort of a showing in these exhibition games this coming fall.

I like to take every opportunity, such as this, to thank you for your loyal support in all sports through the years that I have had the privilege and pleasure to be the Director of the Department of Athletics at McGill. I certainly hope that you will continue to back us, win, lose or draw, because we will always be doing our best no matter what the odds.

"I couldn't do it to a friend!"

—Doctor diagnoses his estate problem

"I thought too much of my best friend to make him executor of my estate, and saddle him with a lot of worries. It wouldn't have been fair to my family either. How much did he know about succession duties, taxation, finance, managing real estate, handling securities? And then there was always the possibility of his illness, absence or death. So, I have appointed the Montreal Trust and now I have peace of mind. I know that they are experienced in estate management. I know that they will be on the job *all* the time."

Dr. James Naismith, Originator of Basketball

Sixty years ago a McGill man, Dr. James Naismith, B.A. '87, invented the game of basketball. The first contest was played at Springfield Y.M.C.A. College, at which he was physical director, on Jan. 20, 1892.

Last year there were more than 20,000,000 players taking part in basketball in 75 countries. The rules of the game have been translated into 35 languages.

On the 60th anniversary of the invention of the game, The News *reprints here an article contributed by Dr. Tait McKenzie, Arts '89, Med. '92, LL.D. '21, who wrote about his boyhood and college friend in the June 1933 issue.*

A powerful youth bestrides an unbound sheaf of wheat and in one hand holds a sheaf he has just bound. He throws this second sheaf up in the air, stoops and binds the other before the first comes back to earth and challenges anyone in the harvest field to do the same thing.

That is one picture I have of Jim Naismith before he went to college. A small admirer, I had been sent to the farm during the absence of my father and mother from the manse, and the old stone house, built by Naismith's grandfather, Robert Young, and afterwards owned by his uncle, P. J. Young, was my second home.

Jim was the hero of many boyish exploits; spearing fish on the flooded flats in the spring by the light of the jack filled with pine knots; hunting the dogs that killed the sheep; riding, rowing, working, and fishing in the summer made the round of life on the farm, with the winters spent in school at Almonte. His challenge to the wheat sheaf was characteristic of his love of competition.

When he went to McGill in 1883 he made the football team almost at once and the gymnasium also had its lure for him for, in his second year, he won the Wickstead Silver Medal, which carries the junior all-round gymnasium championship with it.

When I came to McGill in 1885, he initiated me into the mystery of the first gymnasium I had ever seen and, two years later, when I won the coveted silver medal myself, he was the winner of the gold medal, or senior all-round championship.

The teacher was Francis S. Barnjum, an English gentleman, a lover of horses and all forms of sport and an inspiring teacher. He had come under the influence of Archibald MacLaren of Oxford and started a gym at 19 University street, where the student classes met three times a week.

Jim and I used to linger after class and try stunts. In that way, we learned the simpler forms of tumbling, the handspring and the back and front somersault and, in the course of time, we worked up a brother act, enriched from time to time by surreptitious visits to a vaudeville theatre where there was usually a good acrobatic act on the programme.

He was under man and I, being lighter, was top man. Many times he saved my neck by his steadiness. Our "turn" became a feature of the annual exhibitions and on one great occasion, when home from college, we gave it during the Christmas holidays in the town hall at Almonte, as part of the programme of the high school concert.

Our act ended in a Catherine wheel, in which each held his partner's ankles and, by a series of dives, rolled across the stage like a revolving wheel. We were accustomed to make six revolutions but, unfortunately, the stage was small and we found ourselves across before we realized it and too late to stop. So we burst through the dressing-room door in the wings and collapsed in the midst of the chorus girls who were changing their dresses.

Naismith was completing his theological course at the Presbyterian College when I won the senior gymnastic championship in 1889. That summer Mr. Barnjum died and, in the fall, the university asked Naismith to take charge of the classes in gymnastics. We talked it over and he accepted with the understanding that I should help him in the unaccustomed work which both of us undertook with some misgivings.

This was the beginning of his work in physical education and a visit about that time of Alonzo Stagg, the hero of Yale, still further inflamed his interest. He finished his theological course, however, and I heard him preach from a Montreal pulpit more than once.

But the call of his life's work became more and more insistent and he soon left for Springfield where he came under the dynamic influence of Luther Halsey Gulick and played on

TALKING OVER OLD TIMES: *Dr. R. Tait McKenzie, left, chats with Dr. Naismith at the McKenzie summer home at Altmonte, the little Ontario town where both were born. This picture was taken in 1937. Dr. McKenzie died the next year and Dr. Naismith in 1939.*

NAISMITH THE FOOTBALL PLAYER: *This is the McGill football team of 1885 of which Dr. James Naismith was a member. They are, left to right: back row: F. Robertson, A. W. Smith, E. D. Holden, Col. Wroughton, J. G. G. Kerry and Jas. Naismith. Middle row: H. M. Palmer, Dr. H. Paton, Percy Brown, H. Budden, J. M. Elder, E. H. Hamilton and J. M. Robertson. Front row: E. May, W. J. Hamilton and H. H. Johnson.*

the Springfield College team with Stagg who was his classmate there. He was a great centre and at McGill had outplayed men who outweighed him by many pounds. Often I have seen him so exhausted after a game that he could hardly hold up his head but, in the game, he was quick, resourceful and could usually outwit his opponent.

These qualities showed in his college life. He was generally the leader of the raids and forages that fell upon the unsuspecting inhabitants of the "west wing" in the college dormitory, when study hours became too oppressive and, on more than one occasion, he had to appear before the "powers" for explanation.

He had abundant vitality and to me was like an older brother. Together as students we joined the Fifth Royal Scots, afterwards the Royal Highlanders of Canada and now the Black Watch of Canada who distinguished themselves in Flanders from 1915 on. We used to swank about in our red coats and kilts on the field days and on the evenings of the weekly march out.

On one occasion, he brought me home ignominiously in a cab after I had disgraced myself by fainting in the drill hall after a long march, because I had started with a sprained ankle which had swollen under the strain of the march in a tightly-laced boot.

There were many debates before he decided to give up the pulpit for physical education. It took courage at that time to leave the time-honoured and well-beaten path for the unknown and comparatively unexplored regions but the decision, once taken, he never faltered and I think never regretted it. It was at Springfield that Naismith as a teacher of psychology at the college discussed the problems of an indoor game and formulated a set of rules which to this day constitutes the basis of basketball.

I visited him once at Springfield and saw the college there for the first time. Dr. Gulick urged me to come and teach but I could not leave my growing medical practice in Montreal.

One other visit I made to him and that was as best man at his wedding. Having seen him safely disposed of, there seemed no reason for further worry about him on my part. Those who know him realize he has been in good hands. Of recent years we have scarcely met but the old friendship is deep and burns as brightly as it did in the days when we were students together at McGill.

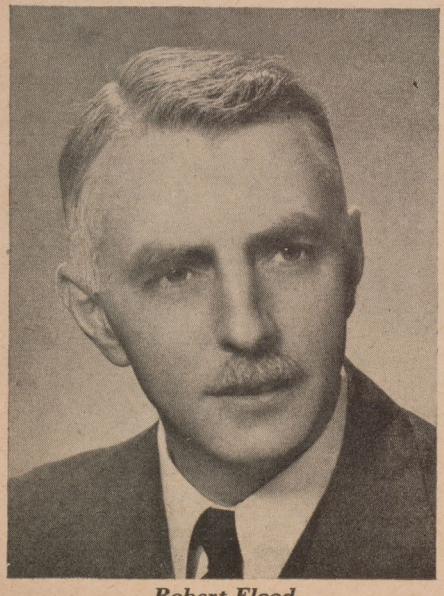

Graduate Society Elects Officers

Shirley G. Dixon

John G. McConnell

Robert Flood

Shirley G. Dixon, O.B.E., Q.C., B.A. '11, B.C.L. '14, was installed president of The McGill Graduates' Society at the annual meeting. The two new vice-presidents are S. Boyd Millen, O.B.E., B.A. '27, B.C.L. '30, and D. Ross McMaster, M.B.E., Q.C., B.A. '30, B.C.L. '33.

The new Graduates' Society representative on the Board of Governors of the university is Francis Gilbert Ferrabee, B.Sc. '24, Diploma, R.M.C.

The four new members of the Board of Directors appointed are Robert Flood, B.S.A. '35, Philip N. Gross, B.Sc. '26, Lindsay Percival Webster, B.Com. '25, C.A. '28, and John G. McConnell, Arts '33.

The regional vice-presidents are:—

Maritime Provinces, Eldon M. Taylor, B.S.A. '18.

Quebec (exclusive of Montreal) and Eastern Ontario, B. H. Drummond Giles, B.Sc. '27.

Central Ontario, E. G. McCracken, B.Sc. '24.

Ottawa Valley and Northern Ontario, Bernard M. Alexandor, B.A. '28, B.C.L. '30.

Prairie Provinces, Lt.-Colonel George E. Cole, B.A. '02, B.Sc. '06.

British Columbia, Harry M. Boyce, B.Com. '30.

U.S.A. (New England), Gerald G. Garcelon, M.D. '35.

U.S.A. (East), Allister M. McLellan, M.D. '24.

U.S.A. (Central), Malcolm T. MacEachern, M.D. '10, D.Sc. (Hon.) (Marquette University), LL.D. (Hon.).

U.S.A. (West), Ernest H. Falconer, M.D. '11.

United Kingdom and countries other than Canada and U.S.A., Thomas F. Cotton, B.A. '05, M.D. '09, D.Sc. '46 (Hon.).

These are the officers who will guide the Graduates' Society for the next several years.

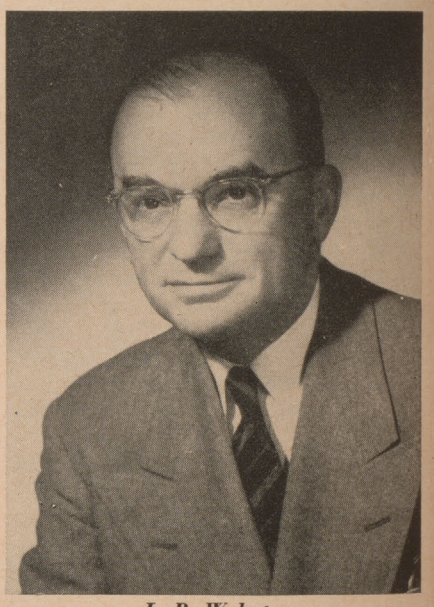

We are happy to have men of such outstanding character serving the Society and the University.

Our president was at one time president of the Students' Society before World War I. He was popular then and has throughout the years maintained his popularity. We look forward to a very successful two years with Mr. Dixon as president.

D.L.G.

Francis G. Ferrabee

L. P. Webster

Philip N. Gross

DATE WITH THE ARCTIC: *Lieut.-Col. P. D. Baird, director of the Montreal office of the Arctic Institute of North America, charts a series of scientific explorations to be undertaken in the northern regions this summer. This field research work is made possible through institute and the McGill-Carnegie grants. Thirteen different universities, including McGill, will be represented in the 25 parties which will attempt to wrest new secrets from the Arctic.*

Northern Research . . .

(*Continued from page 14*)

themselves a program of scientific field research. No amount of tagging along with more experienced expedition men can replace the most valuable experience of all — responsibility for your own work and your own well-being, away from civilization, at or about the age of 20.

The Franklin Society is small and its meetings attract up to forty or fifty people, usually to hear a paper on some expedition in distant parts. The north of Canada has filled most of the meetings but other regions, including Yucatan, Mexico and Norway have been represented. The society has already been responsible for the inspiration and beginnings of one summer expedition to Labrador (Newfoundland Labrador), namely the "Merry Gale" expedition of 1949, on which Professor Kranck was in charge of the scientific work and the "Merry Gale" herself, a 40-foot motor launch, was skippered by her owner, Noel Fothergill. In this instance, the Franklin Society was fortunate to be able to get Dr. Kranck to take over the plans and have the whole thing supported financially by the Geological Survey of Canada.

In 1950, Colonel Pat Baird took with him on his Baffin Island expedition four McGill students: George Riley, John Waller, Sven Orvig and Kenneth Eade. Riley had been a member of the "Merry Gale" expedition the year before. Several graduate students have been working in the Ungava Peninsula in Professor Hare's team in the general field of climatology, including Pierre Gadbois and Norman Drummond. Jack Campbell, a graduate student in the Department of Botany, worked in the Yukon in 1950 and 1951, and Dale Osborn, a zoology student, spent a summer in the Knob Lake area of Ungava in 1951. Arthur Dawson, an undergraduate in biochemistry, was a member of the "Blue Dolphin" expedition to Labrador in 1951.

There are many others. Obviously the taste for expedition work, that is, scientific field work, especially in the north, is developing at McGill, and the Franklin Society serves a vital purpose in encouraging this development, and in keeping students from different departments but with this common interest, in touch during the academic year. It is proper that the emphasis in the society should be on the undergraduate rather than on the graduate students because it is always much easier to obtain funds to support graduate field work leading towards advanced degrees than it is to find money for purely undergraduate, or predominantly undergraduate, expeditions.

Whatever the possibilities may be of ultimately raising such funds (and the cost is not great — somewhere between $500 and $1,000 per head for, say, an expedition to northern Ungava), the Franklin Society will continue its present functions, which have shown themselves to be both useful and popular. And it should not be forgotten that there is always a significant proportion of girls in the membership, many of whom are just as keen as the men to get out into the field on junior scientific expeditions. Such expeditions are by far the best means of ensuring a constant supply of young men and women who have become acquainted, at an early age and on their own responsibility, with the north and with the "language" of the north. There is at present a real shortage of such people for the rapidly widening field of northern research.

"... the building of my herd"

Many a farmer knows that initiative, hard work and the financial support of the bank can all play their part in developing a successful farming operation.

One such man, a rancher in the West, recently wrote to his bank manager:

"I wish to express my appreciation of the way your bank has treated me through the years . . . the encouragement you have given me in the building of my herd. I feel the success we have achieved could hardly have been obtained without your intelligent support."

The farmer uses bank credit in many ways: to develop his land, buy livestock and equipment, market crops. Aiding Canada's food producers is an important part of the broad service the chartered banks perform for all Canadians.

This advertisement, based on an actual letter, is presented here by

THE BANKS SERVING YOUR COMMUNITY

Problem of Coeds' Careers Probed by Alumnae Placement Committee

by Glenna Lymburner Tisshaw

Ever since higher education for women ceased to be exclusively a cultural background for enlightened domesticity, the question of post-graduate employment for women has become increasingly important. And yet, although the majority of girls now enter university with the intention of working after graduation, very few coeds have more than a vague idea of the type of job they would like to hold, and fewer still give any thought to the post graduation suitability of their curriculum.

To the interviewer in an employment office this attitude does nothing to enhance the woman graduate as a job applicant, and it was evident that undergraduate women needed to have some of the facts of business life presented to them before they went job-seeking.

With this in mind, the Alumnae Placement Committee was formed. This year's members include all McGill graduates who had weathered the post university employment struggle and gained collective experience in a wide variety of job fields, including industrial engineering, technical secretarial work, advertising, retailing and personnel work.

This Placement Committee (1951-52) has as its chairman Miss Maryellen Rossiter, B.A. '41, M.A. '42; other members were Miss Ruth Peltier, B.A. '29, (Assistant to the Director of the McGill Placement Service), Mrs. Theo Paterson, B.A. '27, Miss Frances Cohen, B.A. '43, Miss Helena Phillips, B.Sc. '44, Miss Monica McArdle, B.Com. '48, Miss Gilberte Falardeau, B.Sc. '48, Mrs. Glenna Tisshaw, B.A. '49, Mrs. Joan Fitzpatrick, B.Sc. '49, and Miss Mimi Pickering, President of the Women's Union.

The purpose of the committee is to help graduating girls and other undergraduates in their efforts to analyse what they want to do and what preparation will best suit them for their chosen careers. Also, the committee helps the Placement Service whenever possible in placing McGill women in business and industry.

Part one of the committee's programme was the sponsoring of a "Career Clinic", at which a panel of well-known business women acted as "Doctors" to diagnose career ills and problems. Each speaker outlined the specialised job requirements, job interests, working conditions, and to some extent the job market in her particular field. This was followed by an informal group discussion with the girls interested in her type of work.

The eight speakers at this "Career Clinic" were: Miss Irene Kon, advertising consultant; Miss M. Cameron, Executive Assistant to the Comptroller of Henry Morgan's; Mrs. M. Stronach, Canadian Library Association; Miss C. Bourgeois, Personnel Director, Ayerst, McKenna & Harrison; Miss S. Nowlan, Employment Supervisor, Bell Telephone; Mrs. B. S. Johnston, formerly Social Service Director at the Montreal General Hospital; Miss G. Gardner, Education Officer of the Montreal Protestant School Board; Mrs. R. Mallen, Personnel Manager of Henry Morgan's.

The second project undertaken by the Placement Committee was a series of tours of various business organizations and institutions arranged specifically for fourth year women in Arts, Science, Commerce and Fine Arts. The 19 tours, made possible by the generous co-operation of many Montreal firms: Girls' High School (Teaching); Weston School, (Teaching); Aluminum Company of

IF INDUSTRY NEEDS IT...CANADIAN VICKERS BUILDS IT — BETTER

1952 Alma Mater Fund Off to Promising Start

by F. Lyle Pattee
Fund Secretary

The year has started well for the Alma Mater Fund and it is beginning to look as if Chairman Millen will reach his objective of $200,000. The interim report (up to May 15) shows that more contributors have participated than at this time last year and it is hoped the average gift will eventually be greatly in excess of previous years.

The letters received from the members have been warming ones too. All are encouraging because they have shown that someone was interested enough to write. A few of the responses were rather critical but, in almost all cases, the criticism was constructive. This is what we want.

Returns to date indicate that the class of Agriculture '52 will be difficult to beat out for top place with a possible 98% participation.

The District of Bedford branch has made an early start in its membership campaign under the leadership of Bill Ward. It is evident that this branch will make a determined bid for first place in the year-end report.

Here are some of the letters received at this office which I think you will find both entertaining and interesting reading:

I enclose my personal cheque as my contribution to the Alma Mater Fund for this year. The large amount of money collected in the form of many small donations amazes me every quarter when I look through my copy of *The McGill News*. It makes "us lettle fellows" feel a little more important than usual.

Eng. '48

* * *

It seems only fair to reply to your several requests for contributions to the Alma Mater Fund. I have made several small donations in the past and most certainly will again in the future. At present, however, I find such a course almost impossible as I am attempting to save enough money to do a year's graduate work beginning October 1952.

You will, I trust, understand this "leave of absence" for a couple of years. I do feel a sense of guilt for I am more indebted to McGill than most students, having gone through on bursaries and the type of scholarship given to needy students. Since there are no other big financial projects in the offing I should be able to resume my contributions in September 1953.

B.A. '45

* * *

I am enclosing my cheque. I want to say that I am very much in sympathy with the idea and greatly

Bill Ward

regret the size of my contribution, but I have greatly reduced my activities and therefore my income. I feel that I can't reasonably afford more.

I still have my uncertain old age to contemplate. However, my good wishes — in *much* more generous amount — accompany this small donation.

Med. '09

* * *

I received your contribution form for this year. However, as I am doing graduate work at McGill and trying to SURVIVE on the salary which the University is paying me, I believe that I may be more entitled to a subscription from you than vice-versa.

If your campaign should help to improve the lot of such people as myself you can be sure that you will have my full support, but for the present it must unfortunately remain purely "spiritual".

Eng. '48

* * *

I have just received the blank for a subscription to the Alma Mater Fund. Having spent nine years and enjoyed every one of them on the campus it is not my intention to forget Old McGill. However, this is just my fourth month in practice and at the moment my main worry is to pay the rent. So please keep me on your mailing list because I really do want to do at least my part as a graduate, and just as soon as my finances improve a little.

D.D.S. '50

* * *

Herewith my cheque. I am forwarding this early so I will not be bombarded with literature during the balance of the year. It is an example, I hope, that will be followed by many. I am sure early contributions would save a great deal in the Fund's administration expenses. We all know we are going to contribute to the Fund some time during the year anyway, so it might as well be done right away.

Com. '24

* * *

I am sorry that my contribution is so late in arriving, but I have been sick and hospitalized for some time, and am just beginning to come to the surface. I am sorry also that my cheque is smaller than I could wish; but I am a retired clergyman on pension, and if you have any idea what that means you will give me *some* credit.

Branch Notes . . .

Trinidad Organizing Society's 51st Branch

By the time you read these "Notes", the ranks of McGill graduates will have been increased by the addition of the "Class of '52". The Undergraduates' Interests Committee of the Montreal Branch of the Graduates' Society has endeavoured to interest each member of the Class of '52 in the Society and to tell them about the society's varied activities. They have been told about branch meetings and the opportunity that such meetings afford for making new friends amongst McGill graduates — new friends in their new homes. All our branch executives are specially invited to try and welcome members of the Class of '52 to their branch.

The camera has been repaired — graduates pose, bulbs flash, shutters click and the results or at least some of the more presentable ones may be seen in these pages. Naturally, there are many pictures that space, cost and a modest respect for the laws of libel and slander prevent me from publishing. Selection is really a problem.

The most interesting and precedent-creating event these past months was our Alumnae Secretary's trip west. On her way to visit her parents, Mr. and Mrs. Lewis McNab (Sc. '10), in Vancouver, Miss Elizabeth McNab met with several branches — she tells her own story elsewhere in this issue. So now the graduates may look forward to a very pleasing alternate to the General Secretary.

The McGill Society of Ontario held its annual meeting on Feb. 12. The following slate of officers was elected: — A. Harry Galley, B.Com. '24, president, and James L. Lewtas, B.A. '42, secretary.

Professor H. D. Woods, Director of the School of Commerce, was the guest of honour at the St. Maurice Valley Branch meeting held in Three Rivers on March 6. Art Edwards, B.Sc. '20, presided at one of the largest meetings held in a long time. This branch has as an added feature each year: the High School Girls' Public Speaking district finals, sponsored so successfully by the McGill Alumnae Society.

Judging by the two folders of pictures that Mildred White sent us, the March 22 annual meeting of the Washington State Branch must have been a gala occasion. The new officers are: — Mrs. Mildred B. White, president; Dr. Cecil M. Hay, M.D. '23, first vice-president; Charles P. Larson, M.D. '36, second vice-president; Robert Felsted, B.Sc. '46, secretary-treasurer, and Milliam Steedman, press relations.

by D. Lorne Gales
General Secretary

The annual Montreal Branch Sugaring-Off Party at the Morgan Arboretum at Macdonald College grows more popular each year. Jim Anglin's excellent coloured movies tell the reason why — 350 happy (?) parents and children — cokes — hotdogs — maple *la tire* and tons of Kleenex were the high spots, not to mention the tractor ride in and out.

The St. Francis District chose the same sunny Sunday, March 30, for its very largely attended Sugaring Off Party.

Bernard (Bunny) M. Alexandor Q.C., presided at the Ottawa Valley Graduates' Society's meeting held in the Naval Officers' Club on March 31. Cocktails, buffet supper, election of officers, reports and a speech by S. Boyd Millen, O.B.E., followed by the Royal Visit and the Winter Carnival films provided the programme. Herewith another slate of officers M. M. MacOdrum, M.A. '24, honorary president; Robert C. Berry, B.Sc. '13, honorary vice-president; C. M. Drury, B.C.L. '36, president; C. Maxwell Taylor, B.Arch. '33, vice-president; Robert L. McKenna, B. Com. '48, secretary-treasurer; Bernard M. Alexandor, B.C.L. '31, Alma Mater Fund representative.

Dr. F. Cyril James was the guest of honour at meetings held in Hamilton on April 4 and St. Catharines on April 5. Dr. J. P. Fawcett

(Continued on page 34)

Report from London

London, Eng. On the eve of his return to Canada to take up his post as Permanent Under-Secretary in the Department of External Affairs, Ottawa, His Excellency L. Dana Wilgress, Arts '14, High Commissioner for Canada, with Mrs. Wilgress was accorded a farewell reception by the McGill Society of Great Britain. The party, attended by some fifty members and their guests, took place in the offices of the Canadian National Railways, Cockspur Street, in the shadow of Canada House.

It was also an occasion to welcome S. Boyd Millen, Arts '27, Law '30, first vice-president of the parent body and chairman of the Alma Mater Fund who, with Mrs. Millen, was visiting the United Kingdom.

J. B. Thom, Science '15, president of the society here, expressed the regret of all on the impending departure of Mr. and Mrs. Wilgress who, during the past three years, had endeared themselves to a legion of friends in Britain.

Mr. Wilgress' unflagging interest in McGill (he served throughout his stay here as honorary president of the McGill Society) was particularly noted.

On being pressed to speak, Boyd Millen acquiesced. He reminded one of the late Stephen Leacock, who would start by discussing problems of the gold standard, eventually to wind up by describing the curious cut of a Tibetan Lama's cowl. As usual, he was a success.

Films of the Royal Visit to McGill and of last fall's football games were shown.

It was generally agreed that the party was a good idea and that on the next occasion probably twice the number would show up. It's not the easiest thing to collect McGill men and women from all over the British Isles for such affairs. But the executive is determined to try.

D. M. Legate

Branch Visiting Found To Be Delightful Chore

by Elizabeth B. McNab
Alumnae Secretary

I am told that I established a precedent—at least, that is what the advance newspaper publicity said. I doubt very much if I am the first Alumnae (note the "ae") Secretary in Canada to represent her University and Graduates' Society at meetings of graduates in widely scattered cities in Canada and the United States but, for me, it was a new experience.

The idea for the tour developed rather rapidly after a decision to take my holidays in the spring and visit Vancouver. Within a few days the trip had broadened into a tour involving McGill meetings in Winnipeg, Saskatoon, Edmonton, Vancouver, Minneapolis-St. Paul, and Chicago. Last-minute instructions from the General Secretary were numerous, including a short course on the operation of a movie projector (which, fortunately, I never had to put to use) and I must admit I regarded the whole thing with some trepidation as I left Montreal on March 23.

Let me say right now that my fears were hardly justified. Nothing I have done in my six years with The Graduates' Society has been so stimulating or has brought home to me so clearly the great interest of graduates in McGill, no matter how many hundreds or thousands of miles away they may be or how many years ago they graduated. What made it so pleasant was the friendliness of the graduates I met at each stop, their obvious enjoyment of the two coloured movies "Football Highlights 1951" and "The Royal Visit to McGill" which I took with me, and the questions, always questions, about the university; new buildings, old professors, financial situation, and the size of the student enrolment.

Arriving in Winnipeg on March 25, I was met by the well-known and popular president of the Winnipeg branch, Col. George E. Cole, Arts '02, Science '06. After going over the list of graduates in that area with Col. Cole, it is not difficult to see why their mailing lists are so up to date. The energy which their president puts into keeping track of McGill men and women moving in and out and about Winnipeg is of immense help to the records office of The Graduates' Society. Graduates from 1896 to 1951 were present at the dinner meeting in the evening and Vice-President Stewart Bacon, Arts '30, and Secretary Jack Bovard, Eng. '41, were busy promoting the annual inter-university alumni golf match which has become an institution with this branch.

Two days later in Saskatoon, I was present at a very pleasant McGill get-together at the home of the president, Dr. D. M. Baltzan, Med. '20. Attending his first meeting of this branch was Dr. J. Wendell Macleod, Med. '30, who had just arrived that day to take up his new post as Dean of Medicine at the University of Saskatchewan.

In Edmonton, the next day, I was taken on a very interesting tour of this fast-growing city and of the University of Alberta by Mrs. A. C. Emery (Eileen Greene, Com. '25). The dinner meeting that evening was presided over by the president, William Dick, Science '08, and I listened to some fascinating reminiscences of McGill from both Mr. Dick and Dr. J. J. Ower, Med. '09. Once again, the graduates ranged from Dr. Evan Greene, Med. '99, to two graduates of Architecture '51, Gerard Diamond and Emile Dupuis.

Election of officers took place and the following constitute the new executive of the Northern Alberta branch: Graham Huckell, Med. '24, president; Graeme Shaw, Agr. '27, vice-president; Mrs. A. C. Emery, Com. '25, secretary; Harold Williams, Science '26, treasurer; and E. K. Cumming, Eng. '44, committee.

At a large meeting in Vancouver on April 9, a new executive was elected as follows: Alan R. Anthony, Med. '33, president; R. J. A. Fricker, Eng. '40, vice-president; W. K. "Chip" Molson, Arts '38, secretary; A. D. Browne, Com. '39, treasurer.

This, like the others, was a mixed meeting, and the success of it can be judged by the fact that such a large number stayed until well into the evening. There were two more McGill events during my stay in Vancouver—one, a luncheon for the new execu-

(*Continued on page 53*)

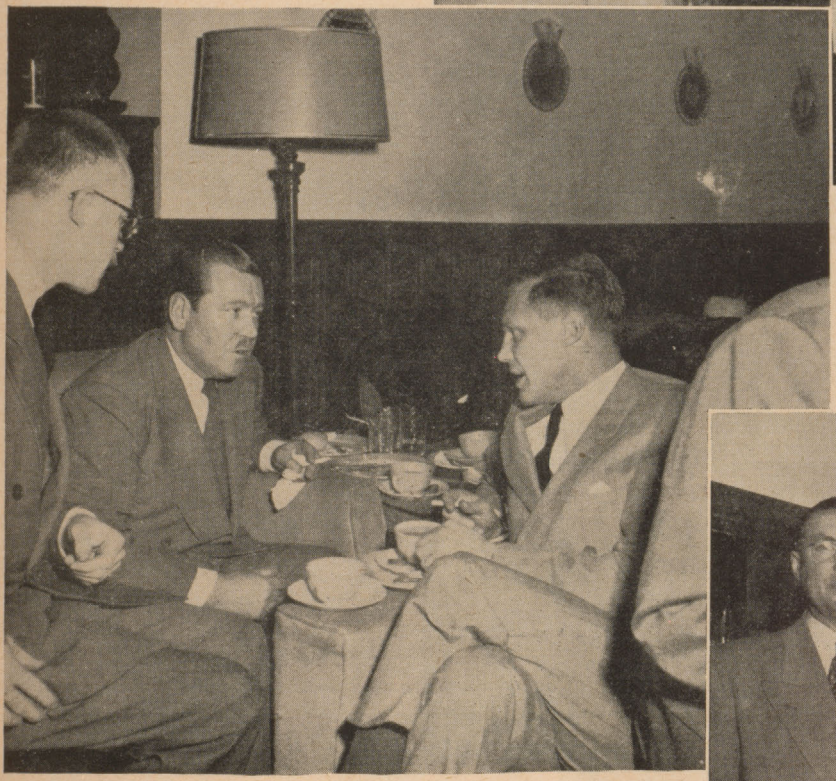

BRANCH MEETING IN VANCOUVER *on April 9 brought the following together, left to right: R. J. A. Fricker, Eng. '40, vice-president; A. D. Browne, Com. '39, treasurer; W. K. "Chip" Molson, Arts '38, secretary; Elizabeth McNab, Arts '41; A. B. McEwen, Science '12, executive member; Leigh Hunt, Med. '31, past president; L. G. McNab, Science '10, past vice-president; F. R. Phillips, Eng. '32, and A. K. Mathisen, Med. '41, members of executive. Three other members of executive not shown in picture: Alan Anthony, Med. '33, president; Harry Boyce, Com. '30, regional vice-president for British Columbia; and Allan S. Gentles, Science '14, retiring regional vice-president.*

LEFT: *St. Francis District sugaring-off party. Left to right: Harold McNaughton, B.Sc. '25, president John Murray, B.Sc. '26, treasurer, and Mrs. John A. York (Betty Peltier, B.A. '36) secretary.*

Class Notes

An all-time high in the number of classes returning to McGill for reunions is expected to be reached next fall. The Homecoming Weekend will be Oct. 17-19, with the McGill-Western football game on Saturday the 18th. The Montreal Medico-Chirurgical Society will hold its Fall Conference from Oct. 13 to 18.

At the moment, 23 classes, listed below, have reunions planned, and a dozen more will be organized in the near future as soon as a reunion chairman can be found. If your class is due for its 5th, 10th, 15th, etc., reunion this year and is not listed, please drop a line to the Graduates' Society office, giving the name of the class president or secretary so that they may be contacted.

The September issue of *The News* will carry full details of the programme of each class reunion.

Science 1912

A dinner at the University Club Montreal, on March 10, 1952 marked the semi-annual meeting of the Class of Science 1912. Those attending this function included F. H. Barnes, W. M. Bolan, the Hon. Senator J. C. Davis, A. Gall, T. G. Goode, R. A. C. Henry, R. H. Mather, J. W. McCammon, A. B. McEwen, J. McNiven, A. R. Renaud, J. B. Robb, E. A. Ryan, A. E. Sargent, A. N. Scott, D. A. Shaw, V. I. Traversy, J. H. Wheatley, F. R. Whittall.

As 1952 is the 40th Anniversary of the graduation of the class, plans for a two-day reunion celebration on Oct. 17 and 18 were discussed. J. W. McCammon was elected chairman of the reunion committee with R. H. Mather, vice-chairman. Sub-committees are busy working out details of the programme of entertainment which will include a cocktail party presided at the Hamilton meeting, while R. D. Bennett was chairman at the Niagara Frontier Branch meeting.

DR. KENNETH B. JOHNSTON *has been promoted from the rank of associate to a full professorship in ophthalmology. He is chairman of the department at the university.*

for members and their ladies in th afternoon and a stag dinner in th evening of Oct. 17, a buffet luncheo at the gymnasium and a footba party at Molson Stadium to se McGill play Western on Oct. 1 A large attendance is expected.

Members at large have been not fied by letter of the coming affair, further notice of which will be issue when final arrangements are com plete.

Branch Notes . . .

(Continued from page 30)

The McGill Society of New Yor guided by retiring President, G. J "Gerry" Jackman, used the occasio of their spring cocktail party to hol an annual meeting. Despite the down pour of rain, 100 graduates wer present and elected the followin slate of officers: — Hon. John God frey Saxe, B.A. '97, M.A. '14, an Charles E. Fraser, B.A.Sc. '99, hon orary presidents; Stuart E. Kay, B.Sc. '21, president; J. L. Greenwood B.C.L. '41, vice-president; Milton S Lloyd, M.D. '24, vice-president David Cowan, B.A. '23, treasurer and Vern Allison, B.Sc. '37, secretary.

In London, Dean Charles Brown and his executive at London, Ont., held their annual spring meeting Thursday, May 1. The General Secretary was present and showed a few McGill movies. At the election of officers, the assembled members re-elected the entire executive — a complete vote of confidence.

On Friday, May 9th, Jean Bieler and Phyllis (McKenna) Duchastel organized the annual meeting of the Quebec branch and a most enjoyable party took place at the Habitant Inn. The new president is Guy T. Caldwell, Comm. '25, with Al Burditt Eng. '46, as the new secretary. The other officers' pictures appear elsewhere in this issue.

As we go to press, word has been received of the Washington, D.C., branch meeting with the District of Bedford meeting scheduled for Friday, June 6, at Hamish and Mrs. Hamilton's Spring Valley Ranch.

New branches are always a source of pleasure. Trinidad is currently organizing our 51st branch under the guidance of Carl A. R. Lee, B.Sc. '47, M.D. '49, while David Hutchison, B.A. '93 has been in correspondence on the subject of a Northern New York State Branch with headquarters at Albany. Will anybody volunteer to help ?

MEMBERS OF THE HAMILTON BRANCH *gathered to hear an address by Dr. F. Cyril James, centre, principal and vice-chancellor. Shown with Dr. James are Dr. J. P. Fawcett, Med. '18, left, president of the branch, and F. I. Ker, C.B.E., B.Sc. '09, past president.*

QUEBEC CITY BRANCH MEETING: *The newly-elected Quebec City executive met with the retiring president and secretary. Seated, left to right: Mrs. P. A. Duchastel (Phyllis A. McKenna), B.A. '38, retiring secretary; Mrs. W. R. G. Ray (Leila E. Argue), B.Sc. (Arts) '26, vice-president; standing, left to right: Lionel Roussin, Comm. '23, treasurer; John H. Bieler, B.A. '13, B.C.L. '19, retiring president; James O'Halloran, B.Sc. '21, vice-president; Guy T. Caldwell, Comm. '25, newly-elected president; Albert W. Burditt, Eng. '46, secretary.*

LONDON, ONT., BRANCH *members gather at least once a year at a well-known rendezvous for McGill graduates. Shown left to right are S. R. "Sammy" Granger, Comm. '21; Frank "Cross-Country" Campbell, Comm. '34; Colonel Ibbotson Leonard, B.Sc. '05, and E.G. "Punch" McCracken, B.Sc. '24, regional vice-president for Ontario.*

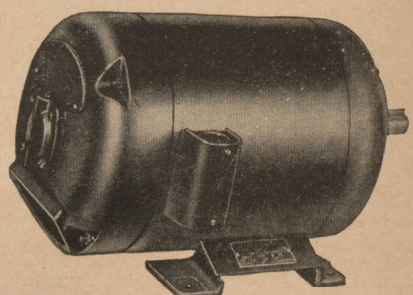

MEETING OF THE WASHINGTON, D.C., *branch of the Graduates' Society. Back row, reading from left to right: Thomas B. Spencer, M.D. '39, Elmer G. Frazier, Edward H. Hickey, Mrs. Robert W. A. Dunn (Kathleen Lawson, B.A. '39), Jocelyn G. Clark, B.A. '38, M.A. '39, Mrs. Jocelyn G. Clark, Ben Caplan, Mrs. Elmer G. Frazier. Third row: Mrs. Kingsley Higgins (Jean Donaldson Reid, B.A. '38), Maud M. Hutcheson, M.A. '27, Mrs. Ben Caplan (Ida Rabiner, B.A. '32), Frederic D. Chapman, M.D. '38, Mrs. James H. Peers (Ada Fanjoy, B.H.S. '29). Second row: E. Elizabeth Duncan, B.A. '36, Kingsley Higgins, Mrs. Richard S. Mason (Sheila Farquharson, Phys. Ed. '42), Lt.-Col. A. Mendelsohn, F. Lloyd Mussells, B.A. '40, M.D. '44. Front row: Mrs. Edward H. Hickey (Ragnhild Tait, B.A. '34), James H. Peers, M.D. '31, Robert W. A. Dunn, B.Com. '39, Mrs. E. K. Cook (Hope Richardson, B.Sc. '34), Mrs. Thomas B. Spencer, Mrs. F. Lloyd Mussells.*

WAGNER MOTORS

Are an Added Feature on Your Product

Your product and the motor that powers it are working partners—and when you choose a Wagner Motor you team your product with a partner that has the ability to take on a permanent job. You can depend on any Wagner Motor when properly applied, to be a faithful working partner.

Prof. R. E. Jamieson

University Notes

by T. H. Matthews

Four important appointments by the Board of Governors have been announced by Dr. F. Cyril James, principal and vice-chancellor.

Prof. Robert E. Jamieson, O.B.E., William Scott Professor of Civil Engineering and chairman of the department of Civil Engineering, has been appointed Dean of the Faculty of Engineering. He succeeds Prof. John J. O'Neill, who has also been acting as vice-principal and is retiring.

Dr. J. S. Foster, Macdonald Professor of Physics and Director of the Radiation Laboratory, has been named Chairman of the Department of Physics to succeed Dr. A. Norman Shaw, who is also retiring.

Dr. G. I. Duthie, Molson Professor of English Language and Literature, has been named Chairman of the Department of English Language and Literature to succeed Dr. H. G. Files, who continues as Greenshields Professor of English Literature.

Dr. T. H. Clark, Logan Professor of Paleontology, has been named Chairman of the Department of Geology.

Professor Jamieson has been on the staff of the university since 1919. A native of Ottawa and a graduate of Lisgar Collegiate, he received his B.Sc. degree in engineering in 1914. After service overseas with the 11th Canadian Siege Battery, he returned to McGill and was awarded his master's degree and appointed a lecturer in civil engineering in 1920.

He was named assistant professor in 1928 and associate professor the following year and William Scott professor in 1932. During the Second World War, he was called to Ottawa to serve as director-general of the Army Engineering Design Branch in the Department of Munitions and Supply, for which services he was awarded the O.B.E.

Honours

Dr. N. W. Philpott has received an honorary degree from Laval University.

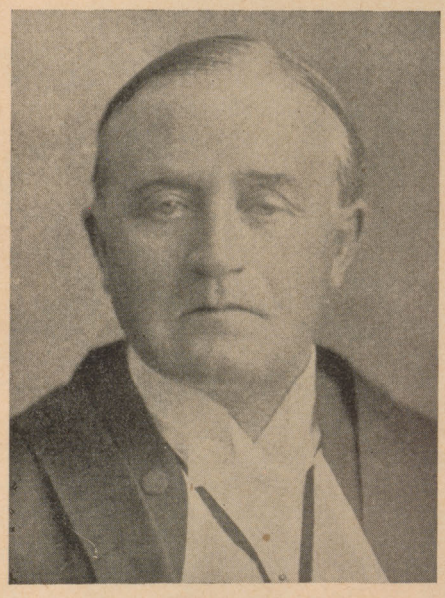

Dr. D. L. Thomson, Dean of the Faculty of Graduate Studies and Research, is to receive an honorary degree from Aberdeen University, his alma mater, in July.

The Principal, Dr. James, recently received the B'nai B'rith Humanitarian Award for 1952.

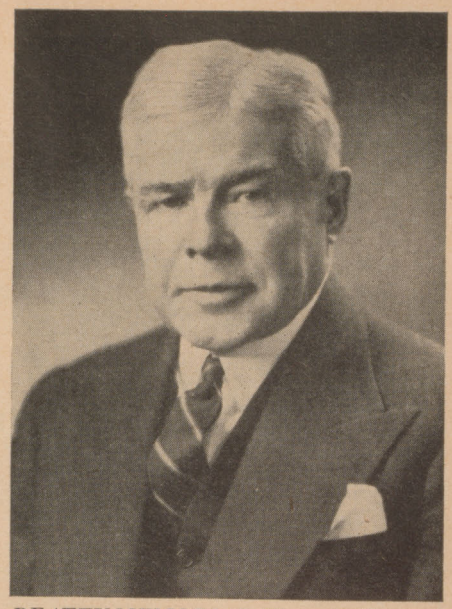

Dr. E. W. Steacie (B.Sc. '23, Ph.D. '26), F.R.S., has been appointed President of the National Research Council of Canada.

Comings and Goings

Dean J. J. O'Neill, Dr. A. N. Shaw, Professor Gordon Sproule, Professor C. V. Christie, and Professor R. deL. French are all retiring from their teaching duties this session and have been guests at many pleasant farewell parties.

SCHOLARSHIPS GIVEN: *A $60,000 endowment to provide scholarships in the law faculty to be known as the Chief Justice R. A. E. Greenshields Memorial Scholarships has been bequeathed to the university by the late Mrs. Maude A. Greenshields. The late chief justice was dean of the faculty for many years until his death in 1929.*

BEATTY MEMORIAL: *Through a $100,000 memorial to the chancellor of McGill from 1920 to 1943, the university will bring distinguished scholars and scientists from United States, England and the Continent to lecture here. The Sir Edward Beatty Memorial Lectures have been founded by a donation from Dr. Henry A. Beatty, a brother of the late chancellor.*

Professor F. M. Watkins, R. B. Angus Professor of Political Science and Warden of Douglas Hall, is leaving McGill to take a professorship at Yale University.

Professor Carleton Craig, who has been for three years the superintendent of the Valcartier Canadian Armaments Research Station, is returning to full-time duty in the Faculty of Engineering.

Dr. Walter deM. Scriver and Dr. Jessie Boyd Scriver recently flew 30,000 miles in a round-the-world trip going to and coming from the Commonwealth Medical Conference in Calcutta, where they represented the Canadian Medical Association.

Miss Marion Lindeburgh, O.B.E., who retired two years ago as Director of the School for Graduate Nurses, has left for a new home in British Columbia. Her portrait now hangs in Beatty Hall, where two farewell parties, organized by the alumnae and the students of the school, were given in her honour.

Visitors

Among the recent visitors to the University have been Dr. J. F. Mountford, the Vice-Chancellor of

Honorary Degree to T. H. Matthews

T. H. Matthews, registrar at the university and associate editor of *The McGill News* was given an honorary LL.D. degree by McMaster

T. H. Matthews

University at its convocation May 19.

Though as Registrar of the University, he has hooded hundreds himself, including Prime Minister St. Laurent and Winston Churchill, this was his first honorary degree.

Mr. Matthews is former secretary of the National Conference of Canadian Universities and McMaster was recognizing his work from 1948 to 1951 for that organization in conferring the honour upon him.

An Oxford graduate, Mr. Matthews came to McGill in 1920 as assistant professor in mathematics. Ten years later, he was appointed registrar. He has been a contributor of articles to many educational journals.

University Notes . . .

(*Continued from page 37*)

the University of Liverpool; Mr. B. L. Hallward, the Vice-Chancellor of the University of Nottingham; and Mr. W. M. Robb, the Registrar of New England University-College, New South Wales. Another visitor has been Dr. Vilhjalmur, the explorer, who lectured here to the Arctic Associates.

Talks to Local High Schools

The Registrar of the University and Miss Virginia Cameron, Assistant Registrar, have visited a number of local high schools and spoken to the graduating classes about McGill University. This is an annual practice which helps to secure good liaison between the Schools and the University.

Unexpected Free Entertainment

Each year the staff responsible for Convocation visits the Forum to discuss arrangements in case of bad weather. Last year the Forum was being prepared for a circus and while we were there we saw the high-trapeze artiste superintending the erection of her terrifying apparatus. This year we watched members of the Hollywood Ice Revue at practice. The Forum is always most co-operative and this year they benefited from the free show because at least two of the party bought tickets.

The Campus in Springtime

The University grounds, which are under the care of Professor R. D. Gibbs, the University Gardenmaster, are at present looking very green and attractive. *The News* hopes to have, in a subsequent issue, a story of the grounds and their more important vegetable inhabitants.

GOLD MEDAL MEMORIAL: *The Ernest Brown Gold Medal has been established at McGill to commemorate the late Dean Brown's services to the university. The medal will be awarded for "the highest ability throughout the undergraduate course in engineering." Dean Brown died in 1949 at the age of 71. He had retired in 1942 after being with the engineering faculty for 42 years, the last 12 as dean.*

RIDLEY COLLEGE
FOR BOYS

Ridley College for boys 8 to 18 offers high academic standards with the advantages of supervised residential life in modern buildings. Special attention is given to physical development and character building. A modern gymnasium, artificial ice rink and over 50 acres of playing fields provide year round recreational facilities.

Generous entrance scholarships and bursaries are available. For information and illustrated prospectus write the Headmaster, J. R. Hamilton, B.A., LL.D.

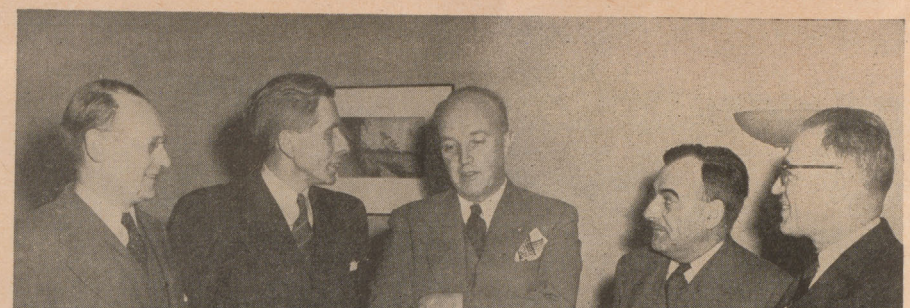

Applications are now being entertained for boys who will be ready to enter Ridley College in 1952 and later years. Fall term opens Sept. 9, 1952.

***McGILL** and University of Montreal will play host next year to one of the most important gatherings of distinguished scientists ever to meet in Canada — the 19th International Physiological Congress—from Aug. 31 to Sept. 4, 1953. Dr. C. H. Best, of Toronto, has said it will mark "Canada's coming of age from a scientific point of view." Shown left to right at a plans meeting for the congress are: Dr. F. C. MacIntosh, McGill, chairman of the local committee; Dr. G. Lyman Duff, Dean of the Faculty of Medicine; Dr. C. H. Best, Toronto, president of the congress; Dr. Wilbrod Bonin, Dean of Medicine, University of Montreal; Dr. D. Marion, University of Montreal.*

Josh Booth . . .

(*Continued from page 17*)

from 6 a.m. to 5.30 p.m. weekdays and from 6 a.m. to 12.30 on Saturdays. For this he was paid the equivalent of $2.50 a week.

"My rise was pretty rapid," says Josh. "When I were 18 I had a pair of cotton mules of my own in the mill. I were then paid $8.00 a week. When I were 27 I got $12.00 a week — that were top money for a spinner.

"When I were 32 my son were six and ready to start school. I were determined the son weren't going into a cotton mill so me and the wife planned to go to Canada," he relates.

Soon after arriving in Canada on November 17, 1912, Josh got a job as an electrician's helper in a cement factory. "Three years later the plant burned down and I got a job in a shoe factory as a watchman. On this job I had to look after a steam boiler. 'Ere, you might say, I got my first training for McGill.

"In the cement factory I got 22 cents an hour. Some weeks I worked as much as 100 hours. I were determined the son would get an education," he says.

His son, Leonard, took a five-year course in architecture at McGill after winning a scholarship in public school that paid for his fees for four years in high school. At McGill he won the Anglin-Norcross prize. He has built up a very successful private architecture business.

Leonard built a comfortable duplex in the Town of Mount Royal, one half of which he planned specially for Josh and Mrs. Josh. And that's about all Josh has been willing to take from his son.

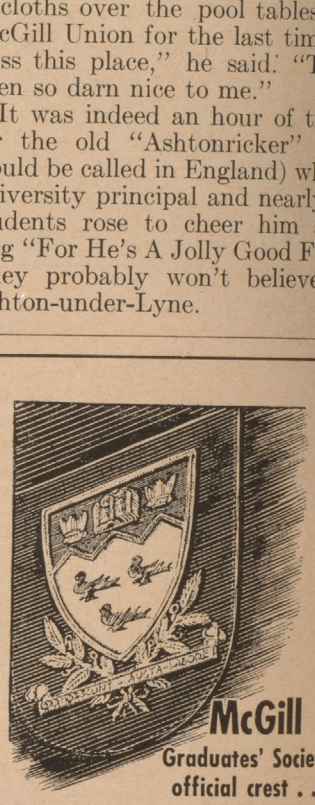

"If I had a buck," says Josh, "I'd buy a package of tobacco and 90 cents went for the son. The wife helped on odd jobs, like 'ouse cleanin'. The wife always said it hurt the son, but I took nothin' off 'im after he graduated. The son says I'm the most independent man in the world. But if I'd got money from 'im I'd only 'ave squandered it."

Josh is proud of the fact that *Time* magazine carried his picture and a story about him in its edition of March 24 of this year. This story revealed for the first time that Josh's wife got some unexpected news this spring. She had inherited $18,[illegible] from an uncle who died recently Cornwall.

"It comes late in life," says Jo "but we'll enjoy it." After a br rest at Old Orchard Beach, Josh a Mrs. Josh sail for England July 16 make their first return to their hom land. "We'll 'ave a little 'oliday Penzance, near Land's End. Th we'll 'ole up in Edinburgh for awhi From there we'll go to Ashton-unde Lyne to seek some of my old friend Also we'll visit Blackpool and t Isle of Man. We'll return to Cana October 2. In the Town of Mou Royal I'll join a pensioners' club a talk about old times and pl checkers and wot 'ave ye."

Tears rolled down Josh's rudd plump face as he pulled the bla oilcloths over the pool tables in t McGill Union for the last time. "I miss this place," he said. "They' been so darn nice to me."

It was indeed an hour of triump for the old "Ashtonricker" (as would be called in England) when th university principal and nearly 1,00 students rose to cheer him and sing "For He's A Jolly Good Fellow They probably won't believe it Ashton-under-Lyne.

PEOPLE IN THE NEWS

This is the third of a series of articles about McGill men who are taking a prominent part in our economic, political and social life

The tremendous growth of air transport in Canada in the past 15 years is reflected in the expansion of Trans-Canada Air Lines from an airline flying 2,000 passengers over 122 route miles between Vancouver and Seattle in 1937, to a major world air carrier in 1951 flying 980,000 passengers over 17,000 miles of routes serving 45 communities in Canada and abroad. Last year was the most successful in the history of TCA, as the airline recorded a financial surplus of $3,890,957 and flew 25,000,000 miles.

G. R. McGregor

A fleet of 23 North Stars and 27 DC-3 aircraft is the backbone of TCA's North American and overseas services. The pressurized four-engine North Stars provide five daily transcontinental services and are flown on TCA's service to major United States centres. They also fly to the United Kingdom, France, Bermuda, The Bahamas, Jamaica, Barbados and Trinidad. The sturdy twin-engine DC-3 aircraft link many Canadian communities with frequent intercity service.

Piloting the company in the role of a major airline is a McGill man. Gordon R. McGregor, O.B.E., D.F.C., the first combat flier of World War II to become president of an airline. He joined TCA in 1945 as general traffic manager and was appointed to the presidency two years later, after being acclaimed for his notable contribution to the study of air traffic problems posed by the post-war expansion of the air transport industry.

In October, 1949, he was elected member of the executive committee of the International Air Transport Association. This appointment was in recognition of his activities as the chairman of several IATA conferences which successfully dealt with world and western hemisphere air transport problems.

Born in 1901 at Montreal, he is the son of Dr. and Mrs. T. D. McGregor. He was educated at High School of Montreal and St. Andrew's, Toronto. At McGill he took an active part in sports, particularly inter-faculty football. In 1921, he married Alexandra May Ramsay.

In addition to his knowledge of aviation, the Montreal-born and McGill-educated airline president gained wide experience in the commercial and engineering field with the Bell Telephone Company of Canada. He served with this company from 1923 to 1939, leaving the position of district manager at Montreal to become a fighter pilot during the Battle of Britain.

Still an ardent weekend flying enthusiast, he holds the distinction of having won the Webster Trophy three times in pre-war days, and continues to fly with Montreal's 401 Auxiliary Squadron whenever the pressure of his position permits.

'10

Ryley, A. St. C., B.Sc. '10, has been appointed vice-president of the Canadian Bridge Co. Ltd., Walkerville, Ont.

'11

Falconer, Ernest H., M.D. '11, regional vice-president of the Society for the western U.S., is an honorary president of The Robert Jones Club of London, Eng., ace society of the orthopedists. With Dr. Abbott of the University of California he is going to London in June to participate in a meeting of the club. A side trip to Scotland is to be included in their itinerary.

'14

Robertson, Randal K., B.Sc. '14, has been elected a director and vice-president of the Laprairie Co. Inc., Montreal.

'17

Cunningham, H. S., B.S.A. '17, M.S.A. '24, is presently Professor of Plant Pathology, Cornell University, in charge of plant disease investigations at the Long Island Vegetable Research Farm, Riverhead, N.Y.

Weldon, R. L., B.Sc. '17, M.Sc. '20, has been awarded the Julian C. Smith Medal "for achievement in the development of Canada", by the Engineering Institute of Canada. He is president and managing director of the Bathurst Power and Paper Co. Ltd. and its subsidiaries.

'20

Hobart, G. M., B.Sc. '20, has been elected a director of the Montreal Trust Co.

Hodgins, Norris, B.S.A. '20, B.A. '27, M.A. '29, of Ottawa, has recently had a book published entitled "The Parsleys and the Sage". The book is not a scientific treatise but a book of humour based upon a series of newspaper articles written for the Ottawa *Evening Citizen.*

Ness, John Earle, B.S.A. '20, has been named chairman of the Canadian National Live Stock Records, the first Macdonald College graduate ever to hold this position.

Wilson, E. P., B.Sc. '20, has been appointed vice-president in charge of kraft and board divisions of St. Lawrence Corporation Ltd.

'22

Fluhmann, C. Fred, M.D. '22, has written a book, "The Medical Treatment of Obstetrics and Gynecology", which is listed amongst the 20 best sellers at Stacey's in San Francisco. He is presently working on another book, not yet titled.

'23

Fraser, W. Allan, M.D. '23, has becom medical consultant for the British Colum bia Hospital Insurance Service. A spe cialist in neurology, Dr. Fraser has had private practice in Victoria since 1926.

Gordon, H. C. M., B.Sc. '23, has beer appointed vice-president of Dominion Coal Co. Ltd., Sydney, N.S.

'24

Campbell, Alexander, B.Sc. '24, M.Sc '26, has been appointed vice-president and manager, Western Division of the Dominion Bridge Co. Ltd.

Munro, Gordon H., B.Sc. '24, was elected president of the Ontario Retail Lumber Dealers' Association at their 35th annual convention held in Toronto in March.

Tombs, Laurence C., B.A. '24, M.A. '26, D.Sc.P. (Geneva '36), as vice-president American Society of Travel Agents, attended its board meeting held in Honolulu and addressed transportation and travel groups in Vancouver, Seattle and San Francisco.

'25

Abbott, A. C., B.Sc. '25, has been appointed vice-president, distribution, of Shawinigan Water and Power Co.

Anson, C. M., B.Sc. '25, has been appointed vice-president of Dominion Iron and Steel Limited, Sydney, N.S.

Angell, Herbert Raleigh, O.B.E., B.S.A. '25, M.S., Ph.D. is principal research officer, Division of Plant Industry, Commonwealth Scientific and Industrial Research Organization, Canberra, Australia.

'27

Winsor, R. B., B.Sc. '27, has been appointed chief engineer of Canadian Industries Ltd.

'28

Bynoe, Evan T., B.S.A. '28, Ph.D. '35, has been appointed officer-in-charge, Bacteriology Section, Laboratory of Hygiene, Department of National Health and Welfare.

Fulton, F. F., B.Sc. '28, has been appointed assistant to the president in charge of sales of the Northern Electric Co. Ltd. He will be the company representative responsible for negotiating all special contracts for the Department of Defence Production in Ottawa, on behalf of all of Northern Electric's divisions.

Garland, Rev. Sidney G., B.A. '28, M.A. '29, was featured in *The Knickerbocker News,* Albany, N.Y., in April, as Clergyman of the Week. Mr. Garland, who is pastor of West End Presbyterian Church, where he has been for three years, previously was at Rosemount Central United Church in Montreal, and before that spent 10 years as Chaplain and Dean of the United Church College in St. John's, Newfoundland.

AVOID *the* HIGH COST *of* INEXPERIENCE

For over forty years, National Trust has been acquiring the experience necessary for the successful administration of estates, both large and small. Up-to-date knowledge of succession duty, income tax and investment problems ensure efficient settlement of these highly technical phases of estate management.

We should like to answer your inquiries about our services as executor.

Dr. M. M. (MAX) MacODRUM, M.A. '24 (right), president of Carleton College and honorary vice-president of the Ottawa Valley Graduates' Society of McGill University, is shown here at the annual meeting with Alonzo J. Klock, B.A. (Sci.) '92.

Michael, Paul, M.D. '28, is a state board director of the American Cancer Association as well as a member of the State Cancer Commission. In addition he is a member of the Executive Committee of the American Society of Clinical Pathology.

'30

Peers, Robert S., M.D. '30, is vice-president of the Arthritis and Rheumatism Foundation as well as current president of the staff at Providence Hospital in Oakland, Calif.

'31

Healy, C. Ross, B.S.A. '31, has achieved that dream of most business men, "A little place up North" where the water is clear and the fishing is good. He and his wife, Elsie M. Nish, B.H.S. '30, have gone into the hotel business and operate a resort for sportsmen and vacationers at Lake St. Peter, Hastings County, Ont.

'33

Armstrong, John E., B.Eng. '33, has been made engineer of track of the Canadian Pacific Railway. He will be responsible for dealing with track and roadway standards, clearance of equipment and oversize loads.

Beeson, Paul B., M.D. '33, is now at Yale University where he has been appointed Chairman of the Department of Medicine. He will also be Physician-in-Chief of the University Service in the Grace-New Haven Community Hospital.

'34

Cooper, Charles E., M.D. '34, has brought distinction to himself, his profession and the Northern California branch of the Graduates' Society by winning the dry fly casting competition in Golden Gate Park, San Francisco.

'35

McLeish, John A. B., B.A. '35, M.A. '48, was awarded the degree of Ph.D. by Cornell University last September, and is now Assistant Professor of Education at the University of British Columbia.

McLernon, R. R., B.Com. '35, has been elected a director of Anglin-Norcross Corp. Ltd.

'36

Garron, Lee, M.D. '36, in addition to carrying on his practice in ophthalmology in Oakland, Calif., is a lecturer in Eye Pathology at the University of California.

Sbarbaro, Victor, M.D. '36, is vice-president of the Mutual Business Club of Oakland, Calif.

'37

Bradley, Wesley H., B.C.L. '37, has been re-elected for a third term as alderman of the City of Sherbrooke.

Duff, C. Alex, B.Sc. '37, has been elected to the board of directors of the Henry Morgan & Co. Ltd. He is store operations Manager.

Katz, Sydney, Ph.D. '37, has been appointed Research Physical Chemist at Armour Research Foundation of Illinois Institute of Technology.

'38

Bagnell, Lt.-Col. William S., M.D. '38, was recently appointed Assistant Chief of Medical Service at the Tokyo Army Hospital. Besides his regular duties he is engaged in a project which it is hoped will ultimately raise Japanese health standards. Under U.S. Army Medical Corps supervision, Japanese internes are being trained at Army Hospitals for three months to learn new methods and treatments.

Etziony, Mordecai B., B.A. '28, M.A. '31, M.D. '38, on the staff of the Jewish General Hospital, has been elected a corresponding member of the Israeli Society of the History of Medicine and Science in recognition of his contributions in the field of the History of Hebrew medicine.

'39

Hall, John H., B.Eng. '39, is now chief engineer of the gigantic Sindri development programme in India. To quote *The American Reporter* published in India: "When the final story of Sindri that holds

Kilroy, Dan, M.D. '39, is the newly elected president of the Sacramento Society for Medical Improvement.

Simpson, Edmond E., M.D. '39, is one of the founders of the Medical Clinic of Sacramento, Calif., which is a group of several specialists in diseases of the skin and eye, general surgery, obstetrics and gynecology.

Udow, Alfred B., B.A. '39, M.Sc. '40, has joined the advertising agency of Monroe F. Dreher Inc., in New York as a partner. He will be director of media and research.

'40

Abbey, Sydney, B.Eng. '40, has resigned as chief chemist, Dominion Magnesium Ltd., Haley, Ont , and is now chemist with the Geological Survey of Canada, Department of Mines and Technical Surveys, at Ottawa.

Pick, Alfred J., B.A. '36, M.A., '37, B.C.L. '40, has been appointed special assistant to the Hon. Lester B. Pearson in the Department of External Affairs.

Salvadorini, V. A., M.D. '40, is now pathologist for the Wahoe County Hospital in Reno, Nevada.

Toreson, Wilfred, M.D. '40, is an instructor in pathology at the University of California.

'42

Guadagni, N. P., B.A. '38, M.D. '42, is assisting Frank Murphy, M.D. '25, in anesthesia at the University of California.

Jamieson, Richard B., M.D. '42, has been promoted to Assistant Professor at the State University College of Medicine of New York at Syracuse, N.Y.

Renshaw, Miss Rose, B.A. '42, who is in Paris studying Music at the College Franco-Britannique on a Provincial Post Graduate Scholarship, has been awarded the Canadian Federation of University Women scholarship which will enable her to continue her work for a second year. She composed incidental music for a recent production of "She Stoops to Conquer" by the "English Players" of the College, and some of her songs and piano music were performed at a concert in Germany in April.

West, K. A., Ph.D. '42, has gone to Sarnia, Ont., where he has been appointed processing superintendent of a new refinery of The Canadian Oil Company.

Coldwell, B. B., B.Sc. (Agr.) '42, Ph.D., '51, has been appointed chemist in charge of Scientific Research, Crime Detection Laboratory, R.C.M.P.

MARY B. JACKSON, B.Eng. '46, the fi woman to graduate with an engineering degr from McGill, is now a pilot officer at Traini Command Headquarters, R.C.A.F. Statio Trenton, Ont., doing statistical work connect with the training of ground crews. Mr Jackson grew up around aircraft for h father is Chief Inspector of Aircraft for t Department of Transport.

'43

Breeden, Brewster C., M.D. '43, is hea of the Department of Internal Medicin of the Atomic Bomb Casualty Com mission, National Academy of Science in Hiroshima, engaged in a study of th late effects of radiation on the survivor of the atomic blast.

Weisz, Paul B., B.Sc. '43, M.Sc. '44, Ph.D '46, has been promoted to Associat Professor in the Biology Department a Brown University. He is known for hi research on nuclear and cytoplasmi relations in cells.

'44

Miller, Hugh C., B.S.C. (Agr.) '44, i executive chairman, Yallaha Valley Lan Authority.

'47

Coleman, Charles, M.D. '47, is engaged in the surgical residency training programme at Highland Hospital in Oakland, Calif., and is on rotation to Merritt Hospital there.

Holmes, Mrs. A. F. (Anne Elizabeth Knopfler), B.Com. '47, last January was awarded the degree of Licenciate in Accountancy by McGill and on March 15 was admitted to membership in the Quebec Institute of Chartered Accountants.

Holmes, A. F., B.A. '47, M.A. '49, has accepted a position with the R.C.A.F. Training Command at Trenton, as a "Test Specialist".

'48

Badgley, Peter Coles, B.Sc. '48, has been awarded a Ph.D. in Geology by Princeton University.

Van Patter, H. Terry, M.D. '49, has been awarded the Canadian Cancer Society's $8,000 Blair Memorial Fellowship for 1952-54. He will spend two years at leading U.S. and British cancer centres.

Births

Archibald: At Albuquerque, New Mexico, on Dec. 12, 1951, to John S. Archibald, M.D. '42, and Mrs. Archibald, a son.

Barry: At Shawinigan Falls, Que., on Nov. 19, 1951, to A. Barry, B.Eng. '50, and Mrs. Barry, a daughter, Martha Elizabeth.

Barwick: At Montreal, on Feb. 10, 1952, to Donald C. Barwick, B.Com. '50, and Mrs. Barwick, a son.

Baynton: At Montreal, on Feb. 21, 1952, to H. W. Baynton and Mrs. Baynton (Lorraine Crowdy, B.A. '41), a daughter, Jane.

Bercovitch: At Deep River, Ont., on Apr. 2, 1952, to Mortimer Bercovitch, B.Sc. '46, M.Sc. '47, and Mrs. Bercovitch, a daughter.

Black: At Berlin, Germany, on Mar. 20, 1952, to Eldon P. Black, B.C.L. '49, and Mrs. Black (Francine Welter, B.A. '47), a daughter.

Blaustein: At New York, on Feb. 11, 1952, to Ancel Blaustein, M.D. '45, and Rita Blaustein (Rita Leff, M.D. '48), a daughter, Jeannette.

Blitstein: At Montreal, on Feb. 21, 1952, to Harry Blitstein, B.Com. '46, and Mrs. Blitstein, a son.

Breeden: At Kure, Japan, on Feb. 12, 1952, to Brewster C. Breeden, M.D. '43, and Mrs. Breeden, a daughter, Martha Gail.

Brown: At Montreal, on Jan. 16, 1952, to Paul J. Brown, B.C.L. '51, and Mrs. Brown, a daughter.

Butt: At Montreal, on Feb. 25, 1952, to W. F. Butt, B.Eng. '51, and Mrs. Butt, a son.

Campbell: At Montreal, on Jan. 7, 1952, to J. Barrie Campbell, B.C.L. '50, and Mrs. Campbell (Harriet Anderson, B.Sc. '47), a daughter.

Carroll: At Montreal, on Feb. 23, 1952, to Thomas E. Dionne Carroll, B.Sc. '48, and Mrs. Carroll, a son.

Cayford: At Montreal, on Feb. 25, 1952, to Ralph Cayford and Mrs. Cayford (Elizabeth Lytle, B.A. '45), a daughter.

Chenoweth: At Montreal, on Jan. 8, 1952, to D. M. Chenoweth, B.A. '38, and Mrs. Chenoweth, a son.

Davis: At Ottawa, on Mar. 7, 1952, to Henry F. Davis, B.C.L. '35, and Mrs. Davis (Susan O'Reilley, B.A. '42), a son.

Davis: At Montreal, on Mar. 28, 1952, to James L. Davis, B.A. '37, and Mrs. Davis, a son.

Doehler: At Montreal, on Jan. 20, 1952, to R. J. Doehler, B.Eng. '40, and Mrs. Doehler, a son.

Epstein: At Athens, Greece, on Jan. 7, 1952, to Jacques Epstein and Mrs. Epstein (Edythe C. C. Cox, B.A. '38), a daughter.

Falkins: At Vancouver, on Mar. 24, 1952, to Gordon Omer Falkins and Mrs. Falkins (Jessie M. Baxter, B.A. '39), a son.

Fergusson: At Montreal, on May 11, 1951, to John R. Fergusson, B.C.L. '48, and Mrs. Fergusson (Agnes M. Ferencz, B.A. '42, M.A. '45), a son.

Finley: At Montreal, on Mar. 20, 1952, to E. G. Finley, B.Com. '48, and Mrs. Finley (Rae Hunter, B.A. '47), a daughter, Barbara Rae.

Fitzpatrick: At Saint John, N.B., on Feb. 22, 1952, to J. Gerald Fitzpatrick, B.Sc. '44, and Mrs. Fitzpatrick, a son.

Frankel: At Montreal, on Jan. 31, 1952, to J. Frankel, B.Eng. '46, and Mrs. Frankel, a son.

QUEBEC DOCTORS NAME OFFICERS: *New officers of the Quebec division of the Canadian Medical Association have been named. Shown left to right, are: Dr. G. W. Halpenny, M.D. '34, Montreal, honorary president; Dr. R. Vance Ward, M.D. '24, Montreal, president; Dr. H. Q. Church, M.D. '17, Aylmer, Que., president of the Canadian Medical Association, and Dr. W. deM. Scriver, M.D. '21, Montreal, chairman of the Quebec division executive.*

Friedman: At Manchester, England, on Nov. 5, 1951, to Martin J. Friedman, B.Eng. '50, and Mrs. Friedman, a son.

Fuentes: At Montreal, on Feb. 12, 1952, to Alberto Fuentes, B.A. '51, and Mrs. Fuentes (Shirley Knight, B.A. '50), a son.

Guadagni: At San Francisco, on Jan. 20, 1952, to Neri P. Guadagni, M.D. '42, and Mrs. Guadagni, a son.

Hampson: At Montreal, on Mar. 10, 1952, to L. G. Hampson, M.D. '49, and Mrs. Hampson, a daughter.

Hardman: At Quebec, on Jan. 15, 1952, to J. G. Hardman, M.D. '43, and Mrs. Hardman (Anne Perry, B.Sc. '42), a son.

Henry: At Montreal, on Mar. 1, 1952, to Ross A. C. Henry, B.C.L. '49, and Mrs. Henry, a son.

Hersey: At Montreal, on Jan. 18, 1952, to E. Peter Hersey, B.Sc. '44, and Mrs. Hersey (Mary Creaghan, B.Sc. '46), a son.

Hill: At Noranda, Que., on Mar. 4, 1952, to Ross O. Hill, M.D. '48, and Mrs. Hill, a son.

Honeyman: At Montreal, on Jan. 9, 1952, to William Honeyman, B.Eng. '49, and Mrs. Honeyman, a daughter.

Hugill: At Montreal, on Mar. 31, 1952, to J. T. Hugill, Ph.D. '46, and Mrs. Hugill, a daughter.

Hyde: At Toronto, on Jan. 30, 1952, to Alexander G. Hyde, B.Eng. '49, and Mrs. Hyde (Grace Jones, B.A. '45), a daughter.

Iversen: At Montreal, on Mar. 10, 1952, to James E. Iversen, B.A. '49, M.A. '51, and Mrs. Iversen, a son.

Kerrigan: At Montreal, on Mar. 19, 1952, to John V. Kerrigan, B.Com. '37, and Mrs. Kerrigan, a daughter.

Lazare: At Montreal, on Feb. 15, 1952, to J. R. Lazare and Mrs. Lazare (Marilyn Ann Block, B.A. '49), a son.

Levine: At Montreal, on Jan. 17, 1952, to Robert M. Levine, M.D. '42, and Mrs. Levine, a daughter.

Lewis: At Montreal, on Jan. 2, 1952, to John F. Lewis, B.Com. '36, and Mrs. Lewis (Ruth Edmison, B.A. '37), a daughter.

Lowe: At Montreal, on Mar. 30, 1952, to Stanley C. Lowe, B.Eng. '43, and Mrs. Lowe (Phyllis Buckingham, B.A. '41, B.L.S. '48), a son, Christopher.

Macdonnell: At Montreal, on Mar. 25, 1952, to G. M. Macdonnell and Mrs. Macdonnell (Christine Pentland, B.L.S. '43), a daughter.

Macfarlane: At Arvida, Que., on Mar. 10, 1952, to Norman F. Macfarlane, B.Eng. '49, and Mrs. Macfarlane, a daughter.

Mackenzie: At Montreal, on Mar. 8, 1952, to Malcolm Mackenzie, M.D. '42, and Mrs. Mackenzie (Margery Gaunt, B.A. '41), a daughter.

Maguire: At Montreal, on Jan. 9, 1952, to Gerald Maguire, B.Sc. '50, and Mrs. Maguire, a son.

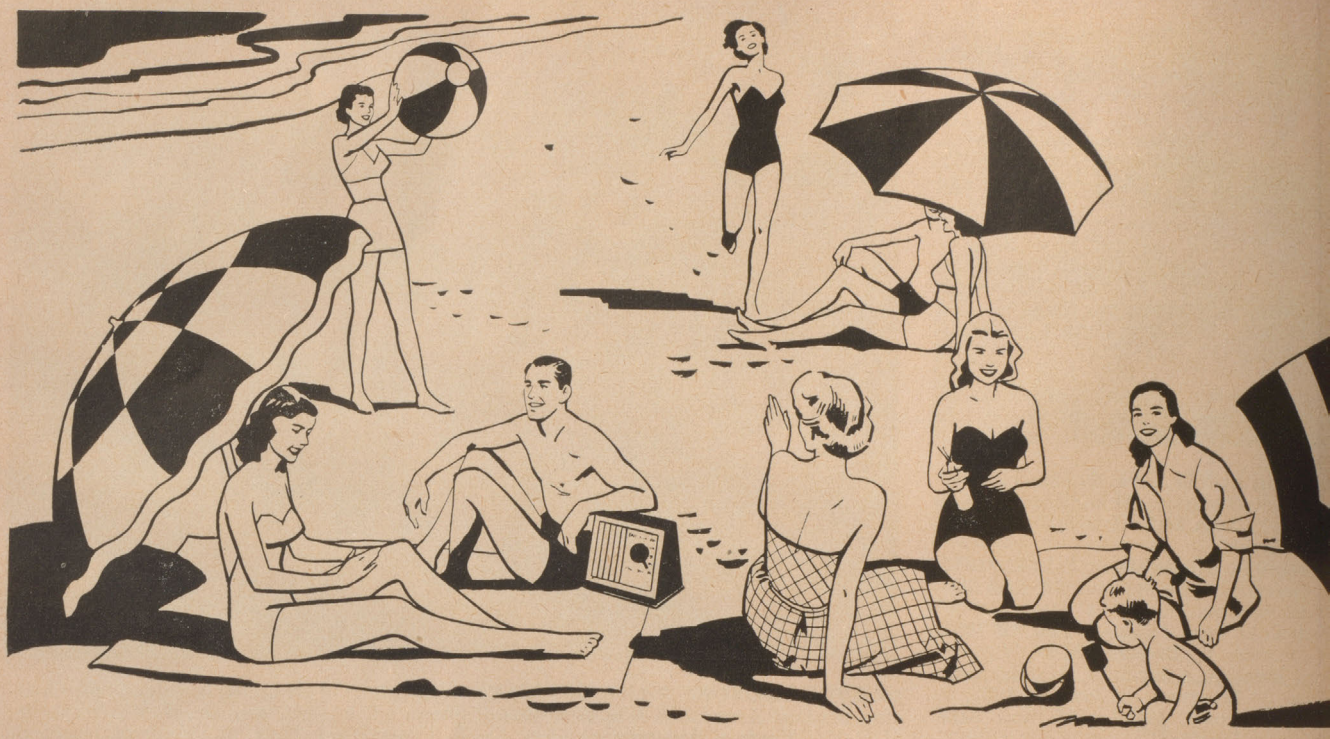

Marshall: At Toronto, on Nov. 15, 1951, to Robert W. Marshall, B.A. '51, and Mrs. Marshall, a daughter.

McCarthy: At Pembroke, Ont., on Nov. 14, 1951, to P. J. McCarthy and Mrs. McCarthy (Betty Brennan, B.Com. '42), a daughter.

McQuillan: At Montreal, on Jan. 16, 1952, to William J. McQuillan, B.C.L. '34, and Mrs. McQuillan, a son.

VACATION TIME . . .

Go East

for the PERFECT HOLIDAY!

Canadian Pacific's Atlantic Coast resorts make a perfect headquarters for your holiday activities. Take your choice of three famous hotels . . . New Brunswick's Algonquin and Nova Scotia's Digby Pines and Lakeside Inn . . . each one ideal for a sun-filled vacation down East. You can get there easily . . . quickly . . . by Canadian Pacific's air-conditioned trains.

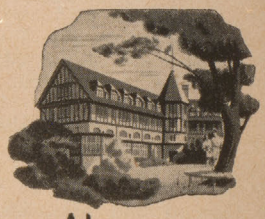

LAKESIDE INN

Yarmouth, N.S.
Open June 28 to Sept. 7

A charming seaside resort . . . restful rooms . . . first class cooking . . . fishing . . . sightseeing.

Low round-trip rail fares.
Information and reservations from any Canadian Pacific agent or write hotel managers.

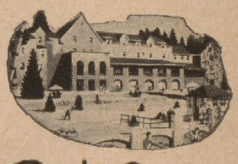

Canadian Pacific

THE Algonquin

St. Andrews by-the-sea, N.B.
Open June 19 to Sept. 13

Swimming in the beautiful setting of Katy's Cove . . . 18-hole championship Golf course . . . tennis . . . dancing . . . riding.

Digby Pines

Digby, N.S.
Open June 10 to Sept. 8

Excellent hotel accommodation or private cottages in a lovely wood-land setting. Golf . . . fishing . . . swimming in a warmed sea-water pool.

DR. A. STANFORD REID, *associate professor of history at the university, has been named warden of Douglas Hall. Educated at Westmount High, Dr. Reid entered McGill with a brilliant scholastic record and, after receiving his B.A. and M.A. degrees, he was awarded his Bachelor's and Master's degrees in theology at Westminster Theological Seminary and his Ph.D. at University of Pennsylvania.*

Births . . .

(*Continued from page 45*)

Meyer: At Montreal, on Feb. 9, 1952, to Richard L. Meyer, Com. '49, and Mrs. Meyer, a daughter, Heather Joan.

Moore: At Montreal, on Jan. 14, 1952, to F. T. Moore and Mrs. Moore (Nancy Taylor, B.A. '44), a daughter.

Newton: At Montreal, on Mar. 24, 1952, to Eric N. Newton and Mrs. Newton (Monica Furniss, B.A. '46), a daughter.

Ostiguy: At Montreal, on Mar. 24, 1952, to Pierre Ostiguy, B.Eng. '49, and Mrs. Ostiguy, a son.

Outhet: At Ottawa, on Feb. 5, 1952, to Murray Outhet, B.Sc./Agr. '50, and Mrs. Outhet (Harriet Mitchell, B.A. '42), a son, Andrew Mitchell.

Postans: At Montreal, on Mar. 13, 1952, to Thomas Postans, D.D.S. '49, and Mrs. Postans, a son.

Reekie: At Montreal, on Apr. 8, 1952, to C. Douglas Reekie, and Mrs. Reekie (Lorna Bridge, Physio '47), a daughter.

Richards: At Montreal, on Mar. 7, 1952, to Wendell Bond Richards, B.Sc. '48, and Mrs. Richards, a son.

Robb: At Montreal, on Feb. 12, 1952, to J. Preston Robb, M.D. '39, and Mrs. Robb, a son.

Rossi: At Montreal, on Jan. 22, 1952, to Ernest J. Rossi, B.Eng. '47, and Mrs. Rossi, a daughter.

Rounthwaite: At Montreal, on Jan. 27, 1952, to Harry L. Rounthwaite, M.D. '49, and Mrs. Rounthwaite, a son.

Runciman: At Dallas, Texas, on Feb. 22, 1952, to Walter A. Runciman, B.Sc. '50, and Mrs. Runciman, a son.

Salkeld: At Montreal, on Nov. 13, 1951, to Lloyd R. Salkeld, B.Eng. '50, and Mrs. Salkeld, a daughter.

Sare: At Montreal, on Apr. 9, 1952, to James R. Sare, B.A. '35, and Mrs. Sare, a daughter.

Schacter: At Montreal, on Feb. 3, 1952, to Samuel Norman Schacter, B.A. '30, and Mrs. Schacter, a son.

Seton: At Montreal, on Jan. 26, 1952, to Leonard A. Seton, B.C.L. '42, and Mrs. Seton (Phyllis Duthie, B.A. '43), a son.

Somerville: At Halifax, on Mar. 5, 1952, to T. A. Somerville, B.Eng. '48, and Mrs. Somerville, a daughter.

Sproule: At Sudbury, Ont., on Jan. 23, 1952, to W. Kelvin Sproule, B.Eng. '36, M.Sc. '37, and Mrs. Sproule (Phyllis Turner, B.A. '36), a son, Gordon Eric. Grandparents are Professor Gordon Sproule, M.Sc. '08, and Mrs. Sproule (Helen Freeze, B.A. '04).

Stedman: At Montreal, on Dec. 20, 1951, to R. W. Stedman, B.Sc. '45, and Mrs. Stedman, a son.

Stovel: At Val D'or, Que., on Mar. 8, 1952, to E. B. Stovel, B.Com. '37, and Mrs. Stovel (Dorothy Keay, B.A. '41), a daughter.

Sutherland: At Montreal, on Feb. 7, 1952, to Donald W. Sutherland, B.Com. '39, and Mrs. Sutherland, a daughter.

Thwing: At Montreal, on Dec. 28, 1951, to E. F. Thwing, Eng. '51, and Mrs. Thwing, a son.

Townsend: At Montreal, on Jan. 28, 1952, to Michael W. Townsend, B.Com. '47, and Mrs. Townsend, a son.

Walsh: At Montreal, on Feb. 20, 1952, to Cameron T. Walsh, D.D.S. '43, and Mrs. Walsh, a son.

Wayland: At Montreal, on Mar. 9, 1952, to Charles H. Wayland, B.C.L. '35, and Mrs. Wayland, a son.

Watson: At Lachine, on Jan. 6, 1952, to George M. Watson, B.Com. '47, and Mrs. Watson, a son.

Marriages

Bloomfield: At Fort Wayne, Indiana, on Mar. 16, 1952, Miss Caroline Lichtenberg and Dr. Morton W. Bloomfield, B.A. '34, M.A. '35.

Cairns-Dohan: At Montreal, recently, Miss Margaret Lelia (Marlee) Dohan, B.A. '45 and Arthur Clifton Cairns, M.D. '49.

Caplan-Kutzman: At Montreal, recently Miss Lois Helen Kutzman, B.Sc. '49, and Herbert Caplan, D.D.S. '50.

Cherney: At Montreal, recently, Miss Gloria Florence Lavene and Alexander Cherney, B.Sc. '49.

Cohen-Berman: At Montreal, on Apr, 1, 1952, Miss Evelyn Myra Berman, B.Sc. '46, and Louis Israel Cohen, B.Eng. '46.

Creasor: At Montreal, on Mar. 28, 1952, Miss Gisela von Eicken and John Creasor, B.Com. '51.

Eidinger-Grover: At Montreal, on June 8th, 1952, Miss Leona Grover, B.Sc. '51, and Mr. Martin Eidinger, B.Sc. '51.

Erdrich: At Montreal, on Mar. 15, 1952, Miss Nancy Sebag-Montefiore and Harry J. Erdrich B.C.L. '31.

Gareau-Macdonald: At Penticton, B.C., recently, Miss Virginia Kimball Macdonald, B.Sc. '50 and Paul Gareau, B.Sc. '49.

Hermann Walter, The Teacher; An Inheritance to Cherish

The recent death of Hermann Walter snapped one of the few remaining links that join the Old McGill and the New. Between the institution he found on his arrival early in the century and that of today there lie the trenches of two World Wars and the partially blasted soil of a period when the humanist studies he loved and served so well have flourished only against difficulties. The men who were his contemporaries have all, or nearly all, passed into the collective memory of those who still retain a mere foothold in that earlier age "before the War." And what characters they were: John Macnaughton, Paul Lafleur, Stephen Leacock, William Caldwell, Samuel Slack — these are but names to most of McGill's inmates nowadays but the Arts Faculty, for which they and Dr. Walter worked, was a place of rich and rewarding associations.

A freshman reporter, I attended the annual *Daily* banquet, to hear him as a guest speaker proclaim his faith in full student control over undergraduate activities and his impatience with those who would attempt to impose on them a precocious sedateness. I sat up and took notice, and so did others present, not all of them students. Later, though circumstances prevented my attending his ordinary academic courses, I read under and with him when, as a graduate student, I was trying to improve my control of German. Several years after that we went through some books of Goethe's *Dichtung and Wahrheit* together — an unforgettable experience. It was thus that I came to realize that under a sometimes impatient manner (he could not suffer fools gladly) Dr. Walter possessed, where the advancement of scholarship was concerned, an almost inexhaustible supply of forbearance and humour. Give him somebody anxious to learn and there were no pains he would not take so that the hungry sheep might be fed.

Though his career at McGill was devoted to the teaching of modern languages, and particularly German, his first love was Sanskrit. This was the field in which before coming to Canada he had won distinction. And I shall always recall with pleasure that the last lectures he delivered in a McGill class-room (only three years ago) were on Sanskrit. It happened that for the "Great Writings" course we needed a few talks on Ancient Aryan culture and literature; Dr. Walter volunteered his services. A good many years had elapsed since his official retirement, and the upright figure that had impressed generations of undergraduates was now somewhat bowed, but his eye was as bright as ever and the keenness of his

Dr. Hermann Walter

intellect seemingly unimpaired. Certain of his former pupils joined the class for the occasion. I think it must have been peculiarly gratifying to him to have for his valedictory such an audience, the old and new commingled.

Dr. Walter had a strong feeling for community life. Nobody could be imagined less like the traditional university professor of narrowed interests and fatuous "unworldliness"; happiness for him implied sharing his activities with others, as witness his work for the local Repertory Theatre and his public lectures on Scandinavian drama. Those who visited him in his summer home at St. Aubert could recognize how intimately he had found his way into the confidence and affections of his French-Canadian neighbours: "l'enfant illégitime de la paroisse", he loved to style himself. They owed much to his Swiss industry and love of the land, too. Apple culture and bee-keeping flourished under his hand; here, as at McGill, he was always ready to pass on his knowledge and skill.

In our large departments, with their huge classes and ever-mounting paper work, we no longer have an atmosphere where marked individuality is eagerly welcomed. Our communal feelings and academic loyalties are, it would seem, increasingly committed to abstractions rather than to men and groups of men. Less and less time is permitted for the kind of personal contact (and that sometimes meant friction, let us admit) which was once customary between teacher and learner, and between teacher and teacher. The kind of teaching Hermann Walter did, the enthusiasms he kindled and kept alive, belong to an inheritance we should cherish. He will not be forgotten.

A. S. N.

R. F. M. Fawcett, M.D. '99

Word has been received of the death in April 1951, in Toddington, Bedfordshire, England, of Lt.-Col. R. F. M. Fawcett, D.S.O., Medicine 1899, distinguished soldier, doctor and countryman.

Dr. Fawcett followed a family tradition in achieving a distinguished service career, for he was a son of a Colonel and the grandson of an Admiral. He volunteered for the South African War and served in Natal, the Transvaal, and Cape Colony. Later he was a year in India and the first World War saw him in action in France, where he gained the D.S.O. and was twice mentioned in despatches.

Always a keen horseman, he used, at one time, to ride on horseback to visit his patients and even in recent years he used the horse when called out on foggy nights.

He is survived by his widow, one son and a daughter. It is interesting to note that Dr. Fawcett and his wife were both Justices of the Peace at the same time.

CANADIAN NATIONAL RAILWAYS

Happy Girl! – She's Going Places on a Canadian National

Gift Certificate!

. . . and *you* can make someone happy, too, with this new and different kind of gift! Here is an out-of-the-ordinary present that's sure to please . . . an open door to new worlds . . . an adventure, experience and education rolled into one!

A Canadian National Train Travel Gift Certificate is the ideal gift for any occasion . . . It is easy to buy, easy to use . . . readily exchanged as full or part payment on a train ticket to any place the recipient may name!

Isherwood, Rev. Percy, B.A. '08, at Scottsvulle, N.Y., recently.

Lamby, William Davidson, M.D. '96, at Kingston, Ont., on Mar, 6, 1952.

Laurie, William Pitt, B.Sc. '93, at Quebec, on Oct. 23, 1951.

Macdougall, Graham R., Ph.D. '48, at Toronto, on Feb. 28, 1952.

Mackenzie, John Malcolm, B.A. '07, M.A. '10, LL.B. '21, at Charlottetown, P.E.I. on Mar. 17, 1952.

Mader, Anthony Ivan, M.D. '91, at Halifax, N.S., on Apr. 1, 1952.

McKechnie, William Cecil, M.D. '99, at Vancouver, on Feb. 22, 1952.

Mitchell, Wallace M., B.Sc. '24, at Cache Bay, Ont., on Nov. 24, 1951.

Patterson, Maj. Gen. Robert Urie, M.D. '98, LL.D. '32, at Washington, D.C. On Dec. 6, 1951.

Reid, Rev. W. D., B.A. '90, at Montreal, on Apr. 9, 1952.

Shapiro, Cecile, Dip. Med. '49, at Pretoria, on Dec. 8, 1951.

Smith, Thomas W., M.D. '02, at Hawkesbury, Ont. on Feb. 10, 1952.

Stackhouse, Hon. Mr. Justice Russell T., B.C.L.'06, in Montreal, on Apr. 9, 1952.

Steacy, Ethel Dorothy, B.A. '25, at Ottawa, on Apr. 21, 1952.

Stewart, Donald L., B.Sc. '24, at Baie D'Urfe, Que, on Jan. 16, 1952.

He's cutting down the cost of your new suit

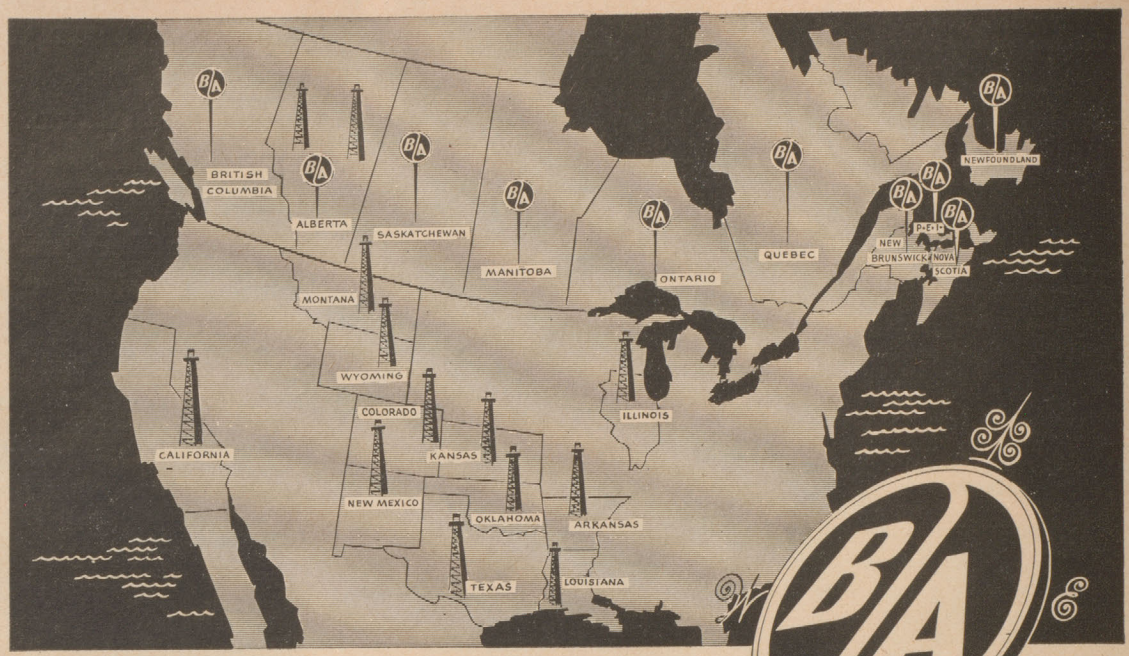

Viscose rayon, a product of the Canadian forests, with its amazing versatility, its superior performance and its outstanding value is putting a check on the rising cost of living. Using viscose rayon alone or blended with wool or other fibres, Canadian textile mills are producing a wide range of excellent fabrics . . . fabrics which now make it possible for a man to buy a good suit **at a price he can afford to pay!** The new rayon and rayon/wool suits represent far and away the best value today. Consider these facts: Because of viscose rayon, colours are richer. Patterns are smarter. Wearability is increased. And, with all these advantages, prices are lower. Ask your clothier about these fine new suits. He knows fabrics . . . you can depend on his good judgment.

In Ten Provinces
In Eleven States

In an area extending through eleven of the United States B-A has built up substantial crude oil and gas reserves. This successful venture in the major U. S. oil fields has contributed greatly to the achievement of B-A's original objective . . . providing for B-A refineries in Canada a profitable and long-term source of crude oil.

In Canada's ten provinces, B-A is concentrating on the improvement of its whole net-work of facilities . . . development of Canadian crude reserves — increased refining capacity — improved marketing outlets and distribution — more economical transportation. The objective is three-fold: highest quality products — better service — fair returns for shareholders.

***MAXWELL COHEN,** B.A., L.L.B. (Man.) L.L.M. (Northwestern) who has been on the faculty of the university since 1946, has been appointed Professor of Law. Professor Cohen has recently returned to the university after serving for one year as special assistant to Dr H. L. Keenleyside, director general of United Nations Technical Assistance Administration.*

Branch Visiting . . .

(Continued from page 32)

tive and their wives at which Allan S. Gentles, B.Sc. '14, regional vice-president for British Columbia, was host, and the other, when I was entertained at tea by the Vancouver Alumnae, the women's group there which have regular meetings of their own. Mrs. C. W. Marr, Phys. Ed. '32, is president.

The meeting in St. Paul on April 18 was held at the Minnesota Club and suffice it to say that the hospitality of President Peter Ward, Med. '24, and Mrs. Ward, Vice-President George Ulmer, Science '18, and Secretary Jack Dodd, Eng. '40, will not soon be forgotten.

It was but a short trip to Chicago where I had the pleasure of staying with the president of the branch, Leslie Laidlaw, Com. '23, and Mrs. Laidlaw, and attending a very pleasant Sunday afternoon meeting held at the Evanston Club. It is a tribute to this branch that, with the suburbs of Chicago spread over such a large area, they manage to meet at least three times a year and in addition at smaller bridge parties in each of the suburbs.

I look forward to visiting other branches when the opportunity presents itself—which The Graduates' Society says may be a lot sooner than I anticipate.

Problem of Coeds . . .

(Continued from page 25)

Canada Limited (Secretarial); Sun Life Assurance Company of Canada, (Accounting), Royal Victoria Hospital (Laboratories); Jewish General Hospital (Laboratories); Ayerst, McKenna & Harrison, Limited (Industrial Laboratories); Dominion Textile Company Limited (Industrial Laboratories); Young & Rubicam Limited, (Advertising); Trans-Canada Airlines (Industrial Relations); Montreal Stock Exchange; Henry Morgan & Company Limited (Retailing); T. Eaton Company, Limited (Retailing); Dupuis Freres (Personnel and Retailing); Bank of Montreal (Personnel); Bell Telephone Company of Canada (Personnel); Montreal General Hospital (Social Work); Family Welfare Division of the Welfare Federation of Montreal (Social Work), were the practical counterpart of the earlier "Clinic", which had been open to all women undergraduates, and offered the graduating student contact and familiarization with the particular aspect of business of interest to her.

Covering a wide cross-section of careers, these tours accommodated those interested in teaching, business organization, personnel work, retailing, advertising, secretarial work, industrial relations and hospital and industrial laboratory work.

The work of this Alumnae Placement Committee during this year is, it is hoped, only the beginning of a much more extensive programme aimed at helping McGill women in their approach to the business world.

YOU CAN HELP!

Each year, tourists from the United States come to Canada by the million. They enjoy the pleasure spots of our country and, if made welcome, they will return, time after time. These visits help us by increasing trade . . . and each tourist dollar is shared by the whole community. It is in every person's interest to support Canada's tourist industry . . . to make our visitors want to come back!

"Jim says Wagondrills ...

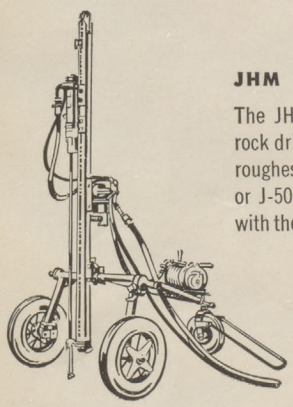

... I say Wagonjacks!"

FM2 WAGONDRILL

The FM-2 Wagondrill is a heavy-duty unit for large rock removal jobs and deep hole service (27 feet). Heavy-production drifter-type drills are used with the FM-2 Wagondrill.

JHM WAGONJACK

The JHM Wagonjack is a light-weight rock drilling unit, easy to move over the roughest ground. DB-30 drifter-type or J-50 Jackhamer-type drills are used with the JHM. Steel changes up to 8 feet.

What's the difference between a Wagondrill and a Wagonjack?

If the work involves rock drilling over very rough ground, the JHM Wagonjack is often the answer.

If the job is straight quarry production on a steady basis, you'd be better advised to have a fleet of Wagondrills.

Why not add our experience to your own in making your careful selection of rock drilling equipment. Canadian Ingersoll-Rand's years of field testing, research findings and manufacturing experience are at your disposal. Let us discuss some specific job with you soon.

Use the Carset 4-Pt. Detachable Jackbit with your Rock Drills.

Pacing a nation's progress...

PUTTING POWER TO WORK REQUIRES THE "KNOW-HOW" BUILT INTO EVERY PIECE OF G-E EQUIPMENT YOU BUY

Canada's steady march to industrial independence has been paced by the ever-growing hum of electric power.

Keeping pace with this growth for 60 years, Canadian General Electric equipment has led the field in harnessing our mighty rivers, in carrying power across the land and in putting it to work. We believe our manufacturing skills, engineering "know-how" and dependability have won for us the faith of the nation.

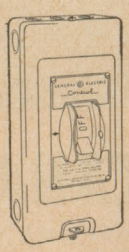

Many firms have found that it is in their own best interest to contact us for *all* their electrical equipment needs. We want to serve *you* too. We offer Canadian industry our services through a nation-wide system of sales and engineering offices.

HELICOPTERS are in the news again

BUT DID YOU KNOW that the autogiro pictured here — an early forerunner of the modern helicopter — was making news across Canada 21 years ago? "The British Consols Autogiro" said a Macdonald advertisement in 1931, "towing the largest aerial sign ever flown in Canada (10 feet by 300 feet long) has been seen over many Canadian cities. It was the first autogiro to 'loop the loop' and the first to cross the continent twice."

Who now would cut down the lovely Ginkgo which shades the tomb of James McGill and stands stately guard to the entrance of the Arts Building? "The Philistines", as Professor Gibbs calls them in his article in this issue, would have the magnificent tree removed to "improve" the view of the Arts Building.

The Second Century

From less than 100 to 8,000 students, from the very generous benefactions of a very few to the possibility of gifts from thousands — this in a nutshell is the story of McGill in its first century.

After reading Professor J. I. Cooper's fascinating article in this issue, it would seem that 1852, the year that Royal assent was given to the new charter for our University, is the logical date to use as a starting point in the development of the McGill that we know today.

A century has passed.

What does the second century hold for McGill?

Let us examine our assets—an endowment of $35,000,000, of which $17,000,000 is earmarked for special purposes; land, building and equipment currently valued at $22,000,000; a teaching staff of more than 900; a student body of 6,000 and 22,000 living graduates.

Now what are McGill's needs? In the field of physical plant — the most pressing is undoubtedly the reconstruction of the Biology Building. The Physical Sciences in their new home on University Street are well provided for. New, better and larger facilities must be provided for the increasingly important Biological Sciences.

With more than 3,000 students in the Faculty of Arts and Science, the Arts Building must be increased in size — soon. For those of you who haven't been back to McGill for many years, the congestion on the steps and in the foyer — not to mention in the classrooms—would amaze you.

There is the need, too, for men's residences to house not only students from all over Canada and the United States who are at McGill, but those from all parts of the world — representatives of 59 different nations. Residences where they can meet Canadians and learn our ways.

But the greatest need of all is funds to provide for the expansion of our teaching staff and the payment of adequate and attractive salaries. And it was for this purpose that the Alma Mater Fund was originally developed.

The Honour Roll of Alumni Funds in this issue will give you an idea of how other universities are faring in the field of alumni support.

Now, as we McGill graduates look forward to the second century of McGill's history, what can we do to ensure the future of our Alma Mater?

In the past, McGill has been supported by the generosity of a few wealthy individuals and by occasional public campaigns.

With changing conditions, these sources may no longer produce sufficient amounts to meet the increasing needs of a great and growing university. A much more comprehensive plan of annual financial support must be envisaged.

In the Alma Mater Fund, the Graduates' Society has provided a framework upon which such a plan may be built.

The Graduates' Society has, in less than ten years, progressed from a three-dollar membership fee and three thousand members, through a three-year War Memorial Campaign, and into a programme of annual giving which, in 1951, provided a membership of 7,356 contributing $125,769.

In other universities, the making of a loyal alumnus is started during undergraduate days so that, by the time of graduation, each member of the graduating class is well aware of his obligation to his Alma Mater for the education he has received. This, to many graduates, is a new and startling thought.

Proof of the appeal of this annual giving programme is seen in the quiet, effective growth of the McGill Associates, who have been contributing annually to McGill for more than a dozen years now.

The McGill Alma Mater Fund could be one of the principal sources of University income, provided that all graduates realized that this was their Fund — their means of proving their interest in McGill and that annual donations, large and small, will, over the years, provide McGill with a much greater income than the results of sporadic capital appeals.

When we can point to a Fund which annually produces for McGill half a million dollars, McGill graduates will be able to feel that they have done their part to ensure the maintenance of McGill's reputation during the second century and have proved worthy of the faith and generosity of those earlier benefactors who made our University possible.

The Principal's Page

"All Experience is an Arch"

by Dr. F. Cyril James

The staccato beat of the times in which we live has forced upon our attention the importance of scientific progress and technological skills. New drugs prolong life and lift the burden of pain from its eventide. Gas turbines accelerate the speed of travel. Atomic fission and radar have provided new methods of national defence.

Each member of this University can feel a thrill of pride in the knowledge that McGill men and women have made, and continue to make, outstanding contributions in the fields of scientific research and scientific education. It would be invidious to mention names when the list is so long and contains so many stars.

But our pride in the progress of science cannot conceal from us the basic fact that science does not provide the answers to some of our most fundamental problems that confront mankind in this generation. Science can prolong life, but how are we to make it richer and happier? We can travel faster, but where are we going? Our defences grow stronger, but we are not always clear about the things we wish to defend.

Much of the perennial controversy about the relative value of science and the humanities may be empty argument, but there is an inner core of truth. "*All* experience is an arch wherethrough gleams that untravelled world" of which the wisest men and women have dreamed. The record of human history, the thinking of philosophers and the rich storehouse of literature can enrich our minds and help us to attain the kind of society which science of itself is incapable of creating.

It is, therefore, encouraging during these summer days to watch the structure of the new extension to the Redpath Library moving rapidly forward to completion. McGill University possesses one of the richest collections of books and documents in Canada and that collection is steadily increasing in size. Many thousands of books that are now inaccessible in dead storage will come to life once more when they are ranged on the shelves of the new stacks, and students will have greater opportunities to consult them in the new reading rooms as well as in the quiet solitude of the carrells.

Nor is it only in books that the record of human experience is to be found. The University museums have much to offer and, in this year when we commemorate the seventy-fifth anniversary of the founding of the Redpath Museum, Mrs. Turnham and her staff are making valiant efforts to increase their usefulness. In spite of the fact that the present buildings are woefully inadequate, steps are being taken to make them as useful as possible and it is hoped that the new electric lighting and the remodelled showcases will permit more effective exhibition of some of our collections.

The underground heating and pedestrian tunnel from the Arts Building to the Redpath Museum and the Library, which was completed a year ago, may not offer much shelter against potential bombs (as more than one visitor has humorously pointed out) but it is not too much to think of it as the connecting link between the units of a "Humanities Centre" paralleling the Physical Sciences Centre which is already in operation.

Another great area of human experience is being made more readily available to the students of McGill.

TRAVELLED 30,000 MILES: *Dr. Walter deM. Scriver, B.A. '15, M.D. '21, physician in charge of metabolism service at the Royal Victoria Hospital and associate professor of medicine at McGill, and his wife, Dr. Jessie Boyd Scriver, B.A. '15, M.D. '22, physician in charge of paediatrics at the hospital and assistant professor of medicine at the university, were Canadian delegates to the British Commonwealth Medical Conference at Calcutta, India.*

Noted Three Relinquish High Posts

Nearly 50 years ago Chief Justice Tyndale, Dr. A. N. Shaw and Dr. J. J. O'Neill were McGill Students

by Clyde Kennedy

Nearly fifty years ago, three young men destined to become well-known "McGill men" were undergraduates at the same time. At Convocation last May, the same three men were on the platform to step down from high McGill posts. One had become Chancellor of the University, one Chairman of the Physics Department, and one Vice-Principal and Dean of Engineering.

"He has brought to the heavy responsibilities of his high post, the great gifts of wisdom and learning and experience," declared His Excellency the Rt. Hon Vincent Massey, Governor-General of Canada, in speaking of the retirement of Chief Justice O. S. Tyndale, the first McGill graduate to be elected Chancellor. "All of us who are members of this Foundation," declared his Excellency at the Convocation "are infinitely sorry that he should feel it necessary to relinquish his office. In expressing our great regret at the Chancellor's decision, I speak not only for McGill, but for all those in Canada who have the cause of higher education at heart, for the brilliant contribution which our Chancellor has made to his own university in the last five years has not stopped at its boundaries. The beneficiaries of the example he has set and the wise counsel he has given can be found far from the precincts of McGill."

Chief Justice Tyndale, who was elected Chancellor in 1947 to succeed the late Morris W. Wilson, received his B.A. from McGill in 1908 and the following year, during which he lectured in French in the Faculty of Arts and Science, he received his M.A. Awarded a special fellowship provided by Sir William Macdonald, Mr. Tyndale went to Paris to continue his studies. There he was appointed a tutor in English at l'Ecole Normale Supérieure. He returned to Canada in December 1911 and accepted a six months' teaching appointment in the French Department of the new McGill College in Vancouver, which was soon to become the University of British Columbia. He returned to McGill in 1912 to take law and to resume his teaching of French. He graduated with a B.C.L. degree in 1915 and in the summer of that year became a lieutenant in the Fifth Overseas University Company. In September 1916 he was wounded while serving with the Princess Patricia's Light Infantry and was sent back to Canada where he served on the Headquarters Staff until 1918.

Mr. Tyndale became Professor of Civil Procedure in 1929, a post which he held until a few weeks before becoming Chancellor. The high esteem in which he was held in the legal profession was indicated by Mr. Tyndale's elevation to the position of Associate Chief Justice of the Superior Court in 1946.

Another of the three men who started lecturing at McGill early in his career was Professor A. Norman Shaw, who was honoured with a D.Sc. at the Convocation last May. He received his B.A. from McGill in 1908 and became a demonstrator the next fall. Two years later he was appointed lecturer in physics.

Described as "a McGill man whose whole life as scholar, teacher and administrator has demonstrated a deep affection for the university" when he was presented for his honorary degree, Prof. Shaw became chairman of the Physics Department and director of the Macdonald Physics Laboratory in 1935, posts which he held until his retirement this year. He wrote many scientific papers on electrical measurements, atomic physics, thermodynamics and other branches of physics. His main research papers are standard reference works throughout the world.

"With every phase of the rapidly expanding department in his heart, he has pressed his well-considered opinions on departmental administration with a vigour and persistence not likely to be equalled in our time," declared his successor, Prof. J. S. Foster, who presented Prof. Shaw for the D.Sc. "His retirement takes from our ranks a colleague of exceptional loyalty and kindness. Hosts of friends, both within and without the university, will acclaim this parting honour."

Prof. Shaw went to Cambridge in 1911 and returned in 1918 to lecture at Macdonald College from 1913 to 1918. The following year he was made associate professor, McGill University, and in 1926, professor. He was elected fellow in the following learned societies: Royal Society of Canada, American Physical Society and the American Association for the Advancement of Science.

The third of the three "McGill men" who were undergraduates together didn't join the faculty so soon after graduation as the other two. Several years of exploration as a geologist that took him to India and to the then little-known Canadian Arctic occupied him before he became assistant Professor of Geology at McGill in 1921. But when Prof. J. J. O'Neill was presented for a D.Sc. at Convocation last May he had become Vice-Principal, Dean of the Faculty of Engineering, Dawson Professor of Geology and Chairman of the Department of Geology.

"These high offices, and his recent presidency of the Royal Society of Canada, bespeak not only of the administrative talents of Dr. O'Neill but also his reputation as a man of science," declared Prof. R. E. Jamie-

DR. PHILIP G. ROWE, *B.Sc. (Arts), '21, M.D. '23, F.R.S.C.(C), has been appointed professor of surgery at the university and surgeon-in-chief at the Montreal General Hospital.*

ONE HUNDRED YEARS AGO. *The original of this magnificent topographical drawing was made in 1852. In the left foreground are the two earliest structures on the McGill campus, the Arts Building and Dawson Hall (1839-1843). To their right is Simon McTavish's haunted house (1804), occupying the site of Duggan House and Purvis Hall. Mid-centre right, just above Sherbrooke Street, is Burnside Place, James McGill's country mansion. McGill's property extended to Dorchester Street, and it was this noble patrimony along with £10,000 that he willed in 1813. Dominating the background is Notre Dame Church (1824-1830), and to its right, St. Patrick's (1847).*

An Important McGill Birthday

One hundred years ago, the university received its amended charter under strange circumstances

by John I. Cooper

In August 1852, a large packet reached Montreal from England, addressed to the trustees of the Royal Institution for the Advancement of Learning. Any expense they may have been put to for postage or carriage was amply compensated by the fact that the contents of the packet gave them complete control of McGill University. The contents were, in fact, Letters Patent providing a revised charter so sweeping in character as to make 1852 the real starting point in the history of McGill. The centenary of this event provides a convenient peg on which to hang a brief examination of the charter and the circumstances which led to its adoption.

But why a revised or amended charter at all? The original McGill charter of 1821 left much to be desired. It created one governing body too many, the trustees of the Royal Institution or the governors of McGill College, depending on your point of view. The governors were seven: the Governor-General, the Bishop of Quebec, the lieutenant-governors of Lower and Upper Canada, the chief justices of Montreal and Upper Canada, the principal of the college.

The Royal Institution for the Advancement of Learning was in existence before the appearance of the first McGill charter. Its members were appointed by the government of Lower Canada, as Quebec used to be called, and its duty was to control the schools. In McGill's charter it was given the power to "visit," that is, to inspect and supervise, and the Royal Institution interpreted this power liberally. Furthermore, the charter of 1821 provided that appointments to the staff and the statutes of the University must be transmitted to Britain for the approval of the Secretary of State for the Colonies.

Finally nothing definite was said of the religious character of the University. "True religion", the phrase employed, was more calculated to excite than to pacify. Protest became shrill since the first president of the Royal Institution was the Anglican Bishop of Quebec, the first principal of the University was an Anglican priest, and the first statutes forbade the teaching of anything contrary to the doctrines of the Church of England. Perhaps we overemphasize these shortcomings, organizational and otherwise, of the original charter. It did permit the University to get under way in medicine, arts, and law. What was needed was change, not a new start.

During the late 1840's, McGill experienced a series of severe shocks. John Bethune was ejected from the principalship in 1846 and his successor, after a troubled interval, announced his intention of departing

John Irwin Cooper, M.A. (Western Ontario), Ph.D., is associate professor of history at McGill.

for more rewarding labours, a civil service post. It was a grim outlook. Yet better things were crowding in. In January, 1847, James Ferrier became president of the Royal Institution for the Advancement of Learning. He was a Montrealer, a successful businessman and, in fact, the prototype of the class which was to revive McGill under the amended charter of 1852. Two months later (March 1847), the government relieved the Royal Institution of its general responsibility for education and confined its activity to visiting McGill.

The effect was striking, for in April, the Royal Institution visited McGill. And what a visit it was! Everyone and everything was examined. Even the grounds were tramped over. They were described as being in a state of nature, a precedent for the three bares which decorate them today. A number of recommendations were made: new courses, the dilution of the Anglican oligarchy then in control and, most important of all, a change in administration. The number of governors should be increased, and ". . . they all should reside within the District of Montreal and . . . should be selected from influential and intelligent persons of different denominations of Protestants . . ."

The Royal Institution proceeded to follow up its move: in July 1848, a memorial was prepared for the Governor-General praying him ". . . to procure the transfer from Her Majesty's Government at Home to the Legislature of this Province the power of amending and altering the charter of McGill College . . ." By the end of 1849 a draft of the amended charter was complete and was submitted to the governors of the College for suggestions. Apparently they had none to make for they do not seem to have answered the letter.

The state of the governors was pitiful. The lieutenant-governors of Lower and Upper Canada had disappeared when the provinces were united in 1841. The Governor-General's position was made delicate by constitutional developments. The Chief Justice of Montreal, who was a Roman Catholic, developed conscientious scruples about intruding in the affairs of an institution so anxious to make itself Protestant. The Bishop of Quebec had two visitations of his own to cope with and could only extend an apostolic blessing. Only two of the governors made pretense of interest, and they, with singular infelicity, contemplated a meeting in Toronto. Shades of Stephen Leacock! Little wonder therefore that from this point the Royal Institution dominated the negotiations.

The precise details of the amendments favoured by the Royal Institution are unknown, but the outline may be inferred. Administratively, the Royal Institution and the governors of the College were to be merged, and the new body was to be representative of Montreal Protestantism. The claims of the Church of England were to be bought off by giving that communion the control of the chair of divinity. It was not exactly a brilliant performance, nor a wise one for an institution in anxious search of public support. The plan to create an Anglican *imperium in imperio* was so fantastic that one wonders whether it was put forward in complete seriousness.

Christopher Dunkin

The next move was to submit the draft to the government. This was done in the summer of 1850, and the reaction was immediate and adamant. The cabinet rejected the proposed changes, commenting with especial asperity on their religious character in general and their plans for the chair of divinity in particular. Only the administrative changes were viewed approvingly, and even they with considerable reservation, ". . . it is inexpedient to make any Officer of Government ex officio '[a] Member' or to limit the discretion of the Crown . . . by excluding Roman Catholics from holding seats . . ."

A long impasse followed. The Royal Institution was indisposed to tinker further with the draft charter, and the cabinet offered "continued objection" to the draft as it stood. Finally some genius, who it is not certain, suggested a way out. It was conveyed confidentially to the Royal Institution in a note of surpassing involution: ". . . the Government . . . will not disqualify Roman Catholics or . . . divest them of qualification of being appointed members of the Board of the Royal Institution, but it engaged that in practice, the Board of the Royal Institution for the purpose of governing McGill college shall be Protestant . . ." This was *probably* the handiwork of Christopher Dunkin. He had a subtle mind, he was a legal draftsman of the highest virtuosity — and he will figure again in this narrative.

At any rate the major difficulty was solved. The good news was brought to Montreal by a committee of the Royal Institution, Ferrier and Ramsay, and discussed at a special meeting in July, 1851. The meeting, which was attended by only one other member, accepted unanimously the government's promises and made the necessary changes in the charter amendments. From then on, things moved with commendable speed. The cabinet, which had got its way, made helpful suggestions about securing an agent in London, who should supervise the passage of the charter through the chancellery. This was Alexander Gillespie, and it was in the safekeeping of his kinsman, George Denholm, that the new Letters Patent reached Montreal. Even to the casual eye the amended charter was arresting. It contained *in extenso* the original charter of 1821, an admirable precaution against misunderstanding. Many of the old provisions stood unaltered, degree-granting powers, classification of degrees, and so on. The obnoxious clauses were repealed. Such was the fate of the governors of McGill College, likewise the exhausting practice of submitting official acts to the Secretary of State for the Colonies. On the positive side were the provisions creating the new board of governors, the personnel of which was drawn from the Royal Institution for the Advancement of Learning. In this way the uncomfortable dyarchy of college governors and trustees of the Royal Institution was abolished,

(*Continued on page 46*)

Macdonald's Marvels Amaze All

Visitors' Day at Ste. Anne de Bellevue proves an absorbing one for the "city slickers."

by Frank O. Morrison

To parody an old phrase: "It's a wise father that knows his child." Such was the thought in the mind of the Macdonald College Field Day Committee when it planned "Macdonald Day" for everybody but especially for McGill. Ringing in the committee's collective ear was a public remark by Dr. Brittain that it was only twenty miles from Macdonald to Montreal but a hundred or more from Montreal to Macdonald.

Now just what has an agricultural college to show which could interest the rank and file: stenographer, professor and businessman alike? Plenty! And some three thousand persons attest that answer. Advertised as "a day in the country but what a country", Macdonald Day was just that. After life on a 50-by-100-foot lot with daily trips to the fifth floor of an office building you can't realize how relaxing it was to sit, legs dangling, on a low-slung rubber-tired farm wagon and be hauled about at a leisurely pace over several hundred acres.

Holiday was in the air and so was the glorious perfume of lilacs. In front of the main building, on the spacious green oval, were young lady receptionists, gay in peasant skirts and straw hats. Young male guides stood by, eager but not too insistent on showing you about. Several members of the Macdonald staff and a number of alumni were in evidence all day with a glad hand for everyone. The gaily-coloured tractors, each drawing a wagon and driven by a chauffeur in blue jeans, colourful shirt, red bandana and straw hat, rolled up for a new load every few minutes. Though organization was the keyword there was no regimentation. You could sit, as some did, cross-legged on the grass all afternoon or you could ride on the wagons, as some did, all afternoon, or if you were curious, ambitious or of an academic turn of mind you could visit the infinity of exhibits.

Layman and professor alike had a wonderful time in the physics and chemistry building. Graduate students and staff were busy explaining the intricacies of physical and chemical phenomena and how they bear on the business of farming. Children delighted in the oddities such as the swimmer who sank when you squeezed the bottle of liquid in which he swam, and the long-skirted doll who kept sucking up an ever-returning bubble in a glass pipe but sadly disappointed all the curious who had the temerity to peek beneath. Then for the initiated there were the stroboscope, the X-ray diffraction apparatus, the densitometer, the spectrograph, and the electron microscope with Dr. Rowles to explain them as only he can.

The musically-minded delighted in Dr. Frank Hanson's organ recital and the performance of the string ensemble. The audio-visual centre gave parents an insight into new-fangled teaching methods. The ladies found the exhibit of textiles most informative. Miss Jenkins explained with delightful asides how modern clothing styles had evolved. She used beautifully dressed dolls to show how milady gradually emancipated herself from the "layers" and yardage of the good old days. She also dispelled the myth that fabrics aren't as good as they used to be. On the same floor the Department of Economics gave a visual and animated picture of the reasons for the high cost of staple foods in this huge country of ours.

The biology building housed displays of plants and plant diseases so that to just vegetate lost its appeal. The entomology-zoology exhibit featured students' notes and drawings, teaching aids and models, and the insects themselves resplendent in their many colours. A graduate student carefully explained the intricacies of phase microscopy, how to put individual house flies into scotch-tape strait jackets (should you ever care to do so), and how to apply to each insect infinitesimally small poisonous droplets. Over this scene hovered a human skeleton and a large eagle to add atmosphere.

The Institute of Parasitology extended a most cordial welcome to all visitors giving each one much individual attention, as he or she oh'd or ah'd over the immense worms said to live inside some people (could account for some dispositions, don't you think?); the aquaria of snails,

***PAST PRESIDENT** of the Graduates' Society, J. A. deLalanne, C.B.E., M.C., B.A. '19, wishes the tractor driver, Alex McGregor of the horticulture field staff, good luck as he starts Tour No. 2 with a hay wagonfull of keen sightseers, young and old.*

OFFICIATING *at the chicken roast are, left to right: Professor Emile Lods (Dept. Agronomy), Reggie Wyatt (Chef), Professor W. A. Maw (Chairman, Dept. Poultry), Professor J. Cooper (Dept. Ag.Eng.).*

tropical fish, and those interesting African toads transported here by air some years ago and used to assure anxious young newlyweds whether or not they are really going to need that extra bedroom.

Outdoors the wagons went about the orchards where the horticulturists are building trees as they were never intended to grow; roots of one kind, trunks of another and fruit of a different sort. (Boy if one could only get a life-mate with all the desirable characteristics grafted together like that!) The many kinds of shrubs and trees, the garden plots, the poultry houses, and even the houses of the natives were pointed out. By bus, you could cross the Metropolitan Boulevard and the railways then again travel about by tractor to see the meticulously laid-out field plots of grasses and grains (many with counted seed hand planted); the fat black Angus cattle, those magnificent milk-making machines, the Ayrshires and Holsteins; the sheep, and pigs housed one in a stall and each with his ears punched to identify him beyond a doubt (shades of "Animal Farm").

A long cavalcade of cars made a trip out to the six-hundred-acre Morgan arboretum where one minute you were lost in the "forest primeval" of the days of Jacques Cartier, the next you saw the forest destroyed by our forefathers being replaced largely through the efforts of one man, and finally you ended up in the middle of a maple sugar bush at a delightful log chalet where the hospitality of Dr. Brittain could be seen and sampled by all.

The new Stewart Phytorium was formally opened when Mrs. Stewart unveiled the plaque. This is the best-equipped set of chambers for growing plants under controlled conditions in Canada. A second formal event was the unveiling of the plaque on the John F. Snell House.

The climax came with the chicken barbecue. That over twelve hundred persons could pass through the two lines and be supplied out of doors, as one letter since put it, with "*hot* barbecued chicken done to a turn and *hot* coffee" in one hour without a single frayed temper was a tribute to the catering staff (Prof. A. H. Maw and Miss Stuart) and the fine spirit of the visitors alike. That final event sponsored by the Macdonald Branch of the Alumnus was a crowning success to a good day.

Best of all, everybody had a wonderful time, nobody saw half what there was to see and all want to come back again. The campus is a beautiful place. Macdonald is more than a "cow college". It is a university where students use the latest in scientific tools to work on the very fringe of human knowledge and thus add thereto almost every day, a worthwhile part of the parent university, McGill.

Brown Gold Medal to D. H. Kennedy

The Ernest Brown Gold Medal, as mentioned in the May issue, has recently been established in the Faculty of Engineering for award to the member of the graduating class in Engineering who has shown outstanding ability throughout his undergraduate course.

The first award of this medal was made at the May Convocation, the recipient being David Howard Kennedy, a graduate in the Department of Civil Engineering.

Mr. Kennedy's record throughout his undergraduate course was outstanding. He took his preparatory education at the Lisgar Street Collegiate Institute in Ottawa and entered McGill with senior matriculation in the fall of 1948. His matriculation standing was very high and he was awarded an entrance scholarship by the university.

On graduation, in addition to the Ernest Brown Gold Medal, Mr. Kennedy was awarded the British Association Medal for great distinction in the final year, and the Robert Forsyth Prize for Theory of Structures and Strength of Materials. In his final year he obtained first class standing in every subject of his course.

Mr. Kennedy is a son of Major-General Howard Kennedy, B.Sc. '14, and of Mrs. Kennedy (Mary Macoun), B.A. '15.

Graduates to Receive Athletics Privileges

During the past year, arrangements were concluded whereby graduates in good standing may afford themselves of athletics privileges, J. A. deLalanne, retiring president of the society, told the annual meeting. These privileges include use of the gymnasium, squash courts, swimming pool and the tennis courts. The charge is $10. per member per activity with a maximum of $25.

"For the Want of a Nail"

Is it difficult for you to understand the pride felt by the Fund officers and class agents of these "Honour Roll" universities (appearing on this page) in the success of their Funds?

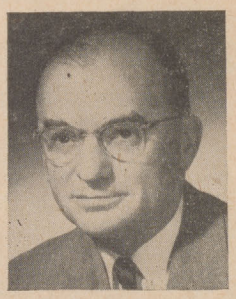

We must, of course, remember that Yale—the mother of all the funds—is now in its 62nd year. Last year 24,698 alumni contributed $1,010,324.00 for an all time record.

Mrs. A. C. Jensen

Many McGill graduates saw the cover picture of the Harvard '27 class reunion on a recent issue of *Life* magazine — that class alone presented Harvard with $200,000; quite an achievement for a 25-year class! These really are feats to be proud of!

We at McGill have had an annual fund for only five years and the results have been good: but it is a new idea and its ultimate worth is probably not fully appreciated by all McGill graduates.

L. P. Webster

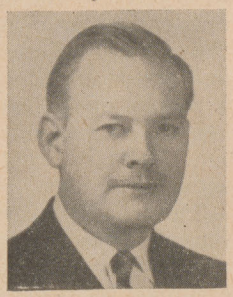

Many token contributions have been received but, if we are to achieve a record commensurate with those of the universities mentioned in the Honour Roll, the yardstick of $3 per year since graduation and the overall objective of $200,000.00 must become the concern of every McGill man and woman. Lack of a dollar today in education is the same lack of a nail that lost that now famous battle.

On the shoulders of Lindsay Webster for Montreal, Mrs. A. C. Jensen for the Montreal Alumnae and their class agents, and John Stewart for Toronto, Gerry Jackman for New York, Bunny Alexandor for Ottawa with the members of their committees, rests the responsibility for ultimate success of this year's fund.

John Stewart

In these four areas are found 12,000 of McGill's 22,000 alumni. Theirs is not an easy task. A personal contact with each graduate is the ideal but it is something of a large undertaking. For purposes of simplification, the campaign in Montreal is conducted on a class and faculty basis and in Toronto, New York, and Ottawa by area. The work of these chairmen and their committees is reduced proportionately by each donation sent in voluntarily before the campaign begins.

Gerry Jackman

This personal approach is the means so effectively used in the beginning by Gil Young of St. Francis District, Bob Flood in Bedford, and Jim Maguire in Sarnia when their respective Branches headed the McGill Honour Roll.

The success of the Alma Mater Fund depends naturally not only on the effective work of the five large branches but, very definitely, on the interest and enthusiasm for the Fund in every area where there are McGill people.

B. M. Alexandor

Many of you who read this article have never missed an opportunity to show your interest in McGill in a most concrete manner. There is still one more effective way in which you can help — that is by giving your class agents and branch fund chairmen assistance by talking up the Alma Mater Fund and making as many McGill men and women as possible take a pride in supplying the nails that will win the battle for an independent "Old McGill".

If each present contributor took a personal interest in seeing that his branch or his class reached at least this 50% goal, the McGill Alma Mater Fund would soon rank as one of the outstanding alumni funds on this continent.

Branch Notes . . .

A Cry of Anguish from the General Secretary

by D. Lorne Gales
General Secretary

The deadlines for *The McGill News*—remember, only four of them a year—are:

August 1 for the Autumn Issue.
November 1 for the Winter Issue.
February 1 for the Spring Issue.
May 1 for the Summer Issue.

One of the features, and I say it happily though modestly, is "The Branch Notes" and the accompanying photographs. But they do cause trouble, almost invariably, between the editor and myself and, according to that distinguished and literary authority, it's always all my fault, because either the notes are late or the pictures are not completely identified, if they turn out at all.

No consideration is ever given to the fact that branches hold meetings at times more convenient to the members than to our friend The Editor and his deadline, or that it is difficult enough to get the pictures, let alone their essential identification. The answer is always "Do you or don't you want a good *McGill News* and out on time?" and I presume we do.

This, therefore, is a plea for help—just to keep the peace in one small segment of the world between at least two would-be friendly McGill people.

Will you help me? When I'm not present at one of your meetings, get one of your many candid camera enthusiasts to get two or three good group pictures—not more than five in the pictures—identify the parties and mail the pictures in immediately. Mildred White, of Seattle, and Betty York, of St. Francis District, have already been most helpful in this respect but, of course, the dean is Henry Morgan of Los Angeles. Picture and news conscious Dave Legate, now of *The Star-Standard* Bureau in London, England, is the reason for the sudden flow of newsworthy Great Britain pictures.

If a photographer is not readily available, do as Ken Ross of Philadelphia does, and let me have a note on the meeting. It all helps and it really keeps The Editor happy, and that naturally makes the General Secretary very happy.

The meetings held in the early summer have all been varied, pleasant and well-attended affairs.

Our peripatetic first vice-president and chairman of the Alma Mater Fund, S. Boyd "Marco Polo" Millen, has continued his blazing pace in search of ten thousand contributions to the Fund for $200,000. This time, accompanied by the long-suffering, patient, Howard Ross, the executive officers and graduates were visited in Vancouver, Victoria, Seattle and San Francisco. Watch the Fund report for results.

Ken Ross reported a successful picnic with Robb and Thale McDonald as hosts for the Philadelphia branch. Charles Goren, of contract bridge fame (see Book Reviews); Rev. Ralph M. Carmichael, Eng. '35, turned minister, and his wife, the former Jean Dunlop (Arts '35) were among the fifty graduates and children present.

Sudbury Branch held its Scholarship Ball on June 20 with approximately 230 attending. The event was most successful and raised the necessary funds for the $300 scholarship to McGill open to a student from the Sudbury area. The enthusiastic committee, led by Chairman George Charlap, B.Eng., was responsible for the organization of the ball. The group included James Grassby, M.Eng.; Arthur Townend, B.Arch.; Bob McDonald, B.Eng.; and Peter Edwards, B.Sc. Active members of the local executive were Mrs. Saul Silverman, B.A., president; Alan R. Smith, Ph.D., vice-president; and Noel O'Brien, B.Eng., secretary.

Pictures tell the stories of good meetings for the District of Bedford and St. Francis District. At the latter the Rev. E. Clifford Knowles, Arts '27, who is Students' Counsellor and the University Chaplain, as guest of honour, kept the graduates fascinated with his story, "Trials and Tribulations of a Student Adviser".

Dave Fraser, B.A. '38, and his executive combined in a most successful manner—despite frequent and violent rainstorms — the second

(Continued on page 18)

***THREE LONG-STANDING MEMBERS** of the McGill Alumnae Society were honoured at the annual meeting of the Society with emeritus membership. All graduates of the class of 1899, they are shown above with Mrs. E. C. Common, president, and Mrs. Walter Vaughan, honorary president, who presented the awards. Left to right are: Mrs. Common, Mrs. Walter Lyman, a past president of the Society, Miss Margaret Brodie, Mrs. Vaughan, and Miss Isabel M. Hurst.*

AT THE MONTREAL BRANCH'S *second annual golf tournament: in the centre, Frank Pope, Comm. '48, winner for the second time of the Eric A. Leslie Golf Trophy, with two close runners-up: on the left, Earl (Whizzer) Smith, Comm. '42, and right, John Keay.*

RIGHT:

PRESIDENT OF THE MONTREAL BRANCH, *G. Meredith Rountree, Arts '31, and left to right, Fred V. Stone, Arts '31, and Dr. Errol B. Clift, Dent. '37.*

DURING *one of the frequent heavy rainstorms that interrupted the afternoon's play, another little friendly game was indulged in: left to right are Lorne C. Webster, golf committee chairman, Eng. '50; Russell R. Merifield, Law '41; David R. Fraser, past president of the Montreal Branch, Arts '38; Allison M. Walsh, Law '36; H. C. Karn, president of the University of Toronto Alumni Association in Montreal; and Keith W. Shaw, Eng. '36.*

Class Notes

Since our last issue, four more classes have started organizing reunions: Arts '12 with Archibald Stalker, Q.C. as chairman; Medicine '12 with Dr. Stuart Ramsey as chairman; Medicine '27 with Dr. Alan Fowler as chairman; and Arts '37 with Ross Newman as chairman.

The count at the present time is 27 classes coming back for Reunion Weekend, Oct. 17-18. The programmes will consist of class dinners, receptions, the football buffet lunch and McGill-Western game on Saturday and tours of the University buildings. The medical classes will also participate in the programme of the Montreal Medico-Chi Conference, Oct. 13-18.

Science '27

The 25th reunion of the class of Science '27 will be held Oct. 17 and 18. In planning is a cocktail party on Friday afternoon, Oct. 17, the time and place to be announced later. The class will gather in the Sir Arthur Currie Memorial gym for the buffet luncheon Saturday and then attend the football match. The evening will see a stag dinner in an informal atmosphere for the opportunity to check and double check on what has happened during the last 25 years.

Branch Notes . . .

(*Continued from page 16*)

annual Montreal Branch Golf Tournament and the Branch's 24th annual meeting. This took the form of a dinner, followed by the usual business session and election of officers.

Meredith Rountree, B.A. '31, retiring as honorary treasurer, reported a successful financial year, due to the very successful pre-football buffet lunches and the sugaring-off party. Dave Fraser, retiring after two strenuous years as president, reviewed the activities of various committees and thanked the chairmen and members for their enthusiastic support.

The newly elected officers of the Montreal Branch are:—

G. Meredith Rountree, B.A. '31, M.A. '33, president.
Lindsay P. Webster, B.Com. '25, vice-president, Alma Mater Fund.
John A. Nolan, B.A. '34, B.C.L. '37, vice-president, Undergraduates' Interests Committee.
Clifford E. Brown, B.Com. '37, honorary treasurer.
J. Campbell Merrett, B.Arch. '31, representative of the School of Architecture.
Dr. Sydney Wagner, B.Sc. '41, representative of the Faculty of Graduate Studies and Research.
The Reverend E. Clifford Knowles, B.A. '27, M.A. '29, representative of the Faculty of Divinity.
Hugh D. Stratton, M.S.P.E. '50, representative of the McGill School of Physical Education.

The "Punch McCracken Challenge Trophy" is the name that the McGill Society of Toronto has given the beautiful bowl which "Punch" has donated for annual competition between golf teams from every branch society in Ontario. This year, Peterborough, represented by Gordon Munro and John Haldimand, was the winner. Next year, it is hoped that Windsor, Hamilton, London and other branches will have at least one team in the tournament. (Having caddied for the president of the Toronto branch, the General Secretary has decided to compete next year. He picked up a lot of pointers and thinks he stands a chance to win.)

Dr. J. P. (Jake) Fawcett and Charlie Zenwirt, after a strenuous, most successful year with the new Hamilton Branch, held their annual meeting at the attractive Tamahaac Club on July 3. A very friendly reception preceded the buffet supper, after which the annual meeting took place.

The new slate of officers is:

F. I. Ker, Science '09, honorary president.
Dr. J. P. Fawcett, Med. '18, past president.
D. U. McGregor, Med. '24, president.
Bill Gilmour, Science '25, vice-president.
Seth Grossmith, Eng. '51, secretary.
Jack Bodtker, Eng. '50, treasurer.
George Rumpel, Science '24, and W. L. Hutchison, Eng. '34, Alma Mater Fund.
C. K. Zenwirt, Hugh Robertson, Jack Scarlett, Howard Lang and Doris Clark, committee.

John and Mary Stewart (John in charge of Alma Mater Fund, Toronto), Howard Pope and Reg Cowan were guests from the Toronto branch. Coloured movies and slides provided the programme with both machines being more or less operated by ace stickhandler Jack McGill. Music and song concluded the evening's fun.

Bob Peers, Med. '30, president of the Northern California branch, reports that the 5th Annual Barbecue held by the branch was a very successful affair. Held at the home of Norman Morrison in San Mateo on July 20, more than 50 graduates and children participated and consumed 60 chickens.

MACDONALD BRANCH ACTIVE: *Actively interested in keeping their classes together eight members of the Macdonald branch of the Graduates' Society are trying to form a nucleus of what they hope will be a strong Faculty of Agriculture class organization. Left to right are, sitting: Larry Wilkinson, B.Sc. Agr. '51; R. J. D. Martin, B.Sc. Agr. '38; Bill Ritchie, B.Sc. Agr. '51. Standing: Geoff Stead, B.Sc. Agr. '48; William Bokovay, B.Sc. Agr. '52; Frank Upton, B.Sc. Agr. '48; Doug Waterson, B.Sc. Agr. '45; Les Robertson, B.Sc. Agr. '40.*

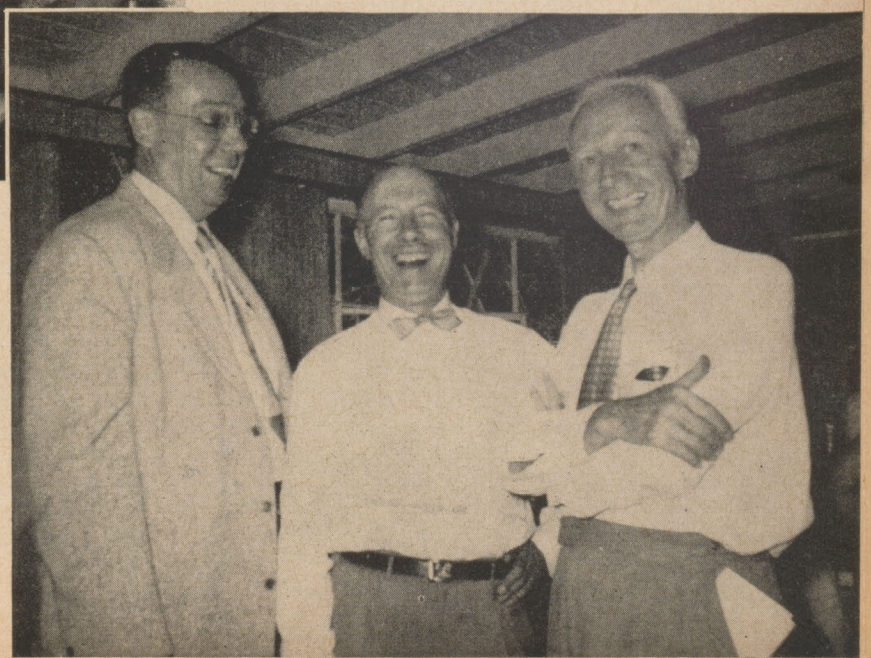

***AT THE HAMILTON** meeting, D. U. McGregor, Med. '22, newly-elected president of the branch, and Col. H. Gordon Wright, Sci. '17.*

***A FEW OF THE YOUNGER GRADUATES** at the Hamilton meeting — Left to right: Harry Kennedy, Eng. '52; Lois Olsen, Physio. '50; Mrs. Hazel Hall; Basil Hall, Arch. '51; Mrs. Margaret Utley; Pat Utley, Eng. '51; Mrs. Glen Shaver; Glen Shaver, Eng. '51.*

***AT THE ANNUAL BARBECUE** of the Northern California branch, Robert S. Peers, Med. '30, president, with host Norman D. Morrison, Jr., Med. '34, past president of the branch.*

***THREE MEMBERS** of the Northern California executive at the annual barbecue, Robert S. Peers, Med. '30, president; M. E. Leonard, Med. '32, secretary-treasurer; Arthur A. Dobson, Sci. '10.*

Report from London

by D. M. Legate

LONDON: Judging by present indications, everybody and his brother will be heading for London and the Coronation next year. Since "everybody and his brother" obviously embraces a lot of McGill graduates, the McGill Society of Great Britain humbly asks that they will not be expected to become a booking agency.

Canadian bank managers, heads of Canadian concerns, Canadian representatives of this and that are already being besieged by relatives, friends and business associates to book hotel rooms and to guarantee places in Westminster Abbey. Let it be remembered, however, that seats in the Abbey simply will not be available to anybody who isn't an important official of some kind; that it is even well-nigh impossible to get a hotel room for next May or June, unless you're willing to put up at Brighton; and that it is going to be tough enough even to perch on the top of a building, let alone pry a reservation for the procession route from the agencies.

Principal Cyril James has come and gone but the McGill Society managed to snare him for a brief moment and to entertain him at a small luncheon in the Cellar Room of A l'Ecu de France on July 23.

Since it was in the midst of the holiday season, it was impossible to round up members of the society at large. The alternative was for the executive committee to act as hosts.

Both Dr. and Mrs. James took part in the informal chat and discussion revolving about McGill's problems which followed the pleasant meal.

Jim Thom, president of the McGill Society, presided and those in attendance included Sir Harry Brittain, his son, Group Captain Brittain; Mrs. David M. Legate, J. B. Archibald, Dr. T. F. Cotton, G. A. Hobbs, Dr. V. Henry Jekill, Campbell Moodie of Canada House, and David M. Legate.

Regrettably Col. J. G. Robertson, Dr. P. L. Backus and Mrs. R. T. McCullagh, other members of the committee, were unable to be present.

Understandably, there will be a hiatus of the society's affairs until the autumn months, at which time there is a probability of another cocktail party along the lines of the highly successful affair of last spring. Meanwhile, Dr. Victor Jekill, who heads the membership committee, is making plans for a determined drive to round up more members, especially among the young graduates.

On second thought, since the McGill Society here needs cash, the executive might go into the Coronation business! Any takers from over there at six hundred bucks, which would include, of course, a bottle of coke.

Visitors Welcomed at Society Offices

The Graduates' Society staff is always pleased to have graduates drop in for a visit at headquarters. More so when they are from out of town and perhaps we can be of some small service. "Climb up to" would be more appropriate than "drop in" for 3574 University street, because it is really a climb. However, the University is seriously considering more centralized quarters for us — but it may be some time in coming. In the meantime, come in and sign our "Visitors' Register" anyway.

From far away came Dr. G. M. Cruikshank, Med. '25, on a leave-of-absence tour which will take him pretty well round the world before he returns to Suva in Fiji.

G. M. Cruikshank

Another visitor was Eric Copland from Los Angeles — east to see his son graduate from Yale.

Dr. Otto Demuth, Med. '15, from Vancouver, of athletic fame, while recuperating from an operation, strolled in and was amused to see his picture on our walls as a member of the 1912 football team.

Dr. John Menzies, Medicine '02, in Montreal to make application for his grandson's admission to Medicine, was directed to our office by Miss Mudge.

Dr. Robert Peers, Med. '30, president of the Northern California Branch, took the opportunity of a visit east with his family, to show them McGill. We reviewed branch activities with him and were brought up to date with his plans too.

Carl Shapter, B.Sc. '20, of Detroit, is always welcome. He keeps the General Secretary posted on his peregrinations by means of post cards.

Regional Vice-President Punch McCracken spent a little while with us lining up ways and means of getting good football for all our supporters in Ontario — no mean task but Punch has an idea or two which we hope will work out.

Now if any visitors have been omitted be sure to register — or even make a telephone call — the next time you are in Montreal.

D.L.G.

MEMBERS OF THE TORONTO BRANCH *at the 19th hole at Weston Golf Club, left to right: John C. Crncich, Comm. '49; Allan F. Knight, Eng. '51; James R. Peers, Comm. '49; J. Howard Pope, B.Sc. '35; J. Gordon Henderson, Comm. '50, and Reginald B. Cowan, B.Sc. (Arts) '26.*

E. G. (PUNCH) McCRACKEN, *regional vice-president, presents the McCracken Challenge Trophy to the winning pair from Peterborough: Gordon H. Munro, B.Sc. '24, centre, and John Haldimand, Comm. '47.*

BEDFORD BRANCH MEETS. *A few of the strong representation of the Macdonald College alumni who are regular supporters of the District of Bedford meetings are, left to right: Gordon Thomson, Agr. '48; Mrs. Gordon Thomson (Enid Forbes, Home Ec. '50); "Pete" Thomson, Agr. '52; Ed. Chaplin, Agr. '50; George Gibb, Agr. '32, and Irving Slack, Agr. '48.*

AT THE DISTRICT OF BEDFORD MEETING, *at Spring Valley Ranch, left to right: W. Russell Bradford, Arts '14; A. Gordon Scott, Sc. '14, and Dr. William S. Rodger, Med. '29.*

The University's Lovely Campus

Shade trees of McGill, green oasis in a great city, have a story all their own

by R. Darnley Gibbs

"In 1855, when Principal Dawson arrived in Montreal, the grounds of McGill College were nothing more than an unfenced common, used for pasturage. A few large trees and a thicket of hawthorn, birches and alders grew beside a little brook which flowed through the grounds and, presumably, gave the name of Burnside to the estate of the Founder, James McGill."

These are the opening lines of an article by Professor Carrie Derick in *The McGill News* of December, 1929, on "The Trees of McGill University." Older graduates will remember Miss Derick as a pioneer among women at McGill and as Professor of Morphological Botany. She also taught Genetics.

In the pages that follow she tells of the early planning of the campus, of the generous donors of rare trees, of the encroachments of buildings, and of the little nursery "started in a ravine near Sherbrooke street." That last phrase strikes a familiar note for we have recently started, in McIntyre Park, a successor to that nursery and only this spring we have planted out its first fruits — three little specimens of the purple willow, a few forsythias, some shrubby potentillas and a couple of golden-leaved ninebarks. These came to our nursery as tiny rooted cuttings from the Dominion Arboretum in Ottawa.

The very next paragraph of Professor Derick's article strikes another familiar note. A "Graduates' Walk", she tells us, extending from The Founder's Elm to Sherbrooke Street, was started many years ago. The Great Founder's tree still flourishes, looking much the same today as in an old photograph (too faded to reproduce here) of 1875. A few of the Graduates' Walk trees are to be seen near the road to the Physics Buildings.

Nowadays we plant a class tree each year — ostensibly on Convocation Day, but actually some weeks ahead — and so maintain in modified form this old tradition, but we are now planting more unusual species and the list of recent class trees reads like a catalogue in some arboretum:

1944. Red Oak (*Quercus borealis*) — somewhat east of the Roddick Gates. The first tree failed but its substitute is growing strongly. A very large specimen of this tree — believed to be a direct descendant of one of those seen by Jacques Cartier on the site of Hochelaga — was still standing near this spot when Miss Derick was writing.
1945. Burr Oak (*Quercus macrocarpa*) — just west of the '44 tree. The first specimen died, a second was broken, and the present tree is one planted this spring.
1946. Red Maple (*Acer rubrum*) — on the southern rim of the hollow near the Redpath Museum. It is growing slowly but steadily and should prove a colourful feature of the campus in the years to come. We have silver maples in abundance, a large sugar maple, a Manitoba maple or two, and Norway maples, but this is the first red maple.
1947. Yellow wood (*Cladrastis lutea*) — in the middle of the little campus, below the Biological Building. This laburnum-like tree has (or will have) lovely white flowers. There are largeish specimens in the grounds of Chancellor Day Hall and of the "new" Conservatorium of Music on Drummond Street.
1948. Japanese Walnut (*Juglans sieboldiana*?) — this fast-growing relative of our butternut is at the north-western edge of the Little Campus, within a few yards of the spot where the copper beech (pictured by Miss Derick) formerly stood. We hope to plant another copper-beech someday, together with other colourful species.

So it goes, with tulip tree, pyramidal white birch, Camperdown elm and Kentucky coffee tree to bring us up to date. The last was "planted" on Convocation Day this year at the foot of the steps leading to the Observatory.

The care of these trees — there are more than one hundred on the main campus alone — is a never-ending task, which we entrust in large measure to professional tree surgeons. These skilled men doctor our trees, lopping broken and diseased limbs, filling cavities and even doing a bit of plastic surgery once in a while. An interesting attempt at bridge-grafting, for example, may be seen near Pine and University, just above the Medical Building, while a large healing wound, which has been carefully treated, is visible on the big elm, planted by Lady Dawson, at the head of the main avenue.

The fees of these surgeons might seem high to the layman (doctors' fees always do!), but the undertakers' seem higher yet, and we have to pay big money when a dead tree must be removed. The weeping willow between the Arts Building and the Redpath Museum lost about a third of its roots when the tunnel leading to the Library was constructed. At the time of writing this much-admired tree, a comparative youngster not much older than our average graduating student, is far from happy but should survive. We have done our best for it.

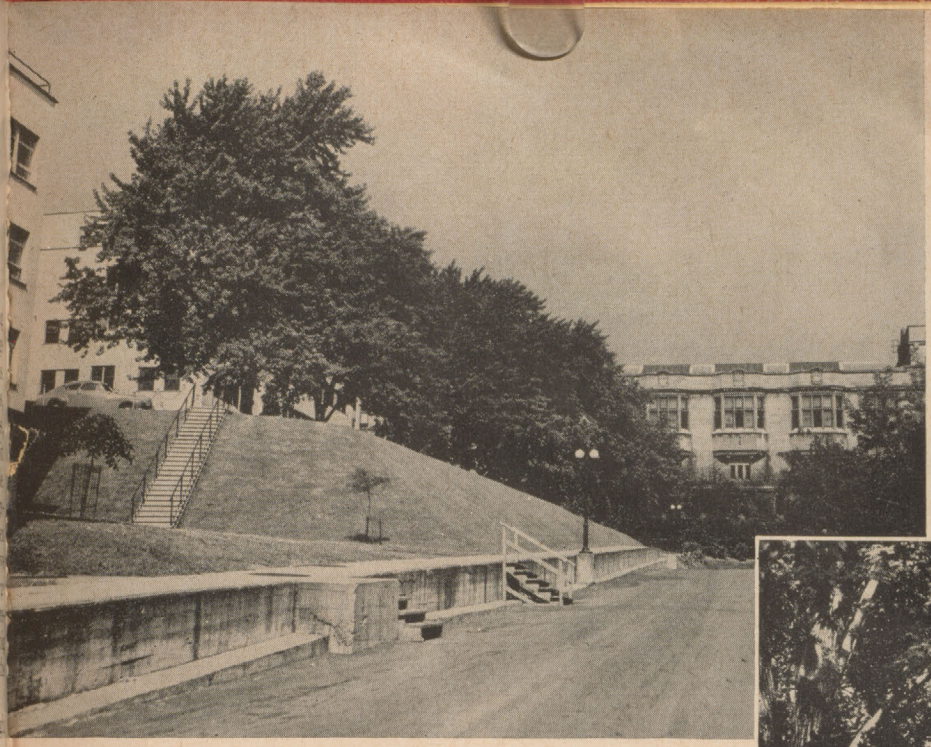

But the campus is more than trees. It is a shady oasis in a big city whose grass is the delight of the lazy, of lunchers and, sometimes, of lovers. The lazy use it for short-cuts, forcing us to re-turf considerable areas each year and — as a last resort — to erect fences at strategic spots. The lunchers, as you have guessed, leave their litter.

A recent letter in French from an indignant visitor who had watched us burning leaves in the fall, described us (I use the editorial plural) as "un ignorant" and told us to let them rot where they fall — thus returning to the soil the materials locked up in them. To leave them on the campus is impracticable but we plan to do better: they are to be composted behind the stadium and returned as "top dressing" to the impoverished turf.

The returning graduate of some years back will see changes on the campus. The old Conservatorium is no more. In its place is a level stretch

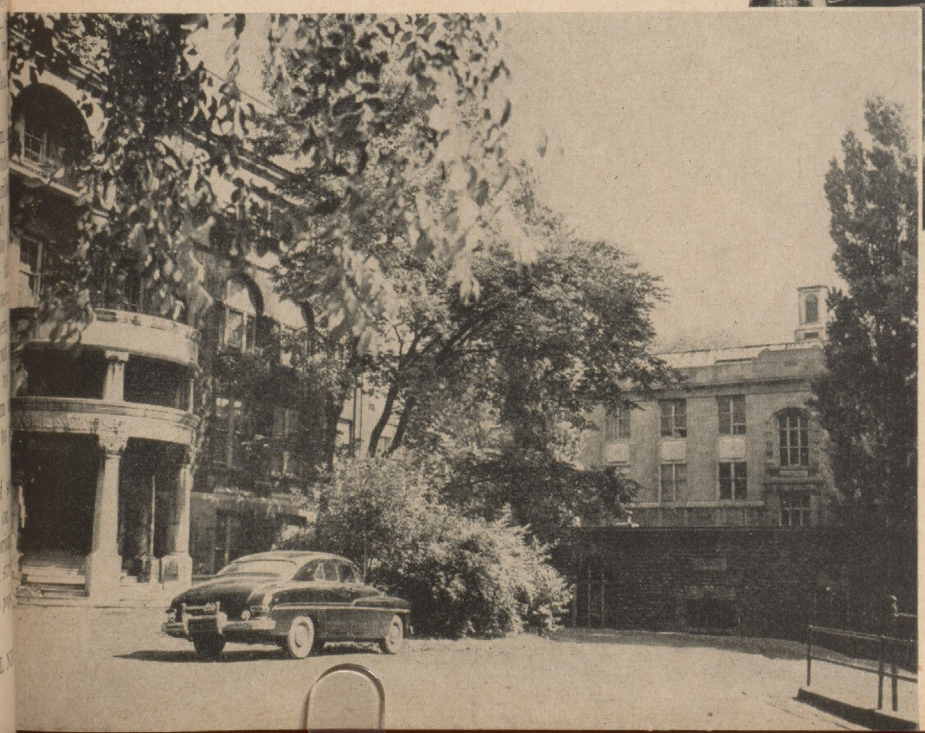

(*Continued on page 26*)

R. Darnley Gibbs, Ph.D. (London), M.Sc., is associate professor of botany at McGill and is the university gardenmaster.

GRADUATES' WALK, *mentioned in Professor Gibbs' article, extended from the Founder's Tree to the Sherbrooke Street gate so that it is roughly the road today in front of the Chemistry and Physics buildings. The centre shot of this road shows that, although it has been encroached on by the 20th century, it is still as lovely as it was when it was first named. Top picture shows the road to the Medical building which Professor Gibbs suggests might be named Osler Way and bottom picture is the little concourse in front of the Physics building which the author would have called Rutherford Circle.*

THE RODDICK GATES *in their stately sylvan setting are a noble introduction to a campus stroll.*

THE WEEPING WILLOW *between the Arts Building and the Redpath Museum lost a third of its roots when the tunnel leading to the library was dug but it still flourishes.*

OPPOSITE *the Engineering Building is the Spindle Tree, introduced to the campus more than 50 years ago. This lovely little tree is at its best when it flowers in the autumn.*

YOU CAN HELP!

Each year, tourists from the United States come to Canada by the million. They enjoy the pleasure spots of our country and, if made welcome, they will return, time after time. These visits help us by increasing trade . . . and each tourist dollar is shared by the whole community. It is in every person's interest to support Canada's tourist industry . . . to make our visitors want to come back!

of thin but improving grass which gives a good view of R.V.C. and provides a suitable site for a bed of magnolias. If all goes well — and eight out of nine of the plants, a very fair average, have survived their first winter — we shall have a fine group of *Magnolia stellata* and *M. Soulangeana* to brighten that corner. The former, which hails from China, has large star-like flowers of purest white; the latter, a hybrid, has larger flowers flushed with rosy purple. They are related to the tulip tree.

The new library is bringing further changes. It will cover much of the old tennis courts on McTavish street but it will also make possible a nice bit of grass between itself and the old McCord Museum. The four little Ginkgo trees already flourishing there will provide light shade in the afternoons. Will they also provide a mate for the female Ginkgo which guards the tomb of the Founder? These trees are dioecious and pollen from the male must be carried by the wind to the female tree to ensure viable seed. As yet the four younger trees have produced no flowers and the old female has borne only sterile seeds. An attempt at what might almost be called artificial insemination, when the writer brought in pollen from a male Ginkgo at Macdonald and "shooed" it at the female, proved abortive. There are some (shall I call them Philistines?) who would remove our lovely Ginkgo to "improve" the view of the Arts Building. Many of us prefer the Ginkgo!

"Thirty years ago", continues Professor Derick in her article in *The News*, "Professor Penhallow, who had been a professor of botany in Japan, received from that country a specimen of the Ginkgo or Spindle tree. It showed few signs of life but was planted in front of the Founder's Tomb. It has now developed into the fine tree which lifts whorls of graceful branches before the entrance to the Arts Building.

"*Ginkgo biloba* is the only modern species of an ancient group which was abundant in Mesozoic times. Once it was thought to be more nearly related to the yews than to other Gymnosperms, but close study of the genus has led to its separation from the Coniferales and the establishment of the order Ginkgoales

which include fossil species as well as the modern.

"The modern Ginkgo is supposed to have been indigenous to China where travellers have reported finding very old trees growing wild. Now it is found only under cultivation. In China and Japan it is considered a sacred tree and is planted near temples as well as in gardens. Probably, as Dean Ira Mackay has suggested, the form of the pagoda was an imitation of the pyramidal form of the tree, whose branches grow in gradually diminishing whorls about the central trunk.

"In 1712, Kaempher published a drawing of a Japanese tree under the name of Ginkgo and, in 1771, it was described by Linnaeus, who gave it its name *Ginkgo biloba* because its leaves have a deep central notch. Soon the Ginkgo became a favourite ornamental tree in both Europe and America.

"Even before our present specimen was obtained", continues Professor Derick, "Sir William Dawson, who, as paleo-botanist, was especially interested in the ancient stock, obtained a specimen from a nursery in the United States. Other young trees were given by Mr. Charles Gibb. None of these survives.

"The Ginkgo often reaches a height of ninety or one hundred feet. It has bark of a soft gray and glossy leaves which turn a pale yellow in the autumn. The leaves bear some resemblance to the leaflets of certain species of the maidenhair fern, hence the popular English name of the Maidenhair tree. The pulp of the seed is unpleasant to the taste and of no value, but the kernel is much liked by Orientals."

It is not too easy to describe locations on the campus, for few of them have official names, and the writer has suggested elsewhere that the main roads, paths and lawns should be given appropriate titles and discreetly labelled. An obvious one would be Graduates' Walk for the road just west of the Chemistry and Physics Buildings — though it does not coincide exactly with the original avenue of that name. Similarly the space with its bed of shrubbery at the entrance to the Physics Building might be Rutherford Circle and the road to the Medical Building called Osler Way!

"I couldn't do it to a friend!"

—Doctor diagnoses his estate problem

"I thought too much of my best friend to make him executor of my estate, and saddle him with a lot of worries. It wouldn't have been fair to my family either. How much did he know about succession duties, taxation, finance, managing real estate, handling securities? And then there was always the possibility of his illness, absence or death. So, I have appointed the Montreal Trust and now I have peace of mind. I know that they are experienced in estate management. I know that they will be on the job *all* the time."

Graduates' Society Reports Steady Growth

The annual meeting of the McGill Graduates' Society was held on Wednesday, June 18, in the ballroom of the Faculty Club, an hour and place which seemed popular as the turnout was excellent. Retiring Presiden J. A. deLalanne called the meeting to order and welcomed the graduates to what is believed to be the 97th Annual Meeting. A special word of welcome was extended to George R. Lighthall, B.C.L. '82, the senior graduate present.

Mr. deLalanne reviewed the Society's activities during the past 12 months and noted the steady growth in members and support for the University. He said in part:

"When I spoke to you last year I referred to the rapid growth of the Society in both numbers of branches and in general membership, to the large number of class reunions and revival in interest generally.

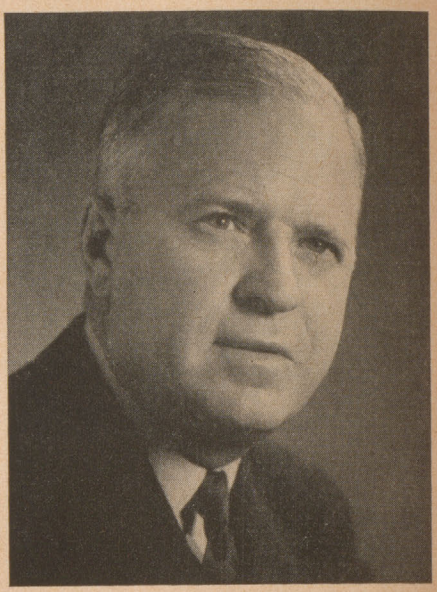

"I also drew attention to the financial situation which was the other side of the picture. I regret to say that this has not improved during the past year and it has now been definitely proven that the Society cannot continue its present activities with a fee as low as $5.00 per year (less the allowance to branches) if we are to charge the general accounts of the Society with the present proportion of salaries and expenses now treated as "other than Alma Mater Fund".

"Three alternatives are open to us:

1. Leave the accounts as they now stand with separate budgets for the Society and for the Alma Mater Fund.
2. Carry both parts under a University budget or budgets.
3. Receive from the University either a fixed sum per member or a fixed number of dollars per annum within which the Society would control its own budgets for both the Alma Mater Fund and the other Society projects.

"Members of the Board of Directors and past officers of the Society consider it most important that the Society maintain its identity and control of its own affairs.

"I might mention here that the deficit shown for the Society for the past year is unusually large as a result of the deterring until the autumn of several of the branch clean-up campaigns which were slated for the spring of 1952.

T. R. McLAGAN, O.B.E., B.Sc. '23, president of Canada Steamship Lines, has been appointed a governor of the university to fill the vacancy created by the resignation of John C. Newman. A native of Montreal, the new governor is a veteran of World War I and a vigorous leader in Canadian industry and director of many companies.

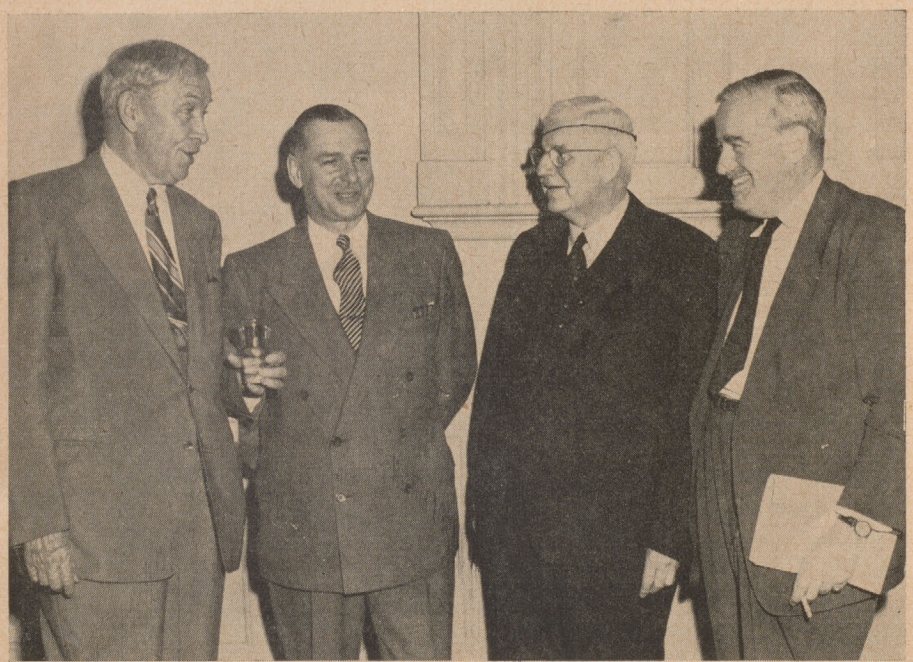

"This is one of the factors which makes it difficult to regulate any even flow of revenues for the Society under the existing arrangement.

"Your Directors are also convinced that the present system of endeavouring to allocate expenses as between "Graduates' Society" and "Alma Mater Fund" is unrealistic.

"For these and other relevant reasons the third alternative is favoured and further studies as to the minimum amount with which the Society can operate efficiently are now being made by the Honorary Treasurer and the General Secretary.

"In the meantime, the Governors have approved a maximum figure for our combined expenses for the year 1952-53 pending the completion of these studies.

"Further, as part of a reorganization of our financial position, it is hoped that the Governors will agree to write off the advances to the Society in excess of the agreed proportion of Alma Mater Fund contributions, viz. $34,673.24 upon the assigning to the University of our investment securities which had a market value of $9,946.00 at 31 May 1952."

GRADUATES ARE HONOURED: *Three McGill men, Charles E. Fraser, B.A.Sc. '99, of New York, Dr. J. J. O'Neill, B.Sc. '09, M.Sc. '10 and Dr. John T. Williamson, B.A. '28, M.Sc. '30, Ph.D. '33, were given honorary memberships in the McGill Graduates' Society at its annual meeting. Shown left to right are: C. E. Fraser, J. A. deLalanne, B.A. '19, retiring president, and Shirley Dixon, Q.C., B.A. '11, B.C.L. '14, newly-elected president of the society.*

Five Scholarships Given by Alumnae

Names of the winners of the five scholarships offered by the Alumnae Society were announced in June by Mrs. W. D. H. Buchanan, chairman of the scholarship committee. The awards were made to the following:

Miss Ruth Taylor, entering fourth year, the Susan Cameron Vaughan Scholarship.

Miss Barbara Bain, entering fourth year, the Ethel Hurlbatt Scholarship.

Miss Mary Szwarc, entering second year, the Georgina Hunter Scholarship.

Miss Adele Oxley, entering fifth year Architecture, the Helen R. Y. Reid Scholarship.

Miss Pearl Arshawsky, entering second year Medicine, the Carrie M. Derick Scholarship.

In the 21 years since the committee was founded, 46 scholarships have been awarded as well as 138 bursaries and loans as the need arises. The total amount awarded in this time is $13,595. The scholarships are open to women students in any year or faculty.

Noted Three . . .

(*Continued from page 9*)

son, new Dean of the Faculty of Engineering who presented Prof. O'Neill at Convocation. "As an authority on the far north, with first-hand knowledge of life in those regions, and a past chairman of the Arctic Institute of North America, he has been active in calling the attention of the Government and of the people of Canada to the great opportunities that lie in our undeveloped northland and to the continuing need for scientific assessment of our resources. A friendly man, a model colleague, and a delightful host, he takes with him in his forthcoming retirement our very best wishes."

At 27 years of age Prof. O'Neill was geologist with the Canadian Arctic Expedition 1913-1918, under the leadership of Vilhjalmur Stefansson, an expedition fraught with tragedy (several members perished when its largest vessel, the Karluk, was crushed in the ice) and the difficulties of travel and communication in a region that was then comparatively isolated from the rest of Canada. He had obtained a B.Sc. in mining at McGill in 1909, an M.Sc. in geology at McGill in 1910 and a Ph.D. in structural geology and petrography at Yale in 1912.

Prof. O'Neill then served as a geologist in India for the Whitehall Petroleum Corporation of London, England. In 1921 he joined the McGill faculty as assistant professor of geology, being made associate professor in 1927. Then in 1929 he became head of the Department of Geology. From 1935 to 1939 he was Dean of Science. From 1938 to 1942 he was Dean of Graduate Studies and Research. In the latter year he was appointed Dean of the Faculty of Engineering.

Prof. O'Neill underwent a serious eye operation and was released from hospital just a few days before Convocation last May. Those who know him well realized that his presence at Convocation was in keeping with his character — "to see a job through to the end."

No Titles Claimed in Senior Football

by D. A. L. MacDonald

This autumn no one seems prepared to claim the senior football championship for McGill before the season opens. This is a refreshing approach and a sobering thought as well, inspired no doubt by what happened in the playoff the last two seasons. There will be no playoff this year and likely no championship for McGill either. But the attitude that we can have entertaining football without the world coming to an end if the senior team loses is what we would like to think represents the sentiments of most of the graduate body.

The senior team has lost a great deal of talent through graduation and other defections. Gone are such players as 1951 Captain Dave Caldwell, Bob MacLellan, George Bossey, Dawson Tilley, Haskell Blauer, Frank Creaghan, Baldy Tomlinson, Bill Pullar, Jim Mitchener, Hank Sliwka, George Klein and Lionel Quinn.

The absence of all these players, a whole team in itself, is a sore blow to Coach Vic Obeck but we think a good representative side can be put on the field. It is early to pick a starting lineup but, when McGill opens its intercollegiate season at Toronto Oct. 4, the probable starting lineup will be something like this: John McGill, at centre; Don Kepron and Vince Capogreco at guard; Lionel Whitman and Wally Kowal at tackle and Jack Miller and Bob McAllister at end with the backfield composed of Captain Geoff Crain, quarter; Len Shaw, left back; Fred Wilmott, fullback; Don Menard, right back, and Harry Biewald, flying wing.

There has been some speculation as to why Jim Mitchener and Baldy Tomlinson signed with Alouettes. The answer is simply that they can use the money (as who can't) in financing themselves through college. They have received permission to play professional football from the authorities, just as others have in the past; Joey Pal, Glen Douglas and Johnny Hammond to name three.

Bring back the old-fashioned scrimmage. There are no less than four budding dentists in the forward pack around centre man John McGill, Frank's son. We can't help thinking that a dentist would be just the ideal man to have in one of those scrums that used to tug and pull at each other to get the ball heeled out. The "dents" are Don Kepron, who led his class last year in third year; Vince Capogreco and Wally Kowal, entering third year and Lionel Whitman who goes into first year. Harold Biewald is the fifth member of the dental brigade on the senior team, which must be something of a record for this faculty.

Apart from the schedule games,

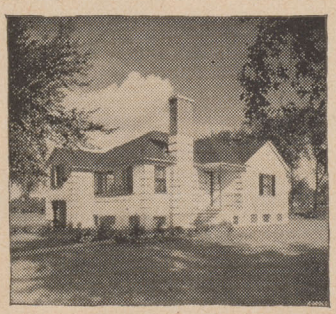

Senior Intercollegiate Football Schedule

Sept. 20—McGill at McMaster
Sept. 27—McMaster at Toronto
Loyola at McGill (Exhibition)

CONCRETE

FOR WHATEVER YOU PLAN TO BUILD

You'll always get full value in concrete. Moderate first cost and low over-the-years maintenance. Permanence, too, and assured fire safety. An ideal construction material for homes, hospitals, schools, highways and bridges—for any and every building project.

HOUSE AT HAMPSTEAD, P.Q. Concrete is suited to home construction of every type and size.

BRIDGE OVER KESWICK RIVER, YORK COUNTY, N.B. Concrete bridges are economical to construct and maintain.

The Canadian leaders in the field of electric motor repairs.

276 SHANNON ST., MONTREAL

there are two contests which should command interest. One is the exhibition with Loyola College Sept. 27, allowing unlimited interference but retaining all other features of the Canadian code. It could be that this is the type of football which will eventually be adopted.

This year the senior college union welcomes McMaster of Hamilton as a playing member though the games will count only as exhibitions. It was mainly through the efforts of McGill that McMaster was accepted into the senior union and so a particularly warm welcome awaits them on Nov. 1.

As for picking the eventual winner of the senior union before the season starts, we cannot do better than put the hex on University of Toronto by choosing them to win the Yates Cup. They will probably do so anyway, inasmuch as they have retained most of their best players from the 1951 championship squad and, to all accounts, both Western and Queen's have been hit as heavily as McGill through graduation of players. See you at the buffet luncheons.

THOMAS L. CHOWN, *B.Comm. '42, is the new president of the McGill Touchdown Club, the graduate organization which has given the senior football team such superb support in the past. The club, which has already signed up more than 300 members and expects a roll call of 1,000, will hold its weekly sessions, featuring movies of all McGill games, again this autumn.*

McGill C.O.T.C. Marks 40th Anniversary

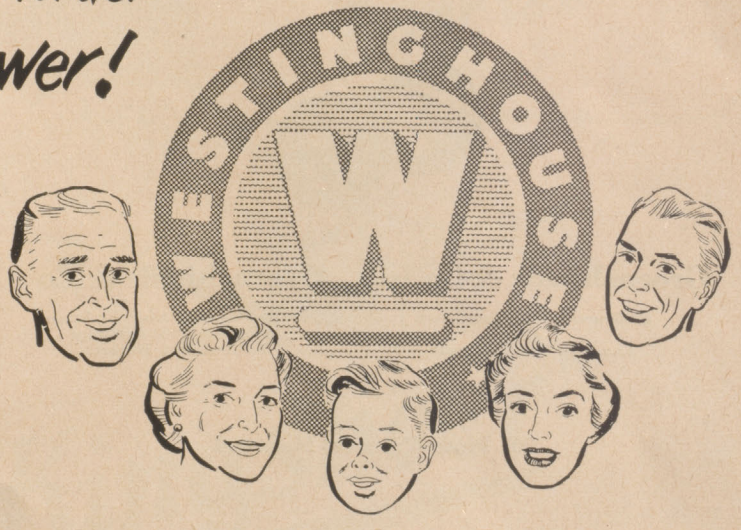

The McGill University Contingent (148th Battalion C.E.F.) Canadian Officers' Training Corps will parade to the Percival Molson Memorial Stadium on Nov. 1 as part of the programme of events to celebrate its 40th anniversary.

A remarkable example of service to King and Country and to the University is to be found in the record of the contingent during these 40 years, which includes two world wars.

Another event will be a great "Fortieth Anniversary Dinner", open to all present and past members of the C.O.T.C., when a very large attendance is expected. It has not been decided yet whether to hold the dinner in the autumn or next spring, but those counting on being present should send their names and addresses to the contingent.

Everybody in Canada Depends on Power!

The child in school . . . the mother in the home . . . the farmer in his barn . . . the worker at his bench . . . everyone shares in the great benefits of cheap and plentiful electric power and the modern equipment to put it to work. Over half of that power comes from generators built by Canadian Westinghouse, producers of electrical equipment for every purpose . . . in farm and factory . . . home and industry.

YOU CAN BE SURE IF IT'S

Westinghouse

VALVES, FITTINGS AND PIPING

Plumbing and Heating Equipment

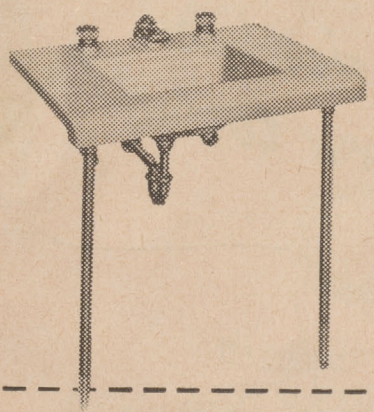

for every industry and every home

from ONE COMPLETE LINE CRANE

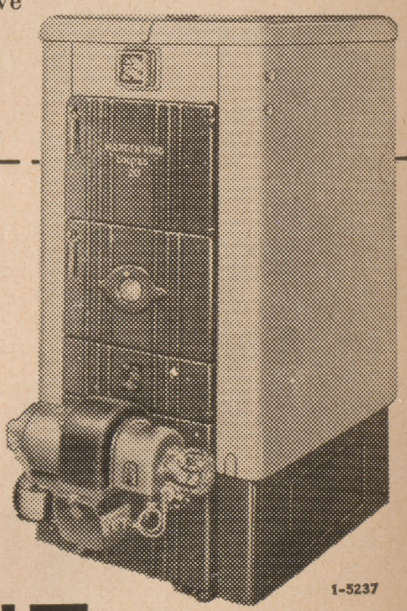

Here's a grand rule of thumb to follow: if it's anything in piping, plumbing or heating equipment, count on CRANE.

An unequalled selection of **VALVES AND FITTINGS** is offered for your selection in the complete Crane line—for every power, process or general service need. Crane brass, iron, steel and alloy piping materials are recognized for durable and dependable performance. Crane Quality means long service life . . . less maintenance . . . low ultimate cost.

In **PLUMBING FIXTURES,** as with valves and fittings, the name CRANE is synonymous with finest quality—in beauty of design, durability and convenience features. Bathtubs and lavatories, toilets and urinals, kitchen sinks and laundry tubs . . . all are available in a wide choice of styles, materials and prices. Many of these fixtures are available in eight attractive colours as well as white.

In **HEATING,** too, you can depend on Crane to meet the specific need—a hot water or steam boiler of the right type and capacity—hot water heaters—standard or concealed radiators, or radiant baseboard panels. Whether it be for home or apartment, for school, church or store, there is a Crane installation to assure dependable heating service.

Descriptive literature on any phase of Crane Service gladly supplied. Ask any Plumbing and Heating Contractor or Crane Branch—or write direct to Crane Limited, 1170 Beaver Hall Square, Montreal.

educational administration in Canadian towns and rural areas.

Bruce D. Storrs, M.D. '40, was one of 73 public health specialists who received degrees from the Harvard School of Public Health in June. He is a major in the Army Medical Corps and is now at Ft. Jackson, South Carolina.

'41

E. L. Jones, B.Eng. '41, has been appointed secretary-treasurer of George Weston Ltd. He is also secretary-treasurer and director of Weston Biscuit Co. Inc., Passaic, N.J.

'42

E. A. Stuart Reid, B.A. '38, M.D. '42, has been granted a Life Insurance Medical Fellowship. This is a renewal of the $4,500 fellowship he held last year and will enable him to continue research on therapy congestive heart failures.

Mrs. Joan Storey, B.A. '42, has been elected president of the Canadian Association of Women Voters.

'43

Ernest Stabler, M.A. '43, has been appointed professor of education at Wesleyan University, Middletown, Conn.

'44

J. G. Leach, B.Eng. '44, has been appointed senior technologist of the Shell Oil Company to assist in the process department, manufacturing, at the company's head office in Toronto.

'46

Sylvia Van Straten, B.Sc. '46, Ph.D. '50, has received the Alumni Achievement Award of Sigma Delta Tau National Sorority. The award was given because of her outstanding service in the fields of chemistry, and she is the first Canadian to be honoured with this award. She is in charge of the chromatography division of the Research Institute of Montreal.

'49

B. L. Funt, Ph.D. '49, has been elected president of the Manitoba section, Chemical Institute of Canada. He is professor of chemistry at the University of Manitoba.

Andre E. Gadbois, B.C.L. '49, has been appointed assistant secretary of Gatineau Power Co.

W. Gordon Kearns, B.A. '49, has been awarded the scholarship of the Canadian Inter-American Association and has left for Mexico to take up his studies at the University of Mexico.

George C. Noble, B.L.S. '49, is now director of Public Library Service for Manitoba. He is the first director of library services for the province.

Rev. T. Desmond Rowe, B.A. '49, has left Montreal to serve as a missionary at North Star, Alta., in the diocese of Athabaska. He was ordained a deacon by Bishop Dixon of Montreal in May.

Gordon S. Trick, B.Sc. '49, has been awarded a Post Doctorate Overseas Fellowship by the National Research Council for the academic year 1952-53. He will study in London, England.

***CLEM ANSON,** B.Sc. '25, of Sydney N.S., was present at the spring convocation to see his daughter, Josephine Claire, receive her degree in physiotherapy.*

'50

Pete Robinson, B.Sc. '50, wired Vic Obeck on the birth of a son, Peter Price, on Aug. 6: "Have a new halfback for you. Save No. 95 for him."

Morris Sabin, B.Sc. '45, M.Sc. '46, M.D. '50, has been granted a Life Insurance Medical Fellowship by the Canadian Life Insurance Officers' Association.

'51

Spyridon G. A. Alivisatos, M.Sc. '49, Ph.D. '51, has been awarded a Merck Post Doctoral Fellowship in the natural sciences to study enzyme systems at Bellevue Medical Centre, New York City.

He's cutting down the cost of your new suit

Viscose rayon, a product of the Canadian forests, with its amazing versatility, its superior performance and its outstanding value is putting a check on the rising cost of living. Using viscose rayon alone or blended with wool or other fibres, Canadian textile mills are producing a wide range of excellent fabrics . . . fabrics which now make it possible for a man to buy a good suit **at a price he can afford to pay!** The new rayon and rayon/wool suits represent far and away the best value today. Consider these facts: Because of viscose rayon, colours are richer. Patterns are smarter. Wearability is increased. And, with all these advantages, prices are lower. Ask your clothier about these fine new suits. He knows fabrics . . . you can depend on his good judgment.

Shipley-Turnau: In Montreal, on June 12, 1952, Miss Vivian Helen Turnau, B.Sc./-H.Ec. '48, and William Charlton Shipley, B.Sc./Agr. '48.

Smith: In Westport, Conn., on April 5, 1952, Miss Lorraine Fillmore Tweedell and David Bruce Smith, B.Eng. '49.

Smith: In Montreal, on June 7, 1952, Miss Shelagh Wheeler and Eric Smith, M.D. '49.

Steele: In Montreal, on June 18, 1952, Miss Margery Bertha Leslie and John Ross Steele, B.Sc./Agr. '52.

Stobie: In Toronto, on June 7, 1952, Miss Beth Allan Francis and George Hugh Cameron Stobie, B.Sc. '48, M.D. '50.

Stratford: In Montreal, on July 19, 1952, Miss Aurelie Isabel Forbes and Joseph Graham Stratford, B.Sc. '45, M.D. '47, M.Sc. '51

Summerby: In Saint John, N.B., on July 5, 1952, Miss Marion Norine Wilson and Robert William Summerby, B.A. '48.

Summers: In Montreal, on July 5, 1952, Miss Anne Kathleen Mahoney and Frederick William Summers, B.Com. '37.

Tawse: In Montreal, recently, Miss Joyce Hilda Morgan and William John Tawse, B.Com. '49.

Taylor: In Montreal, on June 7, 1952, Miss Dorothy Taylor, B.A. '49, and Donald C. Beckett.

Taylor: In Ormstown, Que., recently, Miss Ann Louise Page and John Leslie Taylor, B.Sc. '47, M.D. '49.

Turnbull: In Montreal, on June 19, 1952, Miss Dorothy Kathleen Turnbull, B.Sc. '51, and Valmore Sandbach Bradley.

Tyler: In Montreal, on June 9, 1952, Miss Indira Martha de Boissiere and Peter Jeffrey Tyler, B.Eng. '50.

Walter: In Montreal, on June 19, 1952, Miss Anna Isabel Lyons and Edward Percy Walter, M.D. '50.

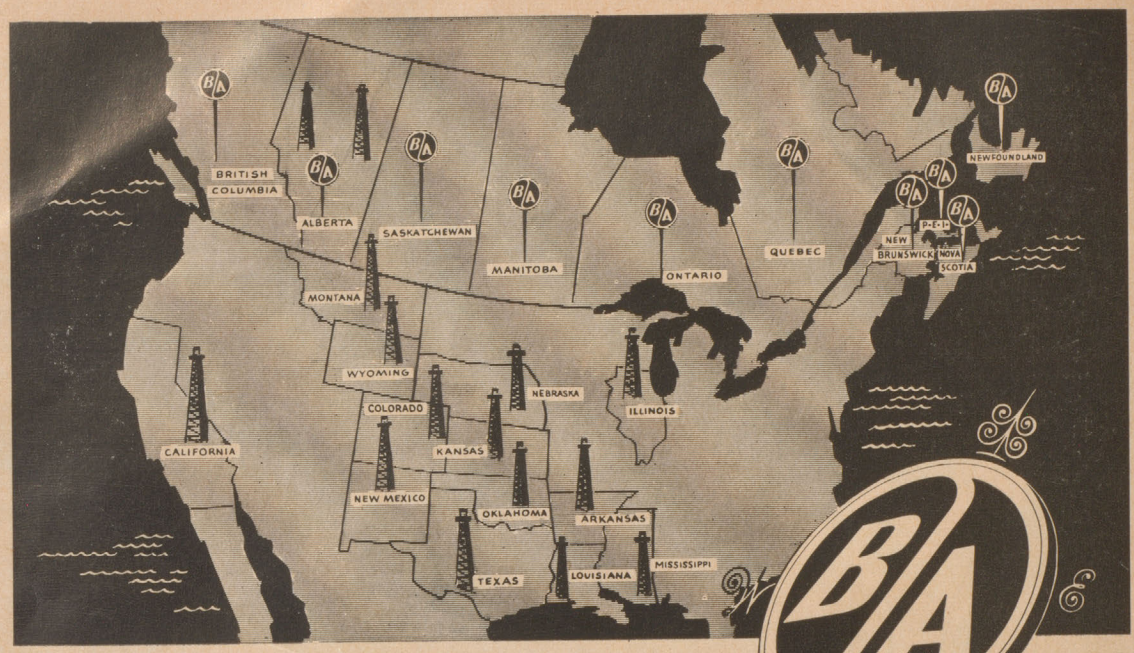

Walsh: In Montreal, recently, Miss Pauline Douglas Donald, and Frederic Norman Walsh, B.Eng. '50.

Weintraub: In Montreal, recently, Miss Clarice Helene Weintraub, B.A. '52, and Irving Saul Krakower.

Wight: In Montreal, on June 6, 1952, Miss Jessie Adams Smith and John Bethune Wight, B.Com. '47.

Winters: In Ottawa, on July 19, 1952, Miss Margot McDonald Winters, B.Sc./H. Ec. '51, and Eric Bryson Toller.

Worden: In Montreal, on July 26, 1952, Miss Beverley Jean Woodburn and Robert Thackray Worden, B.Eng. '51.

In Ten Provinces
In Thirteen States

In an area extending through thirteen of the United States B-A has built up substantial crude oil and gas reserves. This successful venture in the major U. S. oil fields has contributed greatly to the achievement of B-A's original objective . . . providing for B-A refineries in Canada a profitable and long-term source of crude oil.

In Canada's ten provinces, B-A is concentrating on the improvement of its whole net-work of facilities . . . development of Canadian crude reserves — increased refining capacity — improved marketing outlets and distribution — more economical transportation. The objective is three-fold: highest quality products — better service — fair returns for shareholders.

THE BRITISH AMERICAN OIL COMPANY LIMITED

The Largest Oil Company ***Owned By Canadians***

Births

Alexander: In Montreal, on June 3, 1952, to John A. Alexander, B.Eng. '38, and Mrs. Alexander, a son.

Beaubien: In Montreal, on April 20, 1952, to Jacques Beaubien, M.D. '40, B.Sc. '40, Dip.Med. '49, and Mrs. Beaubien (Miriam F. Miller, M.D. '41), a daughter, Elizabeth Gabrielle.

Bliss: In Montreal, on June 14, 1952, to Frederic M. Bliss, B.A. '50, and Mrs. Bliss, a daughter.

Bourke: In Montreal, on May 5, 1952, to Douglas T. Bourke, B.Eng. '49, and Mrs. Bourke (Sheila Ramsay, B.A. '49), a son.

Boyle: In Kingston, Ont., on May 21, 1952, to W. S. Boyle, B.Sc. '47, M.Sc. '48, Ph.D. '50, and Mrs. Boyle, a son.

Bradford: In Granton, Ont., on July 21, 1951, to Russel Carman Bradford, B.Sc./-Agr, '46, and Mrs. Bradford, a son.

Brian: In Montreal, on June 12, 1952, to Joseph M. Brian and Mrs. Brian (Ruth Elizabeth Schofield, Phys.Ed. '39), twins, Susan and Blair.

Briggs: In Montreal, on May 12, 1952, to Albert C. Briggs, B.Com. '42, and Mrs. Briggs, a daughter.

Bujwid: In Montreal, on June 4, 1952, to Alex O. Bujwid, B.Sc. '49, and Mrs. Bujwid, a daughter.

Cavan: In Toronto, on June 8, 1952, to A. Cavan and Mrs. Cavan (Joyce Heslam, B.Sc./H.Ec. '45), a daughter.

Chown: In Montreal, on June 1, 1952, to Thomas L. Chown, B.Com. '42, and Mrs. Chown (Beryl M. Ford, B.A. '44), a son.

Cox: In Geneva, Switzerland, on June 5, 1952, to Robert Warburton Cox, B.A. '46, M.A. '49, and Mrs. Cox (Jessie Gunn, B.A. '44, B.L.S. '45), a daughter.

Douglas: In Sarnia, Ont., on May 4, 1952, to J. H. Douglas, B.Eng. '46, and Mrs. Douglas (Joan Mary Dever, Physio. '46), a son.

Eastham: In London, Eng., on May 31, 1952, to Arthur Eastham, Ph.D. '43, and Mrs. Eastham, a daughter.

Eaton: In Three Rivers, Que., on May 27, 1952, to Kenneth Eaton, B.Eng. '49, and Mrs. Eaton, a daughter, Joan Elizabeth.

Finn: In Montreal, on April 19, 1952, to John R. Finn, B.Eng. '48, and Mrs. Finn, a daughter.

Fitch: In Shawinigan Falls, Que., on April 24, 1952, to Joshua Fitch, B.Sc. '46, and Mrs. Fitch, a son.

Fletcher: In Montreal, on May 10, 1952, to Russell Fletcher and Mrs. Fletcher (Betty McAuslane, Arts '47), a son.

Grant: In Ormstown, Que., on May 21, 1952, to R. Y. Grant, B.Sc./Agr. '46, and Mrs. Grant (Margaret Laurie, B.H.S. '46), a daughter.

Harpur: In Pointe Claire, Que., on May 3, 1952, to R. P. Harpur and Mrs. Harpur (Eleanor Mackenzie, M.D. '39), a son.

Harvey: In Montreal, on May 24, 1952, to R. F. Harvey, D.D.S. '41, and Mrs. Harvey, a daughter.

Hastings: In Grand' Mere, Que., on June 14, 1952, to T. Roy Hastings, B.A. '46, and Mrs. Hastings, a son.

Henderson: In Montreal, on April 19, 1952, to Samuel M. Henderson, B.Sc. '48, and Mrs. Henderson, a son.

Heppner: In Montreal, on May 15, 1952 to J. A. Lyone Heppner and Mrs. Heppner (Dorothy Finestone, B.Sc. '47), a son.

Heward: In Montreal, on May 27, 1952, to C. Denys Heward and Mrs. Heward (Barbara L. Tims, B.A. '36), a daughter.

Hobart: In London, Ont., on June 5, 1952, to George M. Hobart, jr., and Mrs. Hobart (June Walker, B.A. '51), a daughter.

Hugessen: In Montreal, on May 21, 1952, to Edward K. Hugessen, B.C.L. '50, and Mrs. Hugessen, a daughter.

Jenkins: In Montreal, on May 19, 1952, to Kenneth Jenkins, B.Sc./Agr. '51, and Mrs. Jenkins, a son.

Kavanagh: In Montreal, on May 23, 1952, to H. Gordon Kavanagh, B.Com. '47, and Mrs. Kavanagh, a son.

Kelen: In Rochester, Minn., on June 8, 1952, to Andrew Kelen, B.Sc. '41, M.D. '43, M.Sc. '48, and Dr. Marian Kelen (Marian Francis, B.Sc. '42, M.A. '45), a daughter.

Kenny: In Montreal, on May 22, 1952, to Robert A. Kenny, B.Eng. '39, and Mrs. Kenny (Evelyn C. S. Carroll, Arts '42), a daughter.

SERVING CANADIANS THROUGH ENGINEERING

Because we build paper machinery...

. . . Canadian paper mills can produce more and better paper of every quality and at lower cost.

This means that there is paper in ample supply for your newspapers, books, magazines,—for bags, wrapping . . . for your every paper need. In business, paper is a prime essential . . . and as an export it enriches every Canadian.

Thus in serving the Canadian paper industry well, Canadian Vickers serves the people of Canada well.

Machinery to increase production, equipment to lower costs . . . fighting ships to defend our shores or cargo ships to carry Canadian produce . . . Canadians confidently look to Canadian Vickers for fine engineering and expert craftsmanship.

McGill Birthday . . .

(Continued from page 11)

and awkward questions about legal continuity evaded.

Since the Royal Institution could scarcely visit itself, that arduous task was delegated to the Governor-General, who became visitor. The visitor possessed the power of disallowing appointments to, or statutes of, the University within a limited period. This replaced the older procedure, referred to above, of submitting these subjects to Britain. The framing of statutes was the exclusive prerogative of the new board of governors, and on this supremely important subject, the amended charter was commendably explicit: ". . . Statutes, Rules and Ordinances . . . [shall be] made by the Governors, [and] the revoking, augmenting or altering of any Statute . . . shall have full force and effect . . ."

If anyone could have been made happy, it was the new board of governors. They were endowed with immense authority in making regulations, and almost complete freedom in the interpretation of them. The supervision exercised by the visitor was purely formal, since the Governor-General had quite enough to do without inquiring into the running of McGill University. Moreover, his powers were entirely negative, a suspensory veto within sixty days. What that meant was made clear when the governors submitted their first statutes, "for the approval of His Excellency." In acknowledgment, the provincial secretary noted that they were accepted, "not for approval but subject to disallowance within the number of days specified . . ." A more striking indication of the elevation of the governors was the depression of other members of the university community. The Principal suffered a demotion. Once upon a time he had been a governor, now he was just another professor, like them holding his appointment ". . . during their [the governors'] pleasure only . . ."

The new governors bent to their task with vigour. They met for the first time in September 1852 in the Court House of Montreal, under the eye of Mr. Justice Day. He signed himself as "President," the modern term Chancellor not being adopted till 1864. Five months later an important organizational advance was made in the creation of a finance

committee, under the chairmanship of James Ferrier. Until 1852, he had been president of the Royal Institution, and his selection as the head of the oldest committee of the board of governors points to the decisive place it occupied.

A pressing duty confronting the governors was the choice of a principal. Canon Leach, the acting principal, might have had the job but he declined. Daniel Wilson, the future president of the University of Toronto, was approached but decided otherwise in a letter of surpassing tact: ". . . I beg to decline it. The success I have already met with here exceeds my expectations, while my plans have been only partially developed . . ."

Finally, a young Nova Scotian, answering to the name of John William Dawson, accepted the principalship, thus beginning a connection destined to last almost forty years. It was a wise and happy choice, for Dawson was prepared to carry out conscientiously the views of what he called with nice discrimination "the educated and business men" who formed the governors.

At the beginning of their second decade, the governors scored their most decisive victory. They petitioned parliament for amendments to the venerable act which had created the Royal Institution. Their prayer was granted, and a new statute, 26 Vict. cap. 6, gave them the supreme advantage of being able to appoint their successors. In the spring of 1864, new statutes were drafted, stipulating that ". . . Vacancies shall be filled by the Board [of Governors] . . ." and limiting the choice to ". . . Laymen of some Protestant denomination, . . . resident in Lower Canada . . ." Need it be added that the person who piloted the amendments through parliament and who drafted the new statutes was Christopher Dunkin ? The quest which had begun in the earliest charter amendment was at last realized.

The early 1850's produced a bumper crop of university charters. McGill and Laval received theirs in 1852. A year later, 1853, Bishop's at Lennoxville got its. At a greater distance and at slightly different dates, the University of Trinity College, Toronto, and King's College of Nova Scotia were granted charters or amendments to charters. Thus, in this *annus mirabilis* just a century ago, McGill joined a truly honourable company.

"SO MELLOW...
SO MILD...SO
THROAT-EASY!"

Buckingham combines three fine tobaccos in one cigarette. It's this combination of three fine tobaccos that makes a Buckingham so mild, so throat easy, so mellow.

YOUR

ALMA MATER FUND

IS THE

MOST EFFECTIVE WAY

TO HELP

YOUR UNIVERSITY

Let us handle your handling problems

Before we built these 75 ton ladle cranes for the new smelter of Quebec Iron & Titanium Co. Ltd., at Sorel, P.Q., we had already built over 1000 cranes in just over 50 years. This experience was of the utmost value in designing hot metal handling equipment for this extremely arduous 24-hour service.

Your handling problem may be quite different, but whatever it is, you can depend on experienced advice, modern designs and first-class workmanship when you come to Dominion Bridge.

MAIN PRODUCTS OF OUR MECHANICAL DIVISION:
Overhead Cranes... Ore and Coal Unloaders... Ore Bridges... Log Stackers... Dock Cranes... Hydraulic Regulating Equipment... Special Machinery.

Plants and offices throughout Canada.

Other Divisions:* **STRUCTURAL, PLATEWORK, BOILER, WAREHOUSE.
